"A sound treatment of the history of the British Isles from 1782 to 1901 by one of the most reputable English historians."

Recommended as Advanced by Clokie, Hoskins, Meyer; as Intermediate by Chase, Lunt, Reynolds.

Marriott, Sir John A. R. *England Since Waterloo*. (6 votes) Putnam. 1913. \$5.

"Political, constitutional, social and commercial development."

Cooperating Professors: Carl F. Brand, Stanford University; Helen D. Chase, Milwaukee-Downer College; Hugh McD. Clokie, Rutgers University; Alfred L. P. Dennis, Clark University; James E. Gillespie, Pennsylvania State College; Roy Gittinger, University of Oklahoma; Milton R. Gutsch, University of Texas; Halford L. Hoskins, Tufts College; Elizabeth F. Jackson, Agnes Scott College; William E. Lunt, Haverford College; Silas B. McKinley, Vanderbilt University; Erwin F. Meyer, University of Colorado; George F. Reynolds, Colgate University; Sherman M. Smith, Colgate University; Richard G. Wood, University of Maine.

In presenting this selected list of books on Modern British History, the World Peace Foundation aims to offer a guide to the best available material as recommended by composite expert opinion. To the end that these titles be indeed the most worth while the Foundation asked a large number of college professors teaching in the various fields relating to international affairs to recommend the best available books—elementary, intermediate and advanced—in the realm of their particular interest. All of the titles included here were recommended by three or more different professors and are arranged in the order of votes received. It is hoped that not only libraries, but study groups and individuals as well will find this list useful.

Recommended as Advanced by Clokie; as Intermediate by Chase, Gutsch, Lunt, Smith.

Walpole, Sir Spencer. *History of England, 1815-1858*. 6v. (5 votes) Longmans, Green. \$2.75 ea.

"Very entertainingly written and based upon a thorough study of the available sources."

Recommended as Advanced by Chase, Dennis, Gutsch, Lunt, Smith.

Lecky, William E. H. *History of England in the Eighteenth Century*. 8v. (4 votes) Appleton. 1878-1890.

"A keen, impartial analysis . . . based on exhaustive study of the sources. Well-balanced, well-written."

Recommended as Advanced by Brand, Gutsch, Lunt; as Intermediate by Reynolds.

Adams, George B. *Constitutional History of England* (American Historical Series). (3 votes) Holt. 1921. \$3.

"Excellent one-volume work on the development of the constitution, with particular attention to its influence on America."

Recommended as Advanced by Gutsch, Meyer; as Intermediate by Brand.

Cross, Arthur L. *Shorter History of England and Greater Britain*. (3 votes) Macmillan. 1920. \$3.90.

"An excellent one-volume reference book on English history . . ."

Recommended as Advanced by Hoskins, Meyer; as Elementary by Dennis.

Larson, Laurence M. *History of England and the British Commonwealth*. (3 votes) Holt. 1924. \$4.50.

"A very good book in every respect . . . The elements of British imperial history are given in brief compass."

Recommended as Advanced by Hoskins; as Elementary by Gutsch, Wood.

Monypenny, William F., and Buckle, George E. *Life of Benjamin Disraeli*. 6v. (3 votes) Macmillan. 1910-1920. \$6 ea.

Recommended as Advanced by Brand, Dennis, Smith.

Morley of Blackburn, Viscount (John Morley). *Life of William Ewart Gladstone*. (3 votes) Macmillan. \$6.

"Practically a history of England."

Recommended as Advanced by Brand, Dennis, Smith.

Oman, Sir Charles W. C. ed. *A History of England*. 7v. (3 votes) Putnam. 1904-1914. \$3 ea.

"The best review of English history to 1901. The one indispensable set to any study of modern Britain."

Recommended as Advanced by Gittinger, Reynolds.

Robinson, Howard. *Development of the British Empire*. (3 votes) Houghton. 1922. \$2.75.

"Clear and well-organized."

Recommended as Advanced by Chase, Meyer; as Elementary by Smith.

Robinson, Howard. *History of Great Britain*. (3 votes). Houghton. 1927. \$4.25.

"... A nicely balanced discussion of the essentials in British history."

Recommended as Advanced by Hoskins; as Elementary by Dennis, Lunt.

Walpole, Sir Spencer. *History of Twenty-five Years*. 4v. (3 votes) Longmans, Green. 1904-1908. v. 3-4. \$8.

Recommended as Advanced by Dennis, Gutsch, Lunt.

Williamson, James A. *A Short History of British Expansion*. (3 votes) Macmillan. 1922. \$10.

"... There is no better short history of English expansion."

Recommended as Advanced by Chase, Hoskins.

Wingfield-Stratford, Esmé Cecil. *History of British Civilization*. 2v. (3 votes) Harcourt Brace. 1928. \$12.

"One of the new 'humanized' histories."

Recommended as Advanced by Meyer, Wood; as Intermediate by Reynolds.

High Points of the A.L.A. Conference

Governor JOHN C. PHILLIPS of Arizona will give the address of welcome at the Grand Canyon conference program, June 21. Speakers on the program will include Doctor Keogh, President of the A. L. A., who will describe "The College Library"; Estelle Lutrell, Librarian of the University of Arizona, who will outline "Library Development in Arizona"; C. B. Lester, Chairman of the A. L. A. Committee on Library Extension, who will speak on "The State's Function in Library Service"; Effie L. Power, Director of Work with Children, Cleveland, Ohio, who will talk on "Library Service to Children in School and Out," and Julia W. Merrill, A. L. A. executive assistant, Library Extension, who will talk on "The County Library."

"The Library Movement in California" will be the subject of a full session at Los Angeles. Milton J. Ferguson, State Librarian, will speak on the county library system of California; Althea Warren, Los Angeles Public Library, will discuss the State's public libraries; Nathan van Patten, Director of Stanford University Library, will speak on college libraries; Ella S. Morgan, Lincoln High School Librarian, Los Angeles, on school libraries, and Dr. Max Farrand, Director of Research at the Huntington Library, will describe his library.

Orra E. Monnette, President of the Board of Library Commissioners, Los Angeles Public Library, will give the address of welcome at the first general session, followed by the presidential address from Doctor Keogh. There will be a reception later in the evening.

Robert G. Sproul, who will be President of the University of California after July 1, will address the third general session of the conference, followed by Levering Tyson, field representative of the American Association for Adult Education, who will speak on two new aspects of adult education—alumni and radio education.

The Newbery medal for the most distinguished children's book of the year, written by an American, will be awarded to the author in person at the fourth and last general session by Effie L. Power, Chairman of the Section for Library Work with Children. Following a brief response from the author, Ralph Munn, Director of the Carnegie Library of Pittsburgh, will speak on "The Social Significance of Library Work with Children."

Forty sections and committees will hold round table meetings to discuss rural adult education, the public library in the field of business, reading for pleasure among college students, hospital library service, the junior college library, library architecture, western books and book buying, library publicity, school library work, and related problems.

"The Mexican Immigration Problem" will be the subject of a talk by Dr. Emory Stephen Bogardus, Director of Social Welfare at the University of California, Los Angeles, before the Committee on Work with the Foreign Born.

The Detroit charging system, *THE LIBRARY JOURNAL* 54:943, will be demonstrated among the library exhibits and discussed at the small libraries round table. At the same meeting Mrs. Zulema K. Rowell of Orange, Cal., will give her opinion on "What the Public Should Expect from the Library."

The Association of American Library Schools and the Bibliographical Society of America will meet with the American Library Association.

Book News

Book Club Selections

(for June)

BOOK LEAGUE OF AMERICA

Button Hill, by Gordon Stowell. Richard R. Smith.

A saga of three generations starting with 1894 and ending at present time.

BOOK-OF-THE-MONTH CLUB

Liberty, by Everett Dean Martin. Norton.

A call to intelligent Americans to look about and observe what is happening in the world nowadays.

BUSINESS BOOK-OF-THE-MONTH

Watch Your Selling Dollar, by Archibald M. Crossley. Forbes.

CATHOLIC BOOK CLUB

Catherine de Gardeville, by Bertha Radford Sutton. Macmillan.

Catherine's struggles against her English mother's hatred of Catholicism make a story of tremendous force and vividness.

CRIME CLUB

The Other Bullet, by Nancy Barr Mavity. Crime Club, Inc.

A new Peter Piper mystery.

JUNIOR LITERARY GUILD

Little Pilgrim to Penn's Wood (boys and girls 8-12), by Edna Albert. Longmans, Green.
Witch's Maiden (girls 12-16), by Mabel L. Tyrell. Harper.

When I Was a Harvester (boys 12-16), by Robert M. Yates. Macmillan.

LITERARY GUILD

The Adams Family, by James Truslow Adams. Little, Brown.

Begins with John Adams and includes biographies of John Quincy Adams, Charles Francis Adams, and the fourth generation of Adams, John Quincy, Charles Francis, Henry and Brooks Adams.

PAPER BOOKS

The Return of the Hero, by Darrell Figgis. Paper Books, Inc.

An imaginative novel with an introduction by James Stephens.

RELIGIOUS BOOK CLUB

An Emerging Christian Faith, by Justin Wroe Nixon. Harper.

Two Book Clubs Merge

MEMBERS of Business Libraries, Incorporated, and Business Book League will be served after this by one organization, to be called the Business Book League. Through the merger of the two business book clubs the greatly increased facilities will make it possible to give better and more rapid service to members.

The Pulitzer Awards

THE PULITZER AWARDS for 1929, recently announced by the Trustees of Columbia University on the recommendation of the Advisory Board of the School of Journalism, are as follows: Oliver LaFarge won the \$1,000 prize for "the American novel published during the year, preferably one which shall best present the whole atmosphere of American life," with his first and only novel, *Laughing Boy*, published by Houghton Mifflin; Marc Connelly was awarded \$1,000 for his play, *The Green Pastures*, "... the original American play, performed in New York, which shall best represent the educational value and power of the stage," published by Farrar & Rinehart; "For the best book of the year upon the history of the United States," a prize of \$2,000 was awarded the late Claude H. Van Tyne for *The War of Independence*, published by Houghton Mifflin; "For the best American biography teaching patriotic and unselfish services to the people, illustrated by an eminent example, excluding as too obvious the names of George Washington and Abraham Lincoln," a prize of \$1,000 was awarded to Marquis James for *The Raven, a Biography of Sam Houston*, published by Bobbs-Merrill; "For the best volume of verse published during the year by an American author," \$1,000 was awarded Conrad Aiken for *Selected Poems*, published by Scribner.

New Poet Laureate

JOHN MASEFIELD has been appointed Poet Laureate of England. The English Laureate is not required to write poems of occasion as was once the case, but ever since *The Widow in the Bye Street* appeared in the *English Review* he has had a steadily growing audience who thoroughly enjoyed the scores of his poems that so truly interpret the fine spirit of England and English life.

Providence Provides Music Room

A SOUND-PROOF piano room has been installed in the Art Department of the Providence, R. I., Public Library as a convenience for the musicians and teachers who desire to try music before borrowing it for use at home or studio. This feature is almost unique, as there are but one or two public libraries in the country which provide these facilities for the people of the community. The music collection of the library consists of 11,954 pieces, in addition to nearly 2000 books about music.

Through the Looking Glass

*A Monthly Review of Children's Books
and Reading*

By Helen Martin

Library work with children, Western Reserve University School of Library Science

VACATIONING in America has become a fine art. Eager perusals of road maps, time-tables, camp directories, and even steamship sailings are the necessary preludes to the joys of vagabonding. Last but not least into kit and trunk go volumes which will arouse interest and broaden a child's knowledge, no matter where the trail leads.

All lovers of the outdoors will find Wilder's *Jack-Knife Cookery* a veritable *vade mecum*. Within its brief compass are suggestions for cooking all manner of flesh, fish or fowl, either above or below ground, with only one aid of civilization—the humble jack-knife. The author, for many years chief of the Sea Scouts, has gained his knowledge of technique and menus by wandering from Tahiti to Waikiki. There are helpful chapters on signalling and first aid which should relieve the minds of worried camp counsellors and nervous parents. Mr. Wilder has a singularly amusing reminiscent style, and in addition is a clever artist.

Summer is the time to indulge our hobbies, and Albert Neely Hall in *The Big Book of Boys' Hobbies* has a host of suggestions for making useful objects in all seasons of the year. For summer he suggests building a canvas canoe, a motor boat, and, for the less mechanically minded, pushmobiles. Much of the information has appeared previously in periodicals, but the material has been interestingly arranged, illustrated with over seventy photographs, and provided with an invaluable index.

Handicraft books, like education, show the tendency toward specialization. Miss Showalter's *Box Book* describes the intriguing creations which can be evolved from the unprepossessing box. The text and diagrams are clear-cut, simple and will aid the younger children in answering the eternal question, "What shall we do next?"

Ocean lore has been popularized by Thornton Burgess in the *Burgess Seashore Book for Children*. In spite of the inevitable story form, much scientific information is given, and the

The Traveler's Pack

Days and days
We keep on planning
Where we really want to go.

And the time
Before our starting
Seems to move as slow as slow.
—TIPPETT.

illustrations, many of them colored, will serve to identify the fascinating creatures of the seashore, such as starfish, shells, and sea anemones. The appendix classifies the material from a technical standpoint, while the in-

dex gives inclusive paging not only to references in the text but to those in the appendix as well.

Every traveler's pack should contain a book of poetry, and this spring comes *The Junior Anthology of World Poetry*, selected for young people by Mark Van Doren and Garibald M. Lapolla from the former's earlier volume for adults, *Anthology of World Poetry*. The poems are arranged first by language, then chronologically, and to children whose fare has been confined to Anglo-Saxon poetry, these translations from foreign masterpieces will open up a new world.

What would a year be like without a little Tippet book? The latest addition to the well-known Nursery series is *I Spend the Summer*, in which attractive verses on such subjects as camping, highways, hotels, and sailing are arranged in regular sequence, which gives the effect of a continuous narrative. The clever sketches by Miss Wolcott are necessary complements to the poems.

I will draw a blue line
Along the road we travel
And I will use some blue dots
To mark the stops we make.

Tippet—*I Spend the Summer*, published by Harper.

To the readers of this page the White Knight wishes the best of vacations, and with this article bids them a fond farewell.

Cuts, at top of page, of the "White Knight sliding down the poker" are taken by permission from the Tennial edition of *Through the Looking Glass* published by Macmillan Co.
For Bibliography of books reviewed see p. 509.

Thirty Books for Young People

By Jean C. Roos

Head, Stevenson Room, Cleveland Public Library, Ohio

Auslander, Joseph. *Winged Horse Anthology*, by Joseph Auslander and Frank Hill. Doubleday, Doran. \$3.50.

The background and development of poetry in *The Winged Horse* is supplemented by this anthology encompassing the "best verse done in English in whatever form—and only the best." The range is from Chaucer to the present.

Becker, Mrs. May Lamberton. *Golden Tales of Our America*. Dodd. \$2.50.

An original and well-chosen collection of stories of American life as it is reflected in our literature. Each story is prefaced by a sketch of the author, and there is a delightful introduction by the editor.

Boas, L. S. *Great Rich Man*. Longmans. \$3.50.

A dramatic and fascinating biography of Sir Walter Scott, the weaver of romantic tales. "It was through his own creations that Scott realized his life's hopes; he could not himself, lame giant, serve his country; he could not overcome the enemy . . . but he could do all these things vicariously in the persons of his own literary creations."

Boyd, T. A. *Mad Anthony Wayne*. Scribner. \$3.50.

A lively biography of this Revolutionary hero. He was a brilliant, impetuous, and lovable young man whose answer to every question of strategy was, "Attack, Sir."

Buchan, John. *Courts of the Morning*. Houghton. \$2.50.

A story of war, intrigue and adventure in South America, in the series including *Greenmantle* and *Mr. Standfast*. The plot is based on a scheme to undermine the power of the United States as leader in the western hemisphere.

Burdekin, Katharine. *The Burning Ring*. Morrow. \$2.50.

A fantastic story in which Robert Carling, with the aid of a magic ring, is able to wish himself back into the past. He rescues a proud Roman from being a druid sacrifice; becomes an innkeeper in the time of Charles II, and, in the last incident, he is a youth at the time of Queen Elizabeth.

Chapman, Mrs. Maristan. *Homeplace*. Viking. \$2.50.

A lovely idyll of the Tennessee hills which tells a tale of Fayre Jones and his successful attempt to provide a home place "to keep his wife-woman in," and to prove to himself that he is no longer a "jolter head." Renews our acquaintance with the quaint characters of *The Happy Mountain*.

Cleugh, Sophia. *Spring*. Macmillan. \$2.

"Light hearted, gay and delightfully romantic in plot, this novel is as sparkling as its Italian *mise en scène*. Guiliotta, Onofrio, Hugo and their English friends untangle their complicated love affairs in a most amusing and satisfactory manner."

Davis, W. S. *The Whirlwind*. Macmillan. \$2.

The period of the French Revolution and the turmoil of life in Paris, with its dangers and intrigues, are recreated in this novel. The plot is concerned with Chevalier René de Massac, a favorite of the court, who forfeits his position by his determination to marry a peasant girl. René espouses the cause of the people and just escapes the guillotine.

Eadie, Thomas. *I Like Diving*. Houghton. \$3.50.

The thrills and the difficulties of deep-sea diving told by a professional, who begins his book with the statement "I like diving." The author helped raise the S-51 and also describes the later raising of the S-4.

Eaton, Jeanette. *A Daughter of the Seine*. Harper. \$2.50.

The life of Madame Roland, a tragic heroine of the French Revolution, from her christening in the Cathedral of Notre Dame to her noble death under the guillotine. The turbulent years of the French Revolution and life in Paris at this time are most realistic.

Eipper, Paul. *Animals Looking at You*. Viking. \$3.

A book of intimate anecdotes of animals which show their feelings, their characteristics, their play and their loves. Illustrated with startlingly realistic photographs.

Ellsberg, Edward. *On the Bottom*. Dodd. \$3.

"Nothing that the ingenuity of man has permitted him to do is more unnatural than working as a diver in deep water." This is a tale of fortitude and heroism—the salvaging of the submarine S-51.

Ferris, Helen. *Love Comes Riding*. Harcourt. \$2.50.

A collection of romantic and adventurous tales suitable for older girls.

Finger, Charles. *Courageous Companions*. Longmans. \$3.

Dick Osborne, a high-spirited English boy from Portsdown, joins Magellan's fleet and sees bloodshed, adventure and hardships on this first voyage around the world. An amazingly fine seafaring tale of olden days.

Gould, Bruce. *Sky Larking*. Liveright. \$2.50.

A most unusual and informative book on flying. The descriptions of flying as a joyous adventure

are poetic, while the chapters on the "pathfinders of the air" are written with much spirit and restraint. It includes much practical matter, as types of planes and methods of flying.

Hodgins, Eric. *Sky High*, by Eric Hodgins and F. A. Magoun. Little. \$2.50.

The history of aviation, beginning with Roger Bacon's speculations about flight in the thirteenth century and ending with the statement that in 1929 the story has barely been begun.

Leonard, J. N. *Loki; the Life of Charles Proteus Steinmetz*. Doubleday, Doran. \$2.75.

A readable biography of this electrical wizard which deals more fully with the personality of the man than with his achievements.

Looker, Earle. *White House Gang*. Revell. \$3.

The spirit of T. R. lives again in *The White House Gang*. "Theodore Roosevelt started the rollicking, joyous career of the White House Gang by sending his youngest son, Quentin, to the Force Public School. Here the gang was recruited, and here each day after school it went into a huddle to confound all rules of deportment in high places, mingle in the lives of Presidents and policemen, win victories, taste honor, suffer punishments."

Loth, David. *The Brownings*. Brentano's. \$3.75.

A Victorian idyll which gives an intimate and personal interpretation of these two gifted writers. A charming account of their courtship, elopement and happy years in Italy.

Lovelace, M. H. *Early Candlelight*. John Day. \$2.50.

A romantic story of life in the French Canadian fur-trading post, centering about Fort Snelling and St. Paul. "It is the story of soldiers and officers and their ladies at the fort, of the blithe and care-free French Canadian voyageurs and settlers who were the first colonists and the dignified blanketed braves."

Maitland, L. J. *Knights of the Air*. Doubleday, Doran. \$3.50.

Lieutenant Maitland, who participated in the first successful flight to Hawaii, tells the thrilling story of American aviation from the first experiments of the Wright brothers to the end of the eventful year 1927.

Matthiessen, F. O. *Sarah Orne Jewett*. Houghton. \$3.

The story of a happy life spent largely in a Maine village, but varied by travel and a wide acquaintance with interesting people.

Millay, Edna St. Vincent. *Edna St. Vincent Millay's Poems, Selected for Young People*. Harper. \$2.50.

Contains such favorites as "Afternoon on the Hill," "First Fig," "Elaine," "Tavern," "Doubt No More That Oberon," and many others, with seven pleasant verses, "From a Very Little Sphinx," that are new.

Priestley, J. B. *Good Companions*. Harper. \$3.

A good-humored leisurely Dickensian novel in

which a Yorkshire laborer, a maiden lady with a sheltered past, an irresponsible schoolmaster and a strolling banjo player form a concert troupe and become adventurers all.

Repplier, Agnes. *Père Marquette, Priest, Pioneer and Adventurer*. Doubleday, Doran. \$3.

"With a magic touch, the time, the scene and the motive of the holy father's travels are here reconstructed. The forests and the plains are re-peopled with the Indians he sought to convert and the mighty rivers and lakes appear as the marvels they were to the early explorers. And throughout it all the character of Jacques Marquette, scholar, missionary and gentle friend, takes on a reality."

Sheriff, R. C. *Journey's End*. Brentano's. \$2.

A play consisting almost entirely of conversations among a group of British officers in a dug-out before St. Quentin in March, 1918. Realistic characters, fine courage and dramatic situations make this a real contribution to the literature of the war.

Thomas, Lowell. *Raiders of the Deep*. Doubleday, Doran. \$2.50.

True accounts of undersea warfare gathered from the survivors of the German U-Boats.

Van Doren, Mark, ed. *Junior Anthology of World Poetry*. Boni. \$2.50.

An excellent selection from the *Anthology of World Poetry* planned to interest young people.

Villiers, A. J. *Falmouth for Orders*. Holt. \$3.50.

An account of an exciting race of two seaworthy clipper ships which sailed from Melbourne, Australia, halfway round the world.

Museum Group to Meet in Buffalo

BECAUSE less than a quorum of the new Museum Group of Special Libraries Association would be present at the annual conference in San Francisco on June 18-21, plans have been made for a meeting of the Museum Group with the American Association of Museums in Buffalo on June 4 to 7. It is hoped to have an attendance of 20. The Museum Group was organized in Washington last May. Miss E. Louise Lucas, librarian of the Fogg Art Museum, Harvard University, Cambridge, Mass., is chairman, and Miss Minnie White Taylor, librarian of the Cleveland Museum of Natural History, Cleveland, is secretary. Paul Vanderbilt, librarian of the Pennsylvania Museum, Philadelphia, is chairman of the program committee. It is planned to send a report of the Buffalo meeting to the S. L. A. conference at San Francisco, and the Civic-Social Group of S. L. A., of which Miss Ina Clement of the New York Municipal Library, is chairman, will invite members of the Museum Group in San Francisco to meet this year with them.

In The Library World

Architectural Room in St. Louis

THE STEEDMAN Architectural Room in the St. Louis Public Library, containing a collection of over 600 volumes of works on architecture and allied subjects, was thrown open for use on May 1st. This collection is a memorial gift from Mr. and Mrs. George F. Steedman of St. Louis, who also paid the greater part of the cost of constructing a special room to house it and provided an endowment for its annual increase. This gift is the most valuable in the library's history with the exception of that of \$1,000,000 from Andrew Carnegie for library construction. The addition to the library, which includes not only the Steedman Room but new offices and storage space on the floor below and an addition to the bindery in the basement, is not visible from the outside of the building, but occupies space in the interior courtyard. It

Steedman Architectural Room in St. Louis Public Library

opens directly from the Art Room, of which it is an adjunct. The style is somewhat intimate in character. The room is designed and decorated in the manner of a private library, the whole wall space opposite the door being taken up with a large stained-glass window, with a window seat, and a fireplace with an elaborate carved wood mantel. The bookcases are covered with leaded glass.

It is expected and desired that this room should be used chiefly by members of the architectural profession in connection with their work, including, of course, other interested students and investigators. Cards of admission will be required, and may be obtained at the Art Room desk. Members of either of the architectural bodies of St. Louis, namely the

St. Louis branch of the American Institute of Architects and the St. Louis Architectural Club, will receive cards as a matter of form. Use of the books by anyone will be allowed.

Use 15,260,253 Books in Year

THE NEW YORK PUBLIC LIBRARY, through its reference and circulation divisions, supplied to its readers 15,260,253 volumes in 1929, representing a gain of 364,922 volumes over 1928, according to the annual report of the library. In the reference department the readers consulted 4,157,234 volumes, and in the circulation department they borrowed 11,103,019. The number of readers in the reference department was 1,915,415, an increase of 30,236 or 2 per cent over 1928. The number of volumes consulted increased about 3 per cent over 1928. In the circulation department, the number of books issued for home use by its forty-five branches, the extension division including the eleven sub-branches, and the Library for the Blind, gained 225,848, about 2 per cent over 1928. This is the largest number of books ever lent by the library for home reading in any one year.

Design in Industry

THE NEWARK Public Library and the Newark Museum are issuing a new monthly publication, to be called *Design in Industry*. The first number appeared in May, 1930. A note addressed To Manufacturers and Designers makes clear its purpose: In line with John Cotton Dana's ideas on the service the museum and library might render to the designer in industry, this publication presents the latest articles on the subject of design to be found in magazines, books, and pamphlets. Brief annotations will show the scope of each article. The eight pages of the first number list about fifty references, grouped under headings such as Architecture, Ceramics, Metal Work, Packages, Interior Decoration, etc. Those of particular interest to business men will be found under Merchandising.

The Open Round Table

The Late Charles Scribner

To the Editor of THE LIBRARY JOURNAL:

I have looked in vain in the various appreciative notices of the late Mr. Charles Scribner for any mention of his connection with libraries. Mr. Scribner was a trustee of the New York Free Circulating Library during the whole term of my service there, and for a large part of it was chairman of the book committee. On the consolidation of the Free Circulating Library with the New York Public Library, he was not one of the former trustees to be placed on the circulation committee of the latter institution, and so dropped below the library horizon. I have always considered this a pity, for Mr. Scribner was a valuable and interested library trustee and took his duties seriously in this respect, as he did with everything else with which he came in contact. I have always remembered with great pleasure my weekly visits to his office to go over with him my recommendations for purchase. He examined them carefully, taking up and reading each slip and often making illuminative comments on the titles—sometimes rather caustic ones. There was one minor publishing firm (whose name I will not mention here) that was the object of Mr. Scribner's intense dislike, based on the fact, as he said, that this particular firm never issued a book that was worth publishing. On the few occasions when I recommended a publication of this firm, he threw it out at once and could not be persuaded to the contrary. This was the only instance of prejudice that I ever knew him to show, and I am sometimes inclined to think that it was not prejudice at all but rather good judgment.

The work of men like Mr. Scribner in the popular library movement in New York should not be allowed to go unremembered. Its importance cannot be overestimated.

ARTHUR E. BOSTWICK,
Librarian, St. Louis Public Library.

Arizona Invites You!

To the Editor of THE LIBRARY JOURNAL:

The Arizona State Library Association cordially invites all librarians to stop at the Grand Canyon on June 21 for the pre-convention meeting.

There is no doubt that the Grand Canyon, sublimest of gorges, is one of the world's very greatest spectacles. Of its own kind there is nothing in the world which approaches it in form, size, and glowing color. To describe

the Grand Canyon is as impossible as it is unnecessary. Few natural spectacles have been so fully pictured. Its motionless unreality is one of the first and most powerful impressions it makes. And yet the Grand Canyon is really a motion picture. There is no moment that it does not change.

The Grand Canyon is very much more than a wonder place or a scientific museum on a titanic scale. It is a pleasure resort of the first order. While one should remain a week or two, much may be seen in one day. There is the auto ride along the Hermit Rim Road, a drive of sixteen miles, with stops at Maricopa, Hopi, Mohave, and Pima points. Or you may travel through a forest of tall pines via Long Jim Canyon and Thor's Hammer, thirteen miles each way, to Grand View. From Grand View may be seen that section of the canyon from Bright Angel Creek to Marble Canyon, including the great bend of the Colorado. On the east wall are Moran, Juni, Pagago, Pinal, Lipan, Navajo (Desert View), and Comanche Points; and the mouth of the Little Colorado River. Still farther beyond is the Painted Desert and Navajo Mountain—the latter plainly seen, though one hundred miles away.

Everyone will want to see the Lookout, a quaint observatory, built on the edge of the rim near the head of Bright Angel Trail; it is equipped with a large binocular telescope. Where Hermit Rim Road ends and Hermit Trail begins is a unique rest house, built into the hill, with a roofed-in porch and a parapet wall. Opposite El Tovar Hotel is a reproduction of the dwellings of the Hopi Indian and several Navajo hogans. In Hopi House are installed collections of Indian handiwork. Here also live a small band of Hopis, who are among the more primitive of our Indians.

These are just a few of the many attractions at the Grand Canyon. The librarians of Arizona hope that all who attend the A. L. A. conference will stop at the Grand Canyon. We feel that you will not want to miss an opportunity of a lifetime in seeing part of this great Southwest of ours, and we in turn want to meet you personally and welcome you to our "land of sunshine."

IDA G. WILSON,
Secretary, Arizona Library Association.

Periodicals Wanted

INDIANA UNIVERSITY Library, Bloomington, desires *First Annual Report of Board of Education for Librarianship*, A. L. A., and Volume 1 of *Colophon*.

School Library News

High School Libraries

THE NORTH CENTRAL ASSOCIATION of Colleges and Secondary Schools, in 1927, appointed a committee headed by Mr. Edwin L. Miller, Assistant Superintendent of Schools, Detroit, to resurvey the high school libraries of the association and to make a report toward standards. The Score Card for High School Libraries prepared by Martha Wilson for the Education Committee of the A. L. A., was selected as a basis for the survey, and for this purpose was tabulated and numbered by the late Marion Lovis, supervisor of school libraries, Detroit, and M. E. Irwin of the Department of Instructional Research of Detroit. The returns from the survey were tabulated and presented by Mr. Miller at the N. C. A. meeting Chicago, March, 1928.

At the 1929 meeting of the North Central Association, Mr. Miller and Dr. G. W. Roselof of the State Department of Education, Lincoln, Neb., were directed to prepare quantitative library standards for secondary schools. A brief questionnaire was sent to all schools covering items of number of librarians, training and pay; initial number of volumes per pupil; library seats per pupil enrollment and annual costs for books. The results were presented at the Atlantic City meeting of the Education Committee.

Out of 2242 high schools in the Association, 1464 replied. The vote from these schools is shown in the following tabulation:

I. NUMBER OF LIBRARIANS

	Ade- quate	In- ade- quate	Ex- ces- sive
(a) In schools under 250—1 half-time librarian	971	128	122
(b) In schools 250-499—1 full-time librarian	949	37	118
(c) In schools 500-999—1 librarian and a half-time librarian.....	741	72	181
(d) In schools 1000-1999—2 librarians	762	112	79
(e) In schools 2000 plus—2 librarians and one half-time librarian for each additional 1000 pupils or fraction thereof.....	720	156	61

II. TRAINING OF LIBRARIANS

(a) A Bachelor's Degree.....	1,024	46	199
(b) Academic studies—75 hours	804	167	64
(c) Education—15 hours	881	109	107
(d) Library training—30 hours..	1,031	68	151

III. PAY OF LIBRARIANS

The same as for teachers.....	1,171	49	179
-------------------------------	-------	----	-----

IV. INITIAL NUMBER OF VOLUMES PER PUPIL

(a) In schools under 250—10....	903	133	164
(b) In schools 250-499—7.....	831	132	75

(c) In schools 500-999—5.....	755	176	36
(d) In schools 1000-1999—4....	715	194	23
(e) In schools 2000 plus—3.5....	706	203	21

V. LIBRARY SEATS PER PUPIL

One seat for every ten pupils enrolled in school.....	957	274	168
---	-----	-----	-----

VI. ANNUAL COSTS FOR BOOKS

(a) In schools under 250—\$1.50-\$375 maximum	924	107	144
(b) In schools from 250-499—\$1.25-\$625 maximum	820	81	119
(c) In schools 500-999—\$1.00-\$1,000 maximum	776	88	79
(d) In schools 1000-1999—\$.75-\$1,500 maximum	727	115	59
(e) In schools 2000-3000—\$.50-\$1,500 minimum	708	133	49

As a result of this investigation and the discussion that followed in the Commission on Secondary Schools, the Committee on Standards was directed to include the following provisions for library maintenance in its recommendations for the year 1930-31:

PERSONNEL

(a) Schools of 1000 or more pupils, at least one full-time librarian who is professionally trained and holds a bachelor's degree or its equivalent.

(b) Schools of less than 1000 pupils, part-time teacher-librarian with technical library training.

(c) Proper allowance for library aid.

BOOKS AND PERIODICALS

(a) Cataloged library of 800 live books chosen so as to serve school needs.

(b) About 15 periodicals chosen to serve the school needs.

(c) Proper allowance to be made for public library aid.

BUDGET

(a) At least \$200 per year for books and periodicals.

(b) At least 75c. per pupil, according to local conditions.

Norton Establishes College Department

AS A result of the increasing use in colleges and universities of books published by W. W. Norton and Company, Inc., New York, this firm has established a College Department to handle educational books exclusively. The new department will receive manuscripts written as text books for use in universities, colleges and other educational institutions, and will take charge of their editing.

Among Librarians

Chairman of Carnegie Canadian Survey Chosen

JOHN RIDINGTON, librarian of the University of British Columbia, has been given leave of absence from the staff for three months to become chairman of a library commission that will make a tour of Canada in behalf of the Carnegie Corporation of New York. The other two members of the commission are George H. Locke, librarian of Toronto, and Mary J. Black, in charge of the public library of Fort William. Mr. Ridington will leave shortly for the East, and with his fellow commissioners will visit all leading Canadian communities from Halifax to Vancouver, looking broadly into the whole question of public libraries and making recommendations on all aspects of the situation, covering libraries in universities and legislative buildings and schools as well as the run of public institutions and the legislation affecting them.

Dana Tablet Unveiled

A TABLET in memory of John Cotton Dana, founder of the Newark Museum and for more than twenty-five years librarian of the Newark Public Library, was recently unveiled in the library. Funds for the tablet were raised by children of the Newark public schools, under the auspices of the Schoolmen's Club.

College and University Libraries

PHYLLIS D. BENTLEY, Wisconsin '28, has accepted a position in the Library of the State Teachers College, Mankato, Minn.

MARGARET FARLEY, Simmons '27, has been appointed assistant cataloger on the staff of the Wesleyan University Library, Middletown, Conn.

MARGIE HELM, Pratt '22, librarian of the Western Kentucky State Teachers College at Bowling Green, has been granted a fellowship at the Chicago Graduate Library School for 1930-31.

CLARA HINTON, Wisconsin '25, has accepted the position of first assistant in the Order Department, University of Iowa Libraries, Iowa City.

DR. OTTO KINKELDEY, Chief of the Music Division, New York Public Library, has accepted the appointment as librarian of Cornell University and Professor of Musicology, to begin Aug. 1.

Public Libraries

TOMMIE DORA BARKER, librarian of the Carnegie Library and director of the Carnegie Library School at Atlanta, Ga., has been appointed regional field agent for the South by A. L. A.

LOUVA CRANE, Wisconsin '27, has returned to the Duluth Public Library as librarian of the Lincoln Branch.

ALICE A. DAVITT, Western Reserve '26, has resigned her position in the Howard Whittemore Memorial Library, Naugatuck, Conn., to accept the position as director of work with children in the Racine Public Library, Wisconsin.

DORIS DOW, Simmons '28, has been appointed assistant cataloger at the Elmwood Public Library, Providence, R. I.

GRACE W. ESTES, Wisconsin '16, began work on June 1 as assistant to the Executive Secretary of the A. L. A. Committee on Library Extension at A. L. A. Headquarters.

MRS. JASPER FLEMING has been appointed librarian in the Swanton Free Library, Vermont.

REBECCA A. HERRING, Pratt '26, has accepted a position in the cataloging department of the Brooklyn Public Library.

MRS. MARIE JONES has recently resigned as librarian in the Swanton Free Library, Vermont.

MARGUERITE KIRK, Wisconsin '22, resigned in the winter as head of School and Children's Department, Newark Public Library, to accept the work of Supervisor of School Libraries with the Board of Education.

GEORGIE G. MCAFEE, Wisconsin '16, will give the course in library administration and community library work at the New Jersey Summer School, Ocean City, 1930.

HELENE R. ROGERS, Wisconsin '26, has been granted a three months' leave of absence from her work as branch librarian, Evanston Public Library, to demonstrate the Detroit Charging System, as sponsored by Demco Library Supplies.

DR. T. P. SEVENSMA, librarian of the League of Nations Library, has written a Foreword to a *Key to League of Nations Documents, 1920-29*, compiled by Marie J. Carroll, chief of the reference service on international affairs of the World Peace Foundation Library. The *Key* is being published as an aid to libraries and not for profit.

ELEANOR SHALLCROSS, St. Louis '23, has just been appointed cataloger for the Missouri State Library Commission, Jefferson City, Mo.

Opportunities

This column is open to librarians

LIBRARY PURCHASING GUIDE

Wood and Metal

LIBRARY EQUIPMENT SERVICE CO., 377 North 5th Street, Newark, N. J.

Charging desks, Magazine racks, Book display cases, Bulletin boards, etc. Complete library equipment in any color of finish desired. The firm's management has a background of 21 years of library equipment experience. Let us help you plan your special charging desk, new Boys' and Girls' Department, adult library addition, etc.

INK

CHAS. M. HIGGINS & CO., INC. 271 Ninth St., Brooklyn, N. Y.

Higgins' White Waterproof Ink is unexcelled for marking on dark colored papers or bookbindings. Higgins' Eternal Black Writing Ink, permanent as the pyramids, and Higgins' Red Writing Ink, brilliant and free flowing, are excellent for index cards and general library work.

J. W. JOHNSTON, Manufacturer, Johnston's Snow White Products, 244 East Ave., Rochester, N. Y.

Johnston's Snow White Ink is the Standard Product of its kind. It has been on the market continuously for over fifteen years, being particularly well known to Librarians for the purpose of marking the back bindings of dark colored books to be placed on Library Shelves, Notices, Files, etc. Also for Bulletin Board Announcements, and for making white notices on Shelf Edges, Boxes, Drawers, etc. It is easily waterproofed with varnish supplied by Mr. Johnston, as required.

LACQUER (Book)

THE HOLLISTON MILLS, INC., Norwood, Mass. Branch Offices and Warehouses at Boston, New York, Chicago and St. Louis

Barco Book Lacquer forms a washable, waterproof, protective surface on your book covers which resists dirt, water, scratches, stains and insects. Barco is easily applied and dries almost immediately. It will not turn white, crack or become sticky.

LEATHER

STEINHARDT LEATHER CO., Leather Manufacturers, 201 McWhorter Street, Newark, N. J.

Substantial bookbinding leathers consist of cow hides and buffings in various weights. Since 1891 we have specialized in these types. Binders of library books will find Steinhardt Leather economical, reliable and exceptionally durable. Sample books and quotations will be cheerfully supplied.

LIBRARIANS' AGENCY

THE AMERICAN LIBRARIANS' AGENCY, Windsor Conn.

The only Agency for the placement of Librarians exclusively. Our territory covers the whole of the United States. We fill positions in Public, College, School, Special Reference and Business libraries. We have Librarians well qualified for all branches of library work. Service free to employers.

Mrs. A. C. Hubbard, Director.

MAGAZINE HOLDERS

WILLIAM G. JOHNSTON CO., Pittsburgh, Pa.

Manufacturers of Library Magazine Holders and Keyless Lock Binders. Our modern fire-proof plant was built in 1914 from special specifications prepared for us. Constructed of brick and steel with saw-tooth roof according to the latest and best design for light, ventilation and economic manufacturing production, this building houses our manufacturing division, general offices and a power plant of ample size for present and future growth. The general offices occupying two stories, are in the front of the building, the balance, approximately 50,000 square feet, is devoted entirely to the power plant and our printing and manufacturing requirements. Catalog and prices furnished promptly. Manufacturing Plant, 1130-42 Ridge Ave. Commercial and Office Supply Department, 343-345 Boulevard Allies.

MARKING OUTFITS

J. W. JOHNSTON, Manufacturer, JOHNSTON'S SNOW WHITE PRODUCTS, 244 East Ave., Rochester, N. Y.

Johnston's Snow White Outfit for Librarians is the Standard Product of its kind. It contains a half ounce jar of Johnston's Snow White Ink, Higgins' Black Waterproof Ink, Keenan's French Varnish, Alcohol Brush Cleaner and Old Witch Ammonia. Also useful accessories such as Fin Sponge, Camel's Hair Brush, several Pens, Alphabet Card, Directions and Pen Cleaner. In fact, everything needed to accomplish best book marking with first class success.

LIBRARY PURCHASING GUIDE

MUSIC

OLIVER DITSON COMPANY, 179 Tremont St., Boston, Mass., and 10 East 34th St., New York

Publishers of Music and Its Literature. The Musicians Library; Music Students Library; Pocket Music Student; Course in Music Understanding; Analytic Symphony Series.

PASTE AND GLUE

GAYLORD BROS., INC., Syracuse, N. Y., and Stockton, Calif.

"Gaylo," 90c. a quart, post paid, less in quantity, is a quick drying, clean adhesive, specially designed for book repairing and all-around library use. "Gaylo" is most economical as it may be thinned by adding water and does not cake or mold. Sample bottle free. Address nearest house. East or west—price the same.

**CHAS. M. HIGGINS & CO., INC.
271 Ninth St., Brooklyn, N. Y.**

Especially adapted for professional library work, Higgins' Drawing Board and Library Paste is unsurpassed for mending, bookbinding, fastening classification labels, etc. Higgins' Vegetable Glue, an all-purpose, glue-like paste, is preferred by some for its easy spreading qualities, but it is not guaranteed against discoloring tinted papers and should not be used with these papers in place of the Drawing Board and Library Paste.

**WM. H. RADEMAEKERS, SON & CO.
Newark, N. J.**

Rademaekers' Specially Prepared Paste is the result of 54 years of experience, specializing in library and school book rebinding. It fills exactly the needs of all persons requiring a paste for the repairing and mending of books. This paste is sold to libraries and schools at \$1 per quart can, postage prepaid.

Assisted by H. BRUCE BROUGHAM

A Book of Controversy for the Day

A give-and-take compilation of arguments, an assembling of claims on both sides of the great controversy.

It sets forth in impartial manner the pros and cons of such burning questions as:

Is there more drinking than before Prohibition?
Is the Canadian system superior to American Prohibition?

Is Great Britain solving the drink problem through high taxation?

Has crime increased under the dry law?

Can the Eighteenth Amendment be enforced?

Should it be repealed?

Have we reduced consumption of beer and wines and increased the consumption of hard liquor?

Is prohibition ruining youth?

Is the Government poisoning alcohol?

Are we now consuming more alcohol than before?

Have deaths from drink increased?

Published April 14, 1930—3rd Printing Now in Press.

**This Should Convince
You, too, that**

**WEBSTER'S NEW
INTERNATIONAL DICTIONARY**
is the "Supreme Authority"

EVIDENCE Hundreds of Supreme Court Judges concur in highest praise of the work as their authority.

The Presidents and Department Heads of all leading Universities and Colleges give their indorsement.

The Government Printing Office at Washington uses the New International as the standard authority. High Officials in all branches of the Government indorse it.

The Colleges voted overwhelmingly in favor of Webster as standard of pronunciation in answer to questions submitted by the Chicago Woman's Club.

The American Bankers' Association selected The New International as an essential part of a banker's library.

**It is a Library
In One Volume**

Its type matter is equivalent to a 15-volume encyclopedia. In its 2,700 pages there are 452,000 entries, including thousands of **NEW WORDS**; 12,000 **biographical** entries; 32,000 **geographical** subjects; 100 valuable **tables**; over 6,000 **illustrations**. Its up-to-date, encyclopedic information makes it the most convenient and dependable reference work.

Recommend The Best

Webster's New International is America's great question-answerer—the most widely used reference work in the world.

Look for the Circular Trade-Mark. It identifies the "Supreme Authority."

Send for new, illustrated pamphlet containing sample pages—FREE if you mention Wilson Bulletin.

*"When Mother reads aloud,
far lands
Seem very near and true;
I cross the desert's gleaming
sands,
Or hunt the jungle's prowling
bands,
Or sail the ocean blue;
Far heights, whose peaks the
cold mists shroud
I scale, when mother reads
aloud."*

You help parents select BOOKS with The BOOKSHELF for BOYS and GIRLS

"This list is to me no mere black and white arrangement of titles and authors, but a pageant of children down the ages. It begins with the first baby who listened wide-eyed to a rhythm of sound that later on became a Mother Goose rhyme and there is no end to the pageant, for it gathers in all the children of every race and every time, as they laugh to nursery nonsense, dance to singing, thrill to adventure or soberly accept some great truth told with wise imagination." —MAY MASSEE.

COMING IN OCTOBER

This 64 page catalog of books is attractively arranged with beautiful full colored cover, illustrations from books, descriptive notes and a complete index. One thousand titles are entered covering books for children of all ages from nursery rhyme to grown-up time. This catalog is made for Book Week but is useful for all the year-round—a fine booklist of books for children. It is now distributed by more than 200 libraries during Book Week and after.

This guide (1930 edition) will be ready in October. It mails for 2c. postage. Your local bookseller may share costs and imprint with you. This list may be sold to parents, teachers, and others at 5 or 10 cents per copy. If you wish a sample copy of last year's catalog send for one. The new catalog may be purchased after October 15 at 10 cents each. In 100 lots it costs you \$6.00.

Forthcoming Issues of
THE LIBRARY JOURNAL

✻ In the last issue we announced that information about bus service and trips out of Los Angeles would be given. Unfortunately, this information did not materialize, but we are grateful to the staff of the Los Angeles Public Library for a list of Los Angeles restaurants and eating places and to the Los Angeles Chamber of Commerce for the map reproduced on page 560. The page devoted to pictures of Coast Librarians is not as complete as we wished for; we especially regret not receiving photographs from Jeanette Drake, Librarian of the Pasadena Public Library, California; Harold L. Leupp, University of California Library; and Sydney B. Mitchell, Director of the University of California School of Librarianship.

✻ The conclusion of the series of books on foreign countries prepared by the World Peace Foundation has had to be left over to the July number because of lack of space. We are sorry to see the last of these splendid lists and take this opportunity of thanking Holland Hudson, and other members of the staff of the World Peace Foundation, for their preparation.

✻ The next two numbers (July and August) will be devoted to Conference material.
B. E. W.

AN INVITATION

TO ALL LIBRARIANS attending the Fifty-Second Annual Conference of the American Library Association from June 23rd to June 28th, 1930, at Los Angeles

The Publishers of COMPTON'S PICTURED ENCYCLOPEDIA have prepared an exhibit for this meeting of the American Library Association, which they believe will be of particular interest to all librarians.

A special library representative will be in attendance to answer any questions, offer suggestions or discuss any problem in connection with library reference equipment.

Material of great interest to librarians has been prepared for those calling at the exhibit.

A most cordial invitation is extended to every librarian attending this meeting.

The Orange Sign

*The Orange Sign, Which Indicates County Free Library Service in California,
Is Found from North to South and from East to West*

By Mrs. Julia G. Babcock

President, California Library Association and Librarian, County of Kern, Bakersfield, California

CALIFORNIA—great western outpost of a broad, fair land! On her eastern borders lie the rugged, pine-clad, snow-crowned Sierras, rising to majestic peaks, a beckoning inspiration to all who lift up their eyes. Nestled on their slopes are clear, sparkling lakes of glacial origin, and green mountain meadows where the deer feed. Hurrying streams tumble over the cliffs in spreading waterfalls. High among their crests tower the great forests of Sequoia Gigantea, the oldest living things in the world. Here is nature's own cathedral, where instinctively the soul lifts itself in worship. On her western margin the gentler slopes of the Coast range, joining the Sierras in the north, decline easily toward the sea and, uniting again the south, inclose the great fertile interior valleys. Between this range and the sea are the magnificent areas of Sequoia Sempervirens, the California redwood, threatened by extinction for commercial uses, until government protection and public sentiment have saved certain tracts for all time. In the south lies the awe-inspiring Mojave desert reflecting iridescent colors, changing in aspect from hour to hour, carpeted gloriously with wild flowers in the spring, and awaiting only water to change to a veritable garden, but remorselessly taking back to herself any garden spots neglected for

even a season. At two points in California are valleys lying below sea level; one, vast, threatening, mysterious Death Valley, edging close to the very foundations of Mount Whitney, hiding secrets of wealth in her cruel heart, and inviting man to dare her dangers of wind and heat and cold and parching thirst; the other, the Salton Sea in the midst of a fertile plain, best known perhaps through the author whom she made famous. Mid-state, with her back against the high Sierras, rests beautiful Yosemite, once the refuge of hunted Indians, with her 3000-foot walls, her waterfalls, her meadows and forests, now accessible to all who desire to enter.

From the snow-capped mountains of Siskiyou, down the length and breadth of the State to the balmy, even-tempered shores of the Pacific at San Diego, there stretches a service free to all the people of forty-six of the fifty-eight counties—a service as varied in type as the diverse features of the counties themselves. The orange sign, which indicates county free library service, is found from north to south and from east to west. Beginning at the county seat with simply a resolution passed by the Board of Supervisors, and a small fund for maintenance and with any sort of roof overhead, the newly appointed county librarian goes to work with enthusiasm and energy to pur-

chase books and periodicals and send them out to all the people of the county. First, the strategic points of the county, those towns or communities having no public library service of their own, are provided for by finding a suitable location, appointing a local custodian, and furnishing a collection of books sufficient to form a nucleus of a library. A simple charging system is installed, a few magazines are subscribed for, and the new station is opened for business. The plan is not merely to supply the book desired at the moment, but to establish a library atmosphere and a library service for every man, woman and child in the county. Books of reference, the classics, all those fundamentals which every library must have, should be found in the local branch. The individual service unit should be as complete as the community demands. Instructions are given the custodian, not only by the librarian but by a written or printed outline which is left with her for constant reference. One county librarian has prepared an excellent manual for this purpose.

If some particular book is desired (and it always is), a special request form is filled out and sent in at once to the central library, or, if information on some specified subject is wanted, the topic is sent in, and the reference librarian at headquarters looks up the subject and sends out the required material. If the book needed is not on the shelves of the county library, it may be called in from some other branch, or if not available, and if it is not a book whose use would seem to justify its immediate purchase, it may be borrowed from the State Library. It is then sent postpaid to the branch desiring it, and the main library is notified of the loan. If it is not in the State Library, the union catalog of that institution gives the names of those libraries which have it. Of course, inter-library loans must be mixed with the leaven of common sense, but because of the one institution in the State which advertises its ability and its willingness to loan, perhaps the "gimmes" may not be quite the burden to the "got'ems" that they are in Minneapolis.

As the central county library must be established at the county seat, some of them are therefore in large cities, some in small towns, and a few in very picturesque places. The large county library has the same fine organization and liberal budget which any large, well-equipped library possesses, with trained librarians in all departments, with clerical assistants, pages and part-time workers according to the need. In these larger organizations the cataloging for branches as well as for the main library is all done at headquarters. The

records are complete and accurate. In certain cities the city library has united with the county library for reasons of economy and efficiency, and regular city library service with reading rooms and circulation department is maintained in addition to the county functions of the institution. In some cases a library building has been erected with the needs in view of both city and county. In one county a beautiful memorial library building has recently been erected, in which the American Legion devoted the entire first floor to the housing of the library. Planned for library purposes, it provides an ideal setting for county library work.

There are some county seats which are reminiscent of the days of '49, perched high in a river canyon, with buildings strung along either side of the street, which follows the meanderings of the stream. There are remains of the inevitable saloon, built of brick or stone as became its early importance, with sheet-iron shutters for doors and windows. Exploring these old buildings, the visitor may find many exits through inner rooms on different levels, but leading to the possibly safer out-of-doors. There are old Wells, Fargo express offices with faded, weather-beaten signs, telling that gold dust is weighed here and shipped. In one such place, through which millions of dollars in gold passed, the original owners, feeble and tremulous, show the old scales, the roulette wheel, and similar treasures, and ask a small fee for the exhibit. Not much of the early gold dust stuck to their fingers. The primitive fire-engine is preserved with care with its accompanying hose cart and the long rope by which it was hauled by the willing hands of the volunteer fire department. Queer and out-of-date it may be, yet what a welcome sight it must have been in time of need. In these places there is often found a hangman's tree, where Judge Lynch held swift and sure court.

In one such town a small handful of the originally large population of Chinese still remains, with just one Chinese woman looking out wonderingly at strange visitors, and when, by way of conversation, the beauty of her earrings of jade and fire-opals was admired, proffering them for a few dollars. At the old Chinese joss house across the way, still revealing its vivid coloring of reds and blues, the ceremonies of worship and of driving out and burning the evil spirits were performed for a small consideration. In this town are delightfully hospitable people who make the outsider feel that here he would like to spend his days. There is time for reading and culture, leisure for friends and friendliness, and while there is progress and development, there lacks the hurly-burly of the newer, more "enterprising"

town. Happy the librarian in such a place, even though called upon in emergencies to conduct the church service or to lead the choir.

Any school district whose trustees so desire may contract with the county library for school service, and its library fund is then transferred by the superintendent of schools to the county library. It may be from \$25 a teacher upward. These funds are then used for supplying the supplementary school books required by the course of study. (The State furnishes free textbooks.) Maps and globes are also purchased and sent to each school, as well as a large dictionary for classroom use, small dictionaries for each pupil, professional and desk books for the teacher, a choice of one or more educational periodicals, with additional subscriptions for the use of the boys and girls, such as the *National Geographic*, *St. Nicholas*, *Child Life*, *Popular Mechanics*, *American Boy*, *Youth's Companion*, or other magazines of similar value. Every effort is made to meet the needs of the school promptly and fully. Though every need may not be met, certainly the pooled funds provide a fuller and more complete service than the individual school could possibly acquire for itself with the same amount of money. Some county librarians use the entire amount of the school fund for books and maps, some dip into their general book fund to increase the supply of supplementary books, while others budget the fund, making it cover all the expenses incident to the service to the schools, including office personnel for this department, and express, parcel post, and other forms of transportation. This seems the fair and business-like method of handling this department, especially as the stock of books and other material increases. It is also an excellent plan to submit to the superintendent of schools and to the clerk of each board of trustees a report at the end of the year as to the service to the schools by the county library. This report answers any questions which may arise as to the amount of service rendered in relation to the amount of money transferred.

Entirely separate from the school department, but cooperating closely with it, is the children's or boys' and girls' department. With a trained and experienced children's librarian in charge, the service which may be rendered is practically unlimited. With the approval of the superintendent of schools, instruction in "how to use a library" may be given in the classroom, but preferably in the boys' and girls' department, or at the local branch. On the theory that the best way to learn to do a thing is to do it, certainly the best way to teach a child how to use a library is to get him there and show him how to find

his way to what he wants by way of the catalog, the classification system, the call number of the book. He will enjoy, also, learning how to use the everyday reference books. All of this work is being done in the county libraries of California. Not all of them have children's librarians as yet, but where they have not, the county librarian does this work.

The county libraries serve all county institutions, the various offices which need special collections of reference books, such as the farm advisor, the home demonstration agent, the horticultural commissioner, the county hospital, the tubercular sanitarium (to which books are sent, but from which they are not returned). In one county there is a preventorium in a beautiful setting of mountains and hills, of oak and pines, where children who are underweight are taken and brought to vigorous health and sturdy activity. They have a school well equipped, to which the library gives the same liberal service that is granted to all schools. Here, also, go books for the hours of recreation of teachers, of pupils, and of nurses. County jails and State prisons within the boundaries of certain counties receive the same service that is given to other institutions. There is always a "trustee" to be found who enjoys circulating the books, attending to special requests, and seeing that books are returned in good condition. Prison road camps are given liberal book service, and the same special requests which come from any community come from these men with often a preponderance of serious matter for reading or study. There is a charming little library building and fine collection of books open each summer in Giant Forest as a regular branch of the county library. There is never any difficulty in securing a good custodian for this attractive opportunity. Books are furnished for Boy Scout and for Camp Fire Girls' summer camps; in fact, wherever there is a group of people either temporarily or permanently located, there go books and magazines. Construction camps, lumber camps, oil geologists in the field, mining camps, all receive library service, and how it is appreciated!

A few counties, too sparsely settled to be able to provide a library for themselves, have contracted with adjacent county libraries for service, and this plan is working out most satisfactorily. Through such a contract an excellent library is maintained in Yosemite Valley.

There are ample collections of pictures in many of the county libraries, reproductions, of course, rather than originals, for these pictures must earn their board and keep by circulating vigorously among schools and branches. When they grow shabby, they are discarded

and replaced if desirable. Branch custodians enjoy having a few pictures to enliven their surroundings from time to time and use them to awaken interest in groups of books. In one of the mountainous northern counties there occurred something which has been told before, but which deserves the retelling. Soon after the county librarian began her work, a group of women came to her to ask if she would lead a class in art study. She consented, and in order to freshen her own knowledge took several correspondence courses in art appreciation with the university. They continued a systematic study for some years as a group.

The librarian and such heads of departments as need to acquaint themselves with actual conditions at branches and schools make periodic visits to all distributing points of the library. Sometimes the custodian of a branch is gathered up and taken on to visit a neighboring library, while an assistant from headquarters takes charge of the branch or station temporarily. The custodians are invited to visit the main library as often as possible, and most of the county libraries have at least an annual custodians' meeting at headquarters. These meetings are productive of much mutual helpfulness. Several county librarians issue a little monthly mimeographed bulletin in which library news is given or suggestions made, as a means of keeping the contacts close between the county librarian and the custodians. Monthly reports are made by each branch and station to the main library, and some county librarians ask the custodians to report to them any interesting occurrences in connection with

their work during the month. They are also asked to send in the titles of the books which they have read, and sometimes an interesting book review is appended. As a branch grows and requires full time service, trained librarians with cordial human instincts may be secured, and the work then progresses with surprising rapidity. Personality is a vital factor in the success of a branch or station.

The housing of the branch library is often a problem. Sometimes a room or small building may be rented; some communities secure funds and erect a building adequate to the needs of the community, while in other cases the residents provide the site, turn it over to the Board of Supervisors, and the county librarian budgets a fund for a building suited to the requirements. This is a very satisfactory arrangement, as a small additional tax levy takes care of the erection of one of two new branch buildings each year.

Much is being accomplished, much more remains to be done in the fuller development of acquiring and distributing books and other material over a wide area. There must needs be a deepening and broadening of the endeavor with a constant raising of standards to be attained. One of the great needs of the immediate present is a larger, more intelligent recognition of the service of the library to youth as distinguished from younger boys and girls. The boy or girl who has outgrown the children's department cannot be turned loose in the adult department without direction and supervision. Here is opportunity calling aloud for wise and tactful guidance. Ours to catch the vision splendid and make it living reality.

Picturesque Points in California County Library Work

By Anne Hadden

Librarian, Palo Alto Public Library, Palo Alto, California

COUNTY FREE LIBRARY work in a State like California with such variety of topographical, climatic and social conditions, has offered possibly more picturesque points along with its routine than any other type of library work.

Through valleys and deserts, over mountains, across dangerous ocean strait, by train and stage and automobile and wagon, by pack animal and boat and aerial tram, perhaps on skis or by airplane the books go, and receive welcome in remotest corners of the country.

The county free library sign indicating the location of a branch or station may be seen in many unexpected places, for instance, on a lighthouse resembling a medieval castle situated on its high rock above the ocean, in the depths of a forest on a T.N.T. box nailed to a tree, or at a chicken ranch on a retired brooder.

The County Librarian reaches nearly every point the books do, and the ideal County Librarian, in addition to a thorough knowledge of technique, should have an iron constitution,

the instincts of a social worker, and the spirit of a pioneer.

In rural communities very scarce are the trained librarians amongst the custodians, but not so scarce are the custodians with the ideal of service. The more remote the community frequently the more understanding is the custodian.

One instance of the spirit of service was the work of the young woman who carried books

the parents too. The young father of the family who had had to leave school while still in the primary grades, wanted enough arithmetic to enable him to keep the accounts of his farm, and the visiting teacher's wife gave the mother instruction in needlework.

Then there is the monthly shipment of books sent to the meeting of the Home Demonstration Agent. Here books are charged to individuals. During the month they are passed around in the community, but the first borrower is held responsible for the safe return of the book. This, of course, accentuates the difficulty of making accurate circulation reports!

Frequently in the pioneer days, to save expense, the County Nurse, County Librarian and Rural School Supervisor traveled together in remote regions difficult of access, sometimes taking a guide for the trail.

When the blind teacher of the blind comes to the county to look up the blind people there, it has been the County Librarian's privi-

Packing mail at the Gorda Post Office, California. Supplies for Lucia Branch are in this pack

on horseback to borrowers, phoning to all her patrons along the way when she was starting on her ride of five miles to town, reading to them her list of books, finding out what they wanted, leaving the desired book in the rural delivery box and gathering up the read books from these same boxes as she rode back.

Occasionally the County Librarian has the fun of cooperating in a history hunting expedition such as helping an investigator to measure the ruins of an old California Mission, or to locate its original site, and reading, maybe on the spot in which it was written, the translation of the Spanish diary which describes the arrival of the padres. Or historian and librarian, accompanied by the children and teachers of two small mountain schools, take a pilgrimage on foot over a trail cut through spicy scented chaparral to a remote Indian cave with ancient pictographs.

Cooperation with other county officials and other agencies offer picturesque points. Books are sent out to isolated families living too far away to attend school. In one instance the County Superintendent of Schools found pupils not only in the children of school age but in

lege to take her to the centers where she meets her pupils or to the homes of those too old or too feeble to come to her. It is a never to be forgotten experience to see the teacher and her pupil, both blind, sitting close together, hand guiding hand over the letters, and the reawakening of hope in the face of one who believed that he had relinquished hope for a lifetime. Then it is that the County Librarian reverently stands on holy ground.

Interesting requests come to a County Librarian. One mother from a mountain point, having only a weekly delivery of mail by pack animal, and isolated from road and telephone

"The Flying Duck," used to transport mail and passengers when bridges were washed away by floods

and neighbor wrote asking the County Librarian if she would kindly select a dress for her little daughter. Loraine preferred to wear overalls and had grown out of her dress.

Another request, this time from a teacher also beyond the roads, was for the purchase of a Santa Claus mask and candles for the Christmas tree.

There was the day when a County Librarian and her assistant helped the forest ranger to repair a broken telephone wire, the wire which should have carried the news of their coming, and occasions when the County Librarian assisted the driver of the old horse stage with his rural mail delivery.

Once, in an isolated spot on a rough mountain trail, the County Librarian and her party came across, under a shelter of bushes, a piano in its box beside the trail. It had been taken as far as that on a sled, with the greatest difficulty, for a music-loving mountaineer, but the precipitous nature of the country made it impossible to take it any further, and there beside the trail it had stood for several years.

One county in California, in all its area of 3276 square miles of mountainous country, had only one mile of *straight* highway and only one railroad station on its one bit of railroad, which cuts across the extreme southwest corner of the county. At one time the County Librarian of this county left at seven o'clock in the morning by machine to visit two branches. On the way back they encountered a bad piece of road, which necessitated the help of a team of horses in addition to the car's own power, and even then they had to be shoveled out. They arrived home at eleven o'clock at night, having traveled 125 miles in eleven hours actual trav-

eling time. This was no uncommon experience in mountain counties. Sometimes three or four long days like these, with concentrated work to be done at intervals, followed one another in succession, sometimes many miles to travel on horseback over rugged mountain trails, occasionally even a trip on foot from the end of the

automobile road to reach a remote school. A librarian has been known to go by aerial tram across a chasm, or by the so-called "flying duck," a basket and pulley arrangement, across a river when bridges have been washed out by the flood. In the pioneer days, after trips like these there was no chance to take a day off and rest and, if

the staff was limited, the librarian frequently had to work overtime in the office to catch up with the business which had accumulated during her absence.

It must be understood that the points touched upon in this paper are the high peaks of interest rising occasionally from the surface of County Library work in California. The greater part of the business is done on the level of everyday routine, which must be well organized in order to make worth while the expense and effort of getting the books into remote and difficult places.

This is the revision of a paper written to go with a moving picture film shown in the County Library Section of the American Library Association Conference at Seattle in 1925.

The film depicts the visit in 1922 of a county librarian and her assistant on horseback to remote branches "beyond the roads." The County Librarian's brother, a busy professional man with a hobby for photography, went along with his camera strapped on a pack animal and took pictures of the library's activities in remote places. This was a four day trip on horseback over steep trails across rugged mountains to the Pacific. In this country there are as yet no roads, the mountains drop precipitously into the ocean, and mail and supplies are taken over on horseback. In the schools in this rough country, which are served by the county library, one of which Mr. Chase in his book *California Coast Trails* speaks of as "the lost school house," children were to be found, until recently, who had never seen a road, an automobile or a train, though an airplane was no uncommon sight.

The End of the Trail. Post Office and County Branch overlooking the ocean at Lucia

State Library Activities in Oregon

By Mirpah G. Blair

Oregon State Library, Salem

THE LIBRARY SITUATION in Oregon is influenced to a large extent by the physical characteristics of the State. With a total area of 96,699 square miles, it is about 350 miles in width and 275 miles in length, has a coast line of 300 miles, a small range of mountains near the coast, and the Cascade Range, with a peak elevation of 12,000 feet bisecting it from north to south. West of the Cascades is a region of mild winters and ample rainfall; east of the range, a region of cold winters and rainfall varying from about fifteen inches in the north to one of very slight proportions in the central and southeastern portions. Large tracts of land, still under government control, are mountainous or desert. Highways, railroads and population have followed the lines of least resistance, the river valleys, notably those of the Columbia and Willamette. Portland, the largest city, has a population of 300,000; Salem, the second in size, has 26,000. The State has immense resources waiting for a population large enough to develop them.

State participation in library work in Oregon began in 1905, with the organization of the Oregon Library Commission, and continued under the commission until 1913, when the law library, previously known as the State Library, became the Supreme Court Library, and the Library Commission became the State Library. At this time the State and Federal documents, other than those of a legal nature, were transferred to the new State Library, its appropriation increased, and its period of enlarged activity began.

In August, 1905, when Miss Cornelia Marvin came from Wisconsin to become secretary of the Library Commission, there were only three free libraries in operation, Portland, Salem and Eugene, and the two latter were under private management. In December, 1929, there were 107 free libraries, 74 of them tax supported, including 10 county libraries and 50 county library branches. There were also 342 branch library stations.

The first report of the Library Commission,

made to the legislature in 1907, showed 2579 volumes in the library, 68 shipments and 3400 volumes lent. On Dec. 31, 1929, there were 283,462 volumes in the library, and during the year there had been shipped from the General Loan Department 122,658 volumes in 31,309 packages, and from the Traveling Library Department 35,109 volumes in 618 shipments of traveling libraries, and 6579 volumes in 233 shipments of little libraries. Traveling libraries are fixed collections of fifty volumes for general community use; little libraries also are fixed collections, but contain twenty-five volumes, and are sent to one-room rural schools. Transportation charges are paid by the borrower.

The State Library lends to libraries for re-lending to their borrowers, and to individuals having no access to libraries or living in towns having inadequate service. Much of its work is with schools. All of the little libraries and many of the traveling libraries are sent to rural schools. The inadequate book collections of the schools in small towns and rural communities are supplemented from the General Loan collection, by loans of individual books or groups, for periods varying from four to twelve weeks. Many students could not carry on the required outside reading if it were not for the State Library. Groups on the Revolution suitable for seventh and eighth grades have been given to the library by the Oregon Society, Sons of the American Revolution, and are lent for three months. Aid for women's clubs, teachers, high school debaters, the selection of books for busi-

ness men, lumbermen, fishermen, ranchers and those in nearly every walk of life, and the answering of the thousand and one questions that come to the reference desk of a large city library, fill the day for the library workers. Contact with readers is almost entirely by correspondence. In 1929 we received 41,177 letters.

Books are lent to the various State institutions as requested, but there has never been a librarian assigned to this work. Some time ago, through the co-operation of the Adult Education Section of the Federal Office of Education and the State Department of Education, a survey was made of the education and reading interests of the men in the State penitentiary, and the library, with the results of the survey as a guide, made a list of books on various subjects of interest to these men. The results have

A Library Box placed in a country store by the Multnomah County Library, Portland, Ore.

grown to such proportions that some special method of caring for them will have to be devised if the increase continues.

The State Library is the document exchange center for State publications, and has a large collection, cataloged, of the documents of the Federal government and the various States. It is required by law to collect documents and make them available for State officials and members of the legislature. The librarian also prepares the list of books for school libraries of the State, from which school districts select the books to be purchased from their school library tax of ten cents for each child of school age, and superintends their purchase from the State dealer, to the amount of \$20,000 each year.

GENERAL SUMMARY OF OREGON PUBLIC
LIBRARIES, 1929

Free libraries	107
Tax supported libraries	74

Receipts:

Total tax receipts	\$493,178
Fines, gifts, etc.	78,528
Total receipts	\$571,706

Tax per capita for libraries reporting	.655
Income per capita for libraries reporting ..	.759

Expenditures:

Salaries, librarians and assistants	\$298,462
Books, periodicals, and binding	124,334
Other operating expenses	110,271

Total expenditures	\$533,067
--------------------------	-----------

Expenditures per capita for libraries reporting	.70
Expenditures per capita for State	.49
Volumes in libraries reporting	952,581
Circulation per capita for State.....	4.4
Circulation per volume in library	5.005
Population of State (estimated)	1,079,490
Population of towns having access to libraries (estimated)	748,711
Without access to library, other than State library	330,779

The relation of the State Library to the other libraries of the State is advisory only. Many libraries are small, with inadequate resources and untrained librarians, and these depend on the State Library for direction, counsel and books. The larger libraries with trained librarians in charge expect from the State Library the unusual or more expensive books for

which they have little demand, but which should be available for use in the State. The libraries of the University of Oregon and of the Oregon State College of Agriculture also lend books not in use in their own institutions.

Communities are small and library resources are correspondingly small. The county library would seem to be the solution of the problem, but many counties are now taxed to their limit, and will consider no further activities until the peak of road building expenditures has been reached. There are in the State two libraries, Ashland and Bandon, receiving over \$1 per capita, and 26 with from 50c. to \$1; 7 of its county libraries receive at least 50c. per capita, the other 3, less than 50c.; 50 libraries lend more than 5 volumes per capita, and 9 lend 5. The following summary from reports for 1929, filed in the State Library, will give some idea of the library activities of the State. It does not include the reports of college libraries nor of the State Library.

Since the organization of the Library Commission in 1905, there have been two librarians, Miss Cornelia Marvin, who resigned in December, 1928, to marry Walter M. Pierce, formerly Governor of Oregon, and Mrs. Virginia C. Bacon, who died April 12, 1930. In Miss Marvin's final report she made the following statement, which expresses very clearly my aim in this article:

"The point which I wish to make most clearly is that of a unified, far-reaching, tremendously vital library organization carried on by the State Library Staff, the librarians and trustees of public libraries, and the volunteer librarians of traveling libraries, all striving to make good books accessible everywhere."

School Work in Portland

By Evelyn M. Foster

Head of School Department, Library Association of Portland, Oregon

CONSISTENT growth through the vicissitudes of twenty years of existence has marked the progress of the School Department of the Library Association of Portland. Although this library had ministered to the needs of the schools through its county department for many years previously, real school work had its inception in 1910. This was made possible by a joint agreement entered into by the Library Association and the school district of Portland. That year the sum of \$10,000 was set aside by the Board of Education for the purchase of books to be supplied to the various classrooms of the city. This initial appropriation was approved by a taxpayer's meeting in January of that year. Directors of the Library

Association voted in turn to administer and supervise these classroom libraries and to pay all charges except the actual cost of the books. The steady growth of this new department was so encouraging that during 1912-13 the Library Board assumed the book expense, and in August of 1915 the School Board voted to pay one-half the salary for a supervisor of school libraries; the supervisor to be appointed by the library, but to work in close cooperation with the schools. Her official status in the schools was assured because her position ranks with other supervisors in the school system. The duties of the School Librarian include not only complete supervision of all school library work, but also the responsibility of a depart-

ment especially for the use of teachers at the Main Library. This, then, is a brief résumé of the steps that have resulted in the present satisfactory scheme of cooperation between the Library Association of Portland and school district of the city of Portland to supply the book needs of the Portland schools. School work in Portland has inaugurated many changes and witnessed many additions during this interesting score of years through which it has passed.

One of the first activities of the School Librarian was the establishment of a collection of professional books for teachers. This is housed in the School Department at the Main Library. Each year the outstanding contributions to the field of education are added to this collection. Professional journals, Government publications, the educational publications of States and societies are obviously an integral part of this collection.

At the present time the school library service includes a wide variety of schools. Aside from the city schools, there are many parochial and private schools, as well as a number of institutions to which the library privileges have been made available. The statistics of the current year reveal these figures:

- 9 High schools in Portland
- 3 County high schools
- 38 Elementary schools in the city
- 41 Platoon schools
- 5 Parochial schools
- 4 Private schools
- 45 County schools

There was, in addition to this service, a total of 713 classroom libraries deposited in the city schools and 255 in the county schools.

At each of the nine city high schools there is a well-rounded collection of books. Reference aids, periodicals, and supplementary material for classroom use are important factors of each of these libraries. Recreational reading has likewise been given due emphasis. This is in recognition of the existing need for books

that may be enjoyed at home during leisure hours. These collections are constantly supplemented by loans from the collection of books at the Main Library, thus making available for each high school the vast resources of the entire Portland library system. A trained librarian administers each high school library. Four of the large high schools require the services of a full-time clerical assistant, in addition to the necessary page help during the peak of the load.

School Department in the Main Library, Portland, Ore.

The three county high schools have continuous all-day service. This is made possible in one of the schools by the voluntary work of a member of the teaching staff, assisted by several rather capable students. Their work only supplements the work of the trained librarian, who visits once each week in the capacity of supervisor.

Book collections in these schools are small, but they are live working collections. "Dead wood" is conspicuous by its absence. Incidentally the resources of the Main Library in Portland are likewise available for these small county high school libraries. This privilege is freely used, and so their collections are constantly augmented by books from the Central Library. The largest of the county high schools is happily situated in a village where a branch library is maintained. Students from this high school draw heavily upon the branch for their reference work, supplementary material and recreational reading.

Each Saturday morning the librarians from all of the high schools come to the School Department headquarters in the Main Library building for a meeting and conferences. At this time there is an opportunity to select books to fill the needs for the ensuing week. Books selected are sent to the schools the following week.

Perhaps our greatest milestone was passed in 1923. That year marked the organization of the first platoon school by the Board of Education. The transition from the Traditional to the Platoon system has been rapid.

Already forty-one schools have been reorganized according to this plan, with the prospect of two more to follow soon. This fact is most auspicious from the library viewpoint, because a platoon school by its very organization requires a library. The library then becomes an activity to which each child in the school is regularly scheduled. These libraries are in charge of a teacher chosen from the personnel of the school. Her appointment is made usually because of reading interests and background, not because of any training for librarianship. Her official title, Teacher - Librarian, serves well to describe her duties. She is a teacher in charge of the activities in an elementary school library. Realizing the need of formal instruction for the Teacher-Librarians, members of the School Department staff have given various

courses for them under the auspices of the University of Oregon Extension Center.

Undoubtedly the most important duty devolving upon the Teacher-Librarian in the platoon school is the creation of an appreciation of good literature. This we attempt to accomplish by surrounding the children with a collection of carefully chosen books. Discrimination, I am inclined to believe, does not frequently occur in the child as a native endowment. Careful guidance, patiently given by a Teacher-Librarian adequately equipped for this colossal task, is necessary. In a wider sense the Teacher-Librarian's duty is to inspire the children to delve into independent reading of the right sort for themselves. Believing firmly that there is no greater assurance for the future enjoyment of leisure time, and surely no wiser use of it than the reading of good books, every effort in our platoon libraries is directed to this end.

Many unusual devices are employed by the Teacher-Librarians in introducing good books and in arousing an interest in reading. Sometimes a story hour is held. At other times informal book talks are conducted. Oftentimes

these talks are successfully given by the children. Such talks have proved invaluable. In one school that I have in mind the Teacher-Librarian occasionally holds a series of book talks for the purpose of advertising good books. These very informal talks by the children are prefaced by remarks from the Teacher-Librarian stating that certain very excellent titles are apparently being read very little. She further explains that such books are really too good to overlook. Of course there are always

volunteers among those who have read the book and are enthusiastic about it. An invitation is then extended the reader to "advertise" the book, telling clearly and concisely interesting facts about it, as well as why it is to be recommended to others. New books are frequently introduced by members of the

School Department

staff during their regular visits to the school library. Children evince so much enthusiasm following these talks that it is often necessary to take a great number of reserves for one book. Dramatization is one of the most attractive aids in the platoon library. For the younger children especially there is no finer introduction to literature than their own simple presentation of such old favorites as *Three Billy Goats Gruff* or *Rumpelstiltskin*. Children in the upper grades delight, too, in presenting not only folk tales but plays based upon books and book characters. Plays offer a splendid means of correlation between library activities and the auditorium. There are, in fact, unlimited possibilities for many interesting programs. One that has actually been worked out by the children with great success is the story of *Evangeline*. This was originally attempted as a project in the library, but in its final presentation it has very happily involved many departments of the school. The manual training department has even contributed its bit by the making of a spinning wheel to be used in the stage production. The students of this elementary school have, I am told, done an

The Library at Franklin High School, Portland, Ore.

almost incredible amount of research in order that this project might be letter perfect. Throughout every step of their preparation there has been an unusual interest displayed.

Library activities in no sense cease outside the four walls of the platoon library in the Portland schools. Throughout the year the children's librarians from each branch library make visits to the neighboring schools. Their mission is to interest the children in the branch library, and, of course, to open the vistas that may be attained through the larger collections there. Then, too, there are visits to the branch libraries by the children. Regular story hours at the libraries serve to enhance an already attractive program. Perhaps one of the most joyful experiences for the school children was a series of puppet plays, presented particularly for their amusement. Although these contacts are only mentioned briefly, they are of inestimable value. By surrounding children with a wealth of good books, not only in the school library but in the branch library as well, at a time when interest in books is rife, we are hoping to create a love for books and reading. Since the school library must obviously be small, this contact of the school children with the enriched collection at the branch library is one of the important features of our school work.

The library facilities of our School Department are made available in the traditional schools by means of classroom libraries. Such a library is a small collection, usually consisting of about fifty books. These collections are

loaned for a year, with the privilege of exchange at least once during the year. The chief emphasis in these collections has been placed on books that children in the grades could enjoy reading at home. Realizing the need of teachers for books of value as reference aids in their school rooms, there was early established a collection known as the Teachers' Reference collection. From this collection each teacher is entitled to a library of from ten to thirty volumes. This is a privilege of which practically every teacher in the city avails herself.

Picturesque in its entirety is our service to the county schools. A close contact with every school in Multnomah County is maintained by visits at least twice yearly. Stories are told and book talks are given as a means of creating an interest in the collection of books which is deposited at each school, however remote, soon after the opening of school in September. Collections of books for the county schools are selected with care. In order that the books may suit the personality of the children for whom the collection is intended, statistics are carefully gathered on preceding visits of the number of girls and boys, their ages and their particular reading interests. The county service undoubtedly entails our most strenuous efforts. There is a sufficient reward, though, in being welcomed at an isolated school with this greeting: "Oh, goody! here comes the library." This is equally as flattering as those words of Christopher Morley: "Of all the Aryans, the best ones are librarians."

The County Library Situation in Washington

By Clara Van Sant

Reference Librarian, Tacoma Public Library, Washington

THE STATE OF WASHINGTON is in a peculiar situation. It has three legally organized county libraries in operation but no law under which they can function or by which other county libraries may be organized. The explanation calls for nearly thirty years of library history.

Washington ranks well among the other States in educational matters. The public schools conform to reasonably high standards, the State University was established twenty-eight years before we achieved Statehood and has grown until it ranks sixteenth in the United States for attendance, the proportion of illiteracy among our citizens is low, both our large and our small libraries are progressive and well managed, and the library school at the State university was the first of college grade to be established on the Pacific Coast. As in Oregon and California, physical conditions in this State

are admirably adapted to county library service, and many attempts have been made to secure passage of a permissive law. Each attempt has received the cordial support of librarians, educational organizations and the general public. There were the usual campaigns of education, and finally, in 1913, the word "county" was duly inserted in the State law among the bodies empowered to establish public libraries. Three counties promptly contracted with town libraries for a degree of county service, and all went well until 1915. In that year there was a recodification of the law without any intent to change its provisions but the recodification was made from the unrevised instead of the revised text, and the word "county" was omitted. The error was purely inadvertent and was not discovered until after the recodification had been accepted.

An appeal was made to the attorney-general, who ruled that since the recodification had been made from the unrevised text, the evident intent was to withdraw from counties the privilege of establishing libraries. The three county systems were thus left without a legal leg to stand upon. They continue to function, but their progress has been slow.

Various bills which failed for lack of time rather than from opposition were presented to the legislature in 1919, 1921 and 1923. The

1929-1930 biennium. In his zeal to spare the taxpayer's pocketbook he not only refused rural residents the right to provide increased library service for themselves, but withdrew from them the service they had enjoyed for years. There was much dissatisfaction, but no redress is possible until the 1931 legislature meets.

The political situation is far from clear at this time. Washington is regarded as a safe Republican State and is traditionally dry, yet the State Republican Convention held in May went on record favoring the amendment of the Volstead law and joined the Democrats in opposition to the World Court. Until the September primaries give the voters a chance to speak, it is difficult to foretell whether the 1931 legislature will be more or less favorable to county library legislation than its 1929 predecessor. The State Parent Teacher Association, the State Federation of Women's Clubs and the librarians of the State are enthusiastically supporting the county library idea, and it is probable that a new bill will be introduced at the beginning of the session. What its fate may be only the future can tell.

The Everett Public Library School Book Truck covers the outlying districts

matter was then dropped for a time, but a detailed county library bill, purely permissive in character, but with provision for the establishment of independent county systems as well as contract systems between town and county or between neighboring counties was presented to the 1929 legislature. An effort was made to impose a one-quarter-mill maximum tax levy which would have destroyed the usefulness of the bill in several counties. Protest against the too low maximum overcame that difficulty, and the bill passed both House and Senate with encouraging majorities. It was then vetoed by Governor Hartley in these words: "This is another bill that would increase taxes. Taxes should be reduced. The way to reduce taxes is to quit spending the people's money." At the same time the governor vetoed the section of the appropriation bill that provided support for the State traveling library service for the

The Shelton Public Library, Shelton, Wash.

While the law, after its usual manner, has delayed, the libraries have insisted on going ahead. The demand for county library service in King County is so strong that the Parent Teacher Association has undertaken a campaign to secure it by contract with the Seattle Public Library. One section of the existing library law permits the establishment of libraries by "any city, village, town, school dis-

strict or other body authorized to levy and collect taxes," and an effort will be made to organize the King County service under this section.

In the city of Everett a part of the school district lies outside of the city limits. Some years ago the Everett Public Library used its school book truck to give a year of demonstration county library service to the outlying part of the school district. The service was so much appreciated that the residents of the district, led by the community clubs, the Parent Teacher Associations and the School Board, are petitioning the county commissioners to levy a tax and contract for service with the Everett Public Library. It is hoped that this effort may succeed and that it may serve as the cornerstone on which to build a full county system.

Statistics for the county service in Kittitas County, maintained by contract with the Goldendale Public Library, are not available. Mason County, which contracts with the Shelton Public Library, pays \$600 a year for service. Since the county fund is so small no effort is made to offer fully developed county service, but all residents of the county are served at the Shelton library and special privileges are granted to rural school teachers. The library is

very active. With a total collection of only 4782 volumes it sometimes circulates 2750 volumes a month. A two-mill city tax fails to produce a fund large enough to meet the library's needs, and the deficit is made up by generous citizens.

The most extensive of the three county systems established under the 1913 law is the service given to Thurston County by the Olympia Public Library. During 1929 the city provided \$5,000 and the county \$2,400. All county residents may use the Olympia library, rural teachers are given the same special privileges as those in the city schools, books are sent to six libraries in smaller towns and financial aid is extended to three of them. The librarian reports that the greater part of the county circulation is still handled at the Olympia library but that the branch and station work is growing.

Obviously the present condition of library affairs in the State of Washington gives no cause for great rejoicing, but signs are in evidence that the public is awake to its library needs and has determined to supply them. The next few years may well place Washington as high in the library column as it now stands in educational rank.

The British Columbia Demonstration

By H. Norman Lidster

Chairman, Public Library Commission, New Westminster, B. C.

IN November, 1928, the Public Library Commission of British Columbia presented its final report of the activities and findings of the Library Survey which had been in progress for over eighteen months prior thereto. While the report had been presented, yet, as the work had been carried on under the joint financial sponsorship of the Government of the Province and the Carnegie Corporation, it was, of course, a matter of courtesy and duty that publication of the report should be withheld until the two bodies most concerned in its findings should have had an opportunity of digesting it. As a consequence it was not until after June, 1929, that it was found possible to make available to the general public the result of the excellent work which had been carried on by a band of devoted library enthusiasts throughout the Province. In the meantime, however, the commission had opened negotiations with the Carnegie Corporation with a view of securing the financial assistance necessary to engage in one of the most important recommendations of the Sur-

vey, namely, the carrying out of a "demonstration" of library service in an area arbitrarily selected and defined by the commission. The present "Public Libraries Act" does not provide for a County Library System, such as has been found to be practicable in other places, and therefore, in order to inaugurate and carry on such a demonstration, it became necessary to arbitrarily create such a county, having no regard to the political county areas as are already established under other acts of the Province. During the progress of the Survey much information was tabulated having this end in view, and it was found that when the available data had been transferred to a map of the Province, there were three areas which seemed to lend themselves to this idea: The lower end of Vancouver Island, the Okanagan Valley, and the valley of the Fraser River from Hope on the east to Ladner on the west. Very careful consideration had been given to other areas, but these three seemed to offer greater opportunities for library and book service development than any of the others. Sev-

eral months were spent in discussing ways and means, both with the Government and the Carnegie Corporation, and in August, 1929, it was agreed that the Carnegie Corporation should make a grant of the sum of \$100,000 to the commission, payable in annual installments, for the purpose of carrying out such a "demonstration" as has been suggested. At the same time the government of the Province agreed to increase the annual appropriations to the commission by a sum of \$3,500 annually. This was the situation when the present commission were appointed on Dec. 1, 1929.

While it may seem that considerable time had elapsed since the presentation of the report, yet delays are inevitable when much of the discussion must take place by correspondence, and particularly when a new enterprise is being born. Neither governments nor corporations can act with the speed of individuals in matters such as this. After giving very careful consideration to the merits of the respective areas mentioned, the commission selected the Fraser Valley area as offering the prospects for the most immediate and lasting response to the idea and methods which it is hoped the demonstration will develop and prove. *En passant*, it gave the writer a great deal of personal pleasure to be able to assist in making this selection, on account of the fact that in 1925-26, when he was chairman of the New Westminster Library Committee, in collaboration with S. T. Dare, librarian of the New Westminster Public Library, there had been evolved a plan whereby this proposed district could be served by means of vans and deposit stations from the Public Library of New Westminster. Financial consideration having prevented the further development of the plan, it had been dropped, but the idea still persisted, and when such a plan became possible through the kindly and generous cooperation of the Carnegie Corporation, it can readily be understood that while the plan had been materially changed, yet the opportunity remained.

On Feb. 12, 1930, Miss Helen Gordon Stewart, M.A., Ph.D., arrived in British Columbia. She had been appointed by the commission as librarian-director in charge of the "demonstration." Full of enthusiasm and possessing those qualifications of initiative and determination so essential to the success of such an undertaking, coupled with a practical and theoretical background, she very soon got to work, and now at the time of writing we may say that the work is well under way.

This is a short account of the progress of a new venture in book service which we hope

and believe will be a "demonstration" in very truth. Now what is it that we hope to achieve? What are our objectives? Shortly stated, they are as follows:

- I. The creation of a library district in the Fraser Valley, in which, according to some accepted plan of federation, the different municipal and other political units in the territory agreed upon will pool their interests and resources in this field, and operate jointly, a service for the common good of the whole district. This involves—
 1. The experimental selection and limitation of a workable area neither too large nor too small for effective operation.
 2. Building up through publicity, education and demonstration, the public opinion necessary to bring a federation into effect.
 3. Devising and setting up the legal machinery required.
 4. Testing it out with the needs of other localities in view.
- II. The organization of a library service within this area, according to the best standards of County and Extension work today, including
 1. A distributing system, with,
 - a. A radiating centre.
 - b. Branches in the main centres of population.
 - c. Deposit stations where necessary.
 - d. Book collections in schools.
 2. Open lines of communication and transportation to keep the stock of books fluid and flexible, and to supply special wants as they arise,
 - a. By book automobile traveling definite routes according to schedule, and,
 - i. Changing the books at the different stations at regular intervals.
 - ii. Gathering up special requests on one visit and supplying the books to satisfy them on the next.
 - iii. Checking on the needs and wants of each locality through an attendant librarian.
 - iv. Circulating books from the truck itself to isolated families en route.
 - v. Helping to carry through an organized school service.
 - b. By telephone and parcel post.
 - c. By perambulating librarians,
 - i. Readers' Advisers scheduled at each of the branches approximately one day per week.
 - ii. Special school librarian, organizing and visiting.
 - iii. Director and organizer.

3. Trained staff, especially selected with needs of locality in view, and probably including,¹
 - a. Director and supervisor.
 - b. "County" librarian, in charge of general distributing system, and capable of doing Readers' Adviser work.
 - c. Her first assistant, if possible a trained librarian with qualifications and experience for school and general children's work.
 - d. A more junior member of the staff capable of doing good office work, and looking after the routine parts of cataloging and filing.
 - e. An assistant to the Director, able to carry the detail of some of the experimental projects, to act as private secretary, and possibly to do certain Readers' Adviser work in the branches at this end of the Valley.
 - f. A chauffeur, who will also take on part of the general publicity program, organize and map out the main service areas, and help in a general way when the truck makes its rounds.
4. A system of administration following standard procedures and principles in,
 - a. Budgeting and cost accounting.
 - b. The keeping and using of records.
 - c. The selection and organization of books and periodical stock in the best interests of the library public, including approved techniques in,
 - i. Book ordering.
 - ii. Classification and cataloging.
 - iii. Preparation of books for use.
 - d. The circulation and other use of this stock according to the rules and regulations best calculated to serve local interests and at the same time to safeguard the property of the commission.
 - e. Maintenance, etc.: Keeping the books in good repair; taking inventory periodically and setting up methods to minimize loss and destruction; running the "plant" effectively and economically; checking staff output, method, organization and operation in general, with a view to maximum efficiency.

III. The setting up and trying out of certain experimental projects leading to,

1. Better ways of finding the reading needs of the community, and organizing them.
 2. Better methods for satisfying both old and new needs.
 3. Better measurement of achievement, so that through experience one may avoid mistakes, set up plans with a certain predictable assurance of their doing what they are intended to do, get some idea of the relative importance of different kinds of service, and in general make a purposeful organization instead of a hit-and-miss one as an agency for community and individual development.
- IV. The consolidation of all experience in the Fraser Valley, continuously and progressively, and its application to larger needs, both in other parts of the Province and relation to similar situations wherever they occur.

This is our aim in its main essentials. Plans have so far developed that it is hoped that September, 1930, will see the opening of one or more branches in the area accompanied by the operation of our van. To appreciate the magnitude of the task before us may I, in conclusion, briefly sketch the situation.

The Fraser Valley is an area running from the United States boundary on the south to a few miles north of the Fraser itself, a distance of some twenty miles. From Hope, a small town on the east, to Ladner, a similar town on the west, is nearly eighty miles; the district, therefore, comprises about 1600 square miles, divided into twelve or thirteen municipal areas, each of which has its own council and school board. Good roads, however, make possible communications from end to end of the valley and the presence of both steam and electric railroads, together with steamboat facilities on the river itself insures a constant, all-the-year-round possibility of carrying on the work. Each municipality presents a slightly different problem to be solved. Chilliwack, for instance, is somewhat closely knit and self-contained. Surrey and Langley offer us the contrast of widely spread farms and residences. One thing, however, they have in common, the almost utter lack of library facilities. A few local associations have struggled to serve their needs with varying success, but as the reader will readily appreciate, the whole offers a most fertile field for experiment. From time to time the commission will be allowed space in *THE LIBRARY JOURNAL* to keep those interested informed of the progress of an experiment which we can only hope will be of lasting benefit, not only to the Fraser Valley area but to all those as yet undeveloped fields where so much remains to be done.

¹ An alternative recommendation as to staff may be submitted later.

THE LIBRARY JOURNAL

June 15, 1930

Editorial Forum

THE CONFLICT of internationalism, nationalism, localism, between world peace, national aggrandizement and local interests keeps the world in storm and is even reflected in the otherwise quiet field of library activity. The London conference looking toward international peace was sadly embarrassed by selfish nationalism expressed in the nationalists' pressure for big navies, and Mussolini's fiery oratory has since gone to the dangerous extreme. India is in upheaval because of its national and natural desire for greater freedom, but embarrassed not only by the localism of religious dissensions but of the native states which threaten disaster should Great Britain withdraw her protecting hand. Our own Constitution was nearly wrecked at the beginning by the conflict between large and small States, and the recent tariff debates have not been between national parties but between the representatives of local interests, as sugar in Louisiana and citrus fruit in Florida. The library profession, like all other professions, is international in motive and scope, and is helping to make the world one, but against this high endeavor there are national prejudices and local interests. New York calls preachers from London and Edinboro, great doctors come to us from Vienna and elsewhere, and in turn Dr. Fosdick and Dr. Cadman and the Mayo Brothers are welcomed abroad. Heretofore there have been welcomed receptions and exchanges of librarians from other countries exemplified in the specific instances of President Keogh and President-elect Strohm, and the scheme of exchange of librarianships between our own and other countries. There is danger ahead that a selfish nationalism may make difficulty in the future, and the localistic spirit was strongly shown in the recent contest regarding the Brooklyn librarianship. And now it has become understood that the employment of aliens within the library systems of Greater New York is not agreeable to the municipal authorities, and though no official action has been announced, it has seemed

desirable to employ none other than American citizens, or at least those who have taken out first papers toward naturalization. The American Library Association includes Canada within its comprehensive name, and local library schools welcome students from our sister nation and foreign countries as well as all our States, yet a Canadian applicant for library employment has recently been refused opportunity here. If this spirit spreads through our publicly supported libraries, there will still be refuge for wholesome internationalism in our college and university libraries, so that there may still be exchange librarianships as well as exchange professorships.

THE RETIREMENT of M. Roland-Marcel as head of the Bibliothèque Nationale, recently announced, is a loss at once to that great library, still the largest in the world, to France, and to the library profession the world over. In the few years of his service as the Administrateur he has brought the French national library into line with library progress, has made a careful study in his American visit of American libraries, and has been a leader in international library activities, and he has won for himself the highest respect and regard of the library profession. American librarians will especially miss his ready cooperation, and it is to be hoped that the plans he has made for American and other exhibits in the Rue Richelieu may be carried out by his successor. His service to his own nation, culminating in the report on French libraries, issued this spring and summarized on other pages, should be a valuable stimulus for library development. France has the greatest of libraries, and in the early days of the Société Franklin set the pace for popular libraries and the interest of children in libraries which America was later to take up. The new Administrateur Général, M. Julien-Maurice Cain, has been a professor at the university and a section chief in the Foreign Office.

THE BOOK PUBLISHERS, having surrendered in the long waged battle over the importation for libraries of original English copies without restriction, the American Library Association, and libraries in general are now in position to favor positively and heartily the Vestal Copyright Bill which has been introduced into the House by the Patents Committee and is now printed as H. R. 12549. At this writing there is a possibility that action may be obtained from the House within the short session, though this hope may prove to be fallacious by the time this number reaches readers. In any event, no harm will be done by urging Congressmen to support this bill,

which is now practically favored by all the several book interests, and if the bill can be passed by the House either within the present short session or early in the long session, beginning in December, there is every reason to suppose that the Senate will also take favorable action, and that we may enter the International Copyright Union and insure the rights of our authors abroad within the coming year.

THE BOOK PUBLISHERS, or certain of them, have taken another action in which librarians will cordially concur in making large cuts in book prices. How far this will be general throughout the publishing trade is yet to be determined, and the experiment will be watched with the keenest interest from the library point of view. It was precipitated by the enormous sale of Wells' *Outline of History* in the dollar edition, for which the demand exceeded the possible supply from the presses of Doubleday, Doran & Co. for several months, but whether this success can be made general is a question at practical issue. To halve the price means that sales must be doubled to give the author his present royalty return, now none too large, while a book store must sell nearly three times as many books to cover the increment of rent, clerical force and overhead generally. Whether the book market can be extended in this wise certainly is an interesting gamble on the part of publishers pioneering in the present experiment. A number of leading publishers more conservatively minded have joined in a statement that they regard the extreme cut as economically unsound, as a blow to the retail trade on the ground indicated, and it is generally agreed that the retail book store, like the library, is a necessary means of successful book distribution. It is probable that at least an outcome of the present situation will be a lowering of the extreme prices for books, though perhaps not in the startling proportion recently announced by the publisher making the new departure.

SUBSTANTIAL progress has been made toward the "Journal for Discussion," which has itself been under discussion for two or three years past. The Carnegie Corporation has undertaken to finance the proposed periodical by a grant of \$5,000 annually for five years, and the faculty of the Graduate Library School of Chicago University is willing to undertake the editorial responsibility, while the Chicago University Press will undertake the publication. The name of the periodical has not yet been determined, but care will be taken to avoid confusion with existing library periodicals. It is hoped to obtain five hundred subscriptions at

the start in the expectation that with the Carnegie grant this will finance the plan. The purpose of the periodical will be, in discrimination from the field of other periodicals, to cover subjects for which these periodicals cannot afford space. In other words, to present library studies of a more extensive character than the usual periodical articles. Such a contribution as that of Miss Mudge, which *THE LIBRARY JOURNAL* was regretfully forced to decline, may well be a useful feature of the initial number of the periodical, which it is hoped to start early in 1931. Success to it.

THIS great country of ours is so wide and the library profession is now so large that there is room for two great gatherings, and simultaneously with the conference on the Pacific Coast will be that on the shores of the Atlantic at Swampscott, already familiar as a favorite library meeting place. In this the State associations of Massachusetts, Vermont, Rhode Island, Connecticut, New York, and New Jersey will officially participate, as well as other organizations, like the Western Massachusetts Library Club, the Special Library Association of Boston, the New England School Library Association, and the many groups which deal with specific divisions of the library field. It is not intended that this shall be a magnet to draw from the California meeting any librarians who can possibly make the transcontinental journey, but only to provide a substitute gathering for those who are denied the opportunities of the longer absence from home duties which the larger meeting involves.

THAT there will be a good delegation from the East to Los Angeles is sufficiently indicated by the arrangements of Mr. Faxon's travel committee for the special train which is to make the westward journey. The famous earlier train of "the seven sleepers" will this year be outdone by a train of ten sleepers, accommodating approximately two hundred persons, with the necessary baggage cars, two diners, and a club and observation car—which is certainly traveling de luxe. The post conference travel plans are exceptionally varied and attractive, including a party of twenty to Hawaii, about seventy already registered for San Francisco and the Yosemite, nearly two-score for the trip through Bryce and Zion Canyons, while ten or more librarians propose to join the party for Mexico City, arranged by Mr. Patison of Hollywood. Never has there been such a varied opportunity for sight-seeing and educational travel as in This Year of Grace 1930.

Amusement Map of Los Angeles County

On the back of this map are listed principal restaurants, hotels, cafés, motion picture studios, ball rooms, and places of interest. Copies may be obtained at the Los Angeles Chamber of Commerce, Information Desk.

Los Angeles Restaurants and Eating Places

EATING PLACES NEAR HEADQUARTERS

BILTMORE DINING ROOMS—

Sweet Shop (Olive Street).

Sandwich Shop (entrance on Fifth Street, through theater entrance).

MAYFLOWER HOTEL—Grand Avenue, across from Biltmore.

Bull Pen Inn—60 cent lunch—excellent. (Overlooking library grounds.)

POLLY'S CHERRIO TEA ROOM, 623½ South Hill Street—60 cent lunch, \$1 dinner.

CLARK HOTEL COFFEE SHOP, Hill Street between Fourth and Fifth—45 cent and 60 cent lunch.

AILEEN TEA ROOM—Brack Shops—520 West Seventh Street.

FRENCH TABLE D'HOTE, 719 West Sixth Street—50 cent lunch, 85 cent and \$1 dinner.

CAFETERIAS

LA PALMA, 615 South Grand Avenue—Excellent food, Spanish atmosphere.

THE ARBOR CAFETERIA, 309 West Fourth Street—Same management as La Palma.

THE COLONIAL, 642 South Flower Street.

TEA ROOMS

MARY LOUISE TEA ROOM, 2200 West Seventh Street, overlooking Westlake Park—Favorite place for parties.

BULLOCK'S WILSHIRE TEA ROOM, 3050 Wilshire Street—Bus service. Opportunity to see Los Angeles' most beautiful store.

BULLOCK'S TEA ROOM, Seventh and Broadway—Delightful place.

SERENDIPITY, 2966 East Colorado Street, Pasadena.

HOLLYWOOD EATING PLACES

(Movie stars often seen here)

BROWN DERBY, 1624 North Vine, near Hollywood Boulevard.

HENRY'S, 6321 Hollywood Boulevard.

MONTMARTRE CAFE, 6757 Hollywood Boulevard.

MUSSO FRANK GRILL, 6669 Hollywood Boulevard.

ROOSEVELT HOTEL—Blossom Room—7006 Hollywood Boulevard.

FOREIGN RESTAURANTS

CHINESE

MAN JEN LOW CAFE, 309½ Marchessault Street—Best Chinese food in the city.

FRENCH

FRENCH TABLE D'HOTE, 3070 West Seventh Street, near Amabassador Hotel.

TAIX FRENCH RESTAURANT, 321 Commercial Street.

VICTOR HUGO, 619½ Grand Avenue.

GERMAN

BARTEL'S DELICATESSEN AND RESTAURANT, 316 West Fifth Street.

HUNGARIAN

HUNGARIAN KOSHER RESTAURANT, 534½ South Spring Street.

SCHWARTZ' LITTLE HUNGARY CAFE, 5511 Santa Monica Boulevard.

ITALIAN

CAFE D'ALESSANDRO, 6729 Yucca Street, between Highland and MacCaddum.

MONA LISA, 2534 West Seventh Street.

MORA'S, 739 South Hope.

Alvarado, between Wilshire and Seventh Street.

315 South Spring Street.

235 North Broadway.

ZUCCA INN, 610 North Spring Street, near the Plaza.

MEXICAN AND SPANISH

CASA VERDUGO SPANISH INN, 101 Mountain (Glendale).

ESTRADA'S SPANISH KITCHEN, 3520 Wilshire.

LA GOLONDRINA, Paseo de Los Angeles, near the Plaza.

RUSSIAN

THE DOUBLE HEADED EAGLE, 9174 Sunset Boulevard.

MOSCOW INN, 8353 Sunset Boulevard.

SWEDISH

BIT OF SWEDEN, 615 South Vermont.

Commission to Visit Learned Libraries

OXFORD UNIVERSITY has appointed a Commission to visit university and other learned libraries in Europe and America, with a view to extensions of the Bodleian Library. The arrangements for the tour in America, which will begin about the middle of September, are in the hands of the Rockefeller Foundation, which is assisting the University in its investigation. Members of the visiting commission are Sir Henry Miers, chairman; Sir Frederic Kenyon; Sir Edmund Chambers; G. N. Clark of Oriel College, Oxford; H. R. F. Harrod of Christ Church, Oxford; and Kenneth Sisam of the Clarendon Press, Oxford, secretary.

Catholic Periodical Index

CATHOLIC magazines now have their own periodical index in the *Catholic Periodical Index*, which began its first volume in March. It is published for the Library Section of the National Catholic Educational Association by the H. W. Wilson Company. Subscription is on service basis. The next quarterly issue, in June, will add six magazines to the thirty-six indexed in the first number. The third issue will appear in September, and material will be cumulated in the December quarterly number. As in the early days of *Poole's Index*, the indexing has been done by a staff of volunteer librarians. Twenty-six Catholic colleges and universities have contributed from \$5 to \$100 to the Reserve Fund which has made it possible.

Librarian Authors

CLARA V. WINLOW wrote her first novel at the tender age of twelve. This one piece of work is, unfortunately, lost, though certain other writings that date not so many years later have been resurrected and have found publishers. Mrs. Winlow first broke into print during her college days at Stanford University, when she was greatly interested in child psychology. At this time innumerable articles, with a slant toward the picturesque, such as *Pin Luck*, *Children's Superstitions*, and *Children's Imaginary Companions*, appeared in educational magazines, references to which may still be found in various works on education. After college, a couple of years' stay in Europe brought her nine commissions for various of the *Little Cousin* books from L. C. Page & Company, and also for *The Story of the Slavs*, which was never completed. But all this time, great as was her interest in writing, another interest quite as great drew her from it. This was the fascination for "all sorts and conditions of people"; the desire to learn from them, to help and get help. Finally she became one of the first women inspectors employed by the New York City Tenement House Department, and during the war she accepted a special war service position with the Los Angeles Y. W. C. A. It was this experience, combined with her inborn love of books, that made her agree to enter the Los Angeles Public Library, California, in 1920, to develop the Foreign Extension Department, and this no doubt accounted for the rapid and solid growth of the department during the two years she remained there.

During this period it was suggested that the Magazine Section of *The Los Angeles Times* (then edited by Harry Carr) would probably be interested in her wide knowledge of local foreigners. So Mrs. Winlow left two sympathetic articles dealing with certain nationalities

some wonderful power, for the people did everything that she suggested at once, although he had been trying in vain to get the same groups to pose for him. For about a year

CLARA V. WINLOW

after this she had a feature article in practically every weekly issue of *The Times*.

Since then she has been secretary of a large humane foundation and instructor in "Folk Stories and Folk Songs of Our Immigrants" and other courses in the University of California Extension Division. Now, although she says she is lonesome at times for outside service work, she is back at her writing. Last year Macrae Smith Company brought out her *The Kitten That Grew Too Fat*; Longmans, Green, her translation of *The Magic Flutes*, from the Czech (magnificently illustrated by Rudolf Mates), and Raf D. Szalatnay, another translation, *Flick and Flock*. An original juvenile story has recently started on its quest for a publisher, and she is just completing the most ambitious work yet undertaken, a hundred thousand word autobiographic story, based on her joyous and glamorous school days in the pioneer town in Nebraska where she was born. She has also been commissioned to do several more translations, among them being Bozena Němcová's *The Grandmother*, probably the most loved book of the Czechoslovaks.

The King's Kitty is Ill.

at *The Times* office, and Mr. Carr liked them so well that he asked her to go with their photographer to get illustrations for them. The photographer reported that she must have

The Open Round Table

Pratt Bill Before Congress

To the Editor of THE LIBRARY JOURNAL:

May I call the attention of librarians to a bill now before Congress which is of special interest to a small group of librarians and of vital concern to a small proportion of our population? I am referring to H. R. 9042, introduced by Congresswoman Ruth Pratt of New York, providing for more funds for books for the blind. An annual sum of \$100,000 is appropriated to be expended under the direction of the Librarian of Congress to provide books for the use of the adult blind of the country. The Librarian of Congress is empowered to arrange with other libraries to serve as local or regional centers.

At the present time the appropriation made by the government for the American Printing House for the Blind must of necessity be used almost entirely for books for students in our blind schools. The number of titles produced in this country each year for adult blind is pitifully small. The printing of books for the blind is not of commercial advantage—the sale of them is too limited and the cost of production too high. It is necessary that funds for their production should come from some source, most logically the Federal government.

The Pratt bill is sponsored by the American Foundation for the Blind, and the Executive Board of the American Library Association approved it without a dissenting vote. The librarians for the blind will, I am sure, appreciate any assistance the other librarians of the country can give toward the passage and signing of this bill. Letters to representatives in Congress will be most helpful.

MABEL R. GILLIS,

Chairman, A. L. A. Committee on Work with the Blind.

The Wrong J. T. Jennings

To the Editor of THE LIBRARY JOURNAL:

The article entitled "Librarianship as a Profession in College and University Libraries," recently republished in a collection under the title "The Library Within the Walls," through hasty decision was attributed by me to Mr. Judson T. Jennings. This article was the work of Mrs. Jennie Thornburg Jennings, assistant librarian of the Public Library of St. Paul; it was originally published in *THE LIBRARY JOURNAL* of 1918 and was signed J. T. Jennings. The index to this volume, by some

chance, did not include the article with other references to Mrs. J. T. Jennings, and, unfortunately, the presumption that Mr. Jennings was the author was not challenged until it was too late.

KATHARINE T. MOODY,
Chief, Reference Department, St. Louis Public Library.

Guild Representative Makes Wrong Statement

To the Editor of THE LIBRARY JOURNAL:

It has come to my attention that a representative of the Junior Literary Guild has been stating, or implying, that the Carnegie Library of Pittsburgh is a subscriber to the book service of that organization. No subscription has been placed by this library with the Junior Literary Guild or with any other children's book club.

ELVA S. SMITH,
Boys and Girls Department, Carnegie Library of Pittsburgh

President of Literary Guild Replies

To the Editor of THE LIBRARY JOURNAL:

On one or two occasions the Literary Guild has heard reports that untrue statements have been made by its representatives with regard to the relationship of certain librarians with the Guild. Both the Literary Guild and the Junior Literary Guild have enjoyed extremely cordial relations with outstanding librarians in the United States, and it is not only entirely unnecessary for anyone to misquote those who are not supporters of the Guild idea, but entirely contrary to the desire and intentions of this organization.

The Guild is trying to build up a group of men and women who will represent it honestly and in a dignified manner. If any librarian meets any sort of misrepresentation, the Guild will consider it a great favor if facts are at once sent to the Guild office, giving the name of the person guilty of such misrepresentation, if that is possible.

In the present instance, reported in this issue, it seems perfectly logical that an innocent mistake has been made through a misunderstanding. The Carnegie Library has for some time been a member of the Literary Guild and the Carnegie Library, Northside Pittsburgh, is a member of the Junior Literary Guild.

HAROLD GUINZBURG,
President, Literary Guild.

Current Library Literature

Intended to index with brief annotation, or excerpts when desirable, articles in library periodicals, books on libraries and library economy and other material of interest to the profession. The subject headings follow those in Cannons' "Bibliography of Library Economy," to which this department makes a continuing supplement. Readers are requested to note and supply omissions and make suggestions as to the development of this department.

ADVERTISING LIBRARIES. See SPECIAL LIBRARIES.

BACON, FRANCIS. See CLASSIFICATION SCHEMES.

BALTIMORE. See ENOCH PRATT FREE LIBRARY.

BEXLEY (OHIO) PUBLIC LIBRARY

Bexley Public Library. illus. LIB. JOUR. 55:497-498. 1930.

The design of the exterior was studied from a number of minor French buildings of the 17th century. The cost of the building and furniture was \$68,000.

BOOK SELECTION

Crowell, E. H. Order and book selection in small public libraries. *Libraries*. 35:270-272. 1930.

Practical suggestions for economical buying.

BOOKBINDING MATERIAL

Nitz, Herman. *Die Materialien für Buch und Bucheinband und ihre sachgemässe Verarbeitung. Mit 33 Falz- und Ausschliessschemas. Für die Praxis der Buchbindereien, Buchdruckereien und Papierverarbeitung.* Halle (Saale): W. Knapp, 1929. vii, 131. p. illus.

BOOKS AND READING

Hazlitt, Henry. Who reads the classics now? *Nation*. 130:449-451. 1930. Reprinted in *North Carolina College for Women Library Notes*. 9:179-183. 1930.

Summary of reports from the Cleveland, Los Angeles, St. Louis, New York public libraries, and from publishers. "The general conclusions that can be confidently drawn from this survey are perhaps meager. A few generalizations, however, seem reasonably safe. The current reading of older books, as shown by the experience of libraries and by the reprint series of many publishers, is at least far from negligible. Indeed, the current sales of, say, the ten leading old books, in all editions, would probably compare quite favorably with those of the ten leading new books. We must remember, too, that the reading of older books is probably comparatively greater than either current sales of such books or library borrowing would indicate; there is, for example, the important factor of inherited home libraries."

BOSTON (MASS.) PUBLIC LIBRARY. See JEWISH BOOK WEEK.

BOYCE THOMPSON INSTITUTE FOR PLANT RESEARCH

Troy, Zeliaette. Boyce Thompson Institute for Plant Research. illus. plans. LIB. JOUR. 55:400-405. 1930.

By the librarian of the Institute (Yonkers, N. Y.) The library, begun in 1921, has about 11,000 bound volumes and 4000 fully catalogued pamphlets. Over 450 publications which fall within the Union List's definition of "periodicals" are received currently, and as many more current "documents." "Since elementary reference work is unnecessary, much of the time of the library staff can be devoted to the reviewing of current literature and to the building of bibliographies in collaboration with the specialist in charge. The bibliography on seed germination made under the direction of Dr. Crocker will be unique in its comprehensiveness when it is completed."

BUDGET. See LIBRARY BUDGET.

BUSINESS LIBRARIES

Special Libraries for April, 1930 (vol. 20, no. 4) is a Public Library Business Number, with articles by Marian C. Manley (a general and detailed survey of business libraries in public libraries throughout the country); William Alcott, on the Edward Kirstein Memorial Library in Boston; Rose Vormelker, on the Business Information Bureau of the Cleveland Public Library; Dorothy G. Bell, on the Business Branch of the Providence Public

Library; Ethel Cleland, on a typical day at the Business Branch of the Indianapolis Public Library; R. A. Sawyer, on the Economics Division of the New York Public Library; Ola Wyeth, on the Business Branch of the Savannah Public Library in the plant of the *Morning News*; and Anita Levy, on the Business Branch in San Francisco.

See also SPECIAL LIBRARIES.

CALIFORNIA, UNIVERSITY OF. LIBRARY.

Goodwin, J. E. The new library building for the University of California at Los Angeles. illus. LIB. JOUR. 55:451-452. 1930.

Dedicated March 27-28, 1930, the new reinforced concrete building has a frontage of 221 ft., a depth of 244 ft., and is three stories high. The east wing and part of the stack wing are left for future construction. The first unit of the stack wing at the center rear of the building includes seven levels and is sufficient for immediate requirements.

CANADA. See LIBRARIES, SUBHEAD CANADA.

CATALOGING

Mann, Margaret. *Introduction to Cataloging and the Classification of Books.* A. L. A., 1930. 424 + xvi p. \$3.

"Discusses the Cutter, D.C. and L.C. classification systems, dictionary catalog, classified catalog, author, title, subject, and form entries, subject headings, L.C. cards and their use, arrangement of cards, department routine, quarters, equipment, supplies, organization and administration of the department. Appendices list L.C. cards which illustrate A.L.A. rules, discuss traits of the cataloger, tell how to compute cataloging costs, and make comparison of output in catalog departments of public and university libraries of 100,000 volumes."

A symposium of four reviews appears in LIBRARY JOURNAL 55:464. 1930. "Chapters thirteen to eighteen furnish information to be found nowhere in cataloging literature except scattered through numerous books and periodicals. These chapters are a veritable mine of information and suggestion."—Ruth Wallace.

Moore, F. N. Stumbling blocks. *Mich. Lib. Bull.* 21:154-155. 1930.

"There are days, of course, when you wish you could have your book collection made to order, so many volumes in each class, neatly labeled with name in full on the title page, and on the verso, the class number, subject headings and added entries. But what a dull life! The stumbling blocks are the most interesting features of a cataloger's existence." Some of these are uniformity of author's name, consistent and up-to-date subject headings, and classifications for the new geography.

See also TEACHERS COLLEGE LIBRARIES.

CHILDREN'S READING

Briggs, E. D. Selecting readers and primers for use in library children's rooms. LIB. JOUR. 55:502-503. 1930.

Standards of subject matter, language, mechanics and method to be applied to readers and primers. Evolved by a committee of the A.L.A. Section for Library Work for Children.

See also ILLUSTRATED BOOKS FOR CHILDREN; LIBRARY WORK WITH CHILDREN.

CLASSIFICATION SCHEMES

Diamond, E. Francis Bacon; a sketch of his life and a summary of his influence on classification. (continued.) *Lib. Assistant*. 23:92-95. 1930.

The original L.C. classification was based on that of Francis Bacon, and the classification scheme of the British Museum, which came into being somewhere about 1836,

is described by Mr. Sayers as "a survival on large lines of the classification theories of Bacon and Brunet." The D.C. scheme is definitely based on the Inverted Baconian scheme of Dr. William T. Harris, produced in 1870.

See also CATALOGING.

COLLEGE LIBRARIES

Bishop, W. W. In aid of college libraries. *Lib. Jour.* 55:445-448. 1930.

To assist the Carnegie Corporation in formulating a policy of helping colleges with gifts of suitable books for their libraries, President Keppel organized an "Advisory Group" on College Libraries, which has now had several meetings and has submitted a questionnaire (printed in full at the end of this article) to which over 150 colleges (i.e., liberal arts colleges having a four-year course) have submitted answers. A very considerable mass of statistics about college libraries, much of it never before available, is being assembled.

This paper is also printed in the May issue of the *Bulletin* of the Association of American Colleges.

Lewis, E. F., comp. College dormitory or chapter house library. *Libraries.* 35:246-247. 1930.

A list of 50 essential titles which "it is hoped will not only make unnecessary many trips to the college library on dark nights, but will also encourage students to build up their private libraries using these suggestions as a guide."

See also UNIVERSITY LIBRARIES.

COUNTY LIBRARIES

Josselyn, L. W. A successful county campaign. *Penn. Lib. Notes.* 12:105-111. 1930.

Address given before the Pennsylvania Library Association, Oct. 24, 1929. Pennsylvania with its 200,000 farmers has an agricultural population of over one million practically all without library facilities. To this number there are nearly four million citizens more living in villages, mining communities, oil districts and in the mountain patches, a total of five million of people without the chance to obtain the free use of books. The paper describes the county libraries of Monroe County, N. Y., and Jefferson County, Alabama, as two upon which future Pennsylvania county library systems might well be modeled.

Planning the county branch library. *Ln. and Book World.* plans. 19:278-279. 1930. To be continued.

Plans of two English county branch libraries: Durham City and Chester-le-Street (Durham).

PENNSYLVANIA

True, M. A. The Erie County Library campaign. *Penn. Lib. Notes.* 12:113-117. 1930.

A campaign directed towards obtaining \$25,000 from the County Commissioners in November for demonstration work in the county.

ENOCH PRATT FREE LIBRARY, BALTIMORE, MD.

Casey, W. J. Profitable employment of leisure hours. Baltimore Association of Commerce. illus. *Baltimore.* 23:31-41. 1930.

Describes the eight departments into which it is planned to divide the new library building. "The library at present is going through its most critical period, for, with its present inadequate funds and an increase of nearly 150 per cent in its service during the past three years, its entire book collections and routine are being reorganized and put in shape for the new building, and it is feared that many portions of the service will be ineffective for some time unless salaries are provided to carry on this vast amount of preparatory work before the move is made into the new building."

FINANCE. See LIBRARY BUDGET.

FINANCIAL LIBRARIES. See SPECIAL LIBRARIES.

FLORIDA. See PUBLIC LIBRARIES, SUBHEAD FLORIDA.

FLORIDA STATE COLLEGE FOR WOMEN. LIBRARY.

Library of the Florida State College for Women. illus. *Lib. Jour.* 55:498-499. 1930.

Built in T-shape and three stories high, the completed building (the first wing was built in 1925) has a stack capacity of 180,000 volumes.

GOVERNMENT DOCUMENTS

Schmeckebeier, L. F. The government and the libraries. *Lib. Jour.* 55:489-494. 1930.

"In order to make an adequate and fair distribution, it is recommended that the libraries be divided into the three following classes: (1) Twenty central depositories, which shall agree to keep two copies of each publication. (2) Five hundred general depositories, which shall have the privilege of selecting in advance the classes of publi-

cations to be received. (3) One thousand restricted depositories, which shall be entitled to receive publications on application within three months after the issuance of *The Monthly Catalog*, in which the books are listed. The twenty central depositories in class one are designated to make government publications available in all parts of the United States."

HIGH SCHOOL LIBRARIES

Osborn, T. E. The high school library. *Topeka. Kansas Teacher and Western School Journal.* 31:17-19. 1930.

Suggests twelve standards by which a successful high school library should be judged.

HOLIDAY BUREAUS

McClellan, A. W. The Holiday Bureau, an extension of library service. *Lib. Assistant.* 23:97-100. 1930.

"Organizing is best begun in time for the Bureau to be opened by the first week in May. . . . It is a good thing to interview personally a representative of each of the railway companies, who are only too pleased to advise, provide literature and posters. Get into contact with local agents for motor coaches and steamship lines, who will supply regularly useful literature. Make a list of telephone numbers of all people likely to supply literature or information so that they can be obtained quickly. When no literature available satisfies an inquiry phone the appropriate railway company or agent. As far as possible all literature and information should be classified and indexed in some way so that order is obtained in the great variety of information which will soon accumulate. In the arrangement of the room a bright holiday atmosphere is possible if colored posters of the better type are used for decoration. Spare literature can be placed in the public's reach for taking away, but all literature held for reference is best kept out of sight. . . . A small collection of reference books may be kept handy. It can include gazetteers, railway holiday guides, which cover the whole country, road books, contour maps, etc. Time tables for motor coaches and railways can be placed on the public counter."

HOSPITAL LIBRARIES

Beausejour, Mary. How the hospital serves the community. *Mich. Lib. Bull.* 21:117-120. 1930.

Personal experiences of the hospital librarian of the Saginaw Public Libraries. The hospital librarian is "the only person on the whole staff who doesn't treat the individual as a case. No matter what the opinions of the nurses or the doctors or of the patient's family may be, here is someone who will treat the patient as a human being."

ILLUSTRATED BOOKS FOR CHILDREN

McGregor, Della. Who are illustrating our children's books? *N. Y. Libs.* 12:65-70. 1930.

Extract from paper delivered at A.L.A. midwinter meeting, Chicago, 1929. Discusses the work of Boris Artzybasheff, Theodore Nadejen, Ivan Bilibin, Elsa Beskow, the Biancos, Elizabeth MacKinsty, and Anice Cooper. A suggestive list of illustrators will appear in the August issue.

INDUSTRIAL LIBRARIES. See SPECIAL LIBRARIES.

INSECT PESTS

McComb, D. Q. Faithful in that which is least. *Libraries.* 35:190-192. 1930.

"A brief narrative of some of the methods by which the efficiency of the Los Angeles Public Library is promoted by the Building Department." The department worked out its own methods for the control of insect pests, prevention of mold, manufacture of floor wax, and landscaping the staff cafeteria, at much lower cost than any estimate furnished by various "services."

INSURANCE LIBRARIES. See SPECIAL LIBRARIES.

INTERLIBRARY LOANS

Walter, F. K. The burden of interlibrary loans. *Libraries.* 35:177-181. 1930.

Paper read by the librarian of the University of Minnesota at a meeting of the American Library Institute in Washington, D.C., May 13, 1929. "Our experience seems to indicate that we are rapidly approaching a period where the law of diminishing returns will act very perceptibly. We are already feeling its effect. The Library of Congress has long fenced its range against the herds of graduate students. Only two weeks ago the Boston Medical Library, to which we are indebted for many loans of scarce and valuable books, informed us that the increase in demands for interlibrary loans had compelled them hereafter to confine such loans to the middle Atlantic states and Eastern Canada." The Engineering Societies Library and others have put loans on a fee basis.

JEWISH BOOK WEEK

Goldstein, Fanny. Jewish Book Week. illus. LIB. JOUR. 55:460. 1930.

Jewish Book Week was first suggested in 1927 by Rabbi S. Felix Mendelsohn of Chicago, and covers the week in which Lag B'Omar occurs, this year from May 11 to May 17. Between May 20 and June 2 last year the Boston Public Library arranged a special exhibition in the Central Library as well as in several branches.

LEGISLATION. See LIBRARY LEGISLATION. §

LIBRARIANS' LIBRARY

New York State College for Teachers, Albany, N. Y. Library School. Staff. Professional literature for librarians. N. Y. Libs. 12:90-93. 1930.

Recent articles and publications on administrative and reference aids, book selection aids, county libraries, library service for boys and girls, and maps and posters.

LIBRARIES

Beddie, J. S. *The Ancient Classics in the Medieval Libraries*. Cambridge, Mass.: Medieval Academy of America, 1930. pap. 20p. Reprinted from *Speculum*, vol. V, no. 1, Jan., 1930.

Includes appendix of library catalogues of the period 1050-1250 which have appeared in print, but are not listed by Gottlieb.

—. *Libraries in the Twelfth Century; Their Catalogues and Contents*. Boston: Houghton, c1929. pap. 23p. Reprinted from *Haskins Anniversary Essays*.

A study of the types of literature most frequently appearing in cathedral and monastery libraries, as shown by the hundred and more catalogues of the century which have been published, notably by Gottlieb and Becker.

Keogh, Andrew. *The Library's Place in the World*. Toronto: Public Library, 1930. pap. 6p. illus. Reprinted from *Univ. of Toronto Monthly*, May, 1930.

Address by the librarian of Yale University and president of the A.L.A., delivered on the occasion of the opening of the new Central Circulating Library of the Toronto (Canada) Public Library, Easter Monday, 1930.

Traces the development of the library as a potent factor in universal education.

CANADA

Canadian libraries: history and legislation to 1929 and statistics for 1926-27. Tables. In: Canada. Bureau of Statistics. *Annual Survey of Education in Canada*, 1928. 1930. p. 157-222. Text in English and French.

VIRGINIA

Virginia Libraries for April, 1930 (vol. 3, no. 1), has articles on library legislation in the state during 1930: an article by Virginius Dabney, reprinted from the *Richmond Times-Dispatch* for March 23, on the failure of the state to provide county libraries; and an article by M. P. Robinson on suitable permanent materials for public records of Virginia.

LIBRARY ARCHITECTURE

Bonazzi, Giuliano. *Per la Creazione in Roma di una Grande Biblioteca Nazionale; Studi e Proposte. In occasione del Congresso Mondiale delle Biblioteche, Roma, Giugno 1929*. Roma: P. Sansaini [1929]. 19p. illus. plans.

LIBRARY BUDGET

Plaister, C. D. Disadvantages and advantages of a budget cut. LIB. JOUR. 55:443-445. 1930.

The consolidation of various city and county offices in San Diego, Cal., in 1928, resulted in a new evaluation of city property which left the Public Library with an income of \$84,000 instead of \$120,000. Book orders were cancelled and hours of opening curtailed, but the staff was kept together. Publicity given to the problems of the library resulted in an increase in appropriation the next year to approximately \$143,000.

Ranck, S. H. Handling a serious 'cut in a library budget. LIB. JOUR. 55:439-443. 1930.

The first consideration of the Grand Rapids (Mich.) Public Library, when \$22,021 was cut from its budget, was to curtail service as little as possible, but to keep the staff intact. When the library year closed March 31, 1930, there was an increase of 43,442 in the number of books issued for home use, practically the same increase as 1929 over 1928, and an increase of 58,830 in all records of service, less than half the increase of the year before. Large receipts from the rental collection made possible a balance of 86 cents instead of an overdraft in the budget fund. There was relatively little public complaint, that chiefly over the closing of the reading rooms Sundays and the elimination of lectures.

LIBRARY COOPERATION

Vorstius, Joris. International cooperation in intellectual work assures further success. *Libraries*. 35:235-237. 1930.

Describes the revival of the *Index Bibliographicus*, of which the last edition appeared in 1925, with headquarters at the State Library at Berlin.

See also UNIVERSITY LIBRARIES.

LIBRARY LEGISLATION

Yust, W. F. Library legislation in 1928 and 1929. LIB. JOUR. 55:452-459. 1930.

"Library support, county libraries, State libraries, and State library commissions are the subjects which occur most frequently. Several States provided more liberal support for their libraries. In others this step was prevented by the fear of increased taxation. County libraries received the largest amount of consideration. Seventeen States presented bills on this subject. Many of them failed, but new laws for their establishment were passed in Arizona, Colorado and Oklahoma, and improvements were made in a number of others. New State agencies were created in Colorado, Montana, New Mexico, South Carolina and West Virginia."

LIBRARY SERVICE TO CHILDREN

Smith, E. S. The book collection for boys and girls and its use. 4p. pap. illus.

Reprinted from *Carnegie Magazine*, March, 1930, distributed by the Carnegie Library of Pittsburgh and Carnegie Library School. Miss Smith is head of the Boys' and Girls' Department, the work of which is interestingly described here.

MAPS AND ATLASES, CASES FOR

Lewis, W. P. The care of maps and atlases in the library. illus. LIB. JOUR. 55:494-496. 1930.

Practical suggestions for housing maps and atlases, with descriptions of various types of equipment. The author, librarian of Wesleyan University, Middletown, Conn., observed the procedure at the maps rooms of the American Geographical Society, Columbia University Library, New York Public Library, and Dartmouth.

NEW YORK SPECIAL LIBRARIES ASSOCIATION

Rankin, R. B. Paying dividends. LIB. JOUR. 55:407-408. 1930.

An account of the successful work of the Employment Committee of the N. Y. S. L. A., which "cooperates with the library schools and with the public libraries' appointive officers and tries not to trespass into their province. A demand exists for all."

NEWSPAPER LIBRARIES. See SPECIAL LIBRARIES.

PERIODICAL DEPARTMENT

Wulfekoetter, Gertrude. The organization of a periodical department. LIB. JOUR. 55:448-450. 1930.

By the assistant librarian, Van Wormer Library, University of Cincinnati, Ohio. "Since familiarity with the vagaries and idiosyncrasies of periodicals due to the technical handling of them aids in the later reference work, it is advisable, in our eyes, to have one person responsible for both. It is on this basis that our periodical routine is worked out." This routine is described in full detail.

PERIODICALS

Keator, A. D. The popularity of American magazines. *LIB. JOUR.* 55:499-501. 1930.

Less than 2 per cent of our national reading is done through the agency of our organized libraries. Over 7200 magazines (as distinct from newspapers) are published in the United States and Canada. "We do not need to be pessimistic about the reading habits of our people as demonstrated by the circulation figures of our most popular magazines. The intelligentsia may criticize this list and call it the reading of our 'Babbity,' but the fact remains that any nation whose great majority continues to read such sane-minded and conservative periodicals as the *Saturday Evening Post*, the *American*, the *Ladies' Home Journal*, or the *Literary Digest* is not going to the dogs immediately, at least."

PLUMMER, MARY WRIGHT, 1856-1916.

Moore, A. C. Mary Wright Plummer, 1856-1916. *por. Bull. of Bibl.* 14:1-3. 1930.

"Mary Wright Plummer was fully equipped to become a successful writer or editor at the time she entered the library field. She would have given distinction to the field of literary criticism. She became instead a creative force in her chosen profession, not only in relation to the more popular phases of the public library's educational work but in a type of scholarship more often found in European than in American libraries." Miss Plummer was principal of the Library School of the New York Public Library from its organization in 1911 until her death in 1916. She was elected president of the A. L. A. during the last year of her life.

PROFESSIONAL READING. See LIBRARIANS' LIBRARY. PROVIDENCE (R. I.) PUBLIC LIBRARY

Sherman, C. E. The Providence Public Library, retrospect and prospect. *por. Providence Chamber of Commerce. Providence Magazine.* 41:140, 142, 144. 1930.

By the recently appointed librarian. Recommends completion of the branch building program, extension of the central library, adult education work, information service, larger appropriations, etc.

PUBLIC LIBRARIES

FLORIDA

Ahern, M. E. A winter library vacation. By one too busy to go. *Libraries.* 35:201-204. 1930.

A personal record of visits to public libraries in St. Petersburg, Clearwater, Tampa, Bartow, Sebring and Jacksonville. Miss Ahern also visited Chattanooga, Tenn., and Cincinnati, Ohio.

RESEARCH, BIBLIOGRAPHICAL

Richardson, E. C. *General Library Cooperation and American Research Books.* Collected papers by Ernest Cushing Richardson. Yardley, Pa.: F. S. Cook & Son, Inc., 1930. bds. 144p. \$2.

These papers are gathered to serve as a conspectus for the Committee on Bibliography of the American Library Association, in developing a demonstration experiment in general cooperation, based on the field of religion. . . . Thanks to a grant [from John D. Rockefeller, Jr.] it is now possible to carry forward, with system and economy and in a wholesale way, matters of cooperative selection, acquisition, extension of the published card system, cooperative classification, perhaps, and other elements of profitable cooperation recognized in library discussion as waste eliminating elements, with great practical possibilities. . . . Most of these factors are discussed somewhere in the following papers or in the similar volume on *Some Aspects of International Cooperation*.—Preface.

Schluter, W. C. An ideal library for research purposes (with particular reference to business research). *illus. LIB. JOUR.* 55:405-407. 1930.

"With the rapid increase in publications and the greater diversification of them, including also, as it will more and more in the future, research source materials, a departmentalization of general libraries according to specialized fields of knowledge appears to be only a matter of time. . . . In this connection, however, the so-called special—or what are known in academic circles as departmental libraries—seem to possess greater opportunities. They are the true forerunners as real service stations for the research student."

SCHOOL LIBRARIES

Bechtold, R. H. A principal looks at the school library. *Mich. Lib. Bull.* 21:151-153. 1930.

With bibliography of 14 titles. "In general, then, the library should be readily accessible to students, at-

tractive and inviting in appearance, furnished well and containing attractively bound, interesting books, presided over by a trained librarian and assistants who assist and encourage the educative process first and check up on books afterwards."

Pomeroy, P. G. Faculty interest in the school library. *Johnstown: Pennsylvania Council for School Librarians. Newsletter.* No. 2. (1930). no pagination.

The faculty of the Peabody High School in Pittsburgh held a Faculty Stunt Party which cleared over \$195 for the school library. The librarian should have a thorough knowledge of the curriculum and state syllabus of the Department of Education, and should attend faculty meetings in order to keep in touch with problems and activities of the school.

Texas State Teachers Association. Library Section. *Texas School Library Yearbook.* Lubbock: The Association, 1930. pap. 64p. 50c.

Second year of issue. Material received too late for inclusion in this *Yearbook* will be used in the Library Section page of the *Texas Outlook*. Partial contents: Honor Roll of advertisers, contributors, members; hints on book-buying; building up a clipping and pamphlet collection; student library assistants; suggestions on library standards for Texas schools and colleges; library training agencies; statistical directory of Texas school and college libraries.

See also HIGH SCHOOL LIBRARIES.

SPECIAL LIBRARIES

Alexander, M. L., ed. Libraries and business men; a symposium. *LIB. JOUR.* 55:391-399. 1930.

"We, as librarians, must remember that today the majority of the men and women in business come from the great universities, where the wealth of libraries is taken for granted and the book habit is acquired with their college education. While it may once have been a source of wonder that Andrew Carnegie, a great business man, should have become the patron saint of libraries, we now accept as natural the business man's reliance upon printed information and his faith in libraries." The symposium includes articles by Eleanor Cavanaugh, librarian of the Standard Statistics Co., on financial libraries; Elizabeth Wray, librarian of the U. S. Rubber Co., on industrial libraries; Florence Bradley, librarian of the Metropolitan Life Insurance Company, on insurance libraries; William Alcott, librarian of the *Boston Globe*, on the newspaper library; and Mary Louise Alexander, manager of the Library Research Dept. of Batten, Barton, Durstine and Osborn, on the advertising library.

See also BUSINESS LIBRARIES.

STAFF TRAINING

Partridge, Robert. Sidelights on staff training. *Lib. World.* 253-254. 1930.

"Even in its own interests, therefore, a library authority would be well advised for the reasons given above, to offer the assistant every opportunity for increasing his educational and technical knowledge and ability. Librarians must use the persuasive powers of a Mephistopheles and the rhetoric of a Cicero to get their committees to see matters in this light. It is equally the duty of the assistant to avail himself of this offer and by turning every scrap of knowledge acquired to the improvement of this library's service, prove himself morally and financially worthy of officiating at the altar of public service."

TEACHERS COLLEGE LIBRARIES

Pack, Cecilia. Cataloging a college library. *Mich. Lib. Bull.* 21:121-122. 1930.

"A. L. A., because of its lack of newer subject headings, is becoming quite inadequate so we are gradually adopting Sears 'List of Educational Subject Headings.' We have always felt the need of an educational index such as the 'List of Educational Subject Headings,' prepared by L. Belle Voegelien."

TEXAS. See SCHOOL LIBRARIES.

UNIVERSITY LIBRARIES

Richardson, E. C. The university library in its cooperative aspects. *Libraries.* 35:231-235. 1930. To be continued.

Read at dedication of Lehigh University library, April 25, 1930. "Cooperation is simply team work. . . .

Each contributes all that he can to the work of the other; whether student, oral teacher, or librarian. Teacher aids student and librarian, student helps librarian and teacher, librarian cooperates with teacher and student.

Broadly speaking the library is a collection of books kept for use. . . . Use is the emphatic word in the definition. Books are chosen for use, got for use, preserved for use, served for use and used."

School Library News

Clipping Books of Pictures

FORTY-EIGHT clipping books of pictures on a wide range of subjects are given extensive use by the teachers and students of Jefferson High School (Portland, Ore.). These loose-leaf books, uniform in cover and size, have proved to be more convenient and usable than a loose picture collection. Much of the material which they contain on modern poster work and design, so useful in the teaching of art, has not yet found its way into more expensive book form. The art teachers, however, are not the only ones who find these books valuable, as is indicated in the wide circulation of the books on modern interiors, American history, textiles and stage settings. Furthermore, these clipping books give free play to the hoarding instincts of the librarian and provide a permanent home for some of the fine illustrative material that floods our better magazines.

Library Permit Card

ECORSE HIGH SCHOOL LIBRARY, Michigan, has been testing the value of the recently originated Library Permit Card. It is proving very successful for it gives an accurate check on the movements of the students without taking any freedom in the use of the library from them. The card is issued to each pupil and bears his name, grade and home room number. (These items are typed on the cards by the librarian from her Library Roll.) Both the upper and the lower half of the card are spaced in squares, one square per week for ten weeks. Each square is divided into five sections, each section labeled with a letter indicating the day of the week. When the student seeks permission to use the library, he presents his Library Permit Card to his study-hall teacher at the beginning of the period. She places her initial in the space designated for that day at the top of the card, if the student wishes to remain in the library the full period; at the bottom, if he wishes to use the library fifteen minutes or less to get a brief reference, return a book, settle a fine, or secure a book. The full period permits are punched at the door as the student enters the library. The short time permits are placed on the library desk and are punched there, the student securing his card when he is ready to leave the room. This card is 7 x 3½ inches in size, so that it is conveniently carried in pocket or book. The details of the use of the card may be changed to conform to local conditions.

Basic High School Book Collection

FOR THE PERSON called upon to start a basic book collection for a high school, the A. L. A. has just published a list called "500 Books for the Senior High School Library." Selections have been so carefully chosen that they form a practically indispensable collection. Descriptive notes and buying information are furnished for each title. Because it is restricted to 500 titles it will not satisfy the needs of any one school department for reference material nor be sufficient in recreational content, but it will form a nucleus to which volumes may be added as rapidly as is feasible.

Books We Like

"I KNOW the book I'll vote for"—a common year-round statement in Roosevelt School Library, Detroit. During Book Week every child votes anonymously for one book read in the last year which he especially recommends to other children. From these votes the titles to be found in the school library are arranged in lists with the classification number. There is a list for the votes of each grade, but the lists are not graded. A first reader may appear on the same list with *Tom Sawyer*, if individuals in the same grade have turned in those votes. These lists are bound together under the title "Books We Like." The classification makes it possible for even second graders to find books for themselves. Most children prefer another child's recommendations to those of even the most trusted adult. It is pleasant to know that each year the votes show an ever-increasing percentage of desirable titles.

Wild Flower Exhibit

ONE of the girls' clubs of Jefferson High School, Portland, Ore., is responsible for a wild-flower exhibit which is arranged each week in the school library. The flowers, which are labeled with their botanical and popular names and their habitats, are grouped before a small, variously colored screen and make very bright a drab niche in a book-crowded library.

A Contact Chairman

MRS. ELIZABETH RIDDELL WHITE, Department of Libraries, Long Beach City Schools, will be contact (not contract as stated in LIB. JOUR. 55:469) chairman at the Los Angeles conference.

From The Library Schools

Michigan

A RECENT survey of the positions held by 109 Michigan graduates now in active library work shows a surprisingly wide geographical distribution. Former students are now filling positions in no less than twenty-five States, with Canada and Italy also represented. Michigan naturally leads the list, with sixty-five alumni in the libraries of the State; Ohio is second with nine, and the remainder are scattered from Maine to Oregon and from Minnesota to Florida. The kinds of libraries in which students have found places are equally varied. Nearly one-half of the active alumni are in college and university libraries and about one-third in public libraries. Eighteen graduates have gone into school libraries and the remainder are scattered among special libraries of various kinds.

University of California

THE ADVANCED courses of Bibliography and School Library Administration are open to students in full graduate standing in the University of California, Berkeley, who have completed with an average grade of at least B the first-year curriculum of the School of Librarianship or its equivalent. For these students the courses will count toward the master's degree. Other graduate students who propose to take the courses as electives must submit to the instructor in charge satisfactory evidence of their qualification for the work.

Chautauqua

CHAUTAUQUA Summer School, Chautauqua Lake, N. Y., announces the opening of its summer session on July 7, 1930. In four summer sessions students may complete a full year's library course. Classes continue through Saturday of each week to give eight school weeks each season. The work is divided as follows:

The Freshman Class includes courses in cataloging, classification, accessioning, shelf listing, indexing and filing, reference work, bookbinding, library methods, school and children's work.

The Sophomore Class has work in library organization, cataloging, subject headings, classification, reference work, library methods, and history of libraries and printing.

The Junior Class has courses in subject bibliography, public documents, library administration, cataloging, history of libraries, bookmaking, book selecting, and evaluation and selection of periodicals.

The Senior Class includes courses in public documents, national and trade bibliography, organization and administration of libraries, types of libraries, parliamentary law and project methods.

Accreditation of Library Schools

HAMPTON INSTITUTE Library School was accredited as a senior undergraduate library school at a meeting of the American Library Association Board of Education for Librarianship May 5, 1930. The Hampton school was formerly accredited as a junior undergraduate library school.

The Board also granted provisional accreditation to the University of Oklahoma School of Library Science and the College of St. Catherine Department of Library Service as senior undergraduate library schools. Final accreditation is granted only after favorable reports on two visits of the Board are made in two different years.

The Department of Library Science, Kansas State Teachers' College of Emporia, was provisionally accredited as a senior undergraduate library school specializing in the training of school librarians.

The Department of Library Science, North Carolina College for Women, was provisionally accredited as a junior undergraduate library school for the training of school librarians, and the Division of Library Science, University of Tennessee, was provisionally accredited as a sixteen semester hour curriculum for the training of school librarians.

A New Name

AFTER twenty-five years of successful history the Library School, Carnegie Library of Atlanta, becomes the Library School of Emory University, with an enlarged program for development. The school will be housed in the library of the university and will continue to offer practical work in both public and university library systems. After September 1, 1930, the address will be Emory University, Georgia.

A Pratt Scholarship

THE RUTH M. WRIGHT Memorial Fund Committee has thus far received \$753. Although it was the original intention to make it a loan fund, the amount received has reached such goodly proportions that the committee has decided to hold the fund until it reaches one thousand dollars and then turn it over as a scholarship fund, the interest of which would be sufficient to pay the tuition for one term at Pratt.

If there are any who have not made a contribution and who are planning to do so, the committee requests that checks be sent in as soon as possible.

In the Library World

The Bibliothèques Nationales

A REPORT on reading in general throughout France was submitted to the Minister of Public Instruction in March, 1930, by a special committee appointed Nov. 5, 1929. Though there has been a library problem in France ever since there have been libraries, and though a special committee studied it in 1905-1906, the present committee feels it makes a first contribution to the study of the problem as a whole, particularly in its emphasis of reading for recreation as well as reading for study.

The report sets forth the difference between the problem of reading in cities and towns and that in country regions; it urges the establishment in every commune of a collection of books, either in the city hall or in the school, or in some other municipal building; and for every "département" an arrangement for circulation of books through these libraries of the communes. Administrative details for these two centers are suggested minutely, as well as the problem of supervision and financial support.

For city reading the commission suggests a complete reorganization of the municipal libraries and the establishment of a national library fund (*Caisse nationale des Bibliothèques*). There are now about 300 city libraries in France, of which the 45 most important are called "classed." In these latter all staff appointments are made according to a decree of July 1, 1897. A bill now before the Chamber of Deputies suggests the division of these municipal libraries into three categories: first, the "classed" libraries (*classé* = of a certain rank), with technical staff appointed by the state; second, "supervised" libraries, of sufficient importance to be under the observation of the state; third, "inspected" libraries.

For the national library fund two bills are under consideration; the first, controlling establishment of the fund; the second, its administration. The commission quoted figures to show how much more generous other countries in both the old and new world are in making appropriations for libraries than is France and points out how vital is the question for the culture and future of the nation.

It recommends a reorganization, the establishment of an administrative section ("Service Central") for libraries attached to the Division of Higher Education in the Ministry of Public Instruction; the staff of the "classed" libraries to be made part of the national civil ser-

vice; the establishment in each "Département" of an organization for popular reading, with the aim of putting into the hands of dwellers in cities and villages the most recent books, and in increasing numbers of books and periodicals for which they have need or to which they should by right be entitled.

Administration of the national library fund is to be in the hands of a senator, a deputy, a councillor of state, a member of the Cour des Comptes, a member of the Institute, a representative of the Minister of the Interior, two of the Minister of Finance, three of the Minister of Public Instruction, eight as book lovers, librarians, and general readers.

Two Important Bibliographies

MENTAL HYGIENE for April, 1930, contains two interesting and important bibliographies. The first compiled by J. R. Lord, under the title "Great Britain's Contribution to the International Mental Hygiene Library," gives a classified list of books, with their publishers, extending from pages 432 to 444. The second article is entitled "Books Suggested for a Library Pertaining to Behavior Problems of Children," compiled by David M. Levy and Mary Coburn, of the Institute for Child Guidance, of New York City. This list occupies pages 445 to 462, with the statement that the entire list cost approximately \$1,500. A minimum list of books, the titles of which are indicated by a star, cost about \$300. This list is also classified, with a list of publishers and dates of publication. The British list, however, does not give the dates of publication.

Mellon Institute Issues Bibliographic List

THE third annual supplement to Bibliographic Bulletin No. 2 of Mellon Institute of Industrial Research, Pittsburgh, Pa., has just been issued. This publication lists seven bulletins, fifty research reports, fifty-nine other papers, and sixteen domestic and fifteen foreign patents by members of the Institute during the calendar year 1929. The total contributions to the literature for the eighteen years ended January 1, 1930, have been as follows: Fifteen books, ninety-six bulletins, 528 research reports, 849 other articles, 407 U. S. patents, and 295 foreign patents. Complimentary copies of the third supplement, as well as of the preceding numbers of the series, will be sent to laboratory directors, librarians, science teachers, and institutional heads who request them.

Copyright Bill H. R. 12549 Importation Section

Section 30. During the existence of the copyright in any work when such work has been published and manufactured within the limits of the United States or its dependencies, under an assignment covering stated rights in the United States and its dependencies, or any of them, registered at the Copyright Office, and such assignment stipulates exclusive sales rights within the United States and its dependencies or any of them, the importation into the United States of any copies thereof printed or produced by any of the processes mentioned in Sections 28 and 29 of this Act, or of plates or mediums of any kind for making copies thereof, whether or not authorized by the author or proprietor of any foreign copyright, except used copies, shall be reported by the customs authorities at the port of importation to the Register of Copyrights, and if registration of a claim to copyright or rights under Section 36 of this Act and the deposit of two copies of the American edition shall have been accomplished prior to such importation, such imported copies, plates or other mediums for making copies shall be subject to seizure at the instance of the assignee of publication rights in the United States. If found to be imported in violation of the terms of the contract of assignment, such copies, plates or other mediums for making copies shall be forfeited to the assignee or otherwise disposed of at the discretion of the district court of the United States having jurisdiction of the case: *Provided, however*, That the foregoing provision shall not apply—

(a) To any work published in the country of origin with the authorization of the copyright proprietor, when imported, not more than one copy of any such work on any one invoice, for use and not for sale or hire, by and for any free public library or branch thereof, any privately owned or endowed library open to free use by the public or by scholars, or any school, college, society or institution organized and conducted in good faith for educational, literary, philosophical, scientific or religious purposes, or for the encouragement of the fine arts, and not for profit;

(b) To any work published in the country of origin with the authorization of the copyright proprietor, when imported, not more than one copy of any such work on any one invoice, for individual use and not for sale or hire, provided that within ten days prior to the date of the ordering of such copy for importation, the proprietor of the United States copyright or rights to such work, within ten days after written demand for a copy of such work specifying that such copy is desired for use and not for sale or hire, shall have declined or neglected to agree to supply the copy demanded at a price equivalent to the foreign price thereof and transportation charges, plus customs duties when subject thereto; or provided that at the date of the order of such copy for importation no such registration and deposit of such copies of the American edition shall have been made as aforesaid;

(c) To any work published in the country of origin with the authorization of the copyright proprietor when imported by the proprietor of the United States copyright or rights for the purpose of filling demands for copies thereof made pursuant to the preceding subdivision (b) or of filling orders for copies thereof received from any library, school, college, society or institution designated in the foregoing subdivision (a): *Provided*, That every such demand or order shall specify that the work is desired for use by the purchaser and not for resale or hire;

(d) To works which form parts of libraries or private collections purchased en bloc in a foreign country for the use of any libraries, schools, colleges, societies or institutions designated in the foregoing subdivision (a), or which form a part of the personal baggage of any person arriving from a foreign country and which are not intended for sale or hire: *Provided, however*, That no one person shall so import more than five such works at any one time;

(e) To a foreign newspaper or magazine, although containing matter copyrighted in the United States printed or reprinted by authority of the copyright proprietor, unless such newspaper or magazine contains also copyright matter printed or reprinted without such authorization;

(f) To motion pictures and motion-picture photographs;

(g) To the authorized edition of a book in a foreign language or languages;

(h) To works in raised characters for the use of the blind;

(i) To works imported by the authority or for the use of the United States;

Provided further, That copies imported as above may not lawfully be used in any way to violate the rights of the proprietor of the American copyright or annul or limit the copyright protection secured by this Act, and such unlawful use shall be deemed an infringement of copyright.

COPYRIGHT BILL H. R. 12549 has been reported out in the House by Albert H. Vestal of Indiana, chairman of the Committee on Patents. Before action can be taken on it, however, the chairman of the Rules Committee of the House must set a date so that it may be considered. At this date of writing the chairman of the Rules Committee had failed to do this. It may be that the delay is due to the opposition of the theatrical producers, which is one group of the many interested, not satisfied with the bill as written. All other interests, including libraries, are content.

Library importation rights are as fully protected as under the present law. The bill, moreover, provides for the entrance of the United States into the International Copyright Union, an end which librarians have eagerly sought since the Berne Convention in 1886. According to the terms of the international copyright instrument, imbedded in the present bill, the work of an author, no matter in which country he resides, immediately and automatically becomes copyrighted in all other countries subscribing to the convention. The rights of authors are fully protected under the present act, which is an advance over previous copyright legislation in that it recognizes the modern mechanical means of transmitting the author's work to his public, such as radio and the cinema.

Congress will not adjourn until June 20 or possibly July 1. If every librarian would telegraph his Representative at once, not only endorsing the bill but urging his Representative

to demand a date for consideration of the bill from the chairman of the Rules Committee, it is probable that the bill will be passed at this session of Congress.

We have waited so long for satisfactory legislation on this subject that it is not an opportunity to throw away lightly. For once I feel like quoting that great author, "Western Union," by saying, "Do not write—telegraph."

CARL L. CANNON,

Chairman, A. L. A. Committee on Bookbuying.

Book Price Levels

THE BOOK TRADE has been stirred more than at any time in years by the sudden announcement of three publishers that they proposed to publish popular fiction at \$1 instead of at the old levels. The news was released simultaneously, though not by mutual plan, in New York at the end of May, and immediately received front-page attention from the press throughout the country. Librarians will be interested in the effect of this on book purchasing and on future publishing plans. So far it is difficult to forecast the final result, and both the book trade and those who comment on book trade matters have found it difficult to make prophecies. As yet the only actual facts are that the young firm of Farrar & Rinehart, which recently came out of Doubleday, is publishing one novel a fortnight for the next six months at \$1; Doubleday, Doran have announced a list of twenty books of fiction to come out before the end of June, eight of these being books of the Crime Club; Simon & Schuster have announced eight novels for their fall list, these to be in paper covers and therefore not suitable for library use, although they have given some consideration to the idea of having an edition in cloth binding at \$1 net; still another publisher, Coward-McCann, announce a rather different program, which will include the first novels of unknown authors at \$1.50; Doubleday also announce that their fall list non-fiction will be at lower levels, but exact titles and prices are not given. The other publishers, after looking over the proposals, have decided not to follow suit, though it is not at all unlikely that there may be a slight lowering of many fall prices, due not only to these announcements but other conditions, such as the slightly improved value of the \$1. These experiments are due to many conditions, the chief of which probably was the marked success of Doubleday, Doran in the \$1 non-fiction field, a field in which they are about to have a competitor in the Blue Ribbon Books, Inc., a new organization recently announced by the cooperative backing of Little, Brown & Co., Harcourt, Brace

& Co., Dodd, Mead & Co., and Harper & Brothers. The Doubleday firm has reasoned that, inasmuch as the public has shown a keen interest in these \$1 books, it could be induced to buy more current fiction if so priced, and, if sales could be tripled, the publisher and bookseller would be as well off as under the present system. At present, popular priced fiction is entirely in the form of reprints, millions of copies being sold everywhere by Grosset & Dunlap and A. L. Burt Company from one to two years after the first date of publication. The problems involved in these two methods of publishing are quite different, and probably only time and test will tell which works better. The reprints are the pick of tested books of previous years, and the new fiction will have to be published without such winnowing, and the public will decide whether it would rather have the winnowed books a year or so later or current books lacking any test, and the announcements indicate that these publishers expect rapid increases in sales from the markets outside the bookshop, that is, the drug stores, corner stores, and even chain grocery stores have been proposed. This would seem to indicate that the demand would be for the more popular type of fiction, as is in the 75-cent reprint or the books which are heavily demanded in the rental libraries. It has been said, also, that the rapid growth of the rental library has been one of the reasons for hoping for success in this experiment, publishers believing that some of these readers would become buyers. It is pointed out, however, that there is still quite a difference between 25 cents for reading a book a week and \$1 for buying one. If the total number of books is less, this will not be considered by most a disadvantage, as last year's fiction lists were unusually heavy. It has been pointed out by many experienced in the field that there is very little evidence that publishing has been an over-profitable business, that the costs are pretty well known to everybody, and that decreases in the price level would be impossible unless a very rapid increase in the sales total was immediately developed. Critics of book distribution have sometimes failed to point out that in this decade, in the face of increased competition of the movies, radio, and other inventions, the book has seen its most rapid increase in general use. Book production, according to the government census, has doubled, library circulation has seen a rapid increase, and rental libraries have grown up everywhere. It is not because of a bad ten years, but because a good ten years has held out hopes of more spectacular expansion that these rather revolutionary experiments are being tried out on the public.

Among Librarians

Public Libraries

HAZEL FITZ, Drexel '28, has been appointed librarian of the Free Public Library, Upper Darby, Pa.

EDLA M. LAURSON, Wisconsin '18, was transferred from librarian of Schoolcraft Branch, Detroit Public Library, to chief of the Foreign Language Department on Jan. 1.

LUCILE P. REINER, Pratt '26, readers' adviser in sociology in the Washington, D. C., Public Library, was married on April 19 to Philip A. Stebbing.

M. ROLAND-MARCEL was succeeded on May 1 as Administrateur Général of the Bibliothèque Nationale by M. Julien-Maurice Cain, professor at the university and a section chief in the Foreign Office, according to the *Journal Officiel* for May 3, 1930. He has been taken from this position to serve as Prefect of the Lower Rhine.

DOROTHY C. THOMPSON, Simmons '23, is now head of the Technical Division of the Reference Department of the Free Public Library, New Haven, Conn.

CATHERINE TOWER, Simmons '26, has recently become a cataloger at the Carnegie Library of Pittsburgh.

MARJORIE TRUE, Wisconsin '26, sails in the early summer for France to accept a position in the American Library of Paris.

CALLIE WIEDER, Wisconsin '14, has the distinction of being the head of the library (Waterloo, Iowa) which will be the headquarters for the County Library demonstration by the Iowa Library Association, 1930-31.

MRS. NELLIE WILSON, librarian of the Scottsbluff Public Library, Nebraska, has been chosen by the T. A. Bagshaw Publishing Company of Denver as one of the outstanding librarians in her section to receive a complimentary trip to New York.

Schools and Library Schools

ETHEL M. FAIR, N. Y. P. L. '16, acting principal of the Library School, Carnegie Library of Atlanta, has been appointed director of the New Jersey College for Women Library School at New Brunswick.

MARY LONYO of Detroit died May 23. She had been in the Detroit Public Library, the University of Detroit Library, the Detroit News Library, and the University of Detroit High School Library, which position she held at the time of her death.

STELLA M. MORSE, Simmons '20, has been appointed librarian of the Central Rural School, Chazy, N. Y.

Special Libraries

KATHERINE A. ADAMS, Simmons '25, has accepted a cataloging position at the Baker Library, Graduate School of Business Administration, Harvard University.

MRS. AMY ANDERSON MACKO, Wisconsin '20, has accepted the librarianship of the Evanston Historical Society, Evanston, Ill.

HELEN CLELAND has resigned her position in the Grosvenor Library, Buffalo, to become librarian for the Buffalo, Niagara & Eastern Power Company.

MARTHA FOULK is now librarian at H. L. Doherty & Co., New York City.

RUSSELL S. JONES, Pratt '23, has recently been appointed assistant in the Russell Sage Foundation Library.

MARY K. LOGAN, Simmons '22, has been appointed librarian of the Cooper Union Museum Library, New York.

HAZEL MERRY, Wisconsin '25, formerly with the Federal Reserve Bank, Chicago, has recently joined the library staff of the Museum of Science and Industry (founded by Julius Rosenwald), Chicago.

MRS. SUE MOLLESON FOSTER, Pratt '10, has been appointed cataloger of the National Industrial Conference Board in New York.

VIVIAN P. SWERIG, Wisconsin '17, has become librarian of the Aeronautical Chamber of Commerce of America, Inc., 10 East 40th Street, New York City.

University and College Libraries

FRANCIS L. D. GOODRICH, Albany, '06, associate librarian of the University of Michigan, has been appointed librarian of the College of the City of New York with the rank of associate professor, and will take up the duties of his new position in the fall.

MARGARET E. HIBBARD, who has been on the staff of the McGill University Library since 1919, has been granted a year's leave of absence to supervise the reorganization of the Library of the Literary and Historical Society of Quebec, an institution founded in 1824 by the Earl of Dalhousie, then Governor-General of British-North America, under Royal Charter of William IV.

LUCY EUGENIA OSBORNE, Simmons '09, custodian of the Chapin Library, Williams College, has completed a translation into English of Konrad Haebler's *Handbuch der Inkunabelkunde*, published in Berlin in 1925.

PERMA RICH, Illinois, '28, began work as librarian of the Ashbury College Library at Wilmore, Ky., on June 1.

Opportunities

This column is open to librarians

High-grade position wanted by trained librarian with fifteen years' experience. Available immediately. F-14.

University and library school graduate with four years' experience desires position (school or public library) in or near Washington, D. C., or N. Y. Cataloging, reference and school experience. F-15.

University and library school graduate, specialized in cataloging, prefers position in East. Varied experience. Willing to assume responsibility or to teach. Now reviser in large reference library. X-23.

College and library school graduate desires position in a public or school library for the coming year. F-17.

University and library school graduate with experience desires position in college library. F-18.

Children's librarian with ten years' experience would like position as head of a children's department. West, Pacific Coast, preferred. F-19.

College and library school trained librarian, with experience as high school teacher and public librarian, wishes position as high school or normal school librarian, or instructor of library science in normal school. F-20.

University and library school graduate with five years' teaching experience, three years' in special libraries, and seven in university libraries desires position as librarian or reference librarian in college or university library. New England, Middle States or Middle West preferred. F-21.

Librarian with B. S. degree, library training, and experience desires position in school or college library. F-12.

Elusive Quotations

A. L. A.—Would like to know if the following quotation is correct, what the remaining verses are, and where the quotation comes from:

An iron bedstead they did bring
To try my hopes upon,
If found too short I must be stretched,
Cut off, if found too long.

Five Scholarships Offered

FIVE SCHOLARSHIPS of \$1,000 each will be given to five men from colleges in the South next year by the Julius Rosenwald Fund, it has been announced by Dr. Harvey W. Cox, president of Emory University. The belief that the library profession will be strengthened by the addition of more men to its ranks is the reason for the award of the scholarships by the Rosenwald Fund, it was stated.

The Calendar

- June 18-21—Special Libraries Association, annual convention at Clift Hotel, San Francisco, Cal.
- June 18—New Hampshire Library Association, annual meeting at Swampscott, Mass.
- June 23 or 24—California School Library Association will meet at Los Angeles, Cal.
- June 23-26—Library Section of National Catholic Educational Association meets at New Orleans, La.
- June 23-28—American Library Association, annual meeting at Biltmore Hotel, Los Angeles, Cal.
- June 30-July 18—A rural library extension institute at the College of Agriculture, University of Wisconsin.
- Sept. 10-12—Maine Library Association, annual meeting at Bar Harbor.
- Oct. 1-2—Connecticut Library Association, annual meeting at New London, Conn.
- Oct. 2-4—Colorado Library Association, annual meeting at Denver, Colo.
- Oct. 7-9—Missouri Library Association, annual meeting at Sedalia, Mo.
- Oct. 9-10—Kentucky Library Association, annual meeting at Paducah, Ky.
- Oct. 8-11—Regional meeting of Iowa, Minnesota, North and South Dakota, Wisconsin, and possibly Nebraska, to be held in St. Paul.
- Oct. 13-18—New York Library Association, annual meeting at Albany, N. Y., in connection with Convocation of the University of the State of New York.
- Oct. 14-17—Regional Library Conference, including Minnesota, Wisconsin, Iowa, Nebraska, North and South Dakota will be held in St. Paul, Minn.
- Oct. 15-18—Illinois Library Association, annual meeting at Moline, Ill.
- Oct. 15-17—Ohio and Indiana Library Associations, annual meeting (joint session) at Dayton, Ohio.
- Oct. 20-22—Montana Library Association, annual meeting in Billings.
- Oct. 21-24—Pennsylvania Library Association, annual meeting at Williamsport, Pa.
- Oct. 29-Nov. 1—Southwestern Library Association meeting at Dallas, Tex.
- Nov. 6-7—New Mexico Library Association, annual meeting at Albuquerque, N. M.
- Nov. 10—Arizona State Library Association, annual meeting at Phoenix, Ariz.
- Nov. 21—Illinois High School Library Association meets as Section of High School conference at Urbana, Ill.
- Nov. 24-29—Southeastern Library Association, annual meeting at Tampa Bay Hotel, Tampa, Fla.

" The Toledo Method of the Dickman Bookcharging System reduces to the minimum the eye strain incident to the use of the pencil charges. The staff shows less fatigue after a busy day which they affirm is because they do not have to watch and copy figures. It also speeds up service so that there is less congestion around the desk at busy hours. "

Sweeping the Country!

The SELF-CHARGING SYSTEM now
being installed by leading libraries
from coast to coast

NO development in library operation during the past two decades has aroused as much interest, comment and acceptance as the new Self-Charging System.

Typical comments from
librarians using the
new method

"The greatest time-saver ever developed" . . . "Works perfectly, saves time and bother" . . . "Makes book charging automatic" . . . "Surprisingly simple and easy to put in operation" . . . "It's wonderful to be relieved of all that routine."

When librarians learn the details of this new method, its efficiency and economy, they immediately plan to adopt the system.

A New Library A Day

Installations of the method within the past month, at the rate of a new library a day, include many large cities, as well as many smaller libraries. In every case the new plan is reported as giving complete satisfaction.

Free booklet explains in detail

In a booklet by the Demco Library Supplies, you may read all the particulars of this revolutionary method of book charging. We will gladly mail you a copy without charge or obligation.

**This Should Convince
You, too, that**

**WEBSTER'S NEW
INTERNATIONAL DICTIONARY**
is the "Supreme Authority"

EVIDENCE Hundreds of Supreme Court Judges concur in highest praise of the work as their authority.

The Presidents and Department Heads of all leading Universities and Colleges give their indorsement.

The Government Printing Office at Washington uses the New International as the standard authority. High Officials in all branches of the Government indorse it.

The Colleges voted overwhelmingly in favor of Webster as standard of pronunciation in answer to questions submitted by the Chicago Woman's Club.

The American Bankers' Association selected The New International as an essential part of a banker's library.

**It is a Library
In One Volume**

Its type matter is equivalent to a 15-volume encyclopedia. In its 2,700 pages there are 452,000 entries, including thousands of **NEW WORDS**; 12,000 **biographical** entries; 32,000 **geographical** subjects; 100 valuable **tables**; over 6,000 **illustrations**. Its up-to-date, encyclopedic information makes it the most convenient and dependable reference work.

Recommend The Best

Webster's New International is America's great question-answerer—the most widely used reference work in the world.

Look for the Circular Trade-Mark. It identifies the "Supreme Authority."

Colson Book Trucks

Being extremely quiet running, strong, and economical, Colson Book Trucks are ideally adapted to library conditions. They are of exactly the right height for checking and delivery desks, and for quick loading and unloading at shelves.

Model 6113, illustrated, is built of steel, finished in sage green, and blends well with library interiors. The ball-bearing, rubber-tired casters are characteristically quiet. This truck pushes very easily and affords a surprising amount of storage space.

Write for full information on the complete Colson line of trucks and casters.

An Ideal DICTIONARY STAND

THIS pedestal type Dictionary Stand is practical and convenient.

It holds a large Dictionary ready for reference use, and also provides space for several other reference books.

It is 41 in. high in front and 44 in. high in the back, giving a convenient slope to the top which is 21 in. x 15 in. The edges of the top are smoothly rounded, and a "lip" along the front edge always holds the top volume in position.

Two substantial shelves 17 1/4" wide by 14 3/4" deep, with space of 14 1/4" provide room for encyclopaedias, reference works and other large volumes. The back is open.

Strongly built, quartered sawed white oak. Beautiful egg-shell gloss finish. It harmonizes with any style of library equipment.

Prompt shipments. Price upon application.

Scholarship in Library Work

By Andrew Keogh

Librarian, Yale University Library, and President of the A. L. A.

IN MR. BOSTWICK'S interesting and valuable book on *The American Public Library* he tells us that until practically our own times books were collected for the use of a few scholars, and that every step in the progress of the American library was away from a merely scholarly institution to a widely popular one. In a recent article he enumerated the principal things to be found in the American public library, introduced within the past half century and not generally found in libraries elsewhere, and while it would be easy to find in Britain examples of libraries that are carrying out the same ideals on a much smaller income, we may accept his carefully worded statement as being correct. The public library as we know it is characteristically and typically an American institution, and is a contribution to popular education of which we may well be proud.

The history of the American Library Association is in keeping with the development of our libraries. Mr. Justin Winsor, who presided over the first seven conferences, was one of the most learned librarians we have ever had. During the remainder of the nineteenth century, however, only two presidents, Mr. Putnam and Mr. Lane, stand out as primarily of the scholarly temperament, and while it would be easy to pick half a dozen presidents since 1900 who have carried on the scholarly tradition, our choice has usually reflected the greater interest of the Association in the popular movement. The emphasis is also shown in the papers and discussions at our meetings, and in the character of our publications.

I do not imply that this greater interest in popular libraries has been unwarranted or unjustified. On the contrary, I think it was inevitable. The great majority of our members, whether institutional or personal, are from the public libraries, and most of the money that has been given to the Association was given primarily if not wholly for the betterment of public library service. There is too much to be done in the starting of public libraries in the great areas of our country that are still without them, and in the developing of libraries that are inadequate, for anyone to grudge one cent or one hour of effort now given to the public library. What I am venturing to do is to point out that there has been a shift in our civilization in recent years, and that instead of recounting our achievements during the past half century we should, as Lord Elgin told the British Library Association, think rather of the fifty years that are ahead.

Since the Great War there has been a quickening of the people in Europe and America, and indeed all over the world. There has never been so general a desire for knowledge, and in America the most startling evidence of the change is the unprecedented number of candidates for entrance to college. Before the Revolution no American college had more than a hundred students, and the colleges were what we would now call first-class high schools, graduating their students at seventeen or eighteen. A generation ago one in a thousand went to college; now one in every one hundred and fifty of the population knocks at the col-

lege doors. There are now nearly eight hundred degree-conferring colleges and universities in the country, and in them are enrolled about a million students. Within the next decade there will probably be a million and a half. The accommodations and provisions of many colleges are overtaxed, and attempts are made to stem the flood by limiting the number admitted, by raising the standards of admission and graduation, by applying aptitude tests, by placing freshmen and sophomores in junior colleges, and in other ways. In addition to the schools of higher learning in the older sense there is an ever-increasing number of "institutes" or similar foundations for special purposes, sometimes connected with universities, sometimes with great business enterprises, sometimes existing as separate organizations, intended to give a kind or quality of training not hitherto given, or to accomplish results not hitherto attained. These laboratories seek to control the insect pests that cost us a billion a year and the weeds that cost us three billions; to make a synthesis of cellulose, the world's most abundant and most responsive base-material; to electro-weld tubes more speedily and therefore more cheaply; to manufacture improved telephones and radios; to study transportation more scientifically; to isolate disease germs; to reduce iron ore direct without the conventional blast furnace; to broaden fields of commerce; to expand earning power, and supersede manual labor. No one can predict the additions to our wealth and comfort that will result from such research. Up to the present the majority of successful men and women have not been college graduates but the majority of the successful men and women of 1950 will be. Of course there will be Edisons and Fords who have never entered college halls; a genius is born, not made. Yet it is significant that men who achieve success by their own efforts send their sons to college, and endow universities and other research institutions that future generations may not waste time and effort, but begin by standing on our shoulders. Are we fully aware of the transformation that is going on in the intellectual life of the nation, and are we consciously changing the functions and methods of our libraries to meet the new conditions?

Our professional function has not only changed quantitatively but qualitatively. Mr. Bostwick says that the number of books in all the public libraries of the country in 1800, including book clubs, social libraries, and so on, was not more than 80,000, or about one volume to seventy inhabitants. In New York State there are now 500 libraries of all kinds, with fifteen millions of volumes in them, in spite of

the fact that there are only three county libraries in that State, and that more than a million and a half people live there on farms and in rural communities without any sort of library service. Other statistics of the sort will occur readily to everyone.

It is the quality of the books, however, that should be our chief interest, and not the number on our shelves or in our records of circulation; the most valuable reading is that which quickens and guides creative minds. Mr. Hoover said recently in an article in *The Yale News* that the progress of the nation is the sum of the progress of its individuals, and that ideas that lead to progress are born out of the individual mind, not out of the mind of the crowd. More concretely, Sir Michael Sadler said at Columbia three months ago that what most concerns humanity in the long run is the illumination of genius. "A thousand poetasters," he said, "might well have been left to carry on their shoulders heavy burdens up the Italian hillsides rather than lose one Dante. Better that all the students in the mid-Victorian Mechanics' Institutes should never have heard of science than lose one Darwin." Heretical doctrine, you will say, in a democracy? Not so. Sir Michael added that "medieval and modern European history is full of instances of the rise of boys from humble station through conceptional opportunity to posts of eminence in the State." To this I will add a saying by Melvil Dewey, the greatest democrat of us all, who has done more than anyone to spread public libraries throughout our country and to make librarians the zealous missionaries of the book. He would have, he said, the very best raw material as students in his library school, because "you cannot polish a pumpkin."

It is my belief that the scholarly attitude is becoming more active and more influential in the life of the country, and not less in library work than in other fields of activity. There are many evidences pointing in this direction. There is, for example, the paper by Mr. Dana to be read at this conference advocating the restriction of fiction in public libraries, and the turning into more scholarly channels the money and effort spent on it; the increasing call for librarians on advisory boards of all kinds; the greater number of honorary degrees conferred each decade upon librarians; the tendency toward a college degree as a normal entrance requirement by library schools, and toward higher degrees for advanced work; the building up of library school faculties by adding teachers with greater academic background; the establishment of a *Journal of Discussion* comparable to those in other professions; the scholarships and fellowships now available for higher study

in bibliography and library science; the generous grants recently made by the Carnegie Corporation to college libraries; the appointment of Readers' Advisers, not only in public libraries, but in our national library.

Mr. Bostwick says that our libraries are far closer to the people today than they were fifty years ago. It is because this is true that demands are now made that twenty-five years ago were unknown. The "man in the street" going into a public library for information is likely to be a college graduate or one who already has a good knowledge of the subject in which he is interested. The investigator in a university, in some other research foundation, or in a special library, expects to find a member of the staff who speaks his language and knows the bibliography of his subject. President Gilman, who was at one time librarian of Yale, said that "every person in charge of the university collections must be a student capable of teaching. His specialty must be bibliography or, if the staff is large, some branch of bibliography, library, historical, philosophical or scientific. He must know not only what his collection includes, but what it needs." Hitherto the time of promotion in our profession has led to an administrative position; it will soon be necessary to combine scholarship with executive ability.

The scholar I have in mind is not the one pictured in the comic papers, who has no common sense; nor the pedant one, who is unduly formal or subtle; nor the specialist who learns "more and more about less and less," and when he produces a dissertation showing a mastery of method and of the content of a small enclave of knowledge thinks that he has made a contribution of moment to the World's Knowledge; nor the man who has learned all about a subject, and has become what is known as a "monument of erudition." The true scholar is he who has learned thoroughly all that a school can teach him, but who still has the characteristics of a student; who has not only attained precise and accurate knowledge, but has had his judgment matured and his taste corrected. "Scholarship is not knowledge," said Mark Pattison, "but discipline; not science, but scientific habit."

At present, unfortunately, no one can become a scholar in the true sense, if he be not one already. The word "School" originally meant leisure, and the man who devoted his leisure to study became a scholar. No librarian, and especially no administrator (we are worse off even than the teachers) has leisure. In France the typical professor teaches three hours a week and has about three days a week to himself for research and writing. Here even a great scholar

has to do a large amount of overtime work. Few teachers have more than one uninterrupted day in the week for writing and research; we cannot expect them to contribute as much to the uplift of the world as do scholars beyond the sea with their more generous time table. The librarian is tied to his desk even more and has little opportunity for continued study. To develop himself to the point of his best contribution to society, to replace a receptive attitude by a constructive, he must have leisure. Because I am a debtor to my profession and have the obligation to provide a better man as my successor, I commend to any individual or foundation willing to raise the standard of librarianship the following quotation from a letter of Mr. August Heckscher giving \$500,000 to Cornell:

"As research in America suffers from the exhaustion of professors by teaching and other duties, it is my desire that professors and instructors possessing the talent and training necessary for research shall, under such conditions and for such periods as the University authorities may prescribe, be liberated partially or wholly from their duties and enabled to devote themselves in all the freshness and fullness of their energies to productive investigation and scholarship."

Official Publications of European Governments

PART I of *Official Publications of European Governments*, published by the American Library in Paris for the Reference Service on International Affairs comprises Albania, Austria, Belgium, Bulgaria, Czechoslovakia, Denmark, Esthonia, Finland and France (Paris: The American Library in Paris, 1929. pap. 255p.). The list is a revision and expansion of the mimeographed list with the same title issued in December, 1926, which proved to be so valuable to everyone interested in the subject that the edition of 100 copies was almost immediately exhausted. Compilation of a complete list is made difficult by the fact that, with the exception of the United Kingdom, the Irish Free State, Italy and Portugal, no attempt has been made by the individual governments to list their respective publications. It has been found possible, however, to give in almost every case accurate information concerning the official gazette and a complete list of diplomatic documents issued by the Foreign Office. The material is arranged under each country by issuing organization, beginning with the Central Administration, and continuing with the Parliament and the various ministries. Addresses of reliable book dealers are given.

New York Gives Librarian Professional Status

By Carl Cannon

Chief, Acquisition Division, New York Public Library

THE APPROVAL by the Board of Regents at their April meeting of the Standards of Service for libraries and required educational and professional training for librarians, submitted by the New York Library Association, means that library work in New York State will, in future, rank with teaching and other professions requiring special training, fitness and certification. The Standards of Service apply only to librarians of professional grade, and do not include clerical and janitorial forces. Librarians and assistants in villages of less than 2000 population are also exempt from the requirements of the Standards.

Every librarian of professional grade in public libraries of the State will be required to hold a certificate as a condition of legal employment and can qualify for such certificate on the basis of his present position, education, training and period of experience. The Standards provide for advancement from a lower grade to a higher grade certificate by the securing of additional educational or professional credits outside of the library, as well as for advancement within the library without further change in certificate, except added credit for each two years of experience. A certificate valid in one library will be valid for a position of the same grade in any other library in the State, and records concerning the professional and educational status of every library worker will be on file, not only in his own library but also in the Library Extension Division at Albany. Thus interchange of assistants or librarians between different libraries of the State will become relatively an easy matter.

In taking this step New York State has become the first definitely to recognize library work as a profession. Members of the New York Library Association who have worked for such recognition over a long period of years, and who helped formulate the present scheme of service, believe that it will have a far-reaching effect in raising standards, in securing trained and skilled service in all public libraries, and in helping secure adequate recognition for library work.

The Standards are based upon the Telford report, prepared several years ago under the auspices of the American Library Association. Since the Telford report, however, was admittedly tentative in its findings, steps were taken to provide a scheme of classification of libraries and library positions for New York State

which would more nearly fit actual library conditions. A survey of libraries was instituted by the Library Extension Division, which had at its command library statistics from all registered libraries covering every phase of service and extending backward for a long period of years.

To make the Standards flexible, and at the same time close-fitting, libraries in New York were divided into nineteen different classes, based largely upon population, but including other factors of service, such as book stock, circulation, financial support, and staff. The certification plan for libraries was then adapted to the positions in these different libraries.

The various certificates, beginning with the lowest and advancing to the highest, together with the requirements and positions for which they qualify, are:

ONE-YEAR CERTIFICATE FOR LIBRARY WORKERS.

Required training: 4 years high school and 6 weeks library course.

¹Qualifies holder to serve as full-time paid librarian in small villages.

THREE-YEAR PROFESSIONAL CERTIFICATE FOR LIBRARIANS.

Required training: 2 years college and one-half year library school (or training class), or 4 years college and 8 weeks library apprentice class.

¹Qualifies for such positions as chief librarians in places of 2000-4000 population and junior assistants in larger libraries.

FIVE-YEAR PROFESSIONAL CERTIFICATE FOR LIBRARIANS.

Required training: 3 years college and 1 year library school.

Alternative: 3-year professional certificate and in addition 2 years approved experience.

¹Qualifies for such positions as chief librarians in places of 2000-10,000 population, and senior assistants in larger libraries.

(For chief librarians serving communities of 10,000-15,000 and special and supervising assistants in larger libraries, and heads of very small departments; required, 2 years approved experience in addition to above.)

PROFESSIONAL LIFE CERTIFICATE FOR LIBRARIANS.

Required training: 4 years college and 1 year library school.

Alternatives: 5-year professional certificate and in addition 4 years approved experience; or, 3 years professional certificate, and in addition 6 years approved experience.

¹Qualifies for such positions as chief librarians in places of 2000-25,000 population, and heads

¹Qualifies for such positions as chief librarians in place of 2000-50,000 population and as heads of medium-sized departments in larger libraries.

Certificate qualifies in addition for all positions of lower grade. Additional experience is required for librarians of libraries in places of 50,000-1,000,000 population, assistants in high executive positions, specialists and chiefs of large departments in large libraries. A minimum of two years approved full-time experience in any position is required for promotion to a position classified in the next higher grade.

of small departments in larger libraries.

GRADUATE LIBRARY SCHOOL LIFE CERTIFICATE FOR LIBRARIANS.

Required training: 4 years college and 2 years library school.

Alternatives: Professional life certificate and in addition 2 years approved experience; *or*, 5-year professional certificate, and in addition 6 years approved experience; *or*

3-year professional certificate, and in addition 8 years approved experience.

Two of the most important provisions of the Standards are that every librarian in the State is given a prior service certificate qualifying him for the position which he holds, regardless of his educational or professional training, and the other is that it is possible for library assistants to advance from a lower grade position to the highest by reason of native ability, and despite lack of extended educational or professional training acquired outside the library.

Every librarian in the State is assumed to be competent to hold the position he now occupies, and is to be given a certificate to that effect. These certificates are clearly distinguished from the professional certificates that are earned by educational and professional training. If, however, this occupant should resign, the candidate for the vacancy must possess the qualifications required by the Standards. For example, if the librarian in a town of 2000 to 4000 population should resign, his successor would be required to possess a three-year professional certificate.

The lowest certificate qualifying for appointment as a junior assistant in a large library is the three-year professional certificate, which is based on two years of college education and a half year in library school or training class. If an assistant entered a large public library with a three-year professional certificate and advanced in grade by reason of approved experience, this librarian could eventually become chief librarian, although he would still hold his same three-year professional certificate validated for promotion in grade, based upon completion of the necessary terms of approved experience. In other words, the various certificates definitely represent graded credits for formal educational or professional training, and will not be issued unless this education or training is acquired. Lack of the highest grade certificate, however, will not prevent a holder of a lower grade certificate from advancing to the highest position in the library.

If a graduate of a library school in an adjacent State wishes to take a position in New York, he would apply to the Commissioner of Education in New York State, who will examine his credentials and issue the certificate as soon as residence has been established. The Standards will not interfere with civil service

requirements in cities where civil service is in effect, nor do they in any way interfere with the state pension scheme.

Equivalents of four years study in a registered college or for definite terms of library school training will be ruled upon by the Professional Education Bureau at Albany.

The lowest grade certificate—the One Year for Library Workers—requires only four-year high school education and a six weeks' library course training. It qualifies the holder to serve as a full-time paid librarian in a small village, and must be renewed at the end of each year. The reason it is made renewable at the end of each year is to call the attention of the candidate to his need for further education, and also to avoid giving a professional certificate to those who expect to be engaged in library work only temporarily. After the candidate has given satisfactory indication of making library work his profession, the requirements of renewal are eliminated.

As is well known, New York State already registers libraries which conform to certain minimum requirements and submit annual reports to the Library Extension Division. The State makes annually a small grant to registered libraries. Any public or free library receiving State grants or money from taxes, which does not comply with the Scheme of Service, will be required to submit its own plan as an alternative. If approved by the Commissioner of Education as an equivalent of the requirements, the library would continue to operate as usual, or, the library could apply to the Commissioner of Education for exemption or failure to meet the requirements, technically known as "excuse for default." Finally, if the library failed entirely to conform or ignored the certification requirements, the Education Department could either revoke registration, deny the library State grants, or, in extreme cases, notify the State Comptroller that local taxes could not legally be paid to support the library.

In classifying the libraries, the first standard taken was that of population. Based on this measuring stick, the libraries were graded on a basis of 100 per cent on circulation, book-stock, financial support and staff. Each of these four factors counted 25 per cent, and a library was allowed to "pass" for its population group if it could muster as much as 75 per cent. Deficient libraries, however, are supposed to bring their library up to the standard within a limited amount of time. Some of the libraries ranked well over 100 per cent, and based on the factors above mentioned, some of the most efficient libraries in the State were those found in villages. If a library ranks so high in its own population group that it can qualify for the

next highest class, it will be placed in that group.

When the Standards were finally presented to the Regents there was no opposition from any library in the State, and only one library appeared to ask that its own plan be accepted as the equivalent of the requirements proposed. Committees of the Association had been working on the plan for a number of years, and its tentative reports were submitted each year to the State Conference. Last year the Standards in substantially their present form was adopted

unanimously at Lake Placid. The trustees and librarians of every village and city in the State have had ample opportunity to become familiar with the Standards, both through public hearings and through printed questionnaires. Practically all the details of the plan were worked out in the office of the Library Extension Division under the direction of Dr. Frank L. Tolman, to whom a great deal of credit for the workability of the scheme is due.

Certificates will be issued as soon as possible after Jan. 1, 1931, the date on which the regulations take effect.

Cultivating the Index Habit

A Study Directed By Charles E. Rush

Librarian, Teachers College, Columbia University

"AN INDEX," says Miss Zaidee Brown in her valuable guide, *The Library Key*, "is the greatest time saver a student has in using books, and yet it is amazing how much time people waste groping through a book for what they want instead of turning first to the index." Miss Brown is talking to the users of libraries who are looking for information. What she says to them about their neglect of a book's index is an old story to librarians who hear the familiar complaints, "I can't find it" and "It isn't in here"—like endless refrains in a nightmare. Yet one may wonder to what extent librarians themselves are responsible for this condition. Before we conclude, as some have already done, that it is impossible to induce the average person to use an index, it would be well to ask ourselves what has been done to popularize effectively the index habit. Perhaps our general attitude has been something like this. We have said to ourselves that the value of indexes is obvious; if people do not use them, it must be because they find the task too difficult or distasteful and that, since we cannot reform human nature, the case is hopeless. The mistake, of course, lies in assuming that the value of an index is obvious to the average person. The fact is that most readers do not understand or realize in any practical sense even the purpose of indexes.

A recent inquiry among a few normally intelligent young men brought forth such definitions as these: "An index is a list that tells you what subjects are covered in a book"; "An index shows the names of people that are mentioned in a book"; "An index is a kind of study guide," etc. Not one of the replies from

these young men indicated that they had any suspicion that indexes are designed to help people like themselves to find information quickly and easily. In other words, whatever they may have been told in the past about the advisability of using indexes has made no impression. If remembered at all, it was probably regarded as another instance of attempted academic discipline. Certainly none of them had ever been shown the value of an index in the course of any quest touching their own interests. They had never observed that the use of an index could save them any time or trouble. Why should they understand its value?

Some librarians, to whom indexes are as self-evident as the first axiom, may find it hard to believe that a person of normal intelligence could be so hazy about such purpose and use. For them it is difficult to realize that these average readers rarely think of consulting an aid so obvious. Readers see indexes; they know that such things may be found in the back of many books; yet they seldom examine them. Such lists of names and numbers form for them a sort of familiar dull background, along with prefaces, forewords, footnotes, appendices and bibliographies—a faintly confusing liturgy of the book trade. Ask the next dozen of your non-professional friends if they know what a scale-line on a map is and what it is used for. All maps have them, and their purpose is as self-evident as a book's index, but you may be astonished at the results of your inquiry.

This is not the place to discuss the part which the schools should play in developing student familiarity with the simpler fundamentals in

the practical use of books, of which the index habit is a cornerstone. Here, perhaps, the principle of letting children find out things for themselves has been carried too far, since it tends to hamper and discourage them in that very process. But whatever has, or has not, been done to meet this need in the classroom, the library has an opportunity and a problem (as well) of its own. Of necessity, libraries require their readers to use the card-index, but the untold troubles they have with it, the need for assistance and guidance, are ample testimony that the groundwork of the index habit is lacking. To teach the use of a card-index to a person who lacks a working knowledge of book indexes is like teaching algebra to a pupil who has never studied arithmetic. The obvious place to begin the cultivation of the index habit is in the reference room, where readers seeking specific information welcome suggestions of how to go about their business quickly. It is helpful to display such signs as: "Most books have indexes. Use them." They save time."

Some progressive library should try the experiment of a label on the cover of every reference book, reminding the reader to "Use the Index in the Back of This Book." Such prompting would surely induce many of the inexperienced to look at indexes with interest and some practical attention. If reference librarians will seriously seek ways and means to preach the index gospel to questioners, we can considerably reduce the number of library users who are not "index-conscious." Consider what the cross-word puzzle craze has done for dictionaries (besides wearing them out); under its stimulus people have not only learned how to use the alphabetical vocabulary but to trace down variant definitions, abbreviations, synonyms, etc. If we cannot expect to arouse similar enthusiasm for simple index work, at least we cannot question the native ability of library patrons to perform it. To induce an adult to adopt the index habit, even after he understands its value, is the more difficult approach to the problem. The old custom of groping through the pages dies hard. Childhood is the time to begin, and it is here that libraries can perform a distinct service to the whole field of popular education. By following a definite procedure of guidance and instruction in the use of books, they can induce children to learn at the outset the truth of what Miss Brown says so unconditionally, that "an index is the greatest time saver a student has." Saving time at study is surely not a process which many children will resist.

Libraries are, of course, already committed to this policy, but there is always the tempta-

tion to do what seems easier at the moment, namely, to find references for the children instead of telling them how to find them for themselves. This, we know, is not effective instruction, for it naturally defeats its own purpose by inducing the children to lean more and more on the aid of library assistants. Furthermore, by focusing all suggestions and instructions to children who ask for help toward finding page numbers in the indexes instead of searching for the vaguer goal of the subject itself, those in charge are freer to work out the constructive part of their program. The index habit yields another more desirable result than time-efficiency. It insures the finding of all the material a book may contain on a given subject, whenever, as is so often the case, the subject is treated in several different places. Often it leads to the discovery of allied topics of value and interest. Thus it assists quietly and yet most effectively in developing the sense of relationship between facts, the realization that a topic may be important from several different points of view, which is the foundation of genuine culture. Nowhere is the value of the index habit more apparent than in the use of general reference books, such as encyclopedias. The index tells the reader the exact page where the specific fact is to be found. It saves his time in two ways—first, by eliminating his guessing search for the larger heading under which the fact is likely to appear, and, second, by avoiding the reading through of what may be a long article covering several pages in search of that one fact. If, on the other hand, the reader wants much material on a certain topic, the index guides him directly not only to the main treatment of that topic but to all subordinate and allied references as well, telling him what he may expect to find in each place, and again providing him with definite page numbers.

Elsewhere in *The Library Key* there is the following advice: "Sometimes it takes searching to find the word that has been used for a subject in an encyclopedia. If you do not find it under the first word you think of, there may be a cross-reference there to help you. If not, try the index. . . . Often the longer articles are divided into sections, with a word in different type at the beginning of each section, telling what it is about. . . . To find what you want, you may have to glance through the headings of the whole article. If the article is long, it is often quicker to look at the index to the encyclopedia, if it has one." This is good advice, but it would be even better if it urged the reader without qualification to go to the index first, instead of resorting to it only when other methods fail. With the index, there is no

chance of failure. Either it tells the reader at once that the information he seeks is not there, or it guides him specifically and without delay. Tests will show that an inexperienced person can find an obvious major article more quickly on the average by using the page number obtained from the index than by going through the double task of selecting the right volume by means of the letters on the back cover and of following the trail of the titles from page to page within the book. A compact alphabetical series, like an index, is easier to trace than a scattered one, and the sequence of page numbers is a still simpler guide.

The last sentence quoted from Miss Brown's pamphlet brings up an interesting point. She says, "it is often quicker to look at the index to the encyclopedia, if it has one." The proviso is necessary, for it is true that some very reputable houses continue to publish encyclopedias without indexes. And here and there we find librarians who not only acquiesce in but encourage the practice. Perhaps this is due to a theoretical misconception that an encyclopedia is already a sort of index and does not need an additional alphabetical guide. On this theory, the first encyclopedias were made, and at once they encountered tremendous practical difficulties. Only within several score of volumes was it possible to have adequate articles for every topic a reader might look for. And this trouble increased every year with the rapid multiplication of scientific and technical terms. What was to be done? The problem can be made concrete by examining the latest edition of the *Britannica*. It has about 45,000 articles, each from a few lines to several pages long. The average is about half a page. Yet the material in those articles, when indexed, yields half a million references. The editors say, and a cursory investigation supports their claim, that only those places in the text were indexed which give "substantial information." Without an index, how could all this information be made accessible to the reader? Does anyone believe that each of those half million fact units ought to have a separate article devoted to it? To do so would be to change the encyclopedia into a huge, unwieldy dictionary, containing nothing but bare definitions, without background, explanation or coordination. How else could it be done? The alternative is to use what are known editorially as "dummy entries." The reader looks up "Abel" and is told to "see Cain." Nothing is more annoying and nothing has done more to make the use of encyclopedias unpopular than this method, even when used moderately. Consider what it would mean to handle half a million references in this way—ten "dummies" for every real article! Ten

chances to one against the reader hitting the desired fact on the first search. Furthermore, these dummy references never indicate the page number where the reader can finally discover the information; they merely give the title of the article that contains it. This omission is inevitable for mechanical reasons. For it is impossible, when the earlier parts of the text are set into type and made up into volumes, to determine exactly on what page any later material will fall. It would be expensive to hold all the forms open until the end for the purpose of inserting page numbers, perhaps almost as expensive as making an index. Yet, whatever the excuse, their absence is an added drawback to the entire system. Perhaps the best effort so far in English to publish an encyclopedia without an index was made by the editors of *The New International*. They compromised between the two horns of the dilemma. On the one hand, they kept their articles as short as quality and clearness permitted, thus getting a maximum number of headings into the allotted space; and, on the other hand, they tried to keep the dummy entries within tolerable bounds. Considering the obstacles, the results are admittedly fine, but the first half of the compromise tends to sacrifice wealth of detail, while the second half—the reduction of dummy entries—leaves much of the included information without guide posts and therefore inaccessible to the average reader. The total number of titles in *The New International*, including dummy entries, is said to be about 84,000. This is the measure of its possible usefulness for direct references. An index would probably bring to light enough "lost" information to double or treble its scope in this respect.

In every kind of reference work, splitting a topic into many separate headings and articles tends to sacrifice space, since a certain amount of the common background must be repeated in each place. But the worst effect of this method is that it destroys perspective and breadth of treatment. The sense of relationship between the parts and the light that each throws on the other are lost. To take a very simple example, the terms *ampere*, *ohm* and *volt* can be defined separately with technical correctness, but a genuine understanding of the principles involved, their importance and their practical application obviously requires that they be explained and illustrated jointly. Everything that has been said about big encyclopedias applies with double force to the shorter reference works prepared for more popular use, particularly those for children. Reduced as they are to the very essentials of knowledge, their completeness within that field, their clarity and the

easy accessibility of every bit of information they contain become matters of first importance. Many points of knowledge actually need additional explanation and more concrete illustration than in the larger works. Bare definitions that might serve the purpose of trained readers are useless to young people, as well as to the average adult. Since these books have an educational duty to perform, in addition to being purely informative, the text should be as attractive and interesting as formal requirements permit.

All of these things point unmistakably to the kind of encyclopedia that can be made only by the index system, with the information grouped in full adequate articles under the simpler "natural" headings. Thus the quality of information is higher and, by avoiding duplication, the quantity is greater, with every bit of it quickly and directly reached. With equal certainty, these requirements veto the dummy entry system and the multiplication of cross-references, which, while they exasperate and discourage, do not give even a roundabout access to all the information an encyclopedia may contain.

An effective method of treating the index problem for popular reference books has been developed by the editors and publishers of *Compton's Pictured Encyclopedia*. This work, designed for children of school age, follows in its general text the policy of grouping minor details of information, for the sake of clarity and educational quality, under their most closely related major headings. This permits each article to be comprehensive and informative, with a minimum of cross-reference gaps. It makes possible a simple, attractive style, free from the monotonous jargon of "encyclopedic" definitions and quickened by that touch of interest which is needed to make young readers appreciate reference books. The text is indexed in the standard manner, which makes every reference available at once by page number. In addition, the index has been expanded to contain in itself a great deal of pure reference material. Here are given pronunciations of difficult words, birth and death dates, geographical locations, biographical and literary identifications, common equivalents of scientific terms, and so on. This device has been called a "fact-index," and deserves to be adopted more widely. In such a reference work it cannot be troublesome to consult an index first for this kind of simple material. Without further search it is immediately available, together with explicit guidance to fuller information.

The importance of this discussion of reference books lies in the fact that they constitute one of the readiest means of cultivating the general index habit. If all the other considera-

tions of quality and clarity were left out, this one result alone would be justified. A few years ago it was seriously proposed in America and England to deny copyright to any non-fiction book that was published without an index. Perhaps this would be too extreme a measure. If librarians and educators generally took an uncompromising stand on the subject, publishers would be quick to follow suit. Meanwhile, there are indexes to work with. The index habit does not need to be forced upon children who will pick it up readily enough if provided with guidance and opportunities. Once they have formed the habit, they will discover for themselves better results from books with less effort and more pleasure, and will carry into adult life invaluable skill and confidence in the use of helpful print.

Standard Catalog: History and Travel Section

IN THE preparation of the History and Travel Section of the *Standard Catalog for Public Libraries* (Wilson, 1929, cl., 285 p., \$3), the editor, Minnie Earl Sears, has had the cooperation of English and Canadian librarians, so that the list may be useful in other parts of the English-speaking world, although prepared primarily for American libraries. The preliminary list of English books was checked by W. C. Berwick Sayers and Henry A. Sharp of the Croydon Public Libraries, while W. J. Sykes of Ottawa and William S. Wallace of the University of Toronto rendered valuable help on the Canadian books.

The fact that so much historical material is found in the Social Sciences and Biography sections of the *Standard Catalog* and the welcome discovery that so large a number of desirable books are now out of print have limited the number of books on history to 850. A few books on genealogy and heraldry are included. The section on Description and Travel, which follows and which includes Antiquities, numbers 1050. Fully 500 additional titles are mentioned in notes. About 450 titles, or something less than a fourth of the total number of titles included, are starred for first purchase. The author, title, subject and analytical index covers about 560 books. A quantitative review of this sort should not omit to state that the annotations make the History and Travel Section as readable for its own sake as was the Fiction Section.

The editor of the Fiction Section, Corinne Bacon, is also the editor of a recent second supplement to the second revised and enlarged edition of the Social Sciences Section (Wilson, 1929, pap., 41 p.).

THE LIBRARY JOURNAL

July, 1930

Editorial Forum

THE LOS ANGELES CONFERENCE exceeded expectations in every respect, with an attendance of over two thousand, the surprise of cool weather on the journey and through conference week, and a variety and quality of contributions from Californians and others. The two hundred pilgrims from the East who came on the special train, followed by nearly as many more in the succeeding trains, were delighted to find how large was the representation from the far end of the country, which they had not supposed to have a library population comparable with that of the Eastern States. The exuberant and comprehensive welcome given as from every element in Los Angeles by President Monnette of the Board of Library Commissions typified the appreciative hospitality which the visiting librarians had from all sides. The free afternoons were especially profitable and enjoyable as a means of seeing library California at its best in Los Angeles city, county, and vicinity, and the post-conference excursions which offered such varied opportunity will give to many new thought and inspiration from the new experiences. President Keogh's happy tribute to Melvin Dewey, "as the greatest democrat of us all," reminded the conference that no one of the few pioneers was present, while Dr. Frank P. Hill was the only representative of that memorable first pilgrimage to California in 1891.

PRESIDENT KEOGH's address on the texts of Dr. Bostwick's always wise words and Lord Elgin's advice at Edinborough, to look forward to the next half century instead of backward to that which has passed, while giving full credit to the development of the public library in its wider relations, emphasized rightly as coming from the librarian of Yale University

the importance of specialization in intensive work for the scholar and research worker. With the shift in our population, which he noted in the direction of culture, exemplified by the fact that nowadays one out of every hundred persons seeks college education, he emphasized the new demand which will be made upon our library system and which must be met if the library is to hold the place which it has won as the heart of the university and a leading factor in our national culture. The range of library work is already indicated by the three-score committees of the A. L. A. which the Committee on Committees is reviewing, which may perhaps be condensed in number but must be extended in scope as the years and centuries pass.

IT WAS a capital idea to arrange a stop-over of the "Westward Ho" library pilgrims at the Grand Canyon to enable Arizona to have its day, and Arizona did credit to itself and the library profession. In fact, Arizona put itself on the library map. The presence of the governor and of representatives of every branch of the library profession that is to be found in this State made the occasion memorable, and the eastern pilgrims were glad indeed to have this opportunity of making acquaintances so far both from the Atlantic and the Pacific, not usually seen in force at library gatherings. The State certainly has made a good start for remarkable library development which will grow with the growth of this growing commonwealth. Good for Arizona!

THE NORTHEASTERN CONFERENCE at Swampscott scored a like success, and its record of 800 present brought the total attendance at these two library gatherings close to the 3000 mark. This in itself is a striking indication of the growth of the profession. As a regional conference it afforded also an excellent illustration of the value of getting together friends and neighbors from adjoining States. The conference was marked by excellent foresight in the preparation of plans, and the varied round tables occupying the morning sessions did good work, especially in respect to the relations between special and business libraries, which must more and more occupy the attention of the profession on both sides. As always in New England gatherings, the social

features made a great hit, and the Massachusetts Tercentenary received attention in a way which delighted the entire company. Mr. Jones' accession to the octogenarian class was celebrated by a company including the three ex-presidents of the A. L. A., and he may now be cited as a further example of the longevity attained within the library profession.

NO GREATER compliment could be paid to the Library of Congress and Librarian Putnam than the measures which have been made law during the present session of the Congress, which has thus shown the well-deserved appreciation in which it holds the great institution which bears its name. The appropriation of six and a half millions for the construction of the new annex to the Library of Congress for which the purchase of land had been previously authorized was made practically without question, not too soon for the relief of the great building which within one generation has found itself overcrowded with its great collection of books, now third in the world, and provision for the many functions which the Library performs. Room is especially needed for the Copyright Office, which, with the provision for design patents and the ever-increasing demands upon it, will need at least twice the office space at present available. Dr. Putnam had withheld advocacy of the Vollbehr purchase partly because the original measure had been associated with a compliment to himself and partly because he thought so large an appropriation might stand in the way of providing for greater necessities as the appropriation for the annex. Both these difficulties were resolved, and the remarkable indorsement of the Vollbehr bill from librarians and collectors all over the country changed the views of those who felt that so much taxpayers' money ought not to be expended in this wise. Dr. Putnam, however, became convinced that this gift of the people of the nation, as represented by the Congress, to the great Library would be a gain of values instead of a loss of money, because it would stimulate greater and greater gifts, although these had already been many and generous. The nation may well be proud both of its library and of the esteem in which it is held both by the Congress and by the citizenry of the country whom it serves. Probably the largest single library gift ever made to the public is that of the Folger Shakespeare collection with provision for a building to house it, and with the bequest of ten million dollars left by Mr. Folger on his recent death.

Library Chat

THE WHITE HOUSE LIBRARY, the gift of the members of the American Booksellers Association to the presidential equipment which has been abundantly exploited by the press, now becomes a permanent feature of the White House, though it is to be hoped that the selection by the eminent experts has been such that the books will be worn out by use within reasonable time. The suggestion originally came from young Mrs. Hoover's father and was later approved by the President himself. The statement that no books are included in the equipment of the Executive Mansion was, however, a misunderstanding. As a matter of fact, the Library of Congress has for many years treated the White House as a deposit station, and with each administration has changed the books to meet the taste and desires of the new occupant. The misapprehension naturally occurred during the interregnum, when the books furnished to the Coolidges had been removed and had not been replaced to meet the desires of the new occupants. The impression that the nation's great House has been bookless above others is an unfortunate misapprehension which should thus be corrected.

JUDGING from enthusiastic letters written by representative delegates from several States, as well as from personal conversation, there was general satisfaction with the Northeastern Library Convention at Swampscott. The features that seem to have made it an outstanding success were, first, the location; second, the wise arrangement of round tables in the forenoon, set addresses in the afternoon, and less formal talks or entertainment in the evening; third, the practical work of the Hostess Committee; and fourth, the unusual number of speakers of high quality. Freedom from meetings on Sunday was also appreciated, and the finely printed program was praised. Friendly criticism was made of the allotment of rooms for certain meetings, especially in the case of the round table on loan desk problems (said to be allotted inadequate space at all library conferences); but this is one of the most difficult matters to gauge in advance of any convention. Undoubtedly there would be nearly unanimous agreement with the verdict of the New Jersey delegate who wrote: "This was my second regional conference, and I heartily vote for more such conferences!"

W. N. S.

The Los Angeles Conference

FIRST GENERAL SESSION

MR. ORRA E. MONNETTE, president of the Board of Library Commissioners, Los Angeles Public Library, welcomed approximately 2000 members of the American Library Association to their fifty-second annual meeting at the First General Session on Monday Evening, June 23. Mr. Monnette welcomed the gathering in the name of the Mayor of Los Angeles, its government and authority, and in the name of a notable Chamber of Commerce, representing business, trade, and industry; in the name of all betterment and church organizations, civic and social groups, educational officials and associations, universities, schools, colleges, associations, libraries—city and county, public and private—and most particularly, positively, and fraternally, in behalf of the Municipal Department of the Los Angeles Public Library, its official organization, Board of Library Commissioners, librarian, officers, branch librarians, staff and organizations, with cordiality and courtesy and with fellowship. In trying to create a sentiment befitting this great convention, Mr. Monnette had created the following lines, a keynote as it were, in epitome of the meeting and purposes:

"Books on the shelf, books in a row
Are so and so, just so and so—
If on the shelf, and in a row!

BUT,

Books in the hand, books in the mind,
Are wealth, and kind, richer and kind—
If in the hand, and in the mind!"

Mr. Monnette also spoke in his welcoming address in behalf of the honest, interested and high-minded trustee that recognition, honor and justice be shown him in his cooperation in library administration, and stated that in no

other way can the American Library Association attain the greatest height of symmetrical and full development. "Some wit has said," went on Mr. Monnette, "that 'Boards are long and narrow, and made of wood.' I would paraphrase: 'Boards likewise are strong, and full of marrow. By them great libraries have been builded and stood.'"

Adam Strohm, Librarian of the Detroit (Mich.) Public Library, Forty-third President of the American Library Association

Following Mr. Monnette, Andrew Keogh, librarian of Yale University Library and president of the American Library Association, delivered an address on "Scholarship in Library Work." Dr. Keogh stated that the history of the American Library Association is in keeping with the development of American libraries, a contribution to popular education of which we may well be proud. He also pointed out that there has been a shift in our civilization in recent years, and that instead of recounting our achievements during the past half century, we should, as Lord Elgin told the British Library Association, think rather

of the fifty years that are ahead. Dr. Keogh believes that the scholarly attitude is becoming active and a more influential one in the life of the country, and not less in library work than in other fields of activity. The complete text of the address is printed elsewhere in this number.

A reception and dance at the Public Library followed the session.

SECOND GENERAL SESSION

The library movement in California was the general topic of the general session held on Wednesday morning, June 25. Milton J. Ferguson, former State Librarian of California, took for his topic "County Libraries as California Sees Them."

California, despite the fact that it leads all other States in per capita circulation, does not have one bookmobile. This vehicle has great publicity value. Mr. Ferguson did not doubt

that it appeals to the public more strongly than the combined arguments of the American Association for Adult Education, and the A. L. A., in all its ramifications from the Reading with a Purpose Series to the Extension Committee, with the findings of Professor Thorndike thrown in. If it only delivered up to its implied promises, libraries should purchase cars enough to put the motor car manufacturer on a double shift schedule. Here, however, many branches receiving frequent supplies from headquarters by automobile, parcels post, by bus and railway, give a fixity, a permanence to the library system which cannot be attained by a thing with the come and go of the bookmobile. The county system of California, in its inception, thought first of the adult, or, at least, the non-school population as its special objective. However, it was soon clear that the need of the rural elementary schools was quite as great and as important. The system started in a natural way. It had a beginning, often a very simple beginning. Always, however, the fundamental principles were insisted upon. Direct control, tax support, trained and certificated executives, flexibility sufficient to meet varying conditions, ability to follow natural lines of development; these few and easily comprehended rules bring right results. No stress has been placed upon buildings—even the county headquarters; with the sure expansion of the service, all things needed will come.

The gay days were the young days of the public libraries of California, said Althea Warren, First Assistant Librarian, Los Angeles. The first one was organized under Mexican rule in 1844 by a group of Los Angeles notables called "Los Angeles del Pais" (Friends of the Country). The adobe building (Amigos Hall) had a large room for dancing, with a small corner to hold the books partitioned off at one end. In those days a newspaper six months old was eagerly welcomed, and a book of the last century was fresh and readable. When the society ran into debt the building was disposed of by lottery. Andres Pico drew the lucky number. Such pleasant frivolities as dance halls and lotteries have ceased to be part of California library experience, but the compensation is that never, since the year 1878, when a State law was passed empowering municipalities to support a public library by a city tax, has any such institution been dissolved. California has since the seventies been the scene of the most flourishing library development west of Ohio. Of the eleven large libraries of California, five are under the charge of a city manager—Berkeley, Long Beach, Pasadena, Sacramento, and Stockton.

Five are administered by a Board of Trustees appointed by the mayor and dependent for their tax levy upon the City Council—Los Angeles, San Francisco, Oakland, Santa Barbara, and Riverside. The city of San Diego has a city manager in charge of the street and water departments, but the library remains under the care of the Council. Four of the large libraries of the State serve the population of their county as well as the city. These are San Francisco, where the county and city are coterminous, and Stockton, Santa Barbara, and Riverside.

The history of a particular college or university library parallels closely that of the institution with which it is connected, according to Nathan Van Patten, Director of Stanford University Library. Such a library differs essentially from a public library of the same size. The public library is usually a corporate entity; the college library is a department of a larger organization. The public library serves a large clientele with extremely varied interests; the college library serves a small and highly selected group with a considerable community of interests. The acquisition policy of the public library is largely determined by its staff, while in the college library development is closely coordinated with and limited by the educational and research activities of the supporting institution.

The two great university libraries of California (California and Stanford) contain good general collections. With a few exceptions, neither library is exceptionally rich in particular subjects in the same sense as are the libraries of Yale and Harvard. The Bancroft Library at the U. of C. is one of the most important collections relating to the history of the West and of Hispanic America. It is unequaled for material relating to the Pacific slope in general and California in particular. The Hoover War Library at Stanford University is notable as one of the three great collections in the world where research may be satisfactorily carried on in connection with all aspects of the World War and the period of reconstruction. The Lane Medical Library at San Francisco, one of the Stanford University libraries, is the principal medical library west of Chicago and one of the largest in the United States. The University of California Medical School and the College of Medical Evangelists have smaller libraries which are being steadily developed. The cordial cooperation between the three medical libraries in making their collections mutually useful results in the provision of very complete facilities to the staff and students of all of these institutions and to practitioners and research work-

ers throughout the State. The University of California, Mills College, and Stanford University have all benefited from the generosity of Albert M. Bender of San Francisco, who has established at each of these institutions a collection of finely printed books to which additions are steadily being made. The University of California at Los Angeles has recently occupied a new library building, and its collections are being rapidly increased. This library will soon take its place as one of the most important libraries of the State. The famous library of W. A. Clark, Jr., is now the property of the University of California at Los Angeles. This collection, which has its own building and staff, is second only to the Huntington Library in the field of English literature. Adequate libraries exist at the other colleges and universities of the State, including the College of the Pacific, Santa Clara University, California Institute of Technology, St. Mary's College, and the various State normal colleges.

The school library movement beginning here in 1903 had its counterpart on the east coast about the same time, said Ella S. Morgan, librarian of the Lincoln High School Library, Los Angeles. Practically all the school libraries are functioning as parts of the school system and are directly under their control. In many smaller communities the County Library System, by its method of shared expense, is supplying books where otherwise, for lack of funds, there would be none. In the large centers, such as San Francisco, Los Angeles, Long Beach, and San Diego, central purchasing for all or partial central cataloging is the practice. Supervisors of school libraries are employed in San Diego, Long Beach, Oakland, and San Francisco. To hold positions in the high schools of California, librarians must obtain teachers' certificates of secondary grade, since the law states that no librarian may be employed for more than two hours a day in any high school without such certification. It also defines her status as a teacher, and includes her among the beneficiaries of the State retirement act. By this act she may draw a pension after thirty years of service. This assurance of her membership in the faculty adds authority and influence to her position. The usual practice is, and has been, to employ trained librarians, but measures are well under way for making recognized library training a legal requirement.

Max Farrand, director of the Huntington Library, described it as a library of libraries, a collection of collections. Mr. Huntington limited his collection of books and manuscripts almost exclusively to British and American lit-

erature and history. Shortly after he commenced his career as a collector seriously, several large libraries were thrown on the market. Mr. Huntington adapted himself to the new conditions and, with what seemed to be unlimited resources, purchased, in his chosen field, library after library, entire, and collection after collection, the gathering of each of which represented the work of years and even of a lifetime or of generations. Many duplicates were inevitably acquired in such a process, and it was Mr. Huntington's consistent policy to dispose of all material not germane to his particular interest. Members of the staff also were always looking out for opportunities to purchase individual items to fill in any gaps in the collections. It is not the size but the rarity and quality of the Huntington Library that make it important. With less than 200,000 printed items, a remarkably large number—nearly one-half—are to be classified as unusual or rare, and many of them are unique.

Dr. A. S. W. Rosenbach, in his *Books and Bidders*, said: "Mr. Henry E. Huntington . . . was without doubt the greatest collector of books the world has ever known. . . . The library . . . which houses his wonderful collections will be the Mecca of students for all time. No gift to a nation or to a State can ever equal his."

Along with this is the extraordinary collection of British portraits and other eighteenth-century works of art. Then there are 277 acres of land, with the remarkable collection of plants of the arid and semi-arid regions, which distinguished scientific botanists declare have an importance in their own field closely approaching that of the books and paintings in their respective spheres. The other, and unusual, feature of the Huntington Library is that it is a research library, where provision has been made for the carrying on of research in the field of the development of civilization in England and America. The limitation of the field of investigation is determined by the character and content of the collection, and not by any restrictions placed in the deeds of trust. For the first time, provision has been made for the establishment of a research institution in the humanities that corresponds in importance with the great institutions for scientific research.

THIRD GENERAL SESSION

"The Place of the Library in Higher Education" was described by Robert G. Sproul, president-elect of the University of California,

Berkeley, at the third general session on Friday morning, June 27.

Great and complex are the problems which the library of a modern university faces. The relationship of the library to the educational and research work of an institution of higher learning is unique and peculiar. Time-honored and true is the statement that the library is the heart of the university. No other division of the university articulates with all departments of instruction and research on the educational side, and certainly no department can rank with the library which conserves and makes available the thought and capitalizes the experience of all mankind. The intellectual growth and vitality of every school and every division, of every professor and every student depends on the vitality of the library. A building is not a library, although it can and should be a beautiful home for a library. Books are not a library any more than blood is a man, although they are just as indispensable to it. A library is a collection of books, housed adequately and if possible nobly, but most important of all, organized for use and directed by highly trained personnel toward the ends which it has been established to serve, whether they be recreation or research. And this most important feature of the library, its organization for use, in the infinite complexity of modern scholarship and the inexhaustible flood of modern books, can be provided only by highly scientific methods, and by highly educated and organized staffs, differing from the teaching and research staffs of the institution in training, function, and privilege and differing even more widely from the clerical staff in duties and required educational qualifications. The American Library Association would render a distinct and important aid to scholarship if it would organize within itself an efficient fact-finding body to supply university and college presidents with the basic material to enable them to cope intelligently with the fundamental problems outlined above.

Two new aspects of adult education were discussed by Levering Tyson, Field Representative of the American Association for Adult Education.

It is not surprising that libraries are concerning themselves with the recent movement for Alumni Education, he said. There are a few things which can be done to help most effectively. First, acquaint libraries all over the country with the background of the whole idea. Point out particularly the perhaps surprising fact that the traditional and vocal typical alumnus is recognized now definitely to be in the minority. Second, the librarian ought to take the initiative when he is once sure of

his ground. By approaching alumni groups and giving preliminary guidance which will be the most helpful, the librarian can quietly stimulate the whole movement in a way the profession as a whole does not realize.

Radio Education and Alumni Education have their similarities and their differences, insofar as the libraries' chance to participate is concerned. Both are new, both are still in the embryonic stage, both promise a great deal potentially, and there is little known definitely about either. If the library is to be a service station along the alumni education highway as radio education develops the library may be swamped by a different sort of demand. In 1930 census figures will show that there are approximately 13,000,000 radio sets in the country—that is, one to every three to four families. Radio broadcasting can undoubtedly be developed to a certain extent as a useful mechanism in adult education. If the library must broadcast, the various intellectual interests of its immediate community should be organized into a unit with the library as a center. If the A. L. A. could get time on a national chain program to give authoritative and uncolored information about new publications, it would in all probability become one of the most popular and authentic features on the air.

FOURTH GENERAL SESSION

The library administrator who holds that a cataloger or reference assistant needs more training or is doing more important work than a children's librarian, simply admits his lack of knowledge of the possibilities in children's work, said Ralph Munn, director of the Carnegie Library of Pittsburgh. The children's librarian must be accorded salary recognition as a specialist, and it is only in this way that the whole body of children's librarians can be raised to a status that will hold them in their chosen field. The rise of the school library intensifies the need of fairness to the children's librarian. During the last ten years we have seen a large number of our best children's librarians enter the school field. It is to the advantage of society that some of them should do so, but as long as the present wide gap between school and public library salaries exists, there will be an excessive shift to the school, and it will get the best of the incoming classes. With salary equalized, the children's librarian will be free to enter the field she really prefers. Another part of the solution lies in opening more lines of promotion to the children's librarian. Until the two problems of equality in salary and promotion

for children's workers are faced squarely, we will continue to see many of our best children's workers enter other phases of librarianship. The school library can never be a complete and satisfactory substitute for children's rooms; both the school library and the public library have their proper places and both are needed. The problems which seem to be the most urgent are a stabilized personnel which can be gained only through giving fair salaries and opening lines of promotion to children's librarians; a better working agreement and a much more sympathetic understanding between school and public library forces; and the development of intermediate departments which will help to carry the child through the change from children's to adult departments. With solutions to these problems we will have contributed materially toward maintaining the social significance of library work with children.

Mental habits which make for civilization among Americans, and those which tend toward barbarism, were discussed by Everett Dean Martin, author of *Liberty*, the June Book of the Month Club selection.

"Libraries and other educational institutions must help to create a civilization which has never yet existed," said Mr. Martin. "The great civilizations of the past have for the most part consisted of the beliefs and customs of religion. Intellectual achievement has been the exclusive privilege of the few. The masses have simply had civilization swung over their heads. The historical exception to this was the attempt in ancient Athens to base civilization on human intelligence. Hence Greek philosophy and Greek education were occupied with a problem similar to that which confronts us moderns: What are the mental habits which make the civilization?"

"What, in general, are the characteristics which distinguish civilized people from barbarians? I would suggest a few characteristics which would probably help us to estimate the extent of civilization in our own country. It is usually thought that barbarians are undisciplined and free, while the civilized man is a slave. This is not true. Barbarians are not free. Their every act is regulated by authority, custom, taboo. The discipline of barbarians is that of the herd. The discipline of civilized people is that of the individual's reason. Barbarians come in hordes. They swarm. They have little individual consciousness. The emphasis is on the tribe or herd, and I should say that any tendency to emphasize man as mass at the expense of man as person is a tendency toward barbarism.

"Second, barbarians stand in awe of big things and their attention is caught by the spectacular and the gaudy. They lack a civilized man's subtle discrimination. Hence, questions of intellectual sincerity are utterly beyond their comprehension. They simply do not know what intellectual sincerity means and here, to gain some notion of the barbarism in our own country one need only look at the news stands, go to a movie, listen to the radio, or to the average political speech.

"Third, barbarians are essentially conventional and conservative. They tend to destroy whatever is strange, unique, different from their ancestral ways. In other words, barbarians are intolerant, and the revelation of the extent of intolerance in present day America is simply an indication as to how numerous are the barbarians in our midst. In the fourth place, the barbarian mind is psychologically alert, but it is essentially infantile. It is motivated more by wish fancy than by critical knowledge. It has never emancipated itself from parental authority. Barbarians are people who, themselves never having grown up, do their best to prevent anyone else reaching his maturity. We must not, therefore, think of barbarians as wild tribes of aborigines living in the forests. Barbarians today fill our cities, plow our fields, and can be found everywhere, in schools and colleges, in newspaper offices, as well as in the ranks of labor. Modern civilization has merely put clothes on the barbarian and mechanized him.

"The peculiar traits demanded by our present civilization are so obvious that it is only necessary to list them. Ours is a democratic civilization. Hence it is obvious that an unprecedented number of people become capable of any civilization at all. Ours is a mechanical civilization, and most of those who write and speak about this mechanical age seem to think that to adjust the individual to the needs of these times it is necessary only to equip him with certain mechanical techniques. What we really need is the development of something quite the reverse of the mechanical. Education must equip people with supermechanical habits if the values of civilization are to survive. Ours is a world civilization. It demands world-mindedness.

"The struggle for civilization in America is not going to be easy. Perhaps there would be gain if more educators saw more clearly what the conflict between barbarism and civilization really is."

At this session the Newbery medal was awarded to Rachel Field (see page 603).

Pre-Convention Meeting of A. L. A. at Grand Canyon

THE PRE-CONVENTION meeting of the American Library Association was held at the Grand Canyon June 21, 1930. A large assembly of enthusiastic librarians filled the Community Hall. The meeting was called to order by President Keogh. On the platform were Governor J. C. Phillips of Arizona, M. R. Tillotson, superintendent of the Grand Canyon National Park, Dr. C. T. Vorhies of the University of Arizona, Estelle Lutrell, librarian of the University of Arizona and president of the Arizona State Library Association; Ida G. Wilson, librarian of the Arizona State Teachers College, Flagstaff, and secretary of the Arizona State Library Association, and officials of the A. L. A., Carl Milam, secretary, Sarah C. N. Bogle, and Julia Wright Merrill.

The first speaker was Governor Phillips, who gave an address of welcome. Mr. Tillotson was next introduced by Miss Lutrell as the author of *The Grand Canyon Country* and as the person who made it possible for the A. L. A. to hold this meeting at the Grand Canyon.

The next speaker on the program was Dr. C. T. Vorhies of the University of Arizona, representing Dr. H. L. Shantz, president, who could not be present, as he is in Europe. Doctor Vorhies suggested a motto for the initials A. L. A., i.e., *Ask Librarians Anything*.

Miss Estelle Lutrell then spoke on the "Library Movement in Arizona." She told of the natural barriers in Arizona which have held back the development of libraries but that this has been overcome to a large extent by the improvement of the highways and of other transportation facilities. There are 70 libraries in Arizona, 42 being school libraries. The high school expenditure for books during the year 1929-31 was \$1.41 per pupil, and there are in the schools 15 trained librarians. The State Teachers College at Flagstaff, with a new building in

progress, a good book collection and an able librarian, is forging ahead. An equally favorable report may be made for the State Teachers College at Tempe.

Mr. C. B. Lester, secretary, Wisconsin Free Library Commission, was introduced and talked on "The State's Function in Library Service." He said that the primary duty of the State was the establishment of public libraries. There should be a good State agency, State guidance and assistance—all necessary for library development—and a State certification of librarians just as much as State certification of teachers.

Miss Julia Wright Merrill next spoke on "The County Library." She said that today reading has wings, literally wings in several counties where airplanes are carrying books to readers in isolated desert or mountain regions. The demands of rural communities are growing and book appreciation is great in rural districts. Many kinds of branches and stations have been established, the newest one yet heard of being in an irrigation district office.

Dr. Andrew Keogh talked briefly on "College

Cartoon by Reg Manning in "The Arizona Republican" for June 15, 1930

Library Work." He said that there was great need of speed in reading, and he emphasized the wisdom of the formation of the habit of browsing. A college student must learn to use a book in a limited time, for the time-saving factor is one of importance among scholars. The library is the heart of the college where scholars may find all knowledge.

At the close of the meeting Miss Lutrell, with a few words of appreciation of the meeting held in Arizona, presented to Doctor Keogh a Navajo Indian rug, explaining the symbols.

A. L. A. Council

THE A. L. A. COUNCIL met Tuesday morning, June 24, with Dr. Andrew Keogh presiding. The relation of cognate committees and sections recommendations made by Ernest J. Reece, School of Library Service, Columbia University, and chairman of Committee on Committees, was referred back to the Committee on Committees for report at the next conference. After a report on State Aid for libraries, presented by the chairman, Clarence B. Lester, Wisconsin Free Library Commission, the Council resolved to indorse State Aid for libraries and other large unit library service. Samuel H. Ranck, chairman of Committee on Library Revenues, reported that 611 institutions in the United States have trust funds approximating \$40,000,000 (an average of \$60,000 per institution). New York State has the largest trust funds and Maine has the greatest number. Among the States having trust funds of over \$1,000,000 were Illinois, Kentucky, Maine, Massachusetts, New Hampshire, Pennsylvania, Rhode Island, Texas, and Vermont. Mr. Ranck stated that it was the business of the public to finance these libraries by taxation alone, and the great purpose of endowments was to supplement the work rather than to take the place of it.

Following Mr. Ranck's report, the Council resolved that State and Provincial libraries should be asked to include in their reports trust funds and endowments in addition to statement of gifts.

Everett R. Perry of the Los Angeles Public Library recommended Mrs. Elizabeth Sprague Coolidge as a new honorary member of the A. L. A. Council because of her great service and gifts of chamber music concerts to public libraries all over the country. The Council voted to receive Mrs. Coolidge as a member.

Recommendations regarding the publication of a prison library manual by the Committee on Institution Libraries were referred to the incoming committee and the Executive Board for further consideration. The Council went

on record as approving the bill favoring more depositories for government documents now actively before Congress, and of which the Committee on Public Documents are in favor. The George Washington Centennial Commission at Washington, D. C., through a representative, presented a program of observance of the 200th anniversary of the birth of George Washington, to take place in 1932. The Council went on record as approving the program.

On Saturday morning Orra E. Monnette, president of the Board of Library Commissioners, Los Angeles Public Library, presented the report of the American Institute of Genealogy. The Council resolved to appoint a special committee to consider the resolution presented by Mr. Monnette that a committee on the cooperation of the American Genealogy Institute with American libraries be appointed to investigate and report back to the Council.

The Council indorsed the efforts of the National Advisory Committee on Illiteracy to reduce illiteracy as presented by Samuel H. Ranck of the Grand Rapids (Mich.) Public Library.

Mabel R. Gillis, chairman of the Committee on Work with Bill, reported three bills before Congress (Pratt Bill, Braille Bill and Josephson Bill), of which the committee favored the first. The Council moved to approve the Pratt Bill.

The Council instructed the Committee on Civil Service Relations to make a quiet study of the trends in civil service as applied to libraries, report to be submitted to the Council before publication.

In the absence of E. C. Richardson, chairman of the Committee on Exhibitions and Activities in Libraries, John Boynton Kaiser presented plans for the Bimillennium Vergilianum, such celebration to be made by (1) exhibitions of the best books by and about Vergil; (2) exhibition of rare books by and about Vergil, and (3) a union catalog of books by and about Vergil in American libraries.

Harriet E. Howe of the University of Chicago presented J. C. M. Hanson's report on the new Journal of Discussion, the first number to be issued in January, 1931, from the University of Chicago. It was suggested that the present committee be appointed to serve as an Executive Board. The whole matter was referred to the Executive Board with power.

Two resolutions were adopted, one presented by Arthur E. Bostwick resolving that the Council express its approval of the work of the Child Health Conference of the White House, and the Executive Board recommendation that the Committee on Committees redefine the duties of committees.

Rachel Field Wins Newbery Medal

THE JOHN NEWBERY MEDAL, awarded annually by the Section for Library Work with Children of the American Library Association for the most distinguished children's book of the past year, was presented to Rachel Field for *Hitty, Her First Hundred Years*. Miss Field received the medal from Effie L. Power, chairman of the awarding section and director of work with children at the Cleveland (Ohio) Public Library.

The medal is named in honor of John Newbery, an eighteenth-century publisher and bookseller, who was one of the first publishers to devote attention to children's books. It is the gift of Frederic G. Melcher of New York City. Only citizens or residents of the United States are eligible to receive it.

Hitty is the story of a tiny, old-fashioned wooden doll discovered by Miss Field and Dorothy Lathrop, the illustrator, in the window of a New York antique shop. Both the author and illustrator wanted *Hitty*, but she was an early American doll, a real museum piece, and very expensive. She was finally bought in partnership, and her imaginary life history written by Miss Field and illustrated by Miss Lathrop. The book is published by the Macmillan Company.

Miss Field is the author of *Taxis and Toadstools*, *Eliza and the Elves*, *The Magic Pawnshop*, and other stories, plays and poems for children. Miss Lathrop illustrated, among other books, Walter De La Mare's *Three Mulla-Mulgars*, and Dorothy Canfield Fisher's *Made-to-Order Stories*.

Hitty, said Miss Power, is a book which will endure as long as there is youth in the hearts of readers. While it is a story of a doll, boys like it because it is adventurous and rings true. Incidentally, this is the first year that this prize has been won by a woman writer. It is the first prize book with an American background. It is the first prize book which has won two prizes within a year. (It was included in the best fifty books of 1929 chosen by the Typographical Society of America.)

Miss Field, in a graceful response to the presentation, said in part: "I feel that there is one thing they [*Hitty* and the Newbery medal] have in common, and that is the Past. I never get over the wonder that such things

as old samplers, toys and little tattered children's books should be here for us to see and touch long after those who made and handled them are gone. There is something singularly moving about them, and I know that I can never see an old toy or one of those early chapbooks without this sense of the past. So, perhaps, after all, it is appropriate that a little doll of a hundred years ago should be connected with John Newbery and his

bookshop in Old London. I cannot help feeling that she possesses qualities of character that would have pleased him and his distinguished friends and customers—Oliver Goldsmith, Charles and Mary Lamb, and others."

Miss Field flew from New Mexico and was welcomed at the Cojan Pass, in the air, by two planes carrying librarians and was escorted to the Grand Central Air Terminal, Glendale, Cal., June 24, the day the announcement was made that she had won the medal.

Michigan Librarians

THE GENERAL LIBRARY of the University of Michigan and the Department of Library Science were joint hosts to 149 visiting librarians on May 16, which had been set aside as a special "Visitors' Day." Represented among the guests were thirteen public libraries, four college libraries, the State Library, and three special libraries, from Bay City on the north to Grand Rapids, Kalamazoo, and South Bend, Ind., on the south and west. The visiting librarians were escorted through the various departments of the University Library and were also given an opportunity to see the rare collections of the Clements Library. Many attended the classes regularly scheduled in the Department of Library Science and inspected the Study Hall of the Department and its special collection of books and pamphlets on bibliography and library science.

Rachel Field, with *Hitty*, in a T. A. T. plane on her way to receive the Newbery Medal

School Library News

Teachers' Reference Library

THE SAMPLE Textbook and Teachers' Reference Library at the Board of Education, Atlanta, Ga., is of outstanding value and assistance to the teachers of the city. Books, periodicals, courses of study, reports, records and many things of educational aid and value are here for their guidance and help. A good professional library is indispensable to any profession. The right use of professional books makes for the growth and success of the individual, increases the usefulness of his chosen profession, and makes it one of dignity and honor. The library is the teacher's workshop; it is the clearing-house of knowledge. Definite information on an infinite number of subjects and facilities for finding out about other topics are available. Each month a bulletin is sent to the teachers listing the new books received in the Teachers' Reference Library, also a brief review of each book is given. A feature attraction is the opportunity of renewing and returning books and educational material by means of the school bus that visits daily all the public schools; the date of return is plainly stamped inside the back cover of the borrowed book. Books renewed in this manner are restamped and placed immediately back in the school mail. A teacher wishing to take a course of study has at his disposal the catalogs of every school and college in the country, whereas if he had the time and money he would only write to three or four of them. It is the same with magazines and books. Ordinarily, a teacher could only subscribe to one or two magazines and occasionally buy a book. He now has the privilege of reading a number of educational periodicals and keeping in touch with the best educational books. In the permanent exhibit room the latest educational material is always on display. Representative Robison of Kentucky, in his speech to the Seventieth Congress, said: "The security of this nation does not rest upon the completeness of our armaments, our gold, or our possessions; rather it rests more securely upon the enlightened moral and spiritual leadership of the nation. Our young people of today will become the republic of tomorrow." We must have the best educational aids to give them. Our library at the Board of Education is endeavoring to give to the teachers, and through them to the pupils, this aid.

Books are tools with which teachers work every day. They are expert in their use through constant practice. Like good artisans, they need to possess tools of good quality.

High School Library Club

THE MUSKEGON HEIGHTS High School Library Club, Michigan, presented "The Bookland Homecoming," a book-week sketch, at its annual book week assembly this year, featuring an actual Parnassus on wheels drawn by a costumer's dapple gray horse, Lindy with his airplane (a toy one, of course) and Richard Halliburton on bicycle. The play was written by the librarian and produced on three other occasions for women's clubs and parent-teachers' associations. Original library songs and jokes added to the program.

A book-author contest was sponsored by the club at the beginning of the year in the form of a "Visit to the Homes of Authors and Poets." The books, *Women Who Make Our Novels* and Cumnock's *Choice Readings*, were chosen by the winners from a list of books offered as prizes. Plans are now under way for the annual tea given each year to acquaint the mothers of the Library Club members and the faculty with the work, new books, and library club girls. This event takes place in the library, where a short program is followed by an examination of new books.

Book Jacket Contest

TO CELEBRATE Good Book Week, the Jefferson High School Library of Portland, Ore., sponsored a book jacket contest. First and second term students were asked to make jackets for the books which they had read as supplementary work in English, transferring into design and picture the ideas which they had received from their reading. The book jackets, many of whose uniqueness and unconscious flair for advertising might incite the envy or at least the interest of more experienced commercial designers, were exhibited in the library, where they induced many students to ask for the book which they represented.

Universal Reference Guide

ELMER ELLSWORTH JONES, Professor of Education at Northwestern University, and H. Claude Lewis, former Superintendent of the Provo, Utah, City Schools, have recently published *The Universal Reference Guide*, a guide to readings in the *Book of Knowledge*, *Compton's Pictured Encyclopedia*, and the *World Book*. Topics under each subject are arranged alphabetically and give the volume and page number of the reference volume. Hugh L. Nicholas, Chicago, is the publisher.

Librarian Authors

HENRY EVELYN BLISS has since 1892 been a librarian in The College of the City of New York, serving under the titles of Assistant Librarian, Deputy Librarian, Acting Librarian, and now Associate Librarian in charge of Departmental Libraries.

To the preparation, writing and revision of the three volumes, the first of which was published last May by Henry Holt & Company under the title of *The Organization of Knowledge and the System of the Sciences*, Mr. Bliss has since 1922, after thirty years of constant service and hard work in the Library, been permitted to devote a large part of his time. The second volume, a thorough study of *Classification for Libraries*, has been submitted for publication by the A. L. A. The third volume, if published, would present, as a contribution to the general problem and an exemplification of the principles stated in the second volume, the system of classification for libraries, in condensed and tentative form.

This large undertaking was suggested when several leading university librarians met at luncheon during the gathering of the Eastern College Librarians at Columbia University in 1921. On Doctor Richardson's urging that the system of classification should be developed, Mr. Bliss replied that he was more interested in larger aspects of the general movement of the organization of knowledge. He was advised to undertake the larger work as a basis for classification. Shortly after this, the proposal came from the authorities of the college that Mr. Bliss should have ample time for this service in library interests as well as in educational and scientific; and to insure its completion the permission was again and again liberally extended.

Mr. Bliss was born in New York in 1870, of American parentage from New England and New York, his grandparents being of the families of Hale, Davis and Anderson. He has had little schooling beyond that of his college and his library work; but in 1903 he took a summer course in library economy under the elder Mr. Fletcher at Amherst College Library. His interest in classification was encouraged by Mr. Fletcher; and he had the kindly advice of the elder Mr. Cutter at the Forbes Library, Northampton, in several conferences that summer, the last of Mr. Cutter's valuable life. Mr. Bliss regards his education as derived mostly from life and work, books and business. He has had a varied experience, and he finds a congenial kinship between a "jack of all trades" and a "master" of all sciences such as is requisite for

HENRY EVELYN BLISS

adequate handling of the problem of classification for libraries. He has contributed several substantial articles to library journals and to educational and philosophical reviews.

Vergil Bimillennium Reading List

IN COOPERATION with the American Classical League, the Enoch Pratt Free Library of Baltimore has published a four-page circular—which includes a short introductory sketch of Vergil's life and influence and a list of seventeen works by or about Vergil. The intention is that this circular shall be widely distributed to the general public, as an economical and effective way to call attention to the subject and to encourage worthwhile reading.

Owing to special printing arrangements, the cost of these circulars is very low: 100 for \$2; 500 for \$3.50; 1000 for \$6. There is an extra charge of 50 cents for having the name of any local club, library, or school appear on the front page of these lists, so that the name of the Enoch Pratt Free Library of Baltimore appears as an inconspicuous line, "Printed at the Enoch Pratt Free Library, Baltimore," on the back page. Orders may be sent direct to the Enoch Pratt Free Library, Baltimore, specifying the local imprint desired, if any.

Rhode Island Library Association

THE ANNUAL business meeting of the Rhode Island Library Association was held in the auditorium of the Elmwood Public Library (Knight Memorial), Saturday, June 7. The following officers were elected to serve for 1930-31: President, Mrs. Sara E. Sherman, Elmwood Public Library, Providence; first vice-president, Mr. Henry B. Van Hoesen, John Hay Library, Providence; second vice-president, Miss Bess McCrae, Providence Public Library, Providence; recording secretary, Miss Grace H. Hall, Harris Institute Library, Woonsocket; corresponding secretary, Miss Doris Dow, Elmwood Public Library, Providence; treasurer, Miss Gertrude E. Brown, Providence Public Library. Executive Committee: Mr. Clarence E. Sherman, Providence Public Library; Miss Annise B. Kane, Providence Classical High School; Mr. Laurence M. Shaw, Providence Public Library.

Corrected Statement

To the Editor of THE LIBRARY JOURNAL:

May I correct a statement made by Mr. L. F. Schmeckebier in his article, "The Government and the Libraries," in THE LIBRARY JOURNAL for June 1. On page 491 Mr. Schmeckebier states, "No Congressional designations are in effect in two States—Nevada and Wyoming," and later, "In Wyoming the two depositories are close together in the southeast corner. Neither is a general public library, one being the State library at Cheyenne and the other the University of Wyoming Library at Laramie."

These statements were true when Mr. Schmeckebier delivered his address in Washington, but are not accurate at present, since the Natrona County Public Library here in Casper was designated a depository library in July, 1929.

ELEANOR DAVIS,
Librarian, Natrona County Public Library,
Casper, Wyo.

The July and August Forecast

A check list of books of general interest whose publication dates fall during July or August

(Exact date of issue is given when known)

Fiction

- Ashbrook, H. *The Murder of Cecily Thane*. Coward McCann (July 18). \$1.50.
- Ashton, Helen. *Doctor Serocol*. Doubleday, Doran (July 1). \$2.50.
- Bartlett, Vernon. *The Unknown Soldier*. Stokes (July 10). \$2.
England's unknown soldier.
- Birabeau, André. *Revelation*. Viking Press (July 18). \$2.50.
A novel of a mother's love for her son.
- Coleman, Emily Holmes. *The Shutter of Snow*. Viking Press (Aug. 8). \$2.50.
The mental adventures of a woman who fought through insanity to health, told by the woman herself.
- Conselman, Bill. *Ella Cinders in Hollywood*. Stratford. \$2.50.
This novel tells about the intimate and interesting doings of the famous screen stars.
- Deval, Jacques. *Wooden Swords*. Viking Press (July 1). \$2.50.
A riotous story of the "battle of Paris."
- Everton, Francis. *Murder Through the Window*. Morrow (July 24). \$2.
By the author of *The Hammer of Doom*.
- Federn, Karl (trans. by Donald Douglas). *Baron Fritz*. Farrar & Rinehart (Aug. 29). \$2.50.
War story.
- Feval, Paul. *Comrades at Arms*. Longmans, Green (Aug. 6). \$2.50.
- Gibbs, Jeanette Phillips. *French Leave*. Little, Brown (July 1). \$2.50.
A novel of Bohemian Paris.
- Harrison, Charles Yale. *Generals Die in Bed*. Morrow (July 24). \$2.50.
The first realistic account of the War through the eyes of a private in the Canadian army.
- Hoel, Sigurd. *Sinners in Summertime*. Coward McCann (July 18). \$1.50.
Translated from the Norwegian.
- Hughes, Langston. *Not Without Laughter*. Knopf (July 25). \$2.50.
A story of Negro life in the Middle West.
- Iliff, Roy. M. *In the Red*. Stokes (July 24). \$2.
An American middle class tragedy.
- Jackson, G. G. *The Romance of the Sea*. Stokes (July 10). \$2.50.
Sea mysteries.
- Kantor, Mackinlay. *El Goes South*. Coward McCann (Aug. 5). \$2.
A story of the great majority—the city dwellers who hold ordinary jobs.

- Mayor, F. M. *The Rector's Daughter*. Coward McCann (Aug. 18). \$1.50.
Life of a middle-age spinster in one of the quiet backwaters of England.
- Morrow, Honoré W. *The Last Full Measure*. Morrow (July 24). \$2.50.
Complete in itself, this Lincoln novel naturally follows *Forever Free* and *With Malice Toward None*.
- Olivier, Edith. *The Triumphant Footman*. Viking Press (July 18). \$2.50.
A story of the gay deceiver of the gay nineties.
- Reeve, Christopher. *The Toasted Blonde*. Morrow (Aug. 21). \$2.
Mystery.
- Rutledge, Archibald. *Bolio and Other Dogs*. Stokes (July 24). \$2.
Short stories.
- Setubal, Paulo. *Domitila*. Coward McCann. (July 7). \$2.
A fascinating history of the First Brazilian Empire.
- Stanley, Marie. *Gulf Stream*. Coward McCann (Aug. 18). \$1.50.
Story of a mulatto girl.
- Svevo, Italo. *Confessions of Zeno*. Knopf (July 25). \$3.
A fascinating, analytical study of a master hypochondriac.

Miscellaneous Non-Fiction

- Birnis, Arthur. *An Economic History of Modern Europe*. Dial (July 1). \$4.
- Blair, Emily Newell. *The Creation of a Home*. Farrar & Rinehart (Aug. 15). \$2.50.
Answers the questions of a daughter setting out to create a home of her own.
- Davis, H. W. C. *A History of Europe from 800 to 1789*. Dial (July 1). \$4.
- Duffus, R. L. *The Santa Fé Trail*. Longmans, Green. \$5.
- Goldsmith, Margaret, and Voigt, Frederick. *Hindenburg: The Man and the Legend*. Morrow (July 24). \$3.50.
Life of the obscure Prussian officer who became head of Prussian Army during War and later President of First German Republic.
- Heisenberg, Werner. *The Physical Principles of Quantum Theory*. Univ. Chicago Press (July 1). \$2.50.
First detailed account of physical principles of quantum theory.

Jais, Regina. *Legendary Germany, Oberammergau and Bayreuth*. Dial (July 1). \$2.50.

Ketterl, Eugen. *The Emperor Francis Joseph I*. Stratford. \$5.

For nearly three decades Ketterl waited on the Emperor day and night, and thus is in a position to picture that character more faithfully, perhaps, than anyone else.

Lewis, F. F. *The Drama of Life*. Stratford. \$2.50.

Mason, Dexter. *The Art of Drinking*. Farrar & Rinehart (July 31). \$1.

A practical book for prohibition cellars of recipes for cocktails, punches and canapés.

Memoirs of Madame Du Barri. Stokes (July 10). \$2.50.

Mjoberg, Dr. Eric. *Forest Life and Adventures in the Malay Archipelago*. Morrow (Aug. 21). \$4.

Munson, Gorham. *The Dilemma of the Liberated*. Coward McCann (Aug. 5). \$3.

Non-partisan exposition of the New Humanism.

Murray, David A., D.D. *The Real Meaning of Jesus*. Stratford. \$3.

Springer, Fleta Campbell. *According to the Flesh*. Coward McCann (Aug. 18). \$3.

Life of Mary Baker Eddy.

Standing, Herbert F. *Spirit in Evolution*. Dial (July 1). \$5.

A biology from the evolutionary standpoint.

Tillyard, E. M. W. *Milton*. Dial (July 1). \$4.

Wellford, E. T. *Crime and Cure*. Stratford. \$1.

A review of this lawless age and the mistrial of Christ.

Zweig, Stefan. *Joseph Fouché*. Viking Press (Aug. 8). \$3.50.

The biography of the arch-traitor of the French Revolution and the master-spy of Napoleon.

Juvenile

Auslander and Planck. *Lazy Teddy Bear*. Longmans, Green (July 16). \$1.

Berger, Helen. *Mystery of World's End*. Longmans, Green (July 16). \$2.

Caswell, Annie Gray. *Susann of Sandy Point*. Longmans, Green (July 16). \$2.

Scene laid in a Canadian factory town.

Darling, Esther Birdsall. *Navarre of the North*. Doubleday, Doran (Aug. 15). \$2.

Story of a real dog.

Darrow, Floyd L. *Builders of Empire*. Longmans, Green (Aug. 13). \$2.50.

Donahey, Mary Dickerson. *The Tavern of Folly*. Doubleday, Doran (Aug. 15).

Mystery story for older girls.

Fifty Pictures to Paint. Morrow (Aug. 21). \$2.

Picture book.

Gartner and Winkler. *Mugel the Giant*. Longmans, Green (July 16). \$2.

Gay, Zenya and Jan. *Panch and His Burro*. Morrow (Aug. 21). \$2.

One day in the life of a little Mexican boy.

Hinkle, Thomas C. *Tornado Boy*. Morrow (Aug. 21). \$2.

Another great horse story of the Old West.

Justus, May. *Peter Pocket's Luck*. Doubleday, Doran (Aug. 15). \$1.50.

For children up to ten.

Klett and Lewinski. *When Star Children Play*. Longmans, Green (July 16). \$1.50.

Knox, Rose B. *The Boys and Sally*. Doubleday, Doran (Aug. 15). \$2.

Plantation story.

Morris, Kenneth. *Book of the Three Dragons*. Longmans, Green (Aug. 13). \$5.

Olcott, Frances Jenkins. *Wonder Tales from Goblin Hills*. Longmans, Green (Aug. 13). \$2.

Palm, Amy. *Wanda and Greta at Broby Farm*. Longmans, Green (July 16). \$2.

Phipps, Mary. *All About Patsy*. Doubleday, Doran (Aug. 15). \$2.

For children up to seven.

Raymond, Margaret T. *Linnet on the Threshold*. Longmans, Green (July 16). \$2.

High school story.

Rothmund, Toni. *Amber Bead*. Longmans, Green (July 16). \$2.

Nature story.

Sherwood, Merriam. *The Tale of the Warrior Lord*. Longmans, Green (Aug. 13). \$2.50.

Old Spain.

English New Book Agreements

IT HAS now been definitely decided that American libraries are not eligible for commission under the New Book Agreement that went into effect in England with English libraries last fall. It is hoped that libraries that import from England in considerable quantity might perhaps benefit by the Net Book Agreement, but it seems that this is not to be so. This agreement is that libraries which buy in one year "new net books" to the value of more than £100 and less than £500 shall be granted a "rebate," otherwise called "commission," of 5 per cent, and that libraries whose annual business in "new net books" amounts to over £500 shall be granted a rebate of 10 per cent. The rebate is to be taken in other new net books at list price. All is not going well with the scheme, but it is, of course, too early to judge just what are its merits and defects. Surely it would involve a tremendous amount of bookkeeping and auditing.

Book Selection on World Affairs, XI

Modern American History and American Foreign Policy

The World Peace Foundation Mobilizes the Opinions of Experts
Throughout the United States

*Latané, John H. *History of American Foreign Policy*. (12 votes) Doubleday. 1927. \$4.

"This book has the merits of lucidity and simplicity, while being at the same time accurate and scholarly."

Recommended as Advanced by Kelsey; as Intermediate by Goodrich, Hamilton, Kelso, Kimball; as Elementary by Bartlett, Brown, Darling, Jones, Rippey, Thach.

*Howland, Charles P. *Survey of American Foreign Relations*. (8 votes) Yale. 1928. \$5.

"Authoritative discussion of recent American foreign policies."

Recommended as Advanced by Darling, Goodrich, Kelso, Morrison, Rippey, Williams, Woolery; as Intermediate by Bartlett.

Adams, Randolph H. *History of the Foreign Policy of the United States*. (7 votes) Macmillan. 1924. \$3.50.

"... clear, well arranged and convenient."

Recommended as Advanced by Kelsey; as Intermediate by Hamilton; as Elementary by Bonham, Briggs, Brown, Kelso, Morrison.

*Blakeslee, George H. *Recent Foreign Policy of the United States*. (7 votes) Abingdon. 1924. \$2.

"An able exposition of the newer diplomacy of the United States."

Recommended as Advanced by Darling, Fuller, Goodrich, Rippey, Woolery; as Elementary by Hamilton, Jones.

Bemis, Samuel F., ed. *American Secretaries of State and Their Diplomacy*. 10 v. (6 votes) Knopf. 1927-29. \$4 each.

"... one of the most complete accounts of American diplomacy and should be in every library."

Recommended as Advanced by Bartlett, Bonham, Fletcher, Hamilton, Kelso, Williams.

*Fish, Carl Russell. *American Diplomacy*. (6 votes) Holt. 1923. \$3.

"A well-written, comprehensive and judicious treatment of American diplomacy."

Recommended as Advanced by Kelsey; as Intermediate by Cresson, Goodrich; as Elementary by Briggs, Fletcher, Jones.

*House, Edward M. *Intimate Papers*. 4 v. (6 votes) Houghton. 1926-1928. \$20.

"Of major significance in the literature upon the period of the World War."

Recommended as Advanced by Bonham, Darling, Fuller, Hamilton, Johnson, Kimball.

*Moore, John Bassett. *Principles of American Diplomacy*. (6 votes) Harper. 1918. \$2.75.

"... a simple and straightforward account of the chief points of our diplomatic history..."

Recommended as Advanced by Goodrich, Williams; as Intermediate by Cresson; as Elementary by Briggs, Jones, Thach.

Beard, Charles A. *Rise of American Civilization*. 2 v. (5 votes) Macmillan. 1927. \$12.50.

"A most stimulating synthesis."

Recommended as Advanced by Bonham, Dunbar, Kelsey, Kimball; as Intermediate by Johnson.

*Dennett, Tyler. *Americans in Eastern Asia*. (5 votes) Macmillan. 1922. \$5.

"Valuable for an understanding of the background of recent affairs in the Orient."

Recommended as Advanced by Bonham, Darling, Jones, Rippey, Thach.

*Dennis, Alfred L. P. *Adventures in American Diplomacy, 1896-1906*. (5 votes) Dutton. 1928. \$5.

"Interesting essays on foreign relations, 1896-1906, which are partly based on hitherto unpublished papers."

Recommended as Advanced by Darling, Goodrich, Hamilton, Kelso; as Intermediate by Bartlett.

Johnson, Allen, ed. *Chronicles of America*. 50 v. (5 votes) Yale. 1921. \$132.50.

"... the set as a whole is reasonably accurate and is not overburdened with the impedimenta of scholarship."

Recommended as Advanced by Kelsey; as Intermediate by Dunbar, Kimball; as Elementary by Fletcher, Johnson.

*Latané, John H. *United States and Latin America*. (5 votes) Doubleday. 1920. \$2.50.

"A clear, readable summary of the relations of the United States and Latin America..."

Recommended as Advanced by Goodrich, Rippey, Williams; as Intermediate by Briggs; as Elementary by Bonham.

*Stuart, Graham H. *Latin America and the United States*. (5 votes) Century. 1928. \$3.75.

"A very excellent survey of an important portion of America's foreign policy."

Recommended as Advanced by Bartlett, Jones, Kelsey; as Intermediate by Darling; as Elementary by Kelso.

Moon, Parker T. *Imperialism and World Politics*. (4 votes) Macmillan. 1926. \$3.50.

"Effects of modern imperialistic ventures on international relations."

Recommended as Advanced by Fuller, Woolery; as Intermediate by Morrison; as Elementary by Brown.

- *Rippy, J. Fred. *United States and Mexico*. (4 votes) Knopf. 1926. \$5.
"Thorough, readable, scholarly, and a contribution to American literature on world affairs."
Recommended as Advanced by Bartlett, Darling, Fletcher, Kelso.
- *Alvarez, Alejandro. *Monroe Doctrine*. (3 votes) Oxford. 1924. \$3.
"Necessary to a study of the major American policy."
Recommended as Advanced by Darling, Jones; as Intermediate by Briggs.
- *Bryce, James Bryce, Viscount. *International Relations*. (3 votes) Macmillan. 1922. \$2.50.
"A searching analysis by a most discerning scholar."
Recommended as Advanced by Briggs, Jones, Woolery.
- *Buell, Raymond L. *International Relations*. (3 votes) Holt. 1929. \$4.
"... the most thorough and least biased treatment available."
Recommended as Advanced by Briggs, Cresson, Jones.
- Bullard, Arthur. *Our Diplomacy in the Modern World*. (3 votes) Univ. of Pa. Press. 1928. \$1.50.
"This is a short account by a well-known writer."
Recommended as Intermediate by Bartlett, Woolery; as Elementary by Morrison.
- *Dealey, James Q. *Foreign Policies of the United States*. (3 votes) Ginn. 1926. \$2.80.
"A good general analysis of the foreign policies of the United States and of the basic factors determining them."
Recommended as Advanced by Briggs; as Intermediate by Goodrich, Jones.
- Haring, Clarence H. *South America Looks at the United States*. (3 votes) Macmillan. 1928. \$2.50.
"An interesting account of South American opinion on the United States by a trained worker who spent a year in South America in investigation."
Recommended as Advanced by Bartlett, Kelso; as Intermediate by Brown.
- Hart, Albert B., ed. *American Nation Series*. 27 v. (3 votes) Harper. 1904-08. \$2.25 each.
"From the scholar's standpoint, perhaps the best general history of the United States."
Recommended as Advanced by Dunbar, Kelsey; as Intermediate by Johnson.
- *Hill, Howard C. *Roosevelt and the Caribbean*. (3 votes) Univ. of Chicago. 1927. \$2.50.
Recommended as Advanced by Bartlett, Darling, Kelso.
- *Hughes, Charles E. *Our Relations to the Nations of the Western Hemisphere*. (3 votes) Princeton Univ. 1928. \$1.75.
"Our relations with our neighbors in the light of rights granted by international law."
Recommended as Advanced by Goodrich, Morrison, Woolery.
- *Latané, John H. *From Isolation to Leadership*. (3 votes) Doubleday. 1925. \$1.20.
"... an extremely interesting and stimulating brief sketch of the meaning of our international policies."
Recommended as Advanced by Briggs, Fuller; as Elementary by Thach.
- *Mowat, Robert B. *Diplomatic Relations of Great Britain and the United States*. (3 votes) Longmans. 1925. \$5.50.
"Covers the period 1783-1920. Full, careful, scholarly, fair-minded and interesting."
Recommended as Advanced by Bonham, Briggs, Rippy.
- Nearing, Scott, and Freeman, Joseph. *Dollar Diplomacy*. (3 votes) Viking. 1925. \$2.50.
"A radical approach, but an exceptional collection of facts and figures . . . illustrative of the dominant economic motive in our foreign policy."
Recommended as Advanced by Fuller, Hamilton; as Intermediate by Brown.
- Paxson, Frederic L. *Recent History of the United States*. (3 votes) Houghton. 1926. \$3.
"A fair-minded, interesting summary . . ."
Recommended as Intermediate by Bonham, Dunbar, Kelsey.
- Rippy, J. Fred. *Latin America in World Politics*. (3 votes) Knopf. 1928. \$3.50.
"Mr. Rippy touches on the relations between the United States and Latin America . . ."
Recommended as Advanced by Bartlett, Williams; as Intermediate by Brown.
- *Sears, Louis M. *History of American Foreign Relations*. (3 votes) Crowell. 1927. \$3.50.
"Contains a good bibliography and chronological tables."
Recommended as Intermediate by Hamilton; as Elementary by Bartlett, Darling.
- *Thomas, David Y. *One Hundred Years of the Monroe Doctrine*. (3 votes) Macmillan. 1927. \$3.
"A convenient summary."
Recommended as Advanced by Bonham, Cresson, Hamilton.
- *Williams, Benjamin H. *Economic Foreign Policy of the United States*. (3 votes) McGraw. 1929. \$4.
"An excellent approach from a fresh viewpoint."
Recommended as Advanced by Goodrich, Jones, Rippy.

The above list was originally contributed by two distinct groups of professors, one of which was asked to name titles on American Foreign Policy, the other on Modern American History. The frequent mutual preference in both groups for certain titles, and the small number of professors who responded with material on American foreign policy suggested merging the two lists. Titles recommended and professors cooperating in the field of American foreign policy are starred.

Cooperating Professors: Ruhl J. Bartlett, Tufts College; Milledge L. Bonham, Jr., Hamilton College; Harold E. Briggs, Culver-Stockton College; Marshall S. Brown, New York University; *W. P. Cresson, Tufts College; *Arthur B. Darling, Yale University; Willis F. Dunbar, Kalamazoo College; Robert S. Fletcher, Oberlin College; Leon W. Fuller, Colorado College; *Leland M. Goodrich, Brown University; Milton W. Hamilton, Albright College; Cary Johnson, Jr., University of Virginia; *Robert L. Jones, University of Pittsburgh; Rayner W. Kelsey, Haverford College; Maxwell R. Kelso, Mills College; Elizabeth G. Kimball, Wells College; C. H. Morrison, Regis College; *J. Fred Rippy, Duke University; *Charles C. Thach, New York University; Mary W. Williams, Goucher College; W. Kirk Woolery, Bethany College.

Book Reviews

A Symposium

Fargo, Lucile F. *The Library in the School*.
Chicago. American Library Association.
1930. cl. 453p. \$3.

By a School Administrator

THIS SURVEY of the library in the schools will be useful to librarians, to student-librarians, and to educators interested in the school library as a progressive factor in education. The book will doubtless be used as a text in courses in school library methods and practices, but it is of interest also to all those interested in school libraries. The scope of the book is wide. The school library is considered from the elementary school through the junior and senior high schools. Practical problems, such as housing and equipment, technical and mechanical processes of getting books ready for circulation, problems of circulation, of book selection, and of library instruction—all these are discussed clearly and concisely. When there are two sides to a question of policy, Miss Fargo states them. She is frank in giving her opinion, but is open-minded in regard to the opinions of others. Her standards agree with those of men like C. C. Certain and F. K. W. Drury, who have done much to bring school librarianship to a high professional standard. She suggests nothing startling in change of policy from what are already the ideals and objectives of most school librarians, but it is well to have these things stated rather than to exist only in the practices of the best librarians. The orderly arrangement of the topics makes this book valuable for quick authority and reference. The bibliographies at the end of the chapters suggest further reading. The school library as an integral part of the school system, the library keeping alive to educational trends but not being led astray by fads, the library that has for its main purpose the furnishing of books to the child, well-chosen books, simple yet efficient methods of circulating them, and a place to keep books that is attractive to children and is accessible to them—these are Miss Fargo's main texts. But she goes further and treats administrative programs, problems of supervision, and relationships between public and school libraries. Miss Fargo has taken a clear, penetrating look at the field of the school library and sets forth what she has seen and what she thinks about it. It is a book which librarians will want to own.

HAZEL E. HUTCHINS,
Supervisor of Libraries, Public Schools,
Denver.

By a Public Librarian

SCHOOL LIBRARIANS everywhere owe a debt of gratitude to Miss Lucile F. Fargo for the splendid contribution that she has given to the profession in her book, *The Library in the School*, recently published by the A. L. A. as one of its series of textbooks for library schools. Miss Fargo has succeeded in doing a difficult task well. She has written in an interesting, entertaining manner of the many phases of library work with which school librarians are concerned. Although it is a well-known fact that the author's field has been in a high school library, she has treated equally well the problems of the elementary and junior high school. One notes with satisfaction the logic Miss Fargo and her co-workers have employed in the arrangement of this invaluable text. The aims and activities of the library are presented first, followed by a careful consideration of the equipment, the organization, and the procedure necessary for the successful completion of those aims and activities. The wealth of practical knowledge and experience that is Miss Fargo's have been given generously to this work. The book is enhanced by a number of attractive illustrations. These are photographs of various types of school libraries, including, too, a rural service book truck delivering books to a country school. At each chapter end there is an excellent bibliography of recent material. Following the bibliography is a list of questions and projects. These have been carefully prepared. They furnish a comprehensive résumé of the material covered, and at the same time are stimulating and thought provoking. There is included very appropriately for such a book, a list of Accredited Library Schools with information revised to 1930. It is futile to attempt in any review even to name the many points that have been so clearly defined. Every question pertaining to school library management has been so adequately treated that the author has achieved splendidly the purpose for which her book was first intended, that of a textbook for library schools. This book is in many a sense more than a textbook, it is an authority on the subject of school libraries to which students, teachers and librarians will turn for guidance.

EVELYN M. FOSTER,
Head of School Department, Library Association of Portland, Ore.

By a Teacher of School Librarians

THIS basic volume, dealing with the functions and organization of the library in the school, will serve in a fourfold way.

Primarily, it is a textbook for the students. It will be of immediate help to those who independently, or in a library school, in a college class, or in a training-in-service group seek authoritative information regarding present-day library practices in the schools of this country. No prospective school librarian can afford to disregard it.

This volume will serve admirably as a handbook for school administrators and principals. Here are reported and summed up the practices of school libraries as far apart as New York and California, Texas and Minnesota. Here are discussed the problems of the elementary, junior and senior high school library. Librarians must assume some of the responsibility of bringing so helpful a reference aid to the attention of this group.

To those members of the library profession now serving in schools or in public libraries, this study should prove an incentive for self-analysis. No forward-looking school librarian will fail to appreciate its immediate value as an aid to solving local problems and to stimulating a more scientific study of the whole school library situation. They will also welcome it as a reference book providing facts perhaps known but heretofore not available in printed form.

Not least, though last, Miss Fargo has made a real contribution to the literature of education. For teachers of school librarians this will be a basic textbook. For those professors who seek to include in their courses in teacher training institutions a brief study of the library as a part of the modern school plant, it will be invaluable reference reading material. The selective bibliographies given with each chapter, the charts, diagrams, and record forms help to make this a practical handbook for all who are striving to make the library a functioning element in every type of school—rural or city, elementary or secondary.

ELEANOR M. WITMER,

Associate Librarian, Teachers College, Columbia University.

Children's Books from 12 Countries

THE A. L. A. has recently published a brochure of the most attractive and characteristic children's books from twelve countries, a selection made by the Section of Library Work with Children. In each case the foreign pub-

lisher is given, the translator if available, the publisher in this country, and a short descriptive annotation. The basis of selection is the practical need of a public library—the purchase for the children's rooms of books that the boys and girls ask for and are really interested in.

Book Club Selections (for July)

BOOK-OF-THE-MONTH CLUB

Doctor Serocold, by Helen Ashton. Doubleday, Doran.

The novel takes the form of a day in the too-laborious life of a provincial doctor.

BOOK LEAGUE OF AMERICA

St. Augustine, by Giovanni Papini. Harcourt, Brace.

Since this book is appearing on the fifteenth centenary of the death of St. Augustine, it will no doubt attract the world-wide attention of everyone interested in the life of this saint, who was in many ways the first "modern man."

BUSINESS BOOK LEAGUE

Story of Wall Street, by Robert I. Warshaw. Greenberg.

CATHOLIC BOOK CLUB

The Flying Cromlech, by Hugh de Blacam. Century.

CRIME CLUB

One of Us Is a Murderer, by Alan Le May. Crime Club, Inc.

FREETHOUGHT BOOK CLUB

Burbank the Infidel, by Joseph Lewis. Free-thought Press Ass'n.

JUNIOR LITERARY GUILD

Moorland Mousie (boys and girls 8-12), by Golden Gorse. Scribner.

When I Was a Girl (girls 12-16), collected by Helen Ferris. Macmillan.

Thirty Fathoms Deep (boys 12-16), by Edward Ellsberg. Dodd, Mead.

LITERARY GUILD

Wooden Swords, by Jacques Deval. (trans. by Lawrence Morris.) Viking Press.

An autobiographic confession of a nearsighted, bespectacled one who fought the Great War with a spittoon, a wheelbarrow, a sponge, and a broom. Riotously funny.

PAPER BOOKS

By the Waters of Manhattan, by Charles Reznikoff. Paper Books, Inc.

SCIENTIFIC BOOK CLUB

Crucibles: The Lives and Achievements of Great Chemists, by Bernard Jaffe. Simon and Schuster.

Library Organizations

Toronto Opens Central Lending Library

THE THIRTIETH annual conference of the Ontario Library Association was held April 21-22, 1930, the hosts being the Public Library of the city of Toronto. Specially noteworthy was this meeting because of the special feature of the program, namely, the opening of the new Central Lending Library of Toronto, which was formally opened at the evening meeting on Easter Monday by Prof. Andrew Keogh, President of the A. L. A.

At the general meeting the addresses were of special interest because of the men who gave them and the entirely different problem that was discussed. Mr. Weir Grieve told of a library which he had tried to develop in the little fishing village of Tobermory, which is on the edge of the Bruce Peninsula, that great neck of land that separates the Georgian Bay from Lake Huron. Mr. C. R. Sanderson gave an interesting, clear-cut description of the evolution of library work in England and Scotland, in the rural districts, and showed how, after many discouragements, it has been possible now to provide that a person might get a book which he earnestly desired, no matter in what part of the British Isles he lived; and the same idea was brought up by Miss Mary Black of the Public Library in Fort William, where, in the discussion in regard to Library Institutes, she spoke strongly about the necessity of developing the library work in New Ontario so that they wouldn't have in that part of the Province a great many small libraries such as were in the older part of the Province.

The officers for the new year are: President, Mrs. A. A. Kennedy, Kingston; First Vice-President, Mr. R. E. Crouch, London; Second Vice-President, Rev. T. B. Howard, Listowel; Secretary-Treasurer, E. Blanche Steele, Toronto.

First Meeting in Two Years

THE TENTH annual meeting of the Florida Library Association was held at Jacksonville in the Windsor Hotel, April 10-11; the 1929 meeting had been given up, as so many Florida librarians were attending the A. L. A. Convention at Washington, so a two-year interval had elapsed since the Lakeland meeting.

Dr. Helen T. Woolley of Columbia University was the principal speaker of the morning on the topic, "Pre-School Interest in

Stories." The afternoon session was given to Florida history, and the Florida Historical Society in a talk by Mrs. Garrett Porter, secretary of the society, and by Dr. Joseph Roemer, State high school inspector and professor of education at the University of Florida. Carl Bohnenberger gave an arresting portrait of "The Librarian as an Artist," in which the non-creativity of the librarian in literature, as compared to the output of the educator, the lawyer, and members of other learned professions, was strikingly made plain.

"The Public Library as a Civic Asset," a talk by George W. Simons, Jacksonville's city planner, opened the second day's session. A symposium, led by Miss Olive Brumbaugh of Orlando, on library extension followed, the discussion centering about a county library bill. Miss Stelle of the Tampa Public Library spoke on Educational Foundations and Florida's special needs, and Mrs. M. L. Blanton spoke briefly on her experience in library commission work in North Carolina.

The annual banquet was held in the Windsor Hotel on the night of the 10th, the speaker and guest of honor being Harold F. Brigham of the Nashville Public Library.

Officers for the year are: President, Miss Helen V. Stelle, Librarian, Tampa Public Library; First Vice-President, Mr. Carl Bohnenberger, Jacksonville Public Library; Second Vice-President, Mr. E. L. Robinson, Tampa; Secretary, Miss Henrie May Eddy, Gainesville; Treasurer, Mrs. F. R. Wallace, Orlando.

The Carnegie United Kingdom Trust

FROM the sixteenth annual report of the Carnegie United Kingdom Trust, just issued, we learn that the only building erected in 1929 with the aid of a Trust grant was the public library opened at Hendon on July 3.

In no previous year has there been so much all-round development in those sections of the library service in which the trustees are specially interested. Borough and county libraries alike in most parts of the country have shown greatly increased vitality, and the principle of cooperation on regional lines has taken a prominent place in the program of many authorities. As regards the Central Library for Students, the Royal Commission on National Museums, while not going so far as the Departmental Committee on Public Libraries, has definitely recommended a government grant of £3,000 a year.

The Northeastern Library Convention

LIBRARIANS from the six New England States, from New York and New Jersey, who for various reasons were unable to join the A. L. A. pilgrimage to Los Angeles, gathered on June 13-18 at the New Ocean House, Swampscott, Mass., and there held a most successful regional meeting, known as the Northeastern Library Convention. The convention was the result of long and arduous preparation by a committee consisting of the presidents of the State Library Associations of Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New York and New Jersey, the Western Massachusetts Library Club, the Special Libraries Association of Boston, and the New England School Library Association. There were 802 registrations, the various States being represented as follows: Massachusetts, 517; New York, 102; Connecticut, 40; Rhode Island, 37; New Hampshire, 33; Maine, 28; New Jersey, 17; Vermont, 16; Illinois, 4; Pennsylvania, 3; Michigan, 2; Canada, 1; unknown, 2. The presidents of the various organizations shared the responsibility of presiding at the many sessions.

One factor which contributed notably to the success of the convention was a Hostess Committee under the direction of Mrs. Joyce Bisbee Holder, former librarian at the Lynn Public Library, which, in addition to extending hospitality in the usual manner, was able, as the result of careful preparation, to bring together librarians seeking specific help or advice and those able to help them. Commercial exhibits were numerous and thoroughly representative.

On Friday evening, June 13, those who had arrived for the dinner session were welcomed by Edward H. Redstone, State Librarian of Massachusetts, who had been delegated as his representative by Governor Allen, who was on the program but unable to come. Following Mr. Redstone, Benjamin N. Johnson, historian of Lynn, spoke upon "The North Shore in History and Tradition." The term "North Shore" is used to describe all the Massachusetts coast from Boston to Cape Ann, and this includes towns so rich in history and tradition as Salem, Marblehead, and Gloucester.

The president of the Special Libraries Association of Boston, Rev. Frederick T. Persons, opened the Saturday morning session. The subject, "Cooperation Between Special Libraries and Public Libraries," was discussed by Margery Quigley, of Montclair Public Library; Ruth Savord, of the Council of Foreign Relations, New York City; Mrs. Mary W. Dietrichson, of the Business Branch of the

Boston Public Library; James F. Ballard, of the Boston Medical Library, and others. During the same forenoon an open meeting of the New England School Library Association was held, at which those present listened to a stimulating talk, "The Biographer Looks Twice at Life," by Rollo Walter Brown. Emphasizing the necessity of the biographer's taking a sympathetic attitude toward his subject, Mr. Brown explained his liking for "lonely Americans" such as afforded him the title for his recent book, and told many interesting anecdotes of Dean Briggs of Harvard, whose biography he wrote, and of other famous men.

Saturday afternoon Mrs. Gordon Brinley, in medieval costume, gave delightful interpretative readings from *The Canterbury Tales*, reproducing as nearly as might be the manner in which they were originally spoken. At this session it was voted to send a telegram to Senator Fess of Ohio, urging prompt action toward the purchase of the Vollbehr collection for the Library of Congress. In the evening Prof. Odell Shepard of Trinity College, Hartford, Conn., author of *The Heart of Thoreau's Journals*, spoke upon New England poetry. In his talk, thought by many to have been the finest of the whole convention, he paid special tribute to Emerson, Thoreau, and Robert Frost.

On Sunday there were no meetings, but in the afternoon about one hundred and fifty persons accepted the invitation of Miss Katharine P. Loring, trustee of the Beverly Public Library, and a former president of the Massachusetts Library Club, to take tea on the lawn at her ancestral home in Beverly, which overlooks the sea. Sunday evening a dinner was given to Gardner M. Jones, librarian of the Salem (Mass.) Public Library, in honor of his 80th birthday. Three former presidents of the A. L. A., namely, Walter L. Brown of Buffalo, J. I. Wyer, Jr., of Albany, and Hiller C. Wellman of Springfield, were present, together with the presidents of most of the associations taking part in the convention. Mr. Jones, one of the charter members of the Massachusetts Library Club, was in the second class at the New York State Library School, and has been librarian at Salem for 41 years.

Beginning Monday, the forenoons were given over to round tables held in various meeting places, the afternoons and evenings to general sessions. Monday morning was devoted to the following round tables: "State Commission Workers," led by E. Louise Jones, field secretary of the Massachusetts Commission. Discussion was most informal, centering chiefly about the problems of village libraries, institutes for untrained librarians, salaries

for those with little experience, the weeding out of books of no permanent value, school libraries, etc. "Cataloging for Small Libraries," led by Mrs. Frances R. Coe of the Massachusetts State Library. At this round table there was lively discussion. "Modern European Literature, with special reference to Foreign-born Readers," led by Edna Phillips of the Massachusetts State Commission. Leonilda Sansone, of the Aguilar Branch of the New York Public Library, analyzed effectively the reading tastes of Italians in America. She gave a résumé of Italian literature suitable for public libraries and presented a classified list of important Italian books of the last five years. Dr. John A. Walz, professor of the German language and literature at Harvard University, sketched the development of the German novel and presented a list of about forty contemporary novels by outstanding German authors. Copies of Dr. Walz's and Miss Sansone's lists may be had from Miss Edna Phillips, Division of Public Libraries, State House, Boston, Mass. "Loan Desk Problems," led by H. T. Dougherty, librarian of the Westfield, Mass., Athenaeum. The problems discussed were: non-residents and transients, by Robert K. Shaw of Worcester (in his absence his paper was read by Miss Mooney, of his staff); reserves, by Miss Coombs of Providence; overdue books, by Miss Clement of Manchester, N. H.; use of the telephone, by Miss Clark of Montclair; and the use of new charging methods (Dickman, Toledo-Dickman, Detroit, and Gaylord), by Miss Holmes of East Orange and Miss Rogers of Evanston, Ill.

At the afternoon session on Monday, Mrs. Marion Cobb Fuller, of the Maine State Library, spoke on "The Librarian's Library," and Prof. Arthur W. Peach, of Norwich University, Northfield, Vt., outlined "Significant Aspects of Contemporary American Literature." The three aspects which Professor Peach considered most significant were: (1) the disastrous effect of the machine age on American culture, (2) the tendency of the novel to become more and more a medium of sociological discussion, and (3) the contributions of new racial elements—emphasizing to some extent the Negro, but more especially the Jew. Incidentally, Professor Peach predicted the disappearance of rhythm from poetry and the eventual supremacy of free verse. On Monday evening Arthur E. Staples, editor of the Lewiston, Me., *Journal*, talked to the convention about Edna St. Vincent Millay. He gave an interesting account of her early life.

Hospital librarians met for a round table on Tuesday morning, with Elizabeth W. Reed, librarian of the Warren Library at the Massachusetts General Hospital, Boston, as leader.

Miss Ida M. Cannon, head of social service work at the same hospital, gave a résumé of the twenty-five years of this work, originated in this country by Dr. Richard Cabot; and Miss Elsie Thurber told of her work as occupational therapist. George H. Evans, librarian at Somerville, Mass., related how the Rotary Club in his city provided a room for a library at the local hospital, the Public Library supplying books and service. At the same hour a round table for children's librarians was held, under the leadership of Alice M. Jordan, of the Boston Public Library, the general theme being the making of children's collections more attractive through book reviews, puppet shows, and story-telling. At two o'clock the delegates assembled to listen to addresses by Elva S. Smith, of the Carnegie Library, Pittsburgh, on "Open Doors to Literature," and by Prof. Eric Kelly, of Dartmouth College, Newbery medalist, 1928, on "Symbolism in Children's Books." That evening, in the ballroom, Mrs. Edward MacDowell gave an illustrated talk about the MacDowell colony at Peterborough, N. H., and played most delightfully several of Mr. MacDowell's compositions. She urged librarians to do what they could to give publicity to the need of the colony for financial support.

The Wednesday morning round table was devoted to book buying, especially for the limited budget. Leslie T. Little, of Waltham, leader, opened the discussion with a plea for more effective use of book funds, especially by small libraries, many of which are wasting money on mediocre, ephemeral, and overpriced books. He urged libraries to resist high-pressure advertising and then buy books that have been proved worth while, often to be had later at lower prices; also to adopt systematic plans for building up their collections. "Public Library Service to Business" was the subject of a paper by Mildred C. Clapp, of the Newark Free Public Library, at the Wednesday afternoon session, and John Farrar, of Farrar & Rinehart, publishers, whose subject was "Contemporary Authors," related in entertaining fashion some of his experiences with authors, publishers, and reviewers, and explained the dollar book experiment.

The convention came to an end Wednesday evening with a celebration in costume of the Massachusetts Bay Colony tercentenary. All who attended the convention had been invited to appear in any American costume from the past, whether twenty or three hundred years ago, and besides the many who accepted this invitation came those who were to appear as characters in historic episodes. Library staffs of Boston and vicinity then enacted episodes or presented features of colonial life.

In The Library World

Masterpieces of Library Architecture

BOSTON, Indianapolis and Detroit have public libraries which exemplify the best work in their class as selected by a jury of eleven architects, according to a recent publication, *Masterpieces of Architecture in the United States*, published by Charles Scribner's Sons. The Boston Public Library, completed in February, 1895, was designed by McKim, Mead & White and is particularly the work of Charles F. McKim. The Indianapolis, Ind., Public Library, completed in October, 1917, by Paul P. Cret and Zantzinger, Borie & Medary, associated architects, was awarded the Gold Medal of the Philadelphia Chapter of the American Institute of Architects in 1921 and Cass Gilbert designed the Detroit, Mich., Public Library, which was completed in March, 1921.

Believing that the United States possesses a wealth of material worthy of accurate presentation, Edward Warren Hoak and Willis Humphry Church began to plan this book three years ago. A list of some 150 buildings, recognized as being of the highest type of architecture in their respective classes, was compiled and sent to a number of the leading architects with a request that they act as a jury for the final selection. Five buildings were chosen from each class—memorials, museums, libraries, churches, public buildings, hotels and office buildings—and the lists were then revised and voted upon three times. Those buildings with the greatest number of votes were finally selected. The jury consisted of Chester H. Aldrich, Harvey Wiley Corbett, Ralph Adams Cram, William Rutherford Mead, Raymond M. Hood, William Mitchell Kendall, H. Van Buren Magonigle, Paul P. Cret, Ralph T. Walker, Harry Sternfeld, and Milton B. Medary.

Lehigh Acquires Treasures

WHEN Robert Honeyman, of the class of 1920, came to the Lehigh-Lafayette game he brought as a gift to the Lehigh Library, Bethlehem, Pa., sixteen rare and valuable books, which will be added to the treasure collection. Probably the most interesting book among these is a fine copy of the first English translation of Euclid's *Geometry*, translated by Henry Billingsley and published by John Daye in 1570. This is the second oldest English book in our library. The oldest English book Lehigh has was published in 1550. This copy of Euclid contains the autograph of Viscount Hatton,

who was a Governor of Guernsey and a Doctor of Civil Law at Oxford. An interesting inscription shows that he presented the book to Martin Benson of Christ Church, Oxford, who later became Bishop of Gloucester. The book also contains the book plate of J. Benson, D. D., and John Camp Williams, from whose recent book sale it was purchased by Mr. Honeyman. It also bears the book plate of Robert Honeyman, IV, and an inscription showing that it was presented to Lehigh University in November, 1929, by Mr. Honeyman. The book is in excellent condition and has a half morocco slip case to protect it from damage.

The second item in this collection of considerable interest is a copy in five portfolios of Haebler's original leaves from incunabula. There are 280 original incunabulum leaves which illustrate the art of printing in Europe from the beginning up to 1500. Most of the important presses are represented. It contains such rarities as a leaf from the 1481 Dante, the Nuremberg Chronicle, 1493; Jacobus De Voragine, 1483, and Petrarch, 1492. Two volumes cover Italian incunabula, two volumes German, and one volume Western Europe. This publication will enable the library to display the paper and print of the most important books printed in the fifteenth century, with the exception of the Gutenberg Bible and the Caxton imprints.

Among the other books, to mention only a few, are: A copy of *Quintilianus*, published in 1527; a copy of *Aulus Gellius*, 1519; Valerius Maximus' *Moralium*, 1541; Claudio Barthol's *Orbis Maritimi*, 1643; a first edition of Tull's *Horse-Hoeing Husbandry*, which is the book used by Voltaire to guide him in his farm experience; Porta's *Natural Magic*, 1658, and a second edition of Newton's *Principia*.

These books form a distinct addition to the Lehigh Library and will be housed in the new treasure room along with the other rare books.

Hawthornden Prize Awarded

THE HAWTHORNDEN PRIZE of \$500 was awarded on May 22 to *The Stricken Deer*, a biography of William Cowper, by Lord David Cecil. This prize is given in England for what is considered the best piece of imaginative prose or verse by a British author under 41 years of age. *The Stricken Deer* was published in America on March 29 by Bobbs-Merrill Company.

German Cooperative Clearing House for Duplicates

DR. ADOLF JURGENS of the Notgemeinschaft der Deutschen Wissenschaft, Berlin, gives a short description of the German Cooperative Clearing House for Duplicates now in use since 1921.

PURPOSE

That no duplicate shall stand on the shelf of any Germany library.

HOW ORGANIZED

1. All duplicates are registered on slips.
2. Copies of the slips form the general catalog in the office of the Notgemeinschaft der Deutschen Wissenschaft.
3. The original slip circulates, the books remaining on the shelves in their respective libraries.
4. Only a limited number of libraries of the same type are admitted, i.e., thirty German and five foreign.
5. There is a general plan for the route of the original slips.
6. The central library offers new duplicate slips each month to all cooperating libraries.
7. All German scientific libraries are indicated by a key number.
8. The library asking for books or journals takes out the slip, marks it with her key number and sends it, without letter, to the Notgemeinschaft der Deutschen Wissenschaft.
9. Every library taking out books is expected to place the same number of volumes at the disposal of the central library.
10. The offering library makes shipments direct to the ordering library.

The main differences with the Wilson plan (Lib. Jour. 55:108) are:

1. There is no money involved.
2. Service is limited to certain libraries, but includes books and journals.
3. All orders can be filled, there is no waste of time by making demands on exhausted stock.

The effect of this circle of duplicates caused the German Ministry of the Interior to establish the same plan by ordering that notice of all duplicates in government institutions of the Reich be sent to the Reichsaustauschstelle in the Reichsministerium des Innern. The same arrangement has been made with Russia but on a "prized basis." The Notgemeinschaft has received from the Whiterussian State Library in Minsk 3,500 volumes and from the Knishnaja Palate at Moskow 8,000 volumes. Combined with this is the "Suchzirkel" der Notgemeinschaft, organized in the same way. If

a library wants copies of a journal (scientific or not) it sends a red slip which circulates with the duplicate slip after it is marked in the central library with the alphabetical catalog of sections of journals at disposal.

Newark Pamphlet Library

ONE of the many innovations introduced into the library world by the late John Cotton Dana, librarian of the Public Library, Newark, N. J., is the method of filing pamphlets by color and position, now in use in that library. The chief advantages of the system are economy of time, cost and space, immediate accessibility of the pamphlets, and extreme flexibility of the collection. As no catalog cards are made, the collection can be added to quickly and weeded discriminatingly with little labor. The colors designating the numbers of the Dewey Decimal Classification are:

Lemon	for 0
Dark blue	for 1
Red	for 2
Orange	for 3
Green	for 4
Black	for 5
Brown	for 6
Check black and white..	for 7
Light blue	for 8
Striped black and white..	for 9

The pamphlets are banded with strips of colored paper $\frac{1}{4}$ inch in width. Always begin at the bottom and read upward. Take, for example, a pamphlet classed in 331.82. The three figures at the left of the decimal are always in the same position on the pamphlet, i. e., $\frac{1}{4}$ inch from the bottom, $\frac{1}{8}$ of an inch apart. The 82 at the right of the decimal has both color and position; color of 8 is in the second position; 63 would be the color of 6, or brown in the third position, and so on. Thus, placed side by side on the shelf, the first three numbers correspond in both color and position, but the fourth band having both color and position begins at the lower left and rises in sequence to the upper right within the class. A glance will tell if these are out of order.

An alphabetical variation of this is used for biography. In this section all pamphlets have a striped band, or No. 9, 1 inch from the bottom, to designate Biography. They have also a certain color at a certain height to designate the name of the person. Thus, Jones would bear color No. 4, or green, in the seventh position. Lincoln would bear color No. 5, or black, in the second position.

The banding is done quickly and exactly by means of a wooden frame cut to size with exact spacing.

Among Librarians

Hanson Retires in June

J. C. M. HANSON, who has been a member of the faculty of the Chicago University Graduate Library School since January, 1928, will officially retire June 15, although he expects to again join the school on June 30 for the Summer Quarter of 1930, and from January to June, 1931, he expects to again return to the Graduate Library School to take charge of a seminar on classification, with possibly some instruction in cataloging. From January to June, 1928, Mr. Hanson was given a leave of absence from the school to carry on special work in the Vatican Library, and during the Summer Quarter of 1928 he was a member of the faculty of the University of Michigan Library School. In 1928 he received from King Haakon of Norway the order, Commander of St. Olaf, and in the same year the great cross of the society, "Fanitullen," Oslo, Norway.

SARAH BYRD ASKEW, librarian and organizer of the New Jersey Public Library Commission, was awarded the honorary degree of Doctor of Library Science by the New Jersey College for Women on June 7. In awarding the degree she was cited as "distinguished for wit and wisdom in public address, and as idolized by her associates in every library in New Jersey, and through whose enthusiastic, tactful, and persevering efforts the State she loves with such rare devotion has advanced to the foremost rank in the extent and efficiency of its public libraries."

TOMMIE DORA BARKER has received the honorary degree of Doctor of Literature from Emory University at Atlanta, Ga. This distinction follows the recent announcement of Miss Barker's appointment by A. L. A. as regional field agent for the South.

MARGERY BEDINGER, Albany '18, has resigned as head of the Adult Education Department of the Seattle Public Library and is now librarian of the Montana School of Mines, Butte, with the rank of assistant professor.

GRACE WINIFRED BELL was appointed vice-librarian of the Lackawanna Public Library, New York, on May 1. Miss Bell was formerly in the general reference department of the Grosvenor Library of Buffalo.

WILLIAM WARNER BISHOP, librarian of the General Library, University of Michigan, Ann Arbor, received the honorary degree of Doctor of Letters from Columbia University on June 3.

SARAH C. N. BOGLE, assistant secretary of the A. L. A., will represent the Association at the meeting of the International Library Committee in Stockholm, Sweden, on August 20.

NORMA B. CASS, Columbia '28, has been appointed assistant in the Reference Department of the Michigan State Library, Lansing.

MARION COMINGS, Western Reserve '06, formerly architectural librarian in the Art Institute of Chicago and organizer of the Library of the Cleveland Museum of Art, is in charge of the Art Division which was opened in the Carnegie Library of Pittsburgh on May 19.

J. PERIAM DANTON has accepted the position of general assistant at A. L. A. headquarters, beginning Aug. 1. He has been reference assistant at Williams College and in charge of the Reserve Room.

HAZEL DEAN, N. Y. P. L. '25, who has been head cataloger in the Syracuse University Library, has accepted the position of cataloging reviser in the Baker Library of the Harvard University Graduate School of Business Administration, Cambridge, Mass., beginning in September.

HAZEL MERRY, Wisconsin '25, has accepted the position of assistant in the Rosenwald Industrial Museum Library, Chicago.

HERBERT PUTNAM, graduate of Harvard University, jurist, author, and for more than thirty years librarian of the Library of Congress was presented with the honorary degree of Doctor of Letters from New York University on June 11.

ELSIE SCHINZEL, St. Louis '27, formerly a school librarian in Burlington, Iowa, now holds a similar position in Evanston, Ill.

BURTON STEVENSON returns this summer to America, having for five years occupied the post of Director of the American Library in Paris. Mr. Stevenson, as is well known, was formerly editor of the most widely known anthology, *The Home Book of Verse*. He is at work again on a revision and enlargement of *The Home Book of Verse* and has decided that he must live on this side of the water to complete this and other literary undertakings.

MISS TURK, formerly with the Babson Institute, now has charge of the newly organized Remington Rand Library in Buffalo, N. Y.

ITHMER COFFMAN WOLFE, Michigan '28, has resigned as acting librarian of the Coldwater Public Library, Michigan, to accept the position as assistant in the Los Angeles School Library System, California.

Opportunities

This column is open to librarians

Wanted—Assistant for Adult Department. Training or at least one year's public library experience necessary. G-12.

Wanted—Cataloger for two or three months to revise collection in small public library in Middle West. G-13.

Wanted—Librarian for Dowagiac, Mich., Public Library. Training and experience. G-14.

High-grade position wanted by trained librarian with fifteen years' experience. Available immediately. F-14.

University and library school graduate with four years' experience desires position (school or public library) in or near Washington, D. C., or N. Y. Cataloging, reference and school experience. F-15.

College and library school graduate desires position in a public or school library for the coming year. F-17.

University and library school graduate with experience desires position in college library. F-18.

Children's librarian with ten years' experience would like position as head of a children's department. West, Pacific Coast, preferred. F-19.

College and library school trained librarian, with experience as high school teacher and public librarian, wishes position as high school or normal school librarian, or instructor of library science in normal school. F-20.

University and library school graduate with five years' teaching experience, three years' in special libraries, and seven in university libraries desires position as librarian or reference librarian in college or university library. New England, Middle States or Middle West preferred. F-21.

Position wanted by young woman with library school training and three years' experience in public library. G-10.

University graduate with library and secretarial training desires position in public, college or business library. Some experience in college library. G-11.

A college and library school graduate, with one year's experience in special library work, desires a position in a public or college library. Reference work preferred. G-15.

Free for Postage

NEBRASKA LEGISLATIVE Reference Bureau, Lincoln, has the following publications which they would be glad to give to any librarian who cares to pay postage or expressage:

Papers and Proceedings, A. L. A. 1897, 1904-15, 1918-19.

THE LIBRARY JOURNAL, June, August and September, 1907.

Public Libraries, March, 1898; October, 1900; February, 1905; May, 1907.

U. S. Bureau of Education. *Statistics of Public Libraries in the U. S. and Canada*, 1893. *Papers Prepared for the World's Library Congress*, 1896.

Free for Transportation

PRINCETON UNIVERSITY LIBRARY will send to any library, transportation charges collect, the following law reports. All of any one reporter must be taken. Bindings very poor. New Jersey Chancery Court Reports: Dickinson, Vol. 1-21; Stewart, Vol. 1-23; Halstead, Vol. 2-4; Robins, Vol. 1-3; Beasley, Vol. 1-2; McCarter, Vol. 1-2; H. W. Green, Vol. 3; Stockton, Vol. 3; C. E. Green, Vol. 1-12. New Jersey Supreme Court Reports: Vroom, Vol. 1-41; Spencer, Vol. 1; Southard, Vol. 1-2; Halstead, Vol. 1-7; Dutcher, Vol. 1-5; J. S. Green, Vol. 1-3; Zabriskie, Vol. 1-4; Coxe, Vol. 1; Pennington, Vol. 1-2; Harrison, Vol. 1-4. New York Appeals: Comstock, Vol. 1-4; Selden, Vol. 1-6; Kernan, Vol. 1-4; Smith, Vol. 1-13; Tiffany, Vol. 1-12; Hand, Vol. 1-6; Sickels, Vol. 1-101; E. H. Smith, Vol. 1-16; Bedell, Vol. 1-20. New York Chancery: Johnson (1814-23), Vol. 1-7; Hopkins (1823-26); Hoffman (1839-40); Clarke (1839-41); Paige (1828-45), Vol. 1-11. New York Supreme Court: Coleman & Caines (1794-1805); Johnson (1799-1800), Vol. 1-3; Caines (1803-05), Vol. 1-3; Caine's Cases (1804-05), Vol. 1-2 in 1; Johnson (1806-23), Vol. 1-20; Cowen (1823-29), Vol. 1-9; Wendell (1828-41), Vol. 1-26; Hill (1841-44), Vol. 1-7; Hill & Denio (Suppl. 1842-44); Denio (1845-48), Vol. 1-5. Pennsylvania Supreme Court: Binney, Vol. 1-4.

The Calendar

Sept. 10-12—Maine Library Association, annual meeting at Bar Harbor.

Oct. 1-2—Connecticut Library Association, annual meeting at New London, Conn.

Oct. 2-4—Colorado Library Association, annual meeting at Denver, Colo.

Oct. 7-9—Missouri Library Association, annual meeting at Sedalia, Mo.

THE PICTURE MAP
OF

MASSACHUSETTS

No area of our country is more thickly strung with memories, both historical and literary. The picture map visualizes the history of the old commonwealth from the first voyages along the coast down to the present day. It recalls the sea history, fishermen, clippers, fighting men; it gives a revolutionary history of Bunker Hill, Lexington and Concord, Indian Massacres, etc. It pictures its industrial history, and along the border are detailed maps of Boston, old and new, and the neighborhood adjacent to Boston, together with colorful drawings of such old landmarks as Harvard Gate, Washington Statue, House of Seven Gables, and the Bunker Hill Monument.

Maps also may bear one Lands Away

Trails of great adventure famous in history and story stir one's memory on a map.

"For one and all, or high or low,
Will lead you where you wish to go;
And one and all go night and day
Over the hills and far away!"

Every Library should have in the children's room THE MAP OF GREAT ADVENTURES

There is a universal appeal in the Map of Great Adventures and the beautiful coloring makes it a welcome ornament in home, school or public library. For those who have traveled, who wish to travel or who love to read of far traveling, the map has an inescapable appeal. From the days of Marco Polo, Magellan or Cook to Amundsen, Bee and Byrd, the legends are full of reference to famous adventure and of the books that have told the tales.

No one can glance over it without feeling an irresistible desire to follow through print some trail of great adventure on land and sea. Books with this aid become live things again and not mere paper and ink. The Map, quaint drawings and legends, give a hundred and fifty good reasons for more reading.

Full size about 22 x 28 inches. Six colors.

Sweeping the Country!

The SELF-CHARGING SYSTEM now
being installed by leading libraries
from coast to coast

NO development in library operation during the past two decades has aroused as much interest, comment and acceptance as the new Self-Charging System.

Typical comments from
librarians using the
new method

"The greatest time-saver ever developed" . . . "Works perfectly, saves time and bother" . . . "Makes book charging automatic" . . . "Surprisingly simple and easy to put in operation" . . . "It's wonderful to be relieved of all that routine."

When librarians learn the details of this new method, its efficiency and economy, they immediately plan to adopt the system.

A New Library A Day

Installations of the method within the past month, at the rate of a new library a day, include many large cities, as well as many smaller libraries. In every case the new plan is reported as giving complete satisfaction.

Free booklet explains in detail

In a booklet by the Demco Library Supplies, you may read all the particulars of this revolutionary method of book charging. We will gladly mail you a copy without charge or obligation.

The Good Reader and the Good Book

By Professor B. H. Lehman

University of California, Berkeley

BOTH THE LIBRARIANS and the teachers, it is my thoughtful conviction, have now for a long time been making a mistake. They have seemed to believe that all readers can become good readers of good books. That is an illusion, the kind of illusion that is called "hokum" by the lower classes. Not all readers can become good readers of good books. It depends on many things whether a person can become a good reader of an admirable work of literature. It depends upon certain later training, no doubt, but it depends also and fundamentally on whether that given person began life with the reality sense or with the fantasy sense.

Those people who when they were babies imagined that because the bottle appeared when they cried, therefore, they created the bottle by crying for it, never make good readers of good books, for after a while they discover that they didn't create the bottle by crying for it, and they do what the psychologists call "take flight"; they live in a world of fantasy. Such people become in the end the devoted readers of Harold Bell Wright and Ethel M. Dell. The stories presented are fantasies; they are flight stories, admirable ways of filling up the time between two engagements; not an extension and deepening of life, but an anodyne for life. The good reader is not made of such stuff; and the good book is not made, in this special psychological sense, of fantasy and of the materials of flight from life.

To say what is a good book is, of course, difficult. We know good books when we see them; we know them when we read them. They have a certain honesty. They arrange through this stored medium of words impres-

sions of the multiple universe with rigorous honesty, an honesty which is honesty chiefly with reference to a whole, an integrated creative personality, and they contrive of these impressions an authentic beauty. These books, specimens of which we shall come to presently, that are good books are obviously not good books for everybody. One of the best books in the world—I have no hesitation in saying—is an early nineteenth century novel by Jane Austen, called *Emma*. Jane Austen had beyond almost any writer in English a beautiful coincidence of gift with the nature of the world. She had no philosophy smaller than the philosophy of creation itself. She applauded nothing and condemned nothing but stupidity, and even of stupidity she had an understanding. In *Emma*, as in all her books, there is not only a profound and moving and brilliant illumination of what it is to be thoroughly alive, of what it is to have insight, of what it is to have a vivid current flowing through the human organism; there is in that book also an astonishing understanding of "the coziness of being a fool." And Jane Austen, who had like Nature herself a capacity for enjoying and enduring every human type and individualizing it, wrote a book called *Emma*, and at Harvard University that book used to be on the prescribed list for freshmen. I got it out of the library once to reread it, and I reread it with great delight. On the last page, on the fly-leaf, I came upon a comment made by one of my predecessor readers. It was in verse and to this effect:

If there should be another flood,
Good reader, hither fly;
For though the world should be submerged,
This book would still be dry.

Part of address delivered before the lending section of the A. L. A., Los Angeles Conference, June 26, 1930.

Now, I don't know who wrote it, but the man who wrote that quatrain doubtless was very alive, and it might be that were he properly trained, he would have become a good reader of that good book, but at the moment he wasn't. Though he might have been the most delightful of dinner companions, though he might have been great fun as a companion walking across country, he was a bad reader of that book.

The good reader is of another sort. He has insight, to be sure; he has delight in what he is doing, and his insight and his delights are of a special sort. He avoids being a bogus reader: to avoid being that kind of a reader, who pretends that a certain book which has a great reputation is an exciting experience for him, that, I think, should be the first goal of the person who begins to read. These bogus readers are clever often, and they fool themselves. Just as, of course, the world is full of people who are bogus listeners to music, who adore jazz and pretend to like the symphony; just as the world is full of bogus lookers at pictures who really very much prefer high-grade chromos, and go into verbal and artificial ecstasy over a painting by a master, so it is full of readers who do much the same thing. In my time and in your time we have had to listen to a lot of bogus readers' comment from dinner partners and people we meet at teas. To avoid this for oneself, and, as teacher and librarian, to make that rarer and rarer, that I think is an intelligible and an intelligent goal. To avoid the bogus reader's bad qualities and to bring out the good reader's authentic qualities, that is the goal.

How do we do it, if we do it? It seems to me we can say in the first place that the good reader is a reader who wishes to make one little room an everywhere. The good reader imports the whole wide universe into his own study; into his own living room; into perhaps his hall bedroom. The good reader seeking to bring the vast universe into his own consciousness is not content merely with fiction, or merely with fiction and history and biography, nor to add only philosophy, but he wishes to go beyond and bring into his mind those revelations of the physical universe which have of late been made, particularly since in 1911 Rutherford began his experiments, and which have been so brilliantly and intelligibly described by Sir James Jeans and one or two other Englishmen. The good reader making one little room an everywhere concentrates, however, on more human material. After all, the room is not the man. The good reader wishes to make one little life all lives. William James once said that every human being had

latent in him every possibility of being, and that every moment of his life he cut off some alternative possibilities, and to illustrate that he said, "I wish to be a saint and a lady killer." I have, he implies, to destroy one of these alternatives in my own being. If I decide to be the saint, then I read Casanova's *Memoirs*. If I wish to be the lady killer and live that life, then I read *St. Francis*. To make one little life all lives, that is the object clearly; one little room an everywhere. Now, how to do it? In the first place, not by becoming that thing which the universities and the schools are so scandalously stressing and developing, the so-called critical reader. How can any student in the grades, and, indeed, how can many students in universities, tell us what is right or what is wrong with a book? I have been reading books for a quarter of a century and I am still, in spite of continuous training and self-discipline, often not sure what is wrong with a book.

The critical reader who tells you whether a book is good or bad and in what the goodness consists—no, that is not the goal of education. Not the conscious mind, but the unconscious taste for books is what must be developed, and that must be developed in order that we may have a capacity to read with immersion. The key word for the educated man is that word *immersion*. It means to get down into the thing; it means to give yourself to the experience; it means, in short, to experience and not to observe while you are experiencing. The world is full of critics who try to observe instead of experiencing; it is full of sentimentalists who try, instead of experiencing, to sense the fact that they are experiencing. We all know the sentimentalists as well as the critics, the people who drive out to Inspiration Point and say, "What a beautiful view!" Then close their eyes to enjoy "the fine view feeling." Sentimentalists and critics do not make good readers.

A person with an instinctive or a matured capacity to yield himself to the experience, a capacity to yield himself as unconsciously as he yields himself to the processes of digestion, such a person makes ultimately the good reader. This experience is not the experience of the mind alone. It is the experience of the whole organism, and by that I mean more than to say that at the moment when one reads, one's so-called five senses are busy with the material. I mean that one experiences when one projects oneself. The writer projected himself by what Rebecca West called empathy, a word Coleridge used before her. The writer projects himself by empathy and so does the reader. Is the nature of this experience clear

enough? Ought we to explore a few parallels? One of the mistakes we make, you and I who deal with books almost exclusively, is to think that somehow or other the literary human being, the human being who can arrange words on the page or on the tongue, is the possessor of the greatest or, at least, of unique experiences. This is not so. The kind of experience I have reference to I have myself had many times on the stimulus of other things, works of art and works of Nature. I remember, for instance, the experience I had when as a boy of sixteen I first walked, in Mrs. Jack Gardner's palace out in the Fenway in Boston, up to Manet's portrait of his mother. I knew about mothers. I had had one, and I thought I knew a great deal about her and about my aunts and the mothers of my friends, but I never understood the reality which runs through them all. I had never understood the balance in them of the will to live and the willingness to die until, as a boy quite unable to phrase these things I am phrasing now, I stood before that picture—and something happened to me. I saw that Manet, painting his old mother, sitting against a country farmhouse wall, got the pivotal moment in which those two great processes, the will to live and the willingness to die, were balanced on a fulcrum, and then I knew, though I couldn't phrase it, what it was all about in a special way. There is also an experience, if we come nearer home, that perhaps everyone in this room has had; an experience quite unlike anything in the world. As you go into Yosemite, suddenly between two groups of trees there is a perspective in the clear air. It is the most moving sight perhaps that Nature has to give you—the great rock El Capitan. The first time I saw it, as every time I have seen it, I have had the same deep experience: that rock is the prow of unending things cutting into the eternal air.

These experiences of works of art, of Nature, can be reproduced in terms of man's own activities; can be created by the phenomena of man's own activities. Experience of these sorts (you could carry them on—to Duse; you could carry them on to Isadora Duncan)—are not different from the kinds of experience we have when we deal with books. The good reader is a reader who opens himself, who breaks down barriers and inhibitions and opens himself to precisely that sort of experience with a book which you and I may have in the theater, in Yosemite, before a work of art.

The good reader then turns to the good book partly by instinct, partly under your guidance, partly under mine, and every time that he

turns he becomes more profoundly instinctive; he discovers always more quickly which book is not for him, perhaps not for anyone a good book, and he puts it down. When he finds the good book he will be accessible to the experience it holds. The good reader is a reader who lays himself open then, I say, in this sense to the experience of reading. The experience of reading is a matter of perception by the whole organism. Can we not illustrate with some of the good books of our own day? First of all, can't we turn to a few novels that have lately been so much in vogue, novels dealing with war? I take, first, Tomlinson's beautiful and beautifully written book called *All Our Yesterdays*. Now, H. M. Tomlinson is an artist; he writes, in the great sense of the word, but there is something besides the art of words in the book. The man feels, and in his feeling there is a diffusion of the things of the mind. Wishing to say what must be said about war, he does not make the mistake natural to a younger and less mature artist of telling you the story of one boy or of one group. He has a large objective and he moves largely to it. He tells you about the end of the South African war, and shows you how at the very moment when people were experiencing the horror of losing their brothers, their sisters, their children, their husbands—they were building battleships for future wars. He ends with a manifestation of mob spirit. Then he shows you how the disease that makes for war filters through all modern civilization, even filters out into the remotest back-lands of the world. In Africa, where there isn't one person for every hundred square miles, the war feeling got so hot and so hard in the early part of this century that men who presumably had all the space they wanted came together to try to destroy one another. Then Tomlinson leads on through the great war itself to a highly intense and personal climax, one of the most moving I know in literature. A part of the story comes at last where two brothers, both at the front, have been killed. The message that one of them is dead has been intercepted by the father and the message that the other has been lost is intercepted by the mother, and each parent keeps the secret from the other. Each wants the other to think that her favorite, his favorite, is still living, but neither of them can keep this secret. There is a young daughter, and each tells her the secret for relief. In that last moment the nobility and the augustness of this theme come home. Boys go to the front and are scattered in bloody morsels over the landscape. Even girls who stay at home have to make their hearts too big; have to have their experience of life extended

beyond young capacity, and why? Because of designs, elaborate patterns which move in the universe, move ineluctably, move uncontrollably, perhaps because some strange stars are in conjunction. And what is the comment on it all? It is the words of Macbeth: "All our yesterdays have lighted fools the way to dusty death." Human beings, so noble in the small pattern—this mother and father, this girl, these boys, so noble individually, are such fools in mass. That is his comment. The experience of having it domicile itself in your mind—of sensing not only with your mind, but with your whole organism, its significance—is the experience which the good reader has in the presence of that excellent book.

Again, take *A Farewell to Arms*, by Hemingway. I believe it is a noble and beautiful book. I do not myself share the feeling of those people who think it dirty. It seems to me no more dirty than the records of most of my married friends. I find it noble and beautiful. If you can begin with me there, what experience has it to offer? Here is a young man who willingly goes to assist in the bloody business of war, to retrieve people to painlessness. He is a Red Cross man, and under his eyes the whole nastiness of war is concentrated in the Homeric account of running away from war. The army runs away, and among them there runs away the hero of the book. Now the running is magnificent. It is resourceful. It presents you with the youthful will to live, opposed to the willingness to die, and it comes out at last, though it is nowhere so phrased, to the feeling of disillusion. It is so easy to think disillusion. But Hemingway presents you with the emotion of disillusion. Every youthful, positive drive had taken the boy into activity, and now he is out and he will not go back, and he will risk anything not to go back—"Farewell to arms; I've enough of war." Then what? What is left for a man, a young boy, who loses his confidence in his own loyalty to his loyalty? There is still left that other great youthful thing, love, and that the boy experiences; and out of that experience, though the two parties to it aren't married, there comes a child. The mother of the child is, like the man, no poet except in a deep instinctive sense; no articulate human being who can put a phrase on everything. They say ordinary things and make them mean extraordinary things. It is a perfect union. But the mother dies in childbirth. And why? Because the good doctors and the good nurses and all the excellent apparatus which man in the last several hundred years has built up to take care of this crisis called childbirth—all of those are out trying to rescue back to a

mained life people who ought to be creatively engaged in peace activities. The book ties itself together. It isn't first a flight from the army and then a love affair. It is a double disillusion. It is an account of how, to an instinctively geared human being of excellent quality, war doubly undermines hope and the promise of being in terms of the activities of the body in war and the activities of the body in love, and the creative thing of loving, which begets life, and the destructive thing of war, which pulls life to nothing—these are set together under the common dome of disillusion.

The reader comes away from the book provided he is not so young that the fact of lovers unmarried pulls the book out of shape (I don't care how old one is; "not so young," I said); provided he is not so immersed in tradition of literature that he thinks things can only be beautiful when they are arrayed in the elaborate terminology of an old poetry; provided these things are not true of the reader, he is a good reader for that book, and he comes away with an experience which builds him, which enriches his living in every possible sense.

I turn to a third of the war books for a moment—*All Quiet on the Western Front*—even in the American translation, which is so inexcusably garbled, so inexcusably cut. For what, indeed, can be the pornographic value of those passages they have taken out? How can any human beings treat them as pornography in the presence of the immense and the terrible main drive of that book? The book, however, even in this truncated and mutilated American version, offers an experience, and I put it here because, though I find it at least as moving as the other two books, I find the experience less fine. My instinct for experience after twenty-five years of reading finds this book not quite so fine an experience as the others, and I want, if I can, to tell you why. The book has a theme, and the theme is clearly this: it comes out again and again in discussion and in the undertone of the work. The boys in the book, all of them out of one schoolroom, propagandized by an infected teacher, a teacher who was eloquent without being thoughtful, went to war, thoughtlessly and emotionally, and they were all killed. Now, the theme of the book doesn't quite fit with those facts, for the theme is that these boys will, in consequence of having been in the war, of having too young undergone these experiences, be utterly unfitted for the life of peace and reconstruction which is to follow. That is perhaps the most important thing to be said about war. We could document it a thousand times out of American civilization in the last

twelve years, but does the author get to the point? He does not. He is so horrified at the spectacle that he allows all these boys to be killed, including his central figure, and so he can never show you, or indeed he can't even leave you to imagine what that later and far more terrible horror will be like when these boys go back. He might add in response, or reply in response, "Yes, I know that; others will go back." To which I answer, "Yes, but you have not acquainted me with others. These are the boys with whom I have emphatically identified myself, and what I need to bring this experience home to me, beyond all bearing in the tragic way, is either the depiction of your hero back again at home, trying to adjust himself and unable to, or else I want to know that he went home and be left to imagine the ensuing catastrophe." It is an excellent book, giving you an experience of unquestionable quality, but not of that absolute unified sort which the very best books give.

I turn to one or two others for a moment. I turn now to a book not hotly contemporary. Everyone here knows it in the abominable English translation, at least in that Gorky's *My Childhood* offers the disciplined reader, the reader whose instincts are for whole and thoroughgoing experience, an experience of the highest grade. It is the story of a little Russian boy from his earliest memory until the death of his mother, when he was ten or twelve years old, at which time he went out into the world. It is Gorky's own story of his early childhood, and in that story there are episodes by the hundred which reveal a saturated consciousness of Russian life. But there is one character in the book which on the peasant level, on the level of instinctiveness and hardly literate being, rises to the quality of being which Jane Austen manifests in herself and which I hardly hesitate to say such people as Molière and Shakespeare manifested in themselves—and that is the character of Gorky's grandmother. The book tells the story of Gorky's childhood, but the book is the book of Ivanovna. This old woman, who drank too much and had a pock-marked face and a bulbous red nose, was a great artist. She was the only kind of great artist that ever matters in the world. She took the material that was at hand and fashioned a great nature out of it. She took the material that was at hand and made herself creative in other people's lives. She knew very early what the rich and happily placed learn only late in life. She knew that at first you demand pure gold to make your cup, but after a while you are willing to stoop and take the clay at your feet to fashion the ideal goblet of your life. The

woman was an artist not only in her relations with other people, but in some instinctive way, and nobody who has read the passage will ever forget the paragraph in which Gorky tells how, to improvised music, the old woman, fat and unwieldly and ugly, got out on the floor and began to dance, and how her dancing in spite of everything was a revelation of the joy of being. It is the only thing in literature that I know to compare with one of the other great direct experiences of life, the dancing of Isadora Duncan in her last days when she was old and when she was fat.

I take one last instance, a book which combines, I think, the excellencies of all the books we have been talking about, unquestionably in the minds of all peoples fitted to judge, I believe, one of the great books given to the world by our time. I mean Lytton Strachey's *Elizabeth and Essex*. There are those people who say it is not as vital as *Queen Victoria* or as abundantly alive as *Eminent Victorians*. The truth of the matter is that life in this book is more selected and intensified. You have all read it, so I needn't elaborate much, particularly since the full experience which the book offers is a concentrated one. The life of Elizabeth is too elaborate and intricate and involved a life to present in one book, and since the author wishes to keep the form of a book, he takes one episode, that of Elizabeth and Essex, into which all the threads of that complicated, that unexampled intricacy of life that was called Queen Elizabeth, are gathered, and he presents that episode to you fully. He crowds the canvas with brief and memorable pictures of the people of the time, and he gives you a super image of what it should all come to in your consciousness. Elizabeth, with a perfect passion for procrastination, with her wobbling, with her international flirtations, Elizabeth with every gift, every manifestation, was the brooding hen: she kept warmth and peace under her wings. For what? So that this thing which she sensed, which she was uniquely fitted to sense, the Renaissance, could come to its complete fruition. The Renaissance was a great period, and there summarized that period one artist and his name was William Shakespeare. So it would seem that, in giving an account of Queen Elizabeth as the brooding hen who kept in the warm, peaceful dark under her wings the creative forces of the Renaissance maturing, it would be inevitable that Shakespeare should be introduced. Yet he appears only as a name near the beginning. Strachey knew that to present Shakespeare would pull the whole work out of shape. For though Shakespeare was great, the first artist in words perhaps in the world, Queen Elizabeth was

greater, because though she, too, was an artist in words, she was that greater, maturing force that made his artistry possible. So, instead of showing you what Shakespeare did in the warm brooding dark, he shows you what at the end the tragic Elizabeth is, as the verbal spokesman of her age. Essex is beheaded and the light of her life has gone out, and troubles have followed upon troubles. The Speaker of the House of Commons comes with a delegation to object to the Queen concerning the use of certain subsidies by royal patent, and she listens to his speech and then the old woman stands up. There was a pause and then the high voice rang out.

"Mr. Speaker, we perceive your coming is to present thanks unto us; know I accept them with no less joy than your loves can have desired to offer such a present, and do more esteem it than any treasure or riches, for those we know how to prize, but loyalty, love and thanks—I account them invaluable, and though God hath raised me high, yet this I account the glory of my crown, that I have reigned with your loves."

Who is speaking? Elizabeth, or one of the characters in one of Shakespeare's great historical plays? She, had she not been so busy being a queen, might perhaps have been one of the world's greatest writers. In any case, she was its greatest talker, and the Renaissance brooded to fullness in herself. One more quotation of three lines, to prove her Shakespeare power over words. Essex was dead and the

old woman had no more joy in life. She brooded; she pined. Once in a while her spirit flashed out, but for the most part she was obviously dying out there at the Shene Palace at Richmond, dying on her feet. Her favorite god-child John Harrington, who was a wit and who made epigrams, came to call on her, thinking he would quote some of those epigrams to her and entertain her; she sent him away. Then he came again and she admitted him. He thought, as he stood there, to amuse her with some literary trifles. She smiled faintly, and this is what she said: "When thou dost feel creeping time at thy gate, these fooleries will please thee less; I am past my relish for such matters."

Who said that, Queen Elizabeth or Shakespeare?

In that daring omission of Shakespeare, in that audacious presentation of the height of the power of expression in terms of Elizabeth herself, Strachey completed the experience which the book yields the reader. The experience is this. To immerse one's self for a few hours with all one's organism in a period of wonderful unanimity, in a period of integrity of feeling and thinking, of experimentation and consolidation as yet unrepeated in the world—that is the sense of the world Strachey had when he wrote; that is the experience he put into the book for the good reader to have when he reads.

The Social Significance of Library Work with Children

By Ralph Munn

Director, Carnegie Library of Pittsburgh, Pa.

MOST MEN LIBRARIANS appear to be satisfied to secure a trained children's librarian and then wash their hands of all ideas of children's work. Two years ago I went to a position in which I was forced to attempt to learn something of children's work myself. The more I observed the more I was impressed with the social significance of that service.

When I was asked to speak at this meeting, I therefore elected at once to talk about the social significance of library work with children. Later, when I came to prepare the talk, I found that I had ample reason to believe in the importance of this service to society. The only flaw in my great discovery was that it came about thirty years too late. I found that I had just discovered something which had been accepted as a commonplace at about the time

that I entered kindergarten. So instead of attempting to cover a subject which has already filled many pages of the A. L. A. Proceedings, I propose now to examine with you several practical problems which demand attention if we are to maintain and enhance the social significance which I think you would all grant to library work with children.

Personnel is perhaps the deciding factor in all library service, so let us start with that. Let us assume that certain library schools can train children's librarians acceptably, and that those schools will have enough applicants when actual working conditions in libraries warrant. What, then, are the conditions which deter more students from entering the children's field, and which discourage many of those who do? Those conditions were described several years ago in a paper by Miss Latimer (*THE LIBRARY JOURNAL*, 52:134-137), and her conclusions

Paper presented at Fourth General Session of Los Angeles Conference, June 28, 1930.

should be studied by every library administrator. The root of the evil lies in the lack of opportunity for advancement in position and salary. A lack of appreciation which seems to verge on actual discrimination against children's work is apparent in too many salary schedules. Figures from A. L. A. show that not only branch librarians, but catalogers, first assistants in departments, and even first assistants in branches, receive higher average salaries than children's librarians. Fred Telford, in his article on "Salvaging the Specialist," points to the wanton waste of special training and experience within our library systems. As evidence, Mr. Telford cites five typical cases of shifting from one specialty to another, always for more money. It happens that four of his five typical cases started as children's librarians, and I wonder if that percentage might not be maintained if he were to choose a hundred or a thousand cases. Can anyone advance one logical reason why a successful children's librarian should be forced to become a reference assistant, a cataloger, or an adult circulation worker to secure an increase in salary? It is being done, however, every day, and Pittsburgh, with all of its leaning toward children's work, has been guilty along with the rest.

Part of the solution lies in putting all assistants on exactly the same salary basis. Salaries should vary according to training, experience and ability, but not according to whether it is reference, adult, lending, cataloging or children's work. The library administrator who holds that a cataloger or reference assistant needs more training or is doing more important work than a children's librarian simply admits his lack of knowledge of the possibilities in children's work. The children's librarian must be accorded salary recognition as a specialist, and it is only in this way that the whole body of children's librarians can be raised to a status that will hold them in their chosen field.

The rise of the school library intensifies the need of fairness to the children's librarian. During the last ten years we have seen a large number of our best children's librarians enter the school field. It is to the advantage of society that some of them should do so; strong people are needed in the school field as much as in the public library, but as long as the present wide gap between school and public library salaries exists, there will be an excessive shift to the school. With salaries equalized, the children's librarian will be free to remain in the field she really prefers. Another part of the solution lies in opening more lines of promotion to the children's librarian. This problem is manifestly difficult. A typical library may have ten department heads, but only two

—the heads of the children's and schools departments—give their chief attention to boys and girls. The scale is thus weighted five to one against the children's librarian in achieving a department headship. But why should not the children's librarian become branch librarian? The branch librarian usually comes from the adult side, but I wonder if there is any real reason for it. Some of our most successful branch librarians in Pittsburgh were once children's librarians, but unfortunately they were forced to abandon their chosen children's work when they assumed charge of the branch. Some day I am going to put the children's librarian in charge of a big branch just to see if the heavens actually do fall.

Here, then, are two vital points of personnel—equality in salary and promotions for children's workers. Until they are squarely faced and solved, we will continue to see many of our best children's workers enter other phases of librarianship. We will continue always to be looking for children's librarians. We will continue to see young, inexperienced workers forced into positions which require maturity and understanding. In the end we will surely see the decline of the social significance of children's work.

Another pressing matter which has to be settled by library executives and children's librarians is our attitude toward the school library. There is in some quarters a feeling of resentment and jealousy toward the school library. Too many children's librarians see it as a competitor, and they distrust its influence. At the outset, we may as well accept the school library as a fact, regardless of personal opinion. It is here, it is going to remain, and it is going to grow in size and influence far faster than the public library. Where school libraries are organized as they are in Cleveland or Pittsburgh, I believe that we public librarians have little to fear. Our policy everywhere should be one of the closest cooperation. We should influence school boards to set up the highest standards for their libraries, and we should reshape our work, if necessary, to complement that of the school library. I believe that some reshaping of policy will be demanded of our children's departments, not only because of the growth of school libraries, but to meet changing conditions in life.

The library is getting a smaller amount of the time of each child. The school day is being lengthened in some cities. Moving pictures, the family automobile, Boy and Girl Scout activities, and Amos and Andy are competitors which have arisen. If we get less of each child's time, we must be sure that we are making the best use of it. If the child does less reading

we should see that he does better reading. Better reading in this case means reading more definitely chosen for the particular child; it means more individual guidance.

One of our weakest spots is the very one upon which we pride ourselves, that is, the guidance of the individual child's reading. We claim to do it, yet consider that a branch may have five thousand or more registered children and only one or two children's librarians. Look around your children's room at 3:45 some afternoon and see how little chance there is of individual work. The ideal answer lies in a greater number of children's librarians. Every budget has its limitations, but we must learn that one children's librarian cannot carry on an adequate program in a branch, and one seems to be the normal number in most cities.

Following this thought through to the end brings one to a most disagreeable conclusion. Let us trace it through. The public library's budget will not permit it to supply a sufficient number of children's librarians to give individual guidance to its hordes of children. The elementary and junior high school library, when fully developed and in charge of competent children's librarians, may be able to give this individual guidance. The school librarian deals with hundreds while the public librarian deals with thousands. The school librarian has close, daily contact, and she often deals with one class at a time. You see where this reasoning leads us. If the school library reaches the point where it can give better service in every respect to the child, the public library can only withdraw from the field. We would have no right to place an extra tax upon the community if another agency can do the work more thoroughly.

But granting, just for the sake of argument, that the school library will develop and will furnish a higher degree of individual guidance, there are other strong features of the public library which it cannot meet. The school's service is necessarily restricted to special groups and special periods. It must change radically if it is to offer the wide choice of voluntary reading now obtainable at the public library. More important, how is the school library to change the attitude of the child who intuitively attaches a sense of unwelcome compulsion to the school, but who is joyously free in the public library? And, most important, the child who knows only the school library would be more likely to leave his library habits behind when he leaves school.

These points all relate to the real social significance of children's work. They indicate that the school library can never be a complete and satisfactory substitute. The answer is, of

course, that both the school and the public library have their proper places, and that both are needed. Children's librarians who regard the school library as an unwarranted intruder and who fail to cooperate with it are simply harming their own position. Meeting together at A. L. A. conferences once a year is not enough. We must practice our cooperation in our everyday work and thought. A large part of the social significance of children's work lies in its preparation for a lifetime of happy association with books. All of us would feel that we had failed if a considerable percentage of children do not carry their reading habits over into adult life. The apparent need of specialized guidance in the field of adult education may give us cause to take stock of our work.

A major cause for the ineffectiveness of the best of our children's work is the lack of a proper bridge between children's and adult departments. The need of this bridge has been recognized for many years. It has been the subject of several papers, but the first organized round table on work with young people was held here this week. Various libraries are experimenting with different types of service, but there are no accepted standards, such as there are in work with children. Our recently established division in Pittsburgh is still nameless; "Intermediate Department" and "Young People's Department" were immediately vetoed as perhaps offensive to youths. Our one guiding purpose has been to disguise completely the fact that users of the new division are receiving anything more or less than regular adult service. We find other libraries whose ideas of intermediate work are entirely different. This is not a problem to be solved by children's librarians alone, but they should perhaps take the lead.

It was suggested that since we have many chief librarians here today, I direct this talk largely to them, emphasizing those problems which they must solve to retain a high standard of children's work. I have covered the three needs which seem to me to be most urgent. First, a stabilized personnel which can be gained only through giving fair salaries and opening lines of promotion to children's librarians; second, a better working agreement and a much more sympathetic understanding between school and public library forces; and, third, the development of intermediate departments which will help to carry the child through the change from children's to adult departments.

With solutions to these problems we will have contributed materially toward maintaining the social significance of library work with children.

The Prison Library. What Should It Mean?

By Dawson M. Leigh

An Assistant, Department of Library Extension, Brooklyn Public Library

PRISONS are more and more being regarded as hospitals for the treatment of the mentally unbalanced. In such institutions books not only have a proven therapeutic value but also provide outlets for new and wholesome activities; they might be even more welcome than in the regular hospitals, if that were possible. This would be particularly true in prisons where no work is provided, where men are confined within their cells day in and day out, have nothing to do and only their morbid broodings for companions. And yet the prison library is practically where its predecessor, the hospital library, was before authorities and librarians were fully cognizant of its great possibilities.

For years the Federal and State prison libraries were dependent upon the generosity of the people who donated books to which they were unwilling to give shelf room in their own homes. The librarianship devolved upon the chaplain, and it is largely due to his efforts that in recent years funds have been provided by the prison authorities for the purchase of a limited number of new books. Regardless of the number of new titles that are added, the library cannot function effectively unless the borrower has direct access to the books. This is not done in most cases. The men select their books from a printed catalog, write the call numbers on a card, and the inmates, doing the actual work, fill these requests as they can. Consequently much readable non-fiction remains on the shelves.

The library service of the city and county prisons is in many cases in the hands of the public libraries. Trained workers visit the prison once a week to issue the books, which the prisoners are allowed to see and handle before making a selection. This is a step forward, but only a step, for the prevailing conditions of overcrowding, changing personnel, and short allowance of time for the library period make the most satisfactory type of library work impossible.

Under ideal conditions a library would be placed in every penal institution. In the Federal and State prisons it would approach as nearly as possible the modern public library, having suitable room and equipment, fed by a regular budget, and administered by at least one trained librarian. The prisoners would be permitted to visit the library not only for selec-

tion and exchange of books, but also for reference purposes and study. Each larger city and county jail would also have a library in charge of a trained librarian and as well equipped, but this may be slower in realization. Until such time, one of the more intelligent inmates might substitute under the close supervision of a trained person from the public library. There, also, the men would be permitted a daily visit to the library. The books would probably be supplied by the public library until the prison could buy its own.

Regardless of whether a city prison or a Federal institution, the books should be attractive, as up-to-date as possible, and carefully chosen. Any book suitable for a hospital is equally satisfactory in the prison, and so much has been written about hospital books, it does not seem necessary to go into detail. It may be urged, however, that detective stories are usually highly impractical. The prisoners can learn nothing new from them and the criminal is always caught. But with so much really good literature, why not provide that which presents only the best? It must not be assumed that all the men will prefer the better type of book, but under the leadership of the librarian, and through the medium of reading courses and clubs, much progress can be made in this direction. Indeed, the librarian will probably find the way already well paved by the present-day interest in history, biography, and travel.

There is always a demand for technical books, and a prison library should provide them generously. By close cooperation between the prison teacher and the librarian, duplication should be avoided; the prison school should provide textbooks, the library the supplementary reading. It goes without saying that these books must be up-to-date. There should also be books in foreign languages, particularly in sections of the country where the foreign element is pronounced. The different language should be represented in proportion to the nationalities in the particular district in which the prison is located.

Such a library would meet the needs of everyone, from the illiterate prisoner, whether native or foreign-born, to the most highly educated. It would provide an infinite variety of amusement for the pleasure seeker, solid food for the more serious-minded.

Our Place in the Sun

By Marie Hull Jackson

Assistant Cataloger, Oregon State Agricultural College Library

OUR YOUNGEST profession, librarianship, is in the process of self-determination. At present it is more concerned with library science or the systematic knowledge of accepted techniques than with library art, which is the achievement of professional ideals. With this in mind, some random cogitations may not be amiss.

The library is a social agency. Its purpose is to make possible for the group it serves either the dream of the reality or the reality of the dream; to allow a vicarious existence to those that desire it; to deliver the key of knowledge to those that seek it. The library has yet to convince people as a whole of its practical usefulness and psychic value. The librarian's lament, low salaries and inadequate budgets, is proof sufficient that such is the case. Libraries lack the astuteness that characterizes business houses, which know beyond a doubt that "it pays to advertise." It is the public who suffers most by such negligence, for unless it knows of the facilities available, is provided with an incentive to use them, and is assured of efficient service, the library will not be of vital consequence in its community. A library should have definite and well-planned system of publicity—radio talks and a library column in the local papers being obvious methods. Special displays are frequently employed as a means of arousing interest in the library. In order to be highly successful, there should be considerable variety as to type of exhibit, appearance and even location in the library, otherwise they become rather monotonous features, and may eventually elicit casual or superficial inspection.

Progress in the library field is greatly hampered by mental handicaps directly due to what sociologists term "an efficient rule of elders." The average librarian wants precedent to make her decisions. She does not feel independent enough to make exceptions, to depart from tradition. As a class, conservative is the most appropriate adjective with which to describe it. It is also one that places the group out of step with a dynamic twentieth century. The professions that are making their influence felt, such as medicine and, lately, education, are making themselves indispensable to society; those that are losing their position of eminence, such as the ministry, are conservative.

Professional education is partly the cause of the existing situation. The undergraduate col-

lege work is not sufficiently shaped toward a definite objective; technical training for librarianship is compressed into too short a period and does not allow for orientation. The librarian as a research worker lacks background; her techniques are superficial and usually require patience rather than actual familiarity and comprehension of a given subject. Librarianship is not likely to reach a high professional level until more experts and fewer general assistants are in demand. No one librarian can pretend to corner the entire field of knowledge. Also, psychology is being shunned in library training. Librarians are being sent forth to service lacking that fundamental basis. Why not a course in the psychological problems of library administration? The field of education, which certainly should not be more concerned with people than the library, devotes much study to *homo sapiens*. Business recognizes the fact that it must understand the psychology of those with whom it deals, and, hence, special courses in salesmanship and advertising are offered.

Mental and aptitude tests are not thought of in connection with filling library vacancies, and, as a result, square pegs are often secured for round holes, with concomitant maladjustment and lowered efficiency. Even in the matter of hiring pages, such tests would be useful to discover whether the applicant had that most necessary qualification, the ability to follow directions accurately. Library science, then, must become scientific.

In the last analysis the future and usefulness of the library rests with the individual librarian. Her qualifications, potentialities and characteristics incite the public's reaction—interested, indifferent, or antagonistic. The one thing all librarians have in common is at once an asset and a liability, a superior intelligence quotient. The librarian, I refer to the trained professional, is a college graduate, and quite likely may have a year of graduate work. In order to have accomplished this, a high intelligence quotient is necessary. The poorly equipped are not able to graduate from an accredited college. This factor immediately places her among the upper quartile of intelligence grouping. Superior intellectual endowment may enable the librarian to execute the finest sort of a program, or it may merely mean that she will be unable to find a basis

of contact with her public. Therefore, character and temperament are important considerations; they are the media through which intellectual ability is converted into productive activity. Imagination is the *sine qua non* of effective librarianship. Without that creative and searching faculty, no librarian can assume various points of view, impartially evaluate policies, build up the future with accurate perspective, and control the unpredictable vagaries of a heterogeneous public. In other words, she should be a practical psychologist and should have a sincere desire to be of social service. She must endeavor to see beyond the mere addition and dispensing of books to the civic significance of her profession. Too many of the rank and file are lacking in vision.

Many public library heads appear too unfamiliar with people's preferences, or else undertake the delicate task of administering intellectual codliver oil. Ordinarily, a disproportionate amount is spent for books, whereas a survey of reading habits shows that people read, first, newspapers; second, periodicals, and last (especially last), books. A wide range of titles of newspapers and periodicals and even second copies of the most popular ones would satisfy the public appetite better than the usual procedure. The fatal weakness of much library buying is due to the librarian's assumption, conscious or unconscious, that her main concern is for the student type. The appeal should be to everyone, not merely the adult, dull or serious-minded. The usual public library is a tax-supported institution. Sometimes it is endowed. In any event, it is designed for community service. The librarian should never for an instant forget that her duty is to adapt the character of her particular library to her particular clientèle. The library should be used; it is most unfortunate when all the material therein is not permitted to circulate freely for fear of loss or mutilation, for it is depriving society of the enjoyment of its own property. Such destruction that does occur is regrettable, but should be regarded as overhead. Losses can often be replaced in duplicate; if not, a more up-to-date publication will probably be better anyway. In regard to complete "sets," the average librarian is altogether too inclined to regard them as having special virtues. It often seems not to matter whether the final number to complete some continuation is of any merit, nor indeed whether the

completed title is readable by 99 per cent of the immediate public. The public library has not the justification to collect and preserve complete files, as does the college or special library. Even these types carry it to an extreme when inter-library cooperation could eliminate much of the expensive duplication.

The librarian in an administrative position has not only the library patrons to consider, but also the personnel. The assistants are also people like the public. If the library within is not functioning smoothly, it will surely be reflected in the service offered. Cooperation is of primary importance, not simply cooperation between members of the same department, but between all departments. Librarians in different departments are sometimes inclined to place the efficiency of their own department over that of the general library, and are unwilling to assume duties hitherto performed by another department, or to relinquish certain duties, even though the change may be desirable for the system. A broader view is necessary for the best results. The psychology of the assistants should have careful consideration in order to promote their best efforts. Too often they are not allowed to have responsibilities through division of duties, and too often constant and unrelenting supervision destroys a constructive attitude. The crux of the matter is whether the head of a library or of a department encourages her assistants to feel that they are working with her rather than under her. In addition, uniformity of rules and privileges for the entire staff is essential to secure loyalty and harmony.

Sound reasons for all routine and the elimination of all duplication of work form the basis of efficiency in practical library economy. A ruthless check would neither allow several records of the same thing that reorganization could combine in one, nor work carried on by two departments that could be entirely done in one. Department heads should have regular conferences together for the purpose of eliminating uneconomical methods and coordinating their various activities. Silent dissatisfaction with the functioning of some department has no constructive value.

There is much pioneer work yet undone in the library field, new levels of service to be realized. And so, in promoting a common interest, *zwischen uns sei Wahrheit*.

THE LIBRARY JOURNAL

August, 1930

Editorial Forum

THE LOS ANGELES conference greatly enjoyed the presence of the new President of the University of California at Berkeley, Dr. Robert G. Sproul. His address was an enthusiastic statement of the value of the library not only as the heart of the university but in its many cultural relations, and it was received with like enthusiasm. It is gratifying that among the many welcomes which were given to the A. L. A. in California this from its great university emphasized to all people of culture throughout the State what the library should mean in their communities. Another contribution from the same university was that by Prof. B. H. Lehman on "The Good Reader and the Good Book" made before the Lending Section. This is an example of the good material that sometimes falls to the happy lot of the smaller meetings which the larger attendance at the general sessions might profitably enjoy, but no one can take in everything, especially at A. L. A. conferences!

PITTSBURGH has long kept itself at the forefront in training for children's work and therefore the paper of Ralph Munn, director of the Carnegie Library, read before the Fourth General Session, has double emphasis. While it is wise that the experience with children in the public libraries should be brought over to the schools by the children's librarians into school libraries, it would be a pity, as Mr. Munn points out, if the children's rooms of our public libraries should be depleted by an exodus caused by the present salaries paid to employees of the schools. This is but a part of the larger question of relative salaries in the library profession and teaching profession which should ultimately be absolutely in parity. The problem of promoting children's librarians into fields with the public library is more difficult of solution, but as children become grown up so it ought to be possible for the children's librarian to follow her clientèle into even wider fields of usefulness than the children's room, important as this is.

STATE LIBRARIAN FERGUSON had a happy send-off at the Los Angeles conference, especially in the presentation to him by the county librarians, his immediate flock, of a set of volumes particularly suited to his literary taste. Throughout the State his transfer to the other coast has brought out expressions of regret, and indeed California will miss his guiding hand. He will receive a cordial welcome in the East, which will have reason to be indebted to California for giving him the varied experience, which should prove so useful in his new post.

A GENERATION or so ago the South was scarcely on the library map except for the institutions at New Orleans and that ancient among American libraries which still exists in Charleston. Anne Wallace began the work of plowing and seeding the southern field when at Atlanta she arranged the conversion of the Young Men's Library into the Carnegie Public Library, induced Mr. Carnegie to furnish a noble building and to provide for the Carnegie Library School which has done such good work, held a so-called library congress of a few northerners in connection with the Atlanta cotton exposition and organized the State Library Commission. This year sees a remarkable fruitage of that seed sowing. The Carnegie Library School, which for so many years has been affiliated with Emory University at Atlanta, now becomes an integral part of the University under the directorship, as previously announced, of Miss Clara E. Howard of the Library School of the New Jersey College for Women and chairman of the A. L. A. Education Committee, who accepts the larger opportunities which she will have as Dean of the southern school which will be housed in the University Library and have adequate accommodations for classes of fifty students. The appropriation from the Carnegie Corporation and the Rosenwald Foundation of \$100,000, to be expended in the next five years, happily safeguards the development of the school. Miss Tommie Dora Barker, who has been for some years both librarian of the Carnegie Library and head of the Library School, takes the important executive position of Regional Field Agent for the South, a new A. L. A. outreaching. Southern progress of library work within the school will be greatly aided through the establishment at the George Peabody College for Teachers at Nashville of a school for school librarians for which \$80,000 has been appropriated to be expended in the next three years, under the directorship of Jackson Towne, librarian of the University, who acted recently as consultant in library service to the Julius

Rosenwald Fund in its county library program from October, 1929, to June, 1930, while Miss Lucile Fargo, author of the A. L. A. library curriculum study entitled *The Library in the School*, will be in active charge as Associate Director. All this means rich library blood for the new South.

IT is gratifying that the A. L. A. has decided to make Miss Mudge's survey of reference books of the past year, which *THE LIBRARY JOURNAL* was precluded from publishing because of its length, a supplement to her important volume under the title of "Some Reference Books of 1929." This extends to forty-seven pages, as the list has grown with the years from the three pages of 1911. The A. L. A. has done a service necessarily denied to *THE LIBRARY JOURNAL* in putting this material at the disposal of the profession. It would be a grievous loss if some means had not been found for this purpose.

THE RESIGNATION of Burton E. Stevenson from the American Library in Paris, which he took part in organizing in 1920 and which has had the benefit of his service from 1926 to 1930, is greatly to be regretted because he had so usefully identified himself with the work in the French capital and the larger work for which this library has furnished the center. Mr. Stevenson has felt the call of America to return home partly for the revision of his remarkable *Home Book of Verse*, which, despite its necessarily high price, has been a steady seller ever since its original publication in 1912 and partly to resume the other literary work with which his name has been identified. His position will be difficult to fill because it needs a librarian of the widest training and experience who can adapt himself to the French situation, but it is to be hoped that the great opportunity may find a worthy successor. According to the charter, the librarian of the American Library in Paris must be nominated by the A. L. A. Executive Board and elected by the Board of Trustees of the American Library in Paris. The position has been temporarily filled by the Trustees in Paris without consultation with the A. L. A. Executive Board by the appointment pro tem. of Robert Davis, who was publicity agent for the Red Cross during the World War and later engaged himself in dairy development near Bordeaux, and though lacking library experience and not a member of the A. L. A., it is to be hoped that he will bridge the gap satisfactorily until a librarian with training and experience can be found.

Library Chat

WHEN Doctor Vorhies suggested, at the Pre-convention meeting at Grand Canyon, that a motto for the initials A. L. A. be *Ask Librarians Anything*, he little knew how fittingly his suggestion would be illustrated at the Los Angeles Conference. During the convention-rush one day a librarian was hurrying down the foyer of the Biltmore Hotel when she was stopped by an elderly gentleman who called across the hall, "Miss Librarian, can you stop just long enough to answer one question?" Smiling grimly, at the thought of her profession being so plainly stamped upon her, she paused and allowed the man to lead her to a beautiful statue resembling Joan of Arc, but not the Maid of Orleans, on a table nearby. "Librarians know everything," continued the man earnestly; "can you tell me whose statue this is?" For a moment or two the librarian was at a loss for an answer, but hating to disillusion anyone with such perfect confidence she finally said, "I don't believe it is a statue of any particular person for it isn't marked; it seems to be just a statue," upon which the man smiled, thanked her politely and went happily on his way.

AN UNUSUAL incident in library gatherings occurred in connection with the presentation of the Newbery Medal to Rachel Field as the author of *Hitty, Her First Hundred Years*. Miss Field arrived by aeroplane and was met in the air, as was meet, by a deputation from the City of the Angels in one plane and in the other State Librarian Ferguson and movie-talkie operators. Mr. Ferguson delivered an aerial welcome to Hitty's mother, who replied in kind, and the movie-talkie men operated their machines while the angelic hosts in the other plane listened in through earphones. This performance had the unique distinction of being the first talkie movie taken in the air, and librarians will enjoy a thrilling second-hand experience when the films are distributed throughout the country. Hitty began her second hundred years in a way that would indeed have surprised her at the beginning of her first century. Hitty's mother, who is a grandniece of the famous four Field brothers of Stockbridge, had her first transportation and travel experience and her debut in art when Miss Brewer's little School at Stockbridge produced *Rebecca of Sunnybrook Farm*, and a charming Rebecca it was who sat on the box of the improvised stage-coach and conversed affably with Mr. Cobb.

The Los Angeles Conference

A SEVEN DAY BOOK!

Cartoon from the Los Angeles Times of June 26, 1930

ADULT EDUCATION ROUND-TABLE

RURAL adult education was the subject of the adult education round-table at the Los Angeles Conference of the American Library Association on Wednesday afternoon, June 25, 1930.

L. L. Dickerson, as chairman, introduced the topic by pointing out the present remarkable development in adult education and the new technics in subjects like alumni education, radio education and parent education. Some of the difficulties before libraries in the rural adult education field were outlined in an introductory paper prepared by Dr. John D. Willard. First he showed that the country life problem is both economic and sociological, and pointed out some of the opportunities for adult education especially by strengthening and developing the services of existing organizations. Three agencies are the bulwark of adult education: public school, library, and university. How sadly they fall short of rural need. The supply of books to university extension students was discussed by Miss Wotton of the University of California Extension Division. She pointed out there are no "average" extension students. They vary from those who use poor English to the college graduate. Availability of books is aided in a State which serves its citizens through a branch of a county library, which may draw on the central county library or on the main reservoir of the State library. Accessibility of books must be adjusted when lack of leisure for an avocation must be fitted into the work of a vocation or distance makes the books hard to get at. Methods used in Indiana, Michigan, Wisconsin, and North Carolina were cited. The service which can be rendered by a county library was pictured by Margaret E. Livingston of the Orange County Library, Santa Ana, Cal. Two things are vital: books and people. The aim is to bring these together. Individual requests build up stock of a library, and books are supplied to lone mountaineers or amateur astronomers. Inmates in hospitals and the county jails may be furnished with books for reading and study. The contribution of the State library agency was discussed by L. J. Bailey, director of the Indiana State Library. A recent study showed that the forty-eight State libraries differed as to type. Only sixteen, or one-third, were real general book collections giving direct service; twenty-five were supplemented by State library commissions. These agencies face a great opportunity, but are

handicapped by a lack of funds. In his own State service was being given to clubs, teachers, extension course students, study groups, and the smaller libraries. For example, all the books in the Reading with a Purpose courses were available for loan, and certificates were given for completing a course of reading. Direct personal service to citizens in towns and districts without a library was gratefully acknowledged to the State library. In the discussion it was developed that the State universities usually do not have books to lend off the campus, and citizens must, therefore, depend on the local library or secure books from the State agency. One of the problems is to arouse the desire for further reading and education. In Illinois a definite attempt is being made by the Home Demonstrators to quicken an appreciation of reading. The discussion was concluded by Lyman Bryson, director of the California Adult Education Association, who emphasized the need not only for more books but especially for more librarians, since personal service is even more essential in rural areas than in urban. Aggressive advisors are necessary who will guide in beginning a study and will foster it face to face or by letter to reader. A further great need is a more up-to-date supply of books in the social sciences in order to overcome the insulating effect of their own technical agricultural literature, which only widens the chasm between the rural and the urban citizen. Social science literature helps to overcome the inertia of the peasant mind and to make the farmer a citizen of the world.

F. K. W. DRURY, *Acting Secretary.*

AGRICULTURAL LIBRARIES SECTION

THE AGRICULTURAL LIBRARIES SECTION meeting was held at the Citrus Experiment Station, Riverside, Cal., on Thursday afternoon, June 26, 1930. The meeting was called to order by the chairman, M. J. Abbott, who introduced Dr. L. D. Batchelor, director of the Station, who welcomed the section and briefly outlined the work of the Station. He was followed by Dr. H. J. Webber, who spoke on "The Relation of a Research Worker to the Librarian." Miss Nelle U. Branch, librarian of the Branch of the College of Agriculture, University of California at Davis, next spoke on "The Agricultural Libraries of the University of California." She was followed by Miss Margaret Buvens, librarian of the Citrus Experiment Station, who spoke on the library of that station. After this, there followed a short business meeting at which the reports of committees were read. The chairman announced the names of the Committee on Cooperative

We regret that reports were not received for inclusion from Bibliographical Society of America, Business Libraries Section, College and Reference Section, Library Buildings Round Table, National Association of State Libraries, Order and Book Selection Round Table, Professional Training Section, Publicity Round Table, Religious Books Round Table, and Trustees Section.

Bibliographical Aid for 1930-1931 as follows: Louise O. Bercaw, chairman, Bureau of Agr. Econ., Washington, D. C.; Bertha E. Herse, Oregon State Agricultural College; Jane Frods-ham, College of Agriculture, University of Mis-souri; Bess Lowry, Iowa State College; Julia Wright Merrill, executive officer, American Library Association, ex officio. The remainder of the meeting was devoted to a symposium on the Material of Primary Importance on the Economic Aspects of Agriculture. These pa-pers, many of which were accompanied by lists of titles or addresses, had all been mimeo-graphed and were available for those present.

The Nominating Committee reported as fol-lows: Permanent honorary president, Miss Claribel R. Barnett, librarian, U. S. Depart-ment of Agriculture; Chairman, W. W. Ellis, librarian, College of Agriculture, Cornell Uni-versity; Secretary, Miss Emma B. Hawks, as-sistant librarian, U. S. Department of Agri-culture.

MARY G. LACY, *Secretary*.

ALUMNI EDUCATION ROUND-TABLE

A ROUND-TABLE ON ALUMNI EDUCATION was held Friday evening, June 27, 1930, at the Los Angeles conference in order to benefit by the presence of Levering Tyson, who had presented the topic at the third general session that morn-ing. Invited participants in the discussion num-bered twenty. The discussion was based on the topics suggested in a letter of June 14 from Charles H. Brown, chairman of a Committee on Alumni Education, mailed out to 1000 col-lege and university libraries. In this, the li-brary's share in alumni education seemed to include:

1. The preparation of book lists.
2. The organization of alumni libraries.
3. The actual loan of books.
4. A summary of book resources available to alumni in their own communities.
5. Informational or reference service to alumni from material found in books.

The discussion centered on the first three. Diverse practices were pointed out, from lists prepared by professors and alumni offices with no recognition of the library, to those initiated and developed by the library. The important thing seemed to be for the library to cooperate in this movement. The style of annotation has a great deal to do with the success of a list with alumni—the personal element enters in, especially if a former professor can recom-mend the book, yet professional annotations must generally be humanized. Probably the best combination is a joint note based on the accurate knowledge of the instructor and on the experience of the librarian. The supply of

books varies from the generous loan of any book not in active use, through the experiment at Lawrence College (where a special effort is being made to supply certain books) and the book club at Iowa State College (where coupons good for twenty books are sold at quite a sav-ing), to the institution which feels it cannot loan any of its books. In the last instance alumni are referred to the local library or state library lending agency, or are urged to buy the books. The discussion seemed to empha-size that the duty of the colleges was to stimu-late the demand and to urge that the books be secured locally. The function of the college is to know what exists; its concern is only inci-dentally with the alumni's problem of where to get the books it recommends. However, as a means of cooperation the state agencies should be informed of all alumni reading lists. This knowledge may be disseminated by each institution, by the National Alumni Council, or even by the American Library Association. The fact that alumni need to be urged to con-tinue reading and study was considered by some of those present a reflection on the effectiveness of the teaching in the college. But these agreed that alumni education programs offer the hope of catching up with the losses of the past while current students may be better taught. Men-tion was made of the various projects now be-ing experimented with at Lafayette, Lawrence, Michigan, Ohio State and Vassar, with a re-port on present progress.

F. K. W. DRURY, *Chairman*.

AMERICAN ASSOCIATION OF LAW LIBRARIES

THE SESSIONS of the twenty-fifth annual meet-ing of the American Association of Law Li-braries were held at the Hotel Biltmore, Los Angeles, Cal., June 24-26, 1930. There were three regular sessions and a joint banquet with the National Association of State Libraries. President F. W. Schenk of Chicago, who ar-ranged the programs, presided over the first two sessions, while Vice-President S. D. Klapp of Minneapolis introduced Miss Rosamond Parma, who conducted the round-tables, which made up most of the third session. George S. Godard of Hartford, Conn., acted as toast-master at the joint banquet. At the opening session cordial addresses of welcome were given by Robert Owens of San Francisco, Thomas W. Robinson and William R. Roalfe of Los Angeles, to which eloquent response was made by Mr. Klapp. Judge Harry A. Hollzer was present and read a significant paper on "Ser-vice in the Law Library." As the second ses-sion, former presidents A. J. Small of Des Moines, Iowa, George S. Godard of Hartford,

Conn., Franklin O. Poole of New York, N. Y., and Andrew H. Mettee of Baltimore, Md., were present and read papers. Letters of greeting from other past presidents, unable to be present, were read. A paper by Luther E. Hewitt of Philadelphia was presented by James C. Baxter. At the round-tables meeting, after a paper by Dr. Augustus F. Kuhlman on "The Demand of Social Research Upon Law Libraries," and one by Dr. William M. Randall on "Cataloging of Legal Material for Non-Legal Purposes," four topics were discussed which had been submitted by members as calling for action on the part of the Association. At the joint banquet a paper was read on "Our Attitude to the Constitution," which was prepared by Hon. William M. Maltbie of the Connecticut Supreme Court. Two features of the conference, memorable from a social point of view, were an informal reception extended by the Library Committee of the Los Angeles Bar Association and a dinner at the Deauville Club at Santa Monica, tendered by the Bancroft-Whitney Co. The local committee made all in attendance feel themselves very welcome.

For the first time, a woman, Miss Rosamond Parma, librarian of the University of California Law Library, was elected President. Full proceedings will be published in the *Law Library Journal*.

ARTHUR S. McDANIEL, *Secretary*.

ART REFERENCE ROUND-TABLE

THE ART REFERENCE ROUND-TABLE was held on June 24 at the Biltmore Hotel, Los Angeles, Elizabeth K. Steele, Detroit, presiding. It was impossible to estimate the number in attendance, the conference room and all adjacent corridor space being filled. Gilmore Brown, director of the Pasadena Community Playhouse, spoke on "The Problem of the American Theater." The American theater of today is divided into three parts: (1) The New York, or Broadway theater; (2) the motion picture (talking); (3) the little theater. He spoke of the popular theater as being more or less wiped out by the movie, but the idea that the spoken drama is dying out is offset by the little theater. The little theater of today achieves standards of production and acting by developing its own players and serves the community angle through a workshop trying out amateurs. A paper by E. Louise Lucas, Fogg Art Museum Library, on "The Classification and Care of Pictures and Slides," was read by Gladys Caldwell, Los Angeles Public Library, who led the lively discussion which followed. This paper was concerned with methods used by the Fogg Museum Library to make their art material available to every type of student.

In the discussion which followed ideas were exchanged, particularly on the mounting and circulation of pictures. H. W. Wilson spoke on the *Art Index*. Ruth Wilcox, Cleveland Public Library, spoke of the work being done on the Costume Index.

The nominating committee reported the following officers for next year: Chairman, E. Louise Lucas, Fogg Art Museum Library, Harvard University; Secretary, Marian Comings, Fine Arts Dept., Carnegie Library of Pittsburgh.

WINIFRED DENNISON, *Acting Secretary*.

CATALOG SECTION

FOUR MEETINGS were held by the Catalog Section, the general session, the round-table for catalogers in large libraries, the round-table for catalogers in small libraries, and a special informal round-table for those interested in cataloging League of Nations documents. The attendance ranged from 100 to 250. "Research in Cataloging" was generally stressed. The chairman of the Section, Florence M. Craig of Stanford University Library, presided at the general session. The treasurer's report, which showed a thriving condition of the Section, was read and accepted. The reports of the Committee on Regional Groups, the Committee on Standardization of Rules for Arrangement, and the Committee on Cooperative Cataloging were read and accepted. Helen B. Sutliff presented a paper on "What Is Research in Cataloging?" This was followed by Grace O. Kelley on "The Subject Approach to Books; an Adventure in Curriculum," and by William M. Randall on "The Uses of Library Catalogs; a Research Project." Florence B. Currie presided at the round-table for catalogers in large libraries. Papers were read by Alice Charlton on "A Comparative Study of Rules of Entry for Serials in Various Countries," and by Philip S. Goulding on "The Value of Research in Cataloging." Margaret B. Stillwell prepared a paper, "Projects in Incunabula," which was read by Harry M. Lydenberg in her absence. Anna G. Hall presided at the round-table for catalogers in small libraries. A paper on "Economies in Cataloging in Small Libraries" was given by Aimee M. Peters. The special informal round-table for those interested in cataloging the League of Nations documents was conducted by Philip S. Goulding. The Nominating Committee presented the following names for next year: Mildred M. Tucker, Harvard University Library, Chairman; Ruth B. McLean, Connecticut State Library, Secretary-Treasurer.

ANTOINETTE H. GOETZ, *Secretary-Treasurer*.

COUNTY LIBRARIES SECTION

THE FIRST MEETING of the section was held in the Music Room of the Biltmore Hotel at 10 o'clock, Monday, June 23. Miss Sarah E. McCardle, Chairman, presided, and extended to members a warm welcome to California. The program was as follows:

"What Californians Mean by a County Library," Mrs. Julia G. Babcock, Kern County Library, Bakersfield, Cal.

"Service Through Advertising," Mrs. Beatrice Sawyer Rossell, Publicity Assistant, American Library Association, Chicago.

A short discussion followed, after which county librarians of California and other States were introduced by Miss McCardle. The second meeting was held in the lecture room of the Public Library at 10 o'clock, on June 24. The program consisted of an illustrated talk on "Visualizing County Library Work," by Eleanor Hitt, County Free Library, San Diego, Cal., and five-minute talks on Highlights in County Library Service. Several States were represented as follows:

South Carolina—Ellen Perry, Public Library, Greenville.

British Columbia—Mr. Lidster spoke for Helen C. Stewart, Director of Library Demonstration, New Westminster.

Louisiana—Mrs. Lois Henderson, Memorial Library, Shreveport.

Hawaii—Mrs. Julia Davis, County Free Library, Maui.

Arizona—Mrs. Ethel Berryman spoke in place of Con P. Cronin, State Law and Legislative Reference Library, Phoenix.

Wisconsin—Clarence B. Lester, Secretary, Free Library Commission, Madison.

At the business session which followed these officers were unanimously elected for 1930-31: Chairman, Miss Mary Walton Harris, Webster Parish Library, Minden, La.; Secretary-Treasurer, Miss Nellie Morton, New Castle County, Wilmington, Del.; Director for Three-Year Term, Miss Margaret Winning, Allen County, Fort Wayne, Ind.

J. ELIZABETH OLSON, *Secretary*.

HOSPITAL LIBRARIES ROUND-TABLE

MISS MARGARET HICKMAN of the Los Angeles Public Library took charge of the meeting in the absence of the chairman, and Miss Learned, under whose direction Los Angeles hospital service is given, was the secretary pro tem in the absence of Elizabeth Reed. A group of at least fifty listened to the papers and provided animated discussion. The program was planned to give the point of view of the staff

doctor and the hospital nurse. Miss Ethel Swope, Executive Secretary for District No. 5 of the California State Nurses Association, gave a twenty-minute presentation of "The Relation of the Nurse to the Library." The point underlying many of the humorous thrusts and earnest parries seems to have been that the nurses, difficult as they may sometimes be, are liaison agents between the patient and the librarian, who must not be overlooked if we wish to get the best results. They are indispensable, so the wise thing to do would seem to be to cultivate them and have them useful. This takes tact and intelligence. Following this, Mrs. Helen Letson Allen of the Los Angeles Public Library, read Dr. George N. Ruhberg's (St. Paul, Minn.) paper on the "Staff Doctor and the Library; or, Books as a Therapeutic Agent." He said in part: "In speaking of books as a therapeutic agent I am not discussing them as a source of knowledge. Nor am I thinking of them as a source of amusement and entertainment. Rather am I thinking of books as an adjunct and help to the physician in securing definite results in solving a difficult problem." The chairman then spoke of the Lists of Thirty Titles that have been published in the A. L. A. Booklists through the cooperation of the Committee on Hospital Libraries. Some discussion arose over the choice of titles. The present status of the proposed affiliation with the American Hospital Association on the part of the hospital libraries group was explained by the chairman. She stressed the point that the greatest help that could be given the plan would be for each hospital librarian to take out a membership in that organization. Any inquiries on this matter may be addressed to Miss Elizabeth W. Reed, Librarian, Massachusetts General Hospital, Boston.

PERRIE JONES, *Chairman*.

LEAGUE OF LIBRARY COMMISSIONS

THE LEAGUE OF LIBRARY COMMISSIONS held its annual meeting in Los Angeles June 26. In the absence of the President, Louis J. Bailey of the Indiana State Library presided. "The Program of Kiwanis International" was presented by Thomas H. Elson, immediate past Lieutenant-Governor of Division One, California-Nevada District, Kiwanis International, who told of the two major objectives of the organization, the under-privileged child and the establishing closer relations between the farmer and the city man, pointing out that library service was closely related to both projects. During the past year sixty-three Kiwanis clubs in the United States and Canada engaged in library work by furnishing library funds, pur-

chasing children's books, developing rural county "rolling" libraries, aiding high school libraries, cooperating in the observance of Book Week, providing books for prisons and institutions, and in bond issues and campaigns for library funds and buildings. Mr. Elson urged librarians to call on local clubs for whatever type of assistance was most needed, suggesting that they could be particularly helpful in working for bond issues, and in creating favorable sentiment toward increases in financial support from city administrations. A message from Mr. Parker, Executive Secretary of Kiwanis International, expressed his approval of county library development, and gave assurance of his hearty support. In conclusion, Mr. Elson urged a closer cooperation between librarians and Kiwanians, recommending that library speakers appear on local and district programs, assuring them a warm welcome everywhere. Milton J. Ferguson gave a brief report of the Louisiana demonstration with the announcement that a bill to appropriate \$21,000 annually for the continuance of the work is pending in the Legislature of that State. H. Norman Lidster, Chairman of the Public Library Commission, British Columbia, told of the work begun in March last, in his Province, under a five-year grant by the Carnegie Foundation, giving a graphic picture of the difficulties encountered in such a large territory containing so much rugged and sparsely settled country. A second meeting of the League was held June 23 with the National Association of State Libraries, Louis J. Bailey, an official of both associations, presiding.

The officers elected for the following year were:

President, Miss Leora J. Lewis, South Dakota; First Vice-President, Miss Essae M. Culver, Louisiana Library Commission; Second Vice-President, Miss Adelene J. Pratt, Maryland Library Commission; Secretary-Treasurer, Miss Jane Morey, Missouri Library Commission; Member Executive Board, Malcolm J. Wyer, Denver, Colo.

BEVERLY WHEATCROFT, *Acting Secretary*.

LENDING SECTION

THE LENDING SECTION met Thursday, June 26, 1930, at 10 A. M., with Constance Ewing of the Portland Library Association, presiding. B. H. Lehman, Professor of English Literature at the University of California in Berkeley, gave the first address. With a charming diction and real dramatic power he illuminated his hearers regarding "The Good Reader and The Good Book." Professor Lehman made it clear

that the good reader and the good book come together "to make one little room an everywhere; to make one life all lives." (Address elsewhere in THE LIBRARY JOURNAL.) A discussion of the problems presented in reducing the amount of current fiction purchased for public library use was engaged in by Marguerite L. Gates of the Lending Department of the Newark Public Library and A. E. Bostwick, Librarian of the St. Louis Public Library. Instead of participating in lively controversy, they met on a somewhat common ground—that of advocating the purchase of the best fiction. Miss Gates spent some time in her paper in correcting a misapprehension which arose in the 1929 Midwinter Session of A. L. A. regarding the attitude of John Cotton Dana toward fiction. Miss Gates said the question is not, "Is fiction unworthy of a place in a public library, but, to what extent should a public library in the present circumstances go on buying novels?" Doctor Bostwick was of the opinion that we should talk about good books and bad books rather than to differentiate between fiction and non-fiction. Milton J. Ferguson then took charge of a lively presentation of the fiction problem in three-minute talks given by Helen E. Haines, Linda A. Eastman and Susan T. Smith.

Sarah Virginia Lewis presented the report of the Nominating Committee, the following officers being elected: Chairman, Esther Johnston, in charge of Central Circulation, Public Library, N. Y. City; Vice-Chairman, Pauline M. McCaulay, assistant to the librarian, Enoch Pratt Free Library, Baltimore; Secretary, Florence Bradley, Librarian, Metropolitan Life Insurance Co., New York City.

ELEANOR STEPHENS, *Secretary*.

MOTION PICTURE AND VISUAL AIDS ROUND TABLE

THE VISUAL METHODS ROUND TABLE, conducted by Miss Gladys Caldwell, was held in the Uptown Theatre on Thursday morning. The talks were followed by a preview of "The Big House." Mrs. Gladys Case Miller's paper on "The Child and the Moving Picture," dwelt specially on the Junior Matinee movement. This was the outgrowth of parents' effort for better "movies" for their children. In order to secure the better ones, these mothers sponsored a special showing of pictures for children, and endeavored to enlist the support of the community. The motives and aims of the Junior Matinee movement are to provide: (1) Wholesome, entertaining motion picture entertainment for the many school children who attend motion pictures regularly; (2) To attract these children to the junior matinee in

preference to unselected programs; (3) To discourage general attendance at evening performances unattended by parents; (4) To help children create for themselves standards of discrimination and appreciation. Mrs. Alice Ames Winter, speaking of the "Public and the Moving Pictures," stated that it lures more than 16,000,000 people a day to its wide-open doors, and that the public is the ultimate controlling force because pictures, like all other commodities that are for sale, must please their public or they will not sell. And so is registered by attendance with the producers what kind are liked and disliked. Because of the large attendance of children at moving pictures, community supervision has been attempted which has resulted in the code. Roughly, the code pledges itself to upbuild and not lower or destroy social standards, and it goes on to particularize the ways by which the producers mean to keep themselves to this purpose. Mr. Corbett of Electric Products Incorporated discussed modern equipment and trends in the moving picture field.

E. RIDDELL WHITE, *Secretary*.

PERIODICAL SECTION

SECOND annual conference. H. O. Severance, Chairman. Marian C. Manley, scheduled to preside at the first conference, was incapacitated by an automobile accident. Mrs. Mary E. Irish, Librarian of Barlow Medical Library, acted as secretary in the absence of Miss Blake Beem of the Boston Medical Library, who was unable to serve. "The Library's Growing Ally—Business Magazines," was presented by Earl Whiteborne of the McGraw-Hill Publishing Company, in the absence of George C. Tenny. He spoke of the increase in the number of business magazines and house organs which go hand in hand with the growth of business and industry. The paper on "Indexing Business Magazines" was not presented owing to the absence of Mr. Sawyer. The subject, however, was discussed by Mrs. Leidendeker, and the Misses Anidon, Reed, Watson and Whitehorn. "How to Supplement the Book Stack with Free Publications" was presented in a formal paper by Mrs. Leidendeker of the Los Angeles Public Library. She emphasized the collection and use of trade catalogs, house organs and free pamphlet material. Then followed a discussion on the use of such material and methods of making it available. The problems of the *Quarterly Cumulative Index Medicus* were presented by Mrs. Mary E. Irish of the Barlow Medical Library. She emphasized the great value of the Index and the question of including many other journals in its service.

At the second session of the Conference Charles W. Smith, librarian of the University of Washington, presented the topic, "The Pacific Northwest Regional Cooperation—Periodical Holdings and Inter-library Loans," in which he pointed out the advantages of closer cooperation between libraries in various regions of the country, and especially of libraries in a given section, such as the Pacific Northwest. "Better Magazine Consciousness" was the title of the paper presented by Mrs. Jane Gravere, secretary of the Bureau of Public Information, University of North Dakota. She made a plea for more and better magazines in the homes, especially in homes in the rural districts. She said there was little or no provision for children's magazines and church periodicals in the homes. Many worthwhile magazines were unknown in family circles. Story magazines, magazines for girls in the teens and high-grade, low-priced magazines for children are greatly needed. Librarians should be authorities on magazines as well as on books, because the need is greater. Margaret C. Miller led the discussion, and stated that the trouble lies to some extent in the failure of high schools and colleges to introduce their students to the use of periodicals. She moved a resolution, which carried, that a committee of three be appointed to arrange for the broadcasting of advance information on magazines and their contents. "Guides to Periodicals" was ably discussed by Blanche McKown of the Periodical Department of Los Angeles Public Library, in which she gave an account of the several guides published, and urged the revision of *The Guide to Periodicals and Serials*, of which the last revision appeared in 1920. This discussion was followed by a formal brief paper on "The Completion of Sets and Keeping Files of Magazines Complete," by Alfred Hafner of G. E. Stechert & Company, New York City. He described the present methods of importing magazines for libraries, and emphasized the necessity of notifying the agent of the non-receipt of numbers and parts. He advocated a fireproof warehouse for the storage of both foreign and domestic periodicals from which libraries and publishers could secure lacks to fill gaps. The formal program was concluded with a paper on the co-operative clearing house for duplicates in a paper entitled "Treasures Or Junk," by H. W. Wilson.

Officers were elected as follows: Chairman, Mrs. Anne F. Leidendeker, Los Angeles Public Library; Vice-Chairman, Miss Eva W. Graves, Seattle Public Library; Secretary-Treasurer, Miss Janet Doe, New York Academy of Medicine.

MARY E. IRISH, *Acting Secretary*.

PUBLIC DOCUMENTS ROUND-TABLE

THE PUBLIC DOCUMENTS ROUND TABLE was held Saturday morning, June 28, 1930, at the Biltmore Hotel, Los Angeles, with Mary P. Billingsley presiding in the absence of the chairman, James B. Childs. The report of James B. Childs, chairman of the committee, was read by the secretary (printed in *A. L. A. Bulletin*, Vol. 24, No. 5, page 159, with annual reports). A discussion followed on the bill to enlarge the number of depository libraries, which was introduced into the United States Senate on Feb. 1, 1930, by Mr. Johnson of California as S. 3402, 71st Congress, second session, and also was introduced into the House of Representatives on Feb. 15, 1930, by Mr. Anderson of Minnesota as H. R. 9936, 71st Congress, second session. Neltje T. Shimer, Serials Division, Public Library, Los Angeles, read her paper on "Securing and Recording Public Documents at the Los Angeles Public Library." Several members of the staff of the Los Angeles Public Library discussed the paper. Harriet M. Skogh of the Illinois State Library, Springfield, mentioned the difficulty of securing especially valuable State publications. Others joined in the discussion, pointing out the need for greater cooperation on the part of the various States, and a larger staff in the Documents Division of the Library of Congress in order to list more promptly these documents in the *Monthly Check-list of State Publications*. P. L. Windsor, director of the University of Illinois Library and Library School, in response to an inquiry concerning the mimeographed outline for the course in *United States Government Publications as Sources of Information for Libraries*, compiled by Anne M. Boyd, stated that a revised edition soon will appear in book form. Changes in the form of the compilation have been suggested so as to make an appeal to the general public. Nevertheless, the book will adhere strictly to its one purpose, that of providing a course on public documents for the use of students in library schools. *Descriptive List for Use in Acquiring and Discarding United States Government Periodical Mimeographed Statements*, compiled by the Bibliography Committee of the Financial Group of the Special Libraries Association, has also been issued in mimeographed form. F. R. Cowell, formerly of His Majesty's Stationery Office, now on a tour made possible by the Rockefeller Foundation, spoke informally of the comparative study which he is making of the methods in production and distribution of official publications. "Bibliography of Virginia State documents; scope and methods," by

Wilmer L. Hall, assistant librarian of Virginia State Library, Richmond, was next on the program. Due to lack of time, Mr. Hall read only part of his fine paper. Alice J. Haines, California State Library, opened the discussion. A. F. Kuhlman of the University of Chicago Libraries, read a Memorandum on the work of the Social Science Research Council Committee on Public Administration. He said further that research will be impeded greatly unless we have such work as Mr. Hall has outlined. Mabel W. Thomas of the Oakland Free Library made a motion which was seconded and carried, that appreciation be expressed of the outstanding work being done by the Virginia State Library, not only for its reference value, but also as a standard for other States to follow, and that we hope that the project may be carried out as planned.

MINNA STILLMAN, *Secretary*.

RADIO BROADCASTING ROUND-TABLE

A RADIO ROUND-TABLE was conducted on Friday afternoon, June 27, 1930, at the Los Angeles conference, by L. L. Dickerson, chairman of the Library Radio Broadcasting Committee. About twenty were present to consult with Levering Tyson, Director of the National Council on Radio Education. Mr. Dickerson gave a summary of the report of his Committee, based on the returns from 95 libraries. Of these, 45 are not broadcasting, 24 are cooperating with organizations, especially in furnishing material, and 25 are engaged in giving a definite program. Thirteen have discontinued broadcasting because of bad hours, because of being crowded out by commercial broadcasting, or overstimulation for certain books. The programs consist mainly of book discussions, reviews, story-telling, children's reading and library news. Throughout all the returns there was a note of questioning, asking whether the work is worth while. Certainly there is not enough data on hand yet to decide, as the number of people reached and the effectiveness of the program are quite unknown. The committee recommended that a study of programs be made as to subject, construction and presentation, and that inquiry be made as to cooperation between libraries and important stations and chain programs. Mr. Tyson told of the formation of the National Council, whose executive committee will meet in September, 1930. Its program is not settled, but it will almost certainly assemble facts and on their basis will make recommendations. It will not do any broadcasting itself, but will suggest to others. The two nation-wide chains are open

to suggestions from the educational world, and it is the hope of the council to increase educational opportunities on the air. So far, little is known about the technique of broadcasting, though it is recognized that there is a microphone "it." In the discussion a definition of education by radio was given in the words of Prof. W. W. Charters: "Whatever increases the fund of human knowledge, advances the standards of taste, and inspires people to worthwhile activity." So far, the radio has been used primarily for stimulation. Its educational value lies in the extent to which it leads on to self-education, by continuity of subject and self-activity, thus producing more than passive acceptance. The library can collaborate and tie up the radio programs with the information in books; it can select from the programs and announce educational features; it can cooperate with the local station and with the national broadcasting offices. The idea was also advanced that an effort be made to have a book program broadcast over a national chain by some such man as William Lyon Phelps. A very good program of this sort would doubtless meet with acceptance, and the round-table endorsed the proposition.

F. K. W. DRURY, *Acting Secretary.*

READERS' ADVISERS ROUND TABLE

ABOUT seventy-five attended the Readers' Advisers Round Table at the Los Angeles Conference of the A. L. A. on Monday morning, June 23, 1930. Announced originally as a closed meeting, it was open to those giving advisory service and to librarians particularly interested in the work of readers' bureaus. Representatives answered a roll call from over sixteen cities, as follows: Eastern United States—Albany, Washington, D. C., Newark, Pittsburgh. Central—Milwaukee, Cleveland, St. Paul, Indianapolis. Western—Berkeley, Long Beach, Los Angeles, San Diego, Phoenix, Portland, Reno and Pasadena. There were also two representatives from extension divisions, California and Wisconsin. Questions for discussion had been asked from readers' advisers, and from these an outline of topics had been prepared. Only a few could be discussed in the two hours' time allotted for the round-table. "What Should Be Emphasized in an Interview" was taken up first. It was felt that the objective of the reader should be discovered. The difference in service rendered by a reference assistant and a readers' aid was pointed out. The discussion of the best term to use in describing a readers' adviser who gives personal service developed the desirability of an unobjectionable term, such as Consultant or

Aid. The difference between a reading course and a reading list was pointed out in the discussion. A proposal of the headquarters' staff to keep a record of reading courses compiled by libraries seemed to be welcomed. Effective arrangements in supplying books to groups brought out suggestions of different methods. Effective ways of establishing contacts with local organizations were outlined, such as: Find out what schools there are by studying the classified section of the telephone directory and reading the local newspaper with its advertisements; make a card file of agencies; call on the telephone or in person to find out what each school is doing; secure printed matter for the library file; develop principles and a philosophy before practice and program are set up. In order to find out which local schools to include, a useful guide may be found in the lists which associations make out and the vocational lists of the State. In regard to what records are essential in a readers' advisers office, seventy-two items asked for by Amy Winslow were mentioned and a copy of her thesis was exhibited. It is hoped that this will be published in summarized form shortly. On Thursday morning several of the adult education workers enjoyed a breakfast at the Outside Inn of the Los Angeles Public Library.

F. K. W. DRURY, *Chairman.*

SCHOOL LIBRARIES SECTION

THE CONFERENCE WEEK held much to interest school librarians. In addition to the section meetings there was the round-table on young people's reading, the two meetings of the junior college librarians, the review of California school library progress at the Wednesday general session, the visits to school libraries of the city, the delightful dinner at the Beverly Hills Hotel given by the California School Library Association, and, filling in all the odd moments, the entertaining, helpful exhibit and the many casual conferences with school librarians from near and far. These informal conferences were consciously promoted by the appointment of a contact chairman, who sought to bring together the person with a problem and someone especially qualified to give help. The two sides of the library shield, the person and the book, were inspiringly presented at the opening meeting, Monday afternoon, Dr. J. Hudson Ballard speaking on the "Psychology of Influence," and Mrs. Gudrun Thorne-Thomsen on the "Abiding Value of Great Literature." Many lingered after this meeting to meet the speakers, to greet old friends, and to enjoy a cup of punch. The last general session of the conference was also the joint meeting of the School

Libraries Section and the Section on Library Work with Children, and is reported elsewhere. Three round-tables met simultaneously Wednesday afternoon. The teachers' college round-table centered its discussion in such practical matters as reserve systems, library instruction and provision for recreational books. The theme of the elementary school librarians was primarily the coordination of the school library with the public library. Junior and senior high school librarians talked of books and reading. Another important conference was the gathering Wednesday morning of the supervisors of school libraries from nine cities. At the business meeting Friday evening the committee reports, unusually interesting and constructive, contained proposals of vital work yet to be undertaken. The most important action was the adoption of a new constitution establishing an active and an associate membership. By a recommendation from the Committee on Cognate Committees and Sections the long-considered matter of the relationship of the Education Committee and the Section was satisfactorily solved. A suggestion of romance found its way into the routine of business when the section agreed to select a library for the Rapidan River school in the Virginia mountains in which President and Mrs. Hoover are so much interested. A fund of \$65 from a book auction on the A. L. A. special train was given toward the project. Funds were voted to complete the section's share of the expense of the Lincoln library for Mexican children.

The following officers were elected: He'en Harris, Director; Edith L. Cook, Secretary; Jasmine Britton, Treasurer. Eleanor M. Witmer will succeed Annie S. Cutter as chairman.

MARJORIE VAN DEUSEN, *Secretary pro tem.*

SECTION FOR LIBRARY WORK WITH CHILDREN

THE PROGRAM for the Section for Library Work with Children included a general meeting Tuesday morning, June 24; a business meeting Thursday morning, June 26, and a part in the General Session Saturday afternoon, June 28. Effie L. Power, Chairman, presided at the first two meetings, and in the absence of Julia Carter, Claire Nolte acted as secretary. The Tuesday meeting took the form of a library family discussion of some of the problems in the selection and purchase of books for children's librarians. Ralph Munn, librarian of the Carnegie Library, Pittsburgh, presented the subject of "The Library's Budget for Children's Books." This was ably discussed by Miss Porter of Seattle from the point of

view of a children's librarian. Other topics presented were: "The Choice of Editions of Children's Classics," by Mary Lucas; "The Place of Text Books in a Children's Library," by Adah Whitcomb, and "The Problem of Children's Book Selection in Libraries Remote from Publishing Centers," by Alice Burgess Lewis. These papers were discussed by Louise Metcalf, Eva G. Leslie, Katherine Watson, Dorothy Grout and others. The meeting closed with the announcement of the award of the Newbery Medal to Rachel Field for her book, *Hitty, Her First Hundred Years*. The selection of the committee was greeted with great enthusiasm. The business meeting on Thursday was confined chiefly to reports of standing committees. The work reported as accomplished during the year included revision of the A. L. A. "Gifts for Children's Book Shelves" and the preparation of the "Children's Books from Twelve Countries," list published in April by the A. L. A. and the preparation and printing of a list entitled "Romance and Adventure for Girls and Boys in Their Teens." During the year the Section prepared bibliographies on several subjects presented over the radio by the American School of the Air and provided a series of book reviews and articles for six different magazines and newspapers. Membership in the Section reached 754 in May and committees are working toward a goal of 1,000. The presentation of the Newbery Award was made by Miss Power at the General Session on Saturday when Miss Field won all by her gracious response. Mr. Munn's paper on "The Social Significance of Library Work with Children," delivered at this session, was one of the outstanding events of the conference, and is printed elsewhere in this number. The social features of the week included a trip to the Glendale airport on Tuesday to welcome Miss Field and Hitty, who arrived by plane; a tea given by the Los Angeles children's librarians at the Woman's Athletic Club on Friday, and numerous informal sightseeing trips, luncheons and dinners. Children's librarians to the number of 117 registered at the Exhibit Booth of the Section.

Section officers for the coming year are: Chairman, Mary Gould Davis, New York Public Library; Vice-Chairman, Julia F. Carter, Cincinnati Public Library; Secretary, Nora Beust, School of Education Library of the University of North Carolina; Treasurer, Marjorie Potter, Albany, N. Y., Public Library. Ethel Wright, Eva Leslie and Francis Atchinson Bacon were elected members at large on the Committee on the Newbery Award for the Current year.

CLAIRE NOLTE, *Acting Secretary.*

SMALL LIBRARIES ROUND-TABLE

MISS ALICE WILLIAMS, Librarian of the Moline Public Library, presided at the Small Libraries Round-Table. Miss Grace Shellenberger, Librarian of the Davenport Public Library, presented the subject of staff meetings. She felt them important to both librarian and staff. Dinner meetings have proven successful at Davenport. The dinner is a simple meal prepared by the staff in the staff room, and often outside speakers are invited. Miss Winifred Riggs of the Toledo Public Library explained the Dickman charging system used there. A careful page may charge as high as 25 books in 3 minutes and 30 seconds. The work is accurate. It gives the trained worker more time to help readers choose books. Mr. R. A. Ulveling of the Detroit Public Library explained their new system. Patrons charge their own books. The inspection at the door checks the loss of books and the congestion at the desk is removed. Here, too, the trained assistant has more time to devote to personal work with patrons. Miss Joanna Hagey, librarian of the Cedar Rapids Public Library, discussed the problem of "Spending the Book Fund Wisely." She felt that it should be carefully budgeted. Otherwise too much would be spent on one class of books. Avoid subscription sets. Mrs. Zulema K. Rowell, a former librarian and now a resident of Orange, Cal., showed "The Other Side of the Fence." She felt that the public in general knows little of the possibilities of the average library, and that libraries should follow the methods of big business and advertise. This could be done from a central agency so that even the smallest library would profit by it.

The following officers were chosen for the coming year: Chairman, Miss Adeline T. Davidson, Librarian of the East Orange Public Library; Secretary, Miss Laura M. Olson, Librarian of the Eau Claire Library.

MARY A. EGAN, *Secretary*.

WORK WITH FOREIGN-BORN
ROUND-TABLE

THE ROUND-TABLE on work with the foreign-born, held Wednesday afternoon, June 25, was, in the absence of its chairman, presided over by Miss Margaret Hickman of Los Angeles, with Miss Agnes V. Johnson of Minnesota acting as secretary pro-tem. An able and enlightening talk on the immigration situation was given by Dr. Emory S. Bogardus of the University of Southern California, an internationally known sociologist. Beginning with a general survey of the immigration problem, his address led up to a consideration of

the situation as it affects the Pacific and Southwest States in respect to the Mexicans and Filipinos. Discussion followed. Miss Ettie Lee, teacher of experimental English and author of adaptations of the classics, presented a very graphic picture of what can be accomplished with both children and adults in her subject, "Social Values in Learning English." It had been hoped that quite complete discussion could follow this talk, but lack of time prevented anything but brief mention of the foreign lists appearing in the *Booklist*, the juvenile list of foreign books from twelve countries, and calling attention to the useful pamphlet, "Reading Service to the Foreign-Born."

AGNES V. JOHNSON, *Secretary pro-tem*.

A. L. A. Publishes Mudge

OWNERS of the *Guide to Reference Books, Fifth Edition*, will be interested in the announcement that Miss Mudge's annual survey of new reference works, which for nineteen years has appeared in THE LIBRARY JOURNAL, is published this year as a separate by the A. L. A. In a way it serves as a supplement to the *Guide* which was issued in a fifth edition in 1929. The title of the pamphlet is *Some Reference Books of 1929*, and it is priced at sixty cents. The brochure contains forty-seven pages as compared with three pages in the first such survey which appeared in THE LIBRARY JOURNAL in 1911.

Painstaking investigation of the increasing volume of reference works appearing annually in this country and Europe, which characterizes all of Miss Mudge's surveys, makes the supplement a welcome tool for librarians and reference workers. Among some 236 books and sets reviewed are such outstanding titles as the *Encyclopædia Britannica*, the *Encyclopædia of the Social Sciences*, the *Educational Index*, the *Dictionary of American Biography*, *Commercial and Industrial Organization of the United States*, and such foreign publications as the *Concise Oxford Dictionary*, the *Enciclopedia Italiana*, the *Handbüch der Finanzwissenschaft*, the *Catalogue des Catalogues de la Librairie Française*, and the *Year-book of the Czechoslovak Republic* for 1929. Although necessarily brief, her comments are always specific. She says, for instance, of one set that "articles are signed with full names, a marked improvement over the ordinary use of initials." Of another compilation she comments that it was "prepared particularly for small and medium-sized libraries, but will frequently be found useful in the large library as well."

Librarian Authors

ALICE MARION RICHARDSON, the author of *The Index to Stories of Hymns*, published in 1929 by F. S. Cook & Sons, Yardley, Pa., was educated in the public schools of Woburn and

Alice Marion Richardson

at Wellesley College. She received her practical training in library work under Mary A. Richardson in the Public Library of New London, Conn., and Ernest C. Richardson in the library of Princeton University. She was librarian of the Talcott Library, Northfield Seminary, East Northfield, Mass., for three years, then, after being out of work for some years except for a few part-time jobs, she was librarian of the Sheath Memorial Library of Religious Education of the Yale Divinity School from 1919 to 1920. Since September, 1920, she has been a cataloger and in charge of departmental library of religious education at the Case Memorial Library, Hartford Seminary Foundation, Connecticut. Miss Richardson says that in connection with her reference work in religious education, she found she was often asked for hymn stories of special hymns. To find these stories it was necessary to consult several books, and as it seemed that a combined index to all these stories as found in the most used books might prove valuable, she made one for the use of the library. Later, it was suggested that this index might be useful to others, and it was therefore published in book form in 1929. The book is now being handled by H. W. Wilson Company.

GLADYS EDSON LOCKE was born in Boston, Mass., and graduated from the Girls' Latin School, Boston University, and Simmons College in Boston. For six years she was a tutor

Gladys Edson Locke

in Latin, French and Italian and for two years was a teacher of Latin and English in the Milford, N. H., High School. Since 1917, however, she has been a cataloger in the Boston Public Library. Miss Locke says that she has been writing stories ever since she was a child—fairy tales at first and later fairy plays for a theater she made out of pasteboard with paper dolls for actors. Finally she wrote a few historical stories, and while in college a biography of Queen Elizabeth. For some years now she has been writing detective stories, and three out of the number have been published in London. She has published the following books: *Queen Elizabeth*, 1913; *That Affair at Portstead Manor*, 1914; *Ronald O' the Moors*, 1919; *The Red Cavalier*, 1922; *The Scarlet Macaw*, 1923; *The Purple Mist*, 1924; *The House on the Downs*, 1925; *The Golden Lotus*, 1927, and *Redmaynes*, 1928. L. C. Page & Company of Boston published *The Red Cavalier* and subsequently published the rest of her books. Her hobby is traveling in England and Scotland, and, as she is of English descent, she loves this land dearly. For the past several years she has lived in Dorchester, a suburb of Boston.

Current Library Literature

Intended to index with brief annotation, or excerpts when desirable, articles in library periodicals, books on libraries and library economy and other material of interest to the profession. The subject headings follow those in Cannons' "Bibliography of Library Economy," to which this department makes a continuing supplement. Readers are requested to note and supply omissions and make suggestions as to the development of this department.

AMERICAN LIBRARY IN PARIS

American Library in Paris. *Year Book*. 1930. 96p. il. tables.

BOOKS AND READING

Nowell, Charles. Books, libraries, and readers. *Lib. World*. 32:275-279. 1930.

National broadcast, April 23, 1930, by the City Librarian of Coventry, England. "Since the public library was first established in this country, its primary function has been always to encourage the reading of good literature, the development of interest in definite subjects, and clearer thinking by the mass of the people in general. To attain this end librarians endeavour to capture the interest of the child when quite young, and when this has not been successful, they attempt it at a later period with the adult. . . . If you ever want to read a book a second time, that is the book you ought to buy for your own shelf. And any book that haunted you as a child, buy it for your child."

BROMLEY (KENT) PUBLIC LIBRARY

Dealing with outlying districts. V.—Bromley, Kent. *Ln. and Book World*. 19:314-315. 1930.

Two illustrations: elevation and interior. No text.

CERTIFICATION OF LIBRARIANS

Cannon, Carl. New York gives librarian professional status. *LIB. JOUR.* 55:588-590. 1930.

Approval by the Board of Regents of the Standards of Service submitted by the New York Library Association insures that after Jan. 1, 1931, every librarian of professional grade in public libraries of the State will be required to hold a certificate as a condition of legal employment and can qualify for such certificate on the basis of his present position, education, training, and period of experience.

CHILDREN'S LITERATURE

De Gogorza, Flora. Juvenile books about Italy. *Bulletin of the Brooklyn Public Library*. 9:69-71. 1930.

Also published, in slightly expanded form, in the *Publishers' Weekly* of April 26, 1930.

McClure, J. B. Upholding standards of book selection in the children's department. *N. C. Lib. Bull.* 7:257-259. 1930.

Includes quotations from other authorities.

Smith, E. S. The festival of Hans Christian Andersen. illus. por. *Carnegie Magazine*. 4:53-54. 1930.

The 125th anniversary of Andersen's birth was celebrated by the main library and branches of the Carnegie Library of Pittsburgh with exhibits of early editions, clay models of figures from the tales, and elaborate programs of plays, songs, and folk-dances.

CLASSIFICATION

Conner, Martha. Notes on the teaching of classification. *Wilson Bull.* 4:513-514. 1930.

Where to begin in teaching the decimal classification occasionally puzzles the young teacher. Literature, though familiar, presents three new ideas: subject, form, and language, and is not a good class to begin with. History is quite as familiar, and its subdivision by country is easily understood. Here is an opportunity to present subject analysis with regional subdivision.

See also LAW LIBRARY CLASSIFICATION.

CLEVELAND (OHIO) PUBLIC LIBRARY

The June, 1930, issue of *The Gambit*, official publication of the Missouri-Pacific-St. Louis Chess Club, St. Louis, Mo., is a souvenir edition devoted to the John G. White collection of books on folklore, Orientalia, and chess, in the Cleveland Public Library.

COUNTY LIBRARIES

Towne, J. E. County library service of the Julius Rosenwald Fund. illus. *School Life*. 15:183-185. 1930.

Summary of reports from county or parish (Louisiana) libraries now receiving aid from the Rosenwald Fund. By the fall of 1933 all schools not meeting the library standards adopted by the Association of Colleges and Secondary Schools of the Southern States will be dropped from the association's accredited list.

CALIFORNIA

Babcock, J. G. The orange sign. illus. *LIB. JOUR.* 55:541-544. 1930.

The orange sign, which indicates free county library service in California, is found in 46 of the 58 counties.

WASHINGTON

Van Sant, Clara. The county library situation in Washington. illus. *LIB. JOUR.* 55:552-554. 1930.

The situation is a peculiar one: the State has three legally organized county libraries in operation, but no law under which they can function or by which other county libraries may be organized. The word "county" was inadvertently dropped during a recodification of the State library law.

CUBA. See LIBRARIES, subhead CUBA.

EDUCATION, ADULT

Ferguson, M. J. Country life and libraries; with a thought on adult education. *Journal of Adult Education*. 2:272-275. 1930.

"Country life is no longer what it was when the coonskin cap was in style. Good roads, swift automobiles, rural delivery, the radio and airplanes have pushed back the rural frontiers. So it is up to the forces that would appeal to the human mind, that would persuade men and women to acquire new mental tastes, to place their wares before possible customers promptly and in attractive packages. Education was never so richly supported as it is today. . . . The product of the teacher's effort will speedily and greatly deteriorate unless the library be readily at hand to carry on when textbooks have been closed and the commencement orations have been spoken."

"Let us keep our standards. If boys and girls will read cheap literature, let them get it outside of school and library."

Logasa, Hannah, comp. *Historical Fiction and Other Reading References for History Classes in Junior and Senior High Schools.* Philadelphia: McKinley Pub. Co., 1930. pap. 131p. \$1.

Briefly annotated titles of books on ancient, medieval, modern, European, and American history, with a selected list of source books.

Schmidt, Meta, comp. *500 Books for the Senior High School Library.* A. L. A., 1930. pap. 64p. 75c.

Result of a frequency list submitted to twenty-five high school librarians. "All this list can do is to suggest a basic collection for a library in a senior high school. The superintendent of schools who is obliged to do without the services of a librarian may well use it as a buying list by turning it over to a book jobber."—Preface.

Wilson, F. H., and H. E. Wilson, comps. *Bibliography of American Biography.* Selected and annotated for secondary schools. Philadelphia: McKinley Pub. Co., 1930. pap. 64p. 75c. (National Council for the Social Studies, Pub. no. 5.)

With an introduction on biography in the teaching of American history. Entries are arranged chronologically.

HOSPITAL LIBRARIES

Delaney, S. P. The library—a factor in Veterans' Bureau hospitals. U. S. Veterans' Bureau. *Medical Bulletin.* 6:331-333. 1930.

Suggests specific titles for all types of physical and mental cases, as well as for patients who follow some profession in ordinary life.

INDEX

Rush, C. E. Cultivating the index habit. *LIB. JOUR.* 55:590-593. 1930.

"To induce an adult to adopt the index habit, even after he understands its value, is the more difficult approach to the problem. The old custom of groping through the pages dies hard. Childhood is the time to begin, and it is here that libraries can perform a distinct service to the whole field of popular education." The indexes to the new 14th edition of the *Encyclopædia Britannica* and *Compton's Pictured Encyclopedia* are cited as models of excellent indexing.

LAW LIBRARY CLASSIFICATION

Classification for a law library. *Special Libs.* 21:186-188. 1930.

Answer to an inquiry, with bibliography.

LENDING DEPARTMENT

Fortune, W. W. The staff inclosure. Sizes and equipment recommended. plans. *Ln. and Book World.* 19:354-356. 1930.

Dimensions of counters, barriers, wickets; suggestions for placing of charging trays, book bins, drawers, shelves, etc.

LIBRARIANS

Bohnenberger, Carl. Portrait of the librarian as artist. *Libraries.* 35:295-298. 1930.

"From the library training ground has come only one

profound artist: Frances Newman. Lately, we have in Henry Evelyn Bliss of the University of New York Library [sic] what appears to be the nearest approach to a scientific philosopher and metaphysician that our profession has produced. . . . The blame lies somewhere. The library schools that produce librarians? The institutions that employ them? The librarians themselves? I think a little of each contribute to the dearth of creative intelligence among librarians." The writer gives practical suggestions for the establishment of awards, fellowships, and another professional journal to stimulate creative ability in librarians.

Ferguson, M. J. A modern library for a modern world. *News Notes of Calif. Libs.* 25:129-133. 1930.

Paper read during the exercises in dedication of the new library building at the University of Oklahoma, Feb. 22, 1930. Increased service to rural areas and to schools is made possible by modern methods of organization and a trained and alert personnel.

LIBRARIES

BRITISH COLUMBIA

Lidster, H. N. The British Columbia demonstration. *LIB. JOUR.* 55:554-556. 1930.

The Carnegie Corporation is financing a library demonstration in the Fraser Valley area, following the Library Survey of British Columbia, financed by the Corporation and the Government of the Province.

CUBA

Cuban books and libraries. *Bulletin of the Pan-American Union.* 64:451-460. 1930.

Cuba had, in 1927, 58 libraries, owning 622,461 volumes, used by 508,038 readers. They are listed in this article by provinces, with date of founding, location, name of person or entity sustaining each library, and number of volumes.

WALES

National Library of Wales. *Report of the Proceedings of the Fourth Conference on Libraries in Wales and Monmouthshire, Aberystwyth, June 27-28, 1929.* Aberystwyth, 1930. 27p. 3s. pap. 2s.

LIBRARY PERIODICALS

Design in Industry, which began publication in May, 1930, is intended to present the latest articles on the subject of design to be found in magazines, books, and pamphlets. It is planned as a monthly publication, free to residents of Newark, and mailed to non-residents for 25 cents. Address either the Public Library or the Newark Museum, Newark, N. J.

LIBRARY PLAYS

Collins, Louel. Visions from bookland. *N. C. Lib. Bull.* 7:265-271. 1930.

A play written for and presented by the Children's Department of the Winston-Salem Public Library during Book Week, 1929.

Reely, M. K. *Bringing Up Nine.* A. L. A., 1930. pap. 15p.

Dramatization of county library service adapted from the author's *Uncle Sam Brings It to Your Door.* The original appeared in *Wis. Lib. Bull.*, June, 1923; the adaptation, January, 1929.

LIBRARY SERVICE

Hall, G. F. The most important purchase, the librarian. *A. L. A. Bull.* 24:251-253. 1930.

By the president of the Board of Trustees, Cliffside Park (N. J.) Free Public Library. Gives practical reasons for the employment of trained librarians.

Keogh, Andrew. Scholarship in library work. *LIB. JOUR.* 55:585-587. 1930.

Address of the president of the A. L. A. at the Los Angeles Conference, June 23, 1930. "President Keogh's address on the texts of Dr. Bostwick's always wise words, and Lord Elgin's advice at Edinburgh, to look forward to the next half century instead of backward to that which has passed, while giving full credit to the development of the public library in its wider relations, emphasized rightly as coming from the librarian of Yale University the importance of specialization in intensive work for the scholar and research worker."—Editorial.

LIBRARY SERVICE TO CHILDREN. See CHILDREN'S LITERATURE; LIBRARY PLAYS; VACATION READING CLUBS.

LONDON, UNIVERSITY OF. SCHOOL OF LIBRARIANSHIP
Tremaine, Marie. Librarianship in London. *Ont. Lib. Review*. 14:111-113. 1930.

The school, opened in 1919, now has 80 students for the two-year course (which university graduates may take in one) and 64 librarians, who attend the evening sessions which cover the course in about four years. Bibliography, typography, and paleography are emphasized, besides more ordinary subjects.

NEWSPAPER LIBRARIES

Special Libraries for May-June, 1930, has articles on "Reference Facilities of the *New York Times*," by M. E. Walker, and "Collections and System of the *St. Louis Post-Dispatch Library*," by Charles T. Moore. 21:154-158. 1930.

PLAYS. See LIBRARY PLAYS.

PUBLIC LIBRARIES AND PUBLIC EDUCATION

Black, D. M. The influence of the public library on the lives of men and women. *Libraries*. 35:299-305. 1930.

The writer discovered nearly 100 examples of benefit from the use of public book collections from a reading of 350 biographies of eminent American and British citizens of the past 150 years.

RURAL SCHOOL LIBRARIES

Lathrop, E. A. *State Direction of Rural School Library Service*. Wash.: Govt. Prtg. Off., 1930. pap. 50p. illus. 10c. (U. S. Dept. of the Interior, Office of Education., Bull., 1930, no. 6.)

Contents: Introduction; Present Rural School Library Situation; Principal State Agencies Directing Library Service for Rural Schools; Activities of State Educational and Library Agencies; Summary and Conclusions.

SALARIES

Booth, M. J., comp. Salary statistics: teachers' college and normal school libraries. *A. L. A. Bull.* 24:269-271. 1930.

Sixth annual table presented by the A. L. A. Committee on Salaries, Insurance and Annuities. Forty schools are represented, the largest number ever published in this series.

SCHOOL LIBRARIES

OREGON

Foster, E. M. School work in Portland. *LIB. JOUR.* 55:549-552. 1930.

Consistent growth through the vicissitudes of twenty years has marked the progress of the School Department of the Library Association of Portland. Service is given to 9 high schools, 3 county high schools, 38 elementary schools in the city, 41 platoon schools, 5 parochial schools, 4 private schools, and 45 county schools. There are also 713 classroom libraries deposited in the city schools and 255 in the county schools.

See also HIGH SCHOOL LIBRARIES.

STAFF ENCLOSURE. See LENDING DEPARTMENT.

STATE DOCUMENTS

Hazard, Marjorie. State documents—their use and value. *Mich. Lib. Bull.* 21:177-178. 1930.

Discusses the Michigan *Red Book*, *Michigan History Magazine*, etc.

U. S. NAVAL ACADEMY LIBRARY

Bolander, L. H. Training midshipmen to use the library. *Libraries*. 35:326-328. 1930.

Midshipmen, coming to the Academy in June as plebes, are instructed in the use of the library by members of the English department. Three hundred pages must be read each month, not more than half of them fiction. A written examination is held monthly. The actual number of books drawn by midshipmen from the library has increased 650 per cent since 1922, when the idea was adopted.

VACATION READING CLUBS

Vacation Reading Clubs. Why vacation reading? *N. H. Pub. Libs.* 26:62-67. 1930.

No reading club has any justification for existence unless it stimulates the child's joy of reading. The great vice of travel clubs is "device." "The temptation to start a train of elaborate preparations in the way of

library ticket windows, means of transportation, tickets, passports, rules, and impedimenta can easily result in totally obscuring the object of reading in the paraphernalia of the journey." Five good clubs described in this article include the Rainbow, to insure desirable variety in reading; the Treasure Hunt, the special feature of which is the list of questions or clues for finding the treasures; Star by Star, which avoids formal lists of required reading; Tercentenary (for New England); and travel clubs.

WEST HAVEN (CONN.) PUBLIC LIBRARY

Lewis, C. M. The Graham Room for boys and girls. *LIB. JOUR.* 55:496. 1930.

A semi-basement room equipped and furnished by Miss Marguerite Graham as a memorial to her father.

WOLVERHAMPTON (ENGLAND) PUBLIC LIBRARIES

Dealing with outlying districts. IV.—Wolverhampton. illus. plan. *Ln. and Book World*. 19:277-278. 1930.

The site of the Bushbury Branch Library, now in course of erection, is a triangular one, and the plan, which is octagonal in shape, is arranged to come within the building lines.

New Association Formed

THE LIBRARIANS of eastern Oregon, feeling the need of closer contact with fellow workers, and not having the advantage of a State meeting, were called together by Mildred M. Huntamer, librarian of Baker Public Library, on May 29, and through her efforts an association was formed. Twenty libraries were included in the association. Instructive and enjoyable round-tables on pertinent problems were conducted by Miss Jessie M. Choate, librarian of Malheur County Library; Miss Olsen, librarian of Umatilla County Library, and Miss Doty, librarian of La Grande Library. The program closed with a clever original puppet show staged by the staff of the La Grande Library.

Utah Library Association

THE EIGHTEENTH Annual Convention of the Utah Library Association was held in American Fork, Utah, June 14. The morning session featured an address by President Franklin S. Harris of the Brigham Young University on "The Great Libraries of the World." The description and stories of the libraries in China, Japan, India, Egypt, Ceylon and Burma were especially interesting. A round-table on "Magazines in the Library" was conducted by Miss Esther Nelson of the University of Utah Library, and "Some New Books of the Year" were reviewed by Miss Joanna H. Sprague, Salt Lake City librarian. The afternoon session was devoted to a roll call of librarians, who responded with a one-minute report, and to business. Following the meetings, a ride to a large poultry farm and through beautiful Provo Canyon was enjoyed. The following officers were elected: President, Mrs. Ruth V. Tyler; secretary-treasurer, Miss Orpha Kiser.

Book News

HOECKER, RUDOLF, AND JORIS VORSTIUS. *Internationale Bibliographie des Buch—und Bibliothekswesens; mit Besonderer Berücksichtigung der Bibliographie*. 3. Jahrgang, 1928. Leipzig, Harrassowitz, 1929. 203p. 30M.

The two first appearances of this bibliography were as Beihefte to the "Zentralblatt für Bibliothekswesen," but to meet the growing demand and to emphasize its inclusiveness and its international character, the publisher has issued it separately; in future it will be continued as an annual publication quite independent of the "Zentralblatt," and be printed in two editions, on one or both sides of the leaves.

Dr. Hoecker, quite recently appointed director of the Library of the University of Berlin, and Dr. Vorstius, of the Prussian State Library, have divided their bibliography into two parts. The first is an international bibliography of bibliographies, with the following divisions: theory of bibliography and international indices of all kinds; international systems of classification; national bibliographies; subject bibliographies—the only work of its kind—listed in fourteen groups; regional and local bibliographies; and lastly, personal bibliographies, this last alone containing about five hundred items. This first part of the work is the annual bibliography of bibliographies which one of the resolutions of the World Congress of Libraries and Bibliography, passed in Rome last year, referred to as already in existence. Its scope is indicated by the following examples: the division of Orientalia and Judaica contains fifty-three titles, of which nine are British and American; about one hundred and fifty items are listed in the division of history and geography, in eighteen languages; some Americans among the personal bibliographies are Thomas Bailey Aldrich, Henry Ward Beecher, F. Maurice Blomfield, George W. Cable, George Rogers Clark, Theodore Dreiser, Benjamin H. Hill, Lincoln, Jacques Loeb, Maarten Maartens, John Bassett Moore, Poe, Edward Titchener.

The second part deals with the bibliography of books and libraries, that is, bibliography in its broad sense. This part has the following subdivisions: books in general, library economy, libraries in the various countries, palaeography and manuscripts, publishing, book trade, the periodical and newspaper press, copyright, and bibliophily.

The book is printed in two columns of large type, with the rather intense abbreviation com-

mon to German works of this sort. Russian, Ukrainian, and Oriental titles are especially indicated and transliterated. Analytics, from books and periodicals, are freely included. Critical notes were, of course, impossible in a work of this size and universal character, but from personal observation of the methods of the compilers, I know that every title is examined before being included.

There has been a great need for an annual bibliography of bibliographies, as was indicated by the World Library Congress's resolution referred to. The great scope of this work, which is singularly free from national bias, and the meticulous care of the compilers; together with their unusual opportunities for collecting material, go far to make it the one indispensable work in its field.

MAHLON K. SCHNACKE,
Assistant Librarian, Brown University.

Book Club Selections

(for August)

BOOK-OF-THE-MONTH CLUB

Lone Cowboy: My Life Story, by Will James. Scribner.

The biography of Smoky's master.

BOOK LEAGUE OF AMERICA

American Girl, by John R. Tunis. Brewer & Warren.

A brilliant realistic history of an American girl.

BUSINESS BOOK LEAGUE

Morgan the Magnificent, by John K. Winkler. Vanguard Press.

CATHOLIC BOOK CLUB

The Monstrous Regiment, by Christopher Hol-
lis. Minton, Balch.

The history of England during the reign of Elizabeth from a Roman Catholic point of view.

JUNIOR LITERARY GUILD

A Baker's Dozen (boys and girls 8-12), collected by Mary Gould Davis. Harcourt, Brace.

A Barrel of Clams (girls 12-16), by Shirley Berton Leshner. Harcourt, Brace.

Ood-le-Uk, the Wanderer (boys 12-16), by Alice Lide and Margaret Johnson. Little, Brown.

LITERARY GUILD

The Outlaw Years, by Robert M. Coates. Macaulay.

The story of the land and river pirates who infested the American wilderness during the years 1797 to 1835.

Library Organizations

County Libraries Receive Attention

THE SIXTH annual meeting of the Louisiana State Library Association met at Monroe, May 1-2. The program covered a wide variety of subjects. The meeting was unusually well attended, many delegates having driven long distances as part of a caravan, visiting recently established parish libraries on their way. County libraries in Louisiana parish received much attention. Action was taken to stimulate interest on the part of legislators to see that adequate aid is given to continue the work so well begun through the help of the Carnegie Corporation. Miss Lois Shortess, State School Supervisor, led a discussion of the training facilities about to be offered in the State to meet teacher-librarian requirements. Representatives of the various schools offering such courses this summer told of their plans. A most interesting account of the experiment in library extension now being carried on in Webster Parish was given by Miss Mary Harris, the parish librarian. The Rosenwald Fund is cooperating here to give a parish-wide service through the schools as distributing centers to all races. The circulation of books over a short period was reported as phenomenal. Representatives of foundations were present to speak on the work now being done in aid of libraries in the South. Leo Favrot appeared for the General Education Board, and in the absence of a representative briefly mentioned the work of the Carnegie Corporation, and Jackson Towne told of the policies and plans of the Rosenwald Foundation in so far as they affect libraries of this region. A book dinner at the Riverside Country Club was gracefully presided over by Miss Essae M. Culver. James McMillen discussed "Rare Book Buying"; Charles Flack, "Book Plates," followed by several book reviews on "The Most Interesting Book I Have Read This Year." One afternoon session was devoted entirely to problems of trustees, Colonel J. Fair Hardin and J. O. Modisette of Shreveport, together with D. D. Moore, librarian of the New Orleans Public Library, leading the discussion. Of more literary interest was the paper of Rev. J. J. O'Brien, librarian of Loyola University, on the "Source Literature for Louisiana History." Dr. Roger McCutcheon of Tulane University lectured on "Intelligence in Recent Literature," and W. D. Cline, trustee of the Wichita Falls Public Library, told his adventures in building up a private library.

Miss Lois Shortess of Baton Rouge was elected President of the association to succeed R. J. Usher; Mrs. R. S. Gray of Ferriday was elected Secretary.

Catholic Librarians Meet in the South

CATHOLIC LIBRARIANS from all parts of the country met in New Orleans, June 23-26, on the occasion of the twenty-seventh annual convention of the National Catholic Educational Association and the tenth of the Library Section. Among the outstanding topics for discussion were the future policy of the *Catholic Periodical Index*, now indexing forty-six Catholic periodicals; the greater possibilities of the *Catholic Library World*, the official monthly publication of the Library Section; the formulating of a Union Index to back volumes of Catholic periodicals; the compilation of a list showing the masters' and doctors' dissertations submitted to Catholic colleges and universities during the year 1930; and the possibility of an annual Catholic bibliography.

The following papers, read at the General Session, were the occasion of considerable comment: "A Union Index to Back Volumes of Catholic Periodicals," by Miss M. Lillian Ryan, librarian, Loyola University, Chicago, Ill.; "Future Policy of the *Catholic Periodical Index*," by Rev. Paul J. Foik, librarian, St. Edward's University, Austin, Tex.; "Library Training in Catholic Colleges and Universities," by Francis E. Fitzgerald, librarian, St. Thomas College, Scranton, Pa.; "Monastic Libraries," by Capt. E. Cockburn Kyte, librarian, Queen's University, Kingston, Ontario, Canada; "Bibliography of Catholic Authors," by William T. O'Rourke, assistant librarian, Holy Cross College, Worcester, Mass.; "Dissertations in Our Graduate Schools," by Paul R. Byrne, librarian, University of Notre Dame, Notre Dame, Ind.; "The Catholic Library World," by Rev. William M. Stinson, librarian, Boston College, Boston, Mass.; "Why Claudel and Gheon in the College Library?" by Sister M. Miriam, librarian, College Misericordia, Dallas, Pa.

The following officers were elected for the coming year: Chairman, Dr. Francis E. Fitzgerald, librarian, St. Thomas College, Scranton, Pa.; Vice-Chairman, Sister M. Reparata, librarian, Rosary College, River Forest, Ill.; Secretary, Brother Francis H. Ruhlman, librarian, University of Dayton, Dayton, Ohio.

Sloping Shelves

To the Editor of THE LIBRARY JOURNAL:

For a long time libraries have used bookcases for the special display of books in which the shelves are sloping. It seems to me that it would be well to have sloping shelves a general feature of our bookcases. There are a great many people who find it very difficult to read titles of books on the lower shelves, and sloping shelves make it much easier. Many librarians have made the bases of bookcases so high as to give up the bottom shelf. They might find it undesirable to lose a shelf if a sloping shelf were used. Where wooden shelves are used with shelf pins, the slope is secured simply by having the front pins higher than the back ones. One inch difference may be sufficient to secure the desired increase in legibility. If more is wanted, ways of getting between one and two inches will be easy to find. If the bottom shelf is stationary, another shelf may rest on this or be placed at any point above. Metal bookcases vary much from one another; some kinds require no change to secure a slope. Probably the makers could always suggest means of adapting their shelves. In the absence of a back behind the shelves, there may be need of some kind of back stop. One way of meeting this need is to fasten a strip of wood or metal on the back edge of the shelf. The writer would be glad to learn of any librarians who have tried them, and also, inasmuch as he has plenty of time on his hands, to answer any inquiries.

WILLIS K. STETSON,

New Haven Public Library, Connecticut.

District of Columbia Reminiscences

THE ANNUAL MEETING of the District of Columbia, held in connection with a dinner at the Burlington Hotel on the evening of May 28, was attended by 118 members and guests. The first part of the meeting was devoted to the business part of the program, the second part consisted largely of reminiscences of early workers in the association and a so-called Presidential Review. The first speaker was Adelaide R. Hasse, librarian of the Brookings Institution, who was vice-president in 1887 while she was librarian of the Superintendent of Documents' Office. She gave interesting reminiscences of the early days of the association, which was organized in 1894. Other reminiscences of the same period were given in a letter of greeting from Edith E. Clarke, now of Syracuse, N. Y., who was one of the early workers in the association. Following

came the Presidential Review, with George F. Bowerman, librarian of the D. C. Public Library, and Paul Brockett, assistant secretary of the National Academy of Science; William A. Slade, chief of the Bibliography Division, Library of Congress, and Dorsey W. Hyde, Jr., secretary of the Washington Chamber of Commerce, as speakers. Letters or messages of greeting were read from the following past presidents who were unable to attend the dinner: Dr. Cyrus Adler, president of Dropsie College, Philadelphia, and president of the Board of Trustees of the Free Library of Philadelphia; William P. Cutter, assistant librarian, Baker Library, Harvard Graduate School of Business Administration; Dr. William W. Bishop, librarian, University of Michigan; Dr. H. H. B. Meyer, director, Legislative Reference Division, Library of Congress; William J. Hamilton, librarian, Public Library, Gary, Ind.; Dr. Herbert Putnam, Librarian of Congress, and Clara W. Herbert, assistant librarian, Public Library, Washington, D. C. The letters from Dr. Theodore W. Koch, librarian, Northwestern University, Evanston, Ind., and Miles O. Price, librarian, Law Library, Columbia University, New York City, unfortunately were not received until the day after the meeting.

The following officers were elected for the coming year: President, Elizabeth O. Cullen, Bureau of Railway Economics Library; Vice-President, Ralph L. Thompson, Public Library; Secretary, W. Taylor Purdum, Public Library; Assistant Secretary, Edmund A. Freeman, Bureau of Railway Economics Library; Treasurer, Sarah Abbott, Editorial Division, Department of Commerce.

Appreciation of Dr. Koenig Given

AT A dinner meeting of the Maryland, Virginia and District of Columbia Regional Group of Catalogers and Classifiers at the American Association of University Women Club House, Washington, D. C., on April 19, Mr. Miles O. Price, Librarian of the Law Library, Columbia University, gave an interesting address on classification in a law library; Dr. George E. Wire, Librarian of the Worcester County Law Library, Worcester, Mass., spoke of his experience as a law librarian; Mr. Theodore A. Mueller of the Library of Congress gave an address on cataloging theology, and Miss Harriet Pierson of the Library of Congress spoke in appreciation of the work of Dr. Walther Koenig, who recently retired as Assistant Chief of the Catalog Division at the Library of Congress after thirty years' service.

Discusses County Library Law

THE SECOND BIENNIAL CONVENTION of the Idaho State Library Association was held in Boise May 23 and 24. The convention was opened by the president, Miss Marion Orr, Librarian of the Idaho Falls Public Library, and Mr. Morrow, president of the Library Board of Boise, welcomed the members of the association to Boise. The program included a discussion of the County Library Law; a talk on "The Fun and Trials of a County Librarian," by Miss Choate, librarian of the Ontario, Ore., Public Library; "Weeds, How to Recognize and Dispose of Them," by Miss Fraser, librarian of the Twin Falls Public Library; "Work with the Children and Schools," by Miss Barnes, children's librarian of the Boise Library; "The High School Library," by Miss Miller, librarian of the Boise High School, and "The Librarian's Vocational Reading," by Mrs. Bell, librarian of the Caldwell Public Library. An interesting evening session was in charge of Mr. Ayers, president of the Writers' Club of Boise.

The newly elected officers were: President, Miss Jessie Fraser, Twin Falls Public Library; Vice-President, Miss Mary Eagan, Boise Public Library; Secretary-Treasurer, Miss Helen Miller, Boise High School Library.

Rural Schools Discussed

AT THE District of Columbia Library Association meeting on April 9, in the auditorium of the American National Red Cross building, various studies on the problems of rural school libraries, undertaken by the United States Office of Education were described by Miss Edith Lathrop. Miss Lathrop has been appointed by Commissioner of Education Cooper to take charge of such work and, although the studies thus far made have been concerned principally with rural school libraries, certain problems of city elementary school libraries are soon to be investigated.

The work of the A. L. A. Committee on Activities was briefly described by Dr. H. H. B. Meyer, Director, Legislative Reference Division, Library of Congress. Doctor Meyer also made an urgent plea for increased financial support for the A. L. A. As a result, the Association voted to raise each year by voluntary subscription the sum of \$25, which will be given as the annual fee for the D. C. L. A. contributing membership.

Visits were made to the Red Cross Library and museum exhibits during the social hour which followed the formal meeting.

Emily Dickinson Program

LIBRARIANS from all sections of Maryland attended the spring luncheon meeting of the Maryland Library Association, held Wednesday, June 4, at Baltimore. The entire program was devoted to Emily Dickinson, whose centenary is being so widely observed this year. Dr. Carrie Weaver Smith, an authority on the poet, was the first speaker. She exhibited a manuscript copy of one of Miss Dickinson's poems. Madame Martha Dickinson Bianchi, of Amherst, niece of Miss Dickinson, and author of *The Life and Letters of Emily Dickinson*, was the second speaker. She gave a delightful account of her aunt's life and personality. Mme. Bianchi was followed by Dr. Elizabeth Nitchie, professor of English at Goucher College, who closed the meeting with readings from the poet's work.

Albany in 1929

SURVEYING the results of the year's work at the Albany Public Library, one finds that figures show an increased use of the library, even though they fall considerably short of the spectacular 21 per cent increase of the year before. There were 35,915 more books lent than in 1928. The grand total of books borrowed through Harmanus Bleecker, the headquarters, and branches, deposit stations, class room libraries and the library at Memorial Hospital was 639,320. Children's books, including those lent through class room libraries, contribute close to two-fifths of the circulation, and of the books lent to adults a trifle over three-quarters are fiction. In spite of the steady increase apparent for the past few years in the use of so-called class books, or non-fiction, the library still circulates much more fiction proportionately than do other libraries in cities of comparable size which, like Albany, make a definite effort to provide for the serious book needs of their citizens. The use of class books increased faster than the use of fiction in Harmanus Bleecker, Pine Hills and Delaware libraries. Fiction was 76 per cent of the total adult circulation in 1927 at Harmanus Bleecker, in 1928 it was 73 per cent, in the year just ended it has been 71 per cent. Except at Pine Hills Library, the number of children's books borrowed dropped back from the record total made in 1928 when classes from the schools began their systematic visits to the libraries, thereby increasing the juvenile circulation by one-third over the figures of 1927. The use of books in the class room libraries, located in the more remote schools, increased however from 22,145 to 31,021.

In the Library World

New Buildings

THE UNIVERSITY of Tennessee has just broken ground for a new library building of which the first unit will be erected this year. Plans are so drawn that additions can be made on all sides in the future and yet present an attractive appearance during the process. The present unit will cost approximately \$300,000. The style is modified Gothic to harmonize with other new buildings on the campus. It will be constructed of concrete with brick facing and stone trimmings. Contract for the stacks has been let in the Snead Company. The present structure will house about 175,000 volumes. The building has been designed by Barber and McMurry, local architects, with Grant C. Miller as consultant.

THE JOHN W. COLE Memorial, an addition to the Watertown Free Public Library, New York, was dedicated on May 15, 1930.

THE Wolffsohn Library, new building of the Jewish University on Mount Scopus, Jerusalem, was recently dedicated.

THE new Lehigh University Library, Bethlehem, Pa., was dedicated April 25, 1930, fourteen months after the laying of the cornerstone. The possibilities of the future expansion of the library have been anticipated so that the capacity of the building may be doubled or even trebled at an expense smaller than that entailed in the present construction. The panelling in the reading room and in the treasure room is one of the most distinctive features of the new building. The work, done in solid oak, carries out the Gothic period in which the entire building is designed.

THE QUEENS BOROUGH Public Library announces the opening of five new branches by Sept. 2, the libraries to be installed in rented quarters pending the development of book circulation sufficient to warrant permanent building. The libraries will be located as follows: Little Neck, 251-05 Northern Boulevard; Locust Manor, 116-12 Merrick Road; Auburndale, 199-10 Thirty-second Avenue; Broadway, Flushing, Twenty-second Street and Northern Boulevard; Thompson Hill-Sunnyside, 45-12 Queens Boulevard.

THE THOMAS SCOTT BUCKHAM Memorial Library, Faribault, Minn., was dedicated July 20, 1930.

THE NEW BUILDING of the Waban Branch of the Newton Free Library, Mass., was dedicated on May 2. This building, with grounds, was the gift of the citizens of Waban to the city of Newton. Nearly \$63,000 was raised in subscriptions for building and equipment. An acre of land in the center of the village was donated by citizens who were holding this property for public use.

This is the fourth branch building given by citizens to the Newton Free Library within the last four years, the others being at West Newton, Auburndale, and Newton Centre. The total amount thus far raised by subscription for branch library purposes is well over a quarter-million dollars. Five of the nine branches of the Newton system are now housed in independent buildings.

MELLON INSTITUTE of Industrial Research, Pittsburgh, Pa., announces plans for a new building which will give more commodious quarters to the library. The present library contains 11,000 volumes; the new library is planned to accommodate 250,000 volumes.

THE PRIME MINISTER of England dedicated the new Reference Library at Manchester on May 6, 1930.

Home Library Contest Winners

THE AMERICAN home library is not a thing of the past, but is very much alive today, according to the entries in the contest sponsored by the General Federation of Women's Clubs and the National Association of Book Publishers this last spring. Prizes were offered for the most attractive photograph of the family library in an average American home, accompanied by an essay on "The Home Library—How to Build It and Use It." Awards have recently been made to Mrs. Zoa G. Hawley, member of the Superior Garden Club, Wisconsin, who received the first prize, \$75; Mrs. J. F. Llewellyn, Mexico Woman's Club, Missouri, second prize, \$50; and Mrs. Clarence Pease, Quakertown Woman's Club, Pennsylvania, third prize, \$25. All the entries stressed the importance of a regular allowance for book-buying in the family budget, and Mrs. Hawley, in the first prize essay, mentions the fact that the librarian of the local public library is a great help in selecting books for a home library.

New Corridor Lighting Device

THE FIRST installation of the new corridor lighting device designed and perfected by Sneed & Company, Jersey City, has just been completed for the new Sterling Memorial Library, Yale University. Over 4000 lights were installed—the biggest single bookstack lighting installation in the world. Installations are being made also at the Engineering Foundation Library (New York), Cornell, University of Rochester, University of Lyons (France), and International Institute of Private Law (Rome). The new reflector was designed in the laboratories of Sneed & Company especially for library bookstack corridors after tests had been made of some thirty different types of reflectors, according to Angus S. MacDonald, president. The principle upon which the reflector was built is based on control of light by means of a perforated reflecting surface, the amount of light passing through being regulated by the size and position of the perforations, and the rest reflected by a white vitreous enamel inside surface to distant books. A light baffle along the axis of the aisle protects the eyes from glare and has the effect of softening the illumination. It was found that when the reflectors were spaced 6 to 7½ ft. apart, the rays from one properly overlap those from the other and the shadow of the baffle does not strike the books. Reflector and receptacle were worked out together so as to obtain the maximum amount of headroom. Steel was selected as the material on account of its durability, and the shape was developed to properly direct the light rays at the same time, to prevent loss of efficiency through accumulation of dust.

A Clever Scheme!

CHARLOTTE, N. C., used a clever scheme for story hours in the Children's Department last year. The children's librarian used the idea of Granny's Wonderful Chair, having a large comfortable chair placed before a curtain behind which was seated the story-teller; the original idea being to have a chair sufficiently large to allow the person to sit under it, concealed by old-fashioned drapes. The idea proved quite entertaining and successful for the children, still unaware of the truth and still interested, have asked this summer if the chair will be there again. Many curious questions have been asked about the chair for, though they knew the chair itself was not talking, they could not quite figure it out and wondered if it were a radio or talking machine.

Book Review Club of Greater Boston

(List XXIV, June, 1930)

RECENT FICTION

- Boyd, James. *Long Hunt*. Scribner, \$2.50.
A story of the wilderness of the South about 1800. For adult readers only. Should be read before buying.
- Buck, Pearl S. *East Wind: West Wind*. John Day, \$2.50.
Charming story of a young Chinese woman of old traditions married to a "modern" Chinese. Told in the first person.
- Ferber, Edna. *Cimarron*. Doubleday, \$2.50.
Novel of frontier life in Oklahoma, with picturesque characters against a vividly-drawn background of life in the thrilling days of the early West. Very interesting.
- Gibbs, A. Hamilton. *Chances*. Doubleday, \$2.50.
Story of brotherly love between two English boys in a French Catholic boarding school, and, later, of their love for the same girl.
- Green, Anne. *The Selbys*. Dutton, \$2.50.
Tale of two delightful middle-aged people in Paris; and of their visiting niece from Savannah. Full of wit and humor.
- Kelland, Clarence B. *Hard Money*. Harper, \$2.
A story of New York banking and business, just before and after the War of 1812. Well-drawn characters, interesting plot, fine historical background.
- King-Hall, Magdalen. *Well-Meaning Young Man*.
A gay, amusing story of irresponsible modern youth.
- Larrimore, Lida. *Mulberry Square*. Macrae, \$2.
A refreshing love story, light and restful, in what was once a fashionable section of a small Delaware town.
- Oppenheim, E. Phillips. *What Happened to Forester*. Little, \$2.
A series of episodes in the life of Major Forester.
- Suckow, Ruth. *The Kramer Girls*. Knopf, \$2.50.
Lives of three sisters in a small town, bound closer by the invalidism of the mother and the indifference of the father. The characters are well portrayed, but the story is not as interesting as others by the same author.
- Tupper, Tristram. *A Storm at the Crossroads*. Lippincott, \$2.50.
Short stories, beautifully written. Each as perfect as a jewel.

Clarksdale, Mississippi, Carnegie Library

IN 1913 advantage was taken of the offer to have a library building by gift of Andrew Carnegie, and in 1914 the library was opened with a few purchases, many donations, and under the supervision of a local person. In 1915 the Board of Trustees engaged a librarian, who has been with the library since that date. From the opening of the library the county residents were allowed the same privileges as those of the town, partly because the plantation owners also owned property in town and also in order to secure the interest of the county citizens. Through the schools the extension service of the library was conducted for several years until the demand so far exceeded the funds available that a special law was passed in the legislature allowing Coahoma County to appropriate money for the support of the library. Soon a book wagon was put into service, this being in July, 1923, and since that time the stations have grown from schools to farmhouses, garages, churches, and any place where possible to place books. There are now thirty-three stations.

In 1929 it became apparent to all the library had outgrown its quarters and a bond issue of \$30,000 was voted. In August work began and the building remodeled and equipped, the last workman departing in February. By this bond issue the building was enlarged to a bit over twice its original size, and the patrons and employees have been greatly benefited by this increased space and accommodations. In this year, 1929, the Rosenwald Fund became interested in the work being done in the county, and plans for getting aid were put under way. For the ensuing five years the Rosenwald Fund will aid to the extent of approximately \$18,000.

Since the early years the library has made an effort to supply the negroes of the town and county with reading matter. Being a county of population of over forty thousand and approximately two-thirds of the negro race, it was a task almost impossible for some time. Gradually the books were increased for school service, many later on were placed in homes of the negroes, these being used as stations. Soon outgrowing this means of service, plans for the erection of a branch library were entered into, and in 1929, early in the year, a start was made. The librarian met with the leaders of the negroes, and the negroes agreed to raise a thousand dollars as a testimony of

their interest and desire to have a branch. The county and city authorities agreed to aid in the erection and upkeep of a branch. In three weeks, late in the fall of 1929, the negroes raised \$1,100, and in February, 1930, contract was let for the erection of a brick veneer building. On May 4, 1930, the dedication was held, this program being given over entirely to the negroes. On the following day the branch was opened with over 1800 books on the shelves, and a circulation of over 100 books a day has been the record so far. Another branch was opened earlier in the year in the Colored Agricultural High School. This serves as a clearing-house for the county schools for negroes, as the teachers meet once each month and take with them books for the schools. There are over 1600 books there at present.

There are some 37,000 books in the main library, and with the branches 40,000 volumes or more will make the total. The circulation ranges to 100,000 and more, the branches not included, as they are just opened.

One feature of the main library has proved especially popular with the men of the community who had hitherto gone to clubs for their reading. A smoking room was set aside, and the relaxation and feeling of being "at home" has increased.

Do You Want a Position?

We have many good Library positions all over the United States. All branches of work. Write us for complete information.

Do You Need a Librarian?

Tell us your needs. We can supply the person you require for any place on your Library staff. Service free to employers.

School Library News

A School for School Librarians

GEORGE PEABODY COLLEGE for Teachers, Nashville, Tenn., announces an appropriation of \$80,000 from the General Education Board, the money to be expended over a three-year period for the development of a school for school librarians. Many more high school librarians are needed in the Southern section in accordance with the standards of the Association of Colleges and Secondary Schools of the Southern States. Miss Lucile Fargo, author of the A. L. A. Library Curriculum Study, entitled *The Library in the School*, has been offered the position of associate director of the library school at Peabody College, and has accepted. The curriculum will be developed in close cooperation with the Board of Education for Librarianship. Jackson Towne, who acted as consultant in library service to the Julius Rosenwald Fund in its county library program from October, 1929, to June, 1930, will continue as librarian and director of the library school at Peabody College.

An Open Letter to School Librarians

THOSE OF US, so few unfortunately, from out-of-the-State who attended the Los Angeles Conference are carrying away rich memories of helpful talks and of a gracious hospitality. This hospitality was expressed through a carefully worked out organization and unfailing individual courtesy, an organization that made possible the caring for scores of visitors to school libraries in spite of those busy closing days before vacation, the setting up of an exhibit both attractive and practical in suggestion, and a three-period-a-day manning of this booth, which was visited by hundreds of school librarians.

The dinner for three hundred at the Beverly Hills Hotel, the annual meeting of the California School Library Association, to which the out-of-the-State school librarians were most generously invited, will never be forgotten by the fortunate guests who attended. The charm of its setting, the beauty of decoration, the delightful and varied program following the delicious dinner all contributed to a dignity and a distinction never hitherto attained at any similar Section gathering.

The school librarians are growing fast numerically. There are individual organizations of much strength in various parts of our coun-

try. The group as a whole needs the contributions that each has to make. Perhaps some channel may be devised by which information of our neighbors and more distant friends may be obtained regularly. Perhaps, too, we may be thinking along the line of some even more inclusive grouping of all librarians who, irrespective of the type of library, are working with children, and of those who are working with young people. Perhaps someone will point the way.

We bear away vivid memories of the jacarandas, the acacias, the eucalyptus, of Bullock's Wilshire, and of the warm friendliness of our California hosts, not less glowing than their sunny skies.

ANNIE S. CUTTER.

Library Interest Shown

EVIDENCE of the growing interest in library activity on the part of school officials is shown in the following resolution adopted by the Representative Assembly of the National Education Association, July 3, at Columbus, Ohio:

"The National Education Association believes that free public library service should be as general as free school service, and urges adequate legislation and appropriations for the extension of library opportunities."

Filing Biographies

IN A HIGH SCHOOL library there is an ever-present demand for biographical material that is not always to be found in the usual reference books. To meet this demand the Lincoln (Neb.) High School Library has arranged a biography section in its vertical file. The biographies have been found in various places. Publishers' leaflets, book jackets, newspaper clippings, magazine articles, and especially *The Wilson Bulletin*, have provided material. The articles are mounted on sheets of cardboard 8½ by 11 in. The name of the person written about is placed in the upper right-hand corner, and the cards are arranged alphabetically. At present one guide card for each letter of the alphabet is used, but the collection of biographies is growing so large that more guide cards must be added to separate them. A great deal of the work of finding biographies and mounting them was done by an English class which was making a study of modern authors. The library furnished the material and the class, under the direction of the teacher, prepared them for use.

Among Librarians

FAITH ALLEN, assistant supervisor of Staff Instruction, and Cecile Lynch, children's librarian, in the Brooklyn Public Library, have for the past two months been cataloging and organizing the Payne Memorial Free Library of 4600 books at Willsboro, Essex County, N. Y. The library was opened officially Aug. 1.

THELMA BABER succeeds Ruby Babcock as librarian of the George Smith Library of Junction City, Kan. Miss Babcock was married to George P. Johnson, of Washington, D. C., on June 27.

CHARLES F. BELDEN, director of the Boston Public Library, was awarded an honorary doctorate of letters at the Boston University commencement exercises.

WILLIAM H. BREWER, JR., Pratt '29, reference librarian of the University of New Hampshire Library, has been appointed to the librarianship of the Exeter Public Library, New Hampshire.

NINA ELIZA BROWNE was awarded the degree of Doctor of Literature at the recent 52nd Commencement of Smith College.

SENORITA MARIA TERESA CHAVEZ, librarian of the Cervantes Library in Mexico City, has received a fellowship from the Carnegie Endowment for International Peace through the A. L. A. for a year of work in an American library school. She has made application for admission to Pratt Institute School of Library Science, and will hold a substitute position for a month or two in the Detroit Public Library before entering Pratt in the fall.

MAHALA CLEMENT succeeds Rebecca D. Kiner as librarian of the Morrill Free Public Library of Hiawatha, Kan.

VERA E. FELLOWS, Simmons '28, has accepted a position on the recataloging staff of the Massachusetts State Library.

ELEANORE FLYNN, Allston, Mass., who received the E. P. Dutton Fellowship, given by John Macrae, Jr., of Dutton, Inc., through the Committee on Library Work with Children, plans to specialize in library work with children at Columbia University. Miss Flynn's library experience has been obtained in the public libraries of Lynn, Mass., New York, N. Y., and Somerville, Mass.

ELIZABETH C. HALL, Columbia '28, resigned on April 1 as acting children's librarian of the Riverside Branch of the New York Public Library to become librarian of the Horticultural Society of New York, 598 Madison Avenue, New York City.

JANIE HENDERSON, Pratt '26, formerly librarian of Lazard Frères in New York, has been appointed librarian of the Investment Division of the Sun Life Assurance Company of Montreal.

JESSICA HOPKINS, librarian-elect of the Carnegie Library of Atlanta and lecturer in the Atlanta Library School, has received the degree of Litt. D. from the University of Georgia.

MRS. GLADYS Y. LESLIE, N. Y. P. L. '29, has resigned as supervisor of training in the New York Public Library, taking effect July 1. Mrs. Leslie will sail in July for an extended stay in England.

ELSIE LIPPINCOTT, librarian of the Field Museum of Natural History, Chicago, after thirty-three years of service, has resigned because of ill health. Mrs. Emily W. Wilcoxson, assistant librarian, has been appointed librarian to succeed Miss Lippincott.

MILTON E. LORD, who has recently retired from the position of librarian of the American Academy in Rome, has accepted the position of librarian of the University of Iowa, at Iowa City.

LENA B. NOFCIER, Illinois '28, librarian of Asbury College, Wilmore, Ky., has succeeded Fannie C. Rawson as secretary of the Kentucky Library Commission.

ANNA G. ROCKWELL, a pioneer in modern library service and for twenty-seven years librarian of the New Britain Institute, Connecticut, died June 19.

MAHLON SCHNACKE, N. Y. S. '25, of the classification and subject heading section of the Preparation Division, New York Public Library, has resigned to accept an appointment as assistant librarian of Brown University. His position will be filled by John Russell of the University of Michigan Library.

MARION SMALL, Simmons '14, has resigned from her position in the New York Public Library, where she has been in charge of the Serial Section of the Preparation Division since 1921. She plans to spend a year in Europe.

JEAN K. TAYLOR, Albany '25, has been appointed reference consultant in the Queens Borough Public Library.

WYLLIS E. WRIGHT, classifier in the Reference Department of the New York Public Library, has resigned to accept the post of librarian of the American Academy in Rome. The appointment is for three years and takes effect in September, at the beginning of the new school year.

Opportunities

This column is open to librarians

Wanted—Assistant for Adult Department. Training or at least one year's public library experience necessary. G-12.

Wanted—Cataloger for two or three months to revise collection in small public library in Middle West. G-13.

College and library school graduate, with good experience in college teaching and six years' experience in college libraries, seeks position in a college or large public library. Available Sept. 1 as Head, Associate, Head of Reference or Circulation. G-16.

University graduate, young woman, some library training, five years' good experience, desires library position in or near New York City. G-17.

Position in children's department, preferably as assistant in large system, wanted by college and library school graduate. Four years' experience. G-18.

Experienced cataloger in a college library desires change of position Sept. 1. G-20.

Library position wanted by college graduate with one year college library and two years' junior high school experience. Public library work near Michigan preferred but not essential. Available at any time. G-21.

Librarian, now in charge of a summer library, would like engagement after Oct. 1. References. G-22.

Position wanted by young woman with library school training and three years' experience in public library. G-10.

University graduate with library and secretarial training desires position in public, college or business library. Some experience in college library. G-11.

A college and library school graduate, with one year's experience in special library work, desires a position in a public or college library. Reference work preferred. G-15.

Wanted

WANTED—By Library of the College of the City of New York the following numbers of *THE LIBRARY JOURNAL*: v. 1-3, 1876-78; v. 29, no. 6, June 1904; v. 30, no. 9, Sept., 1905; v. 33, no. 8, Aug., 1908; v. 46, no. 2, Jan. 15, 1921; Indexes for v. 32 and 33, 1907-08.

MUSEUM OF SCIENCE AND INDUSTRY LIBRARY, 300 W. Adams St., Chicago, Ill., desires:

Airway Age, January and April, 1929.

American Lumberman, Oct. 26, 1929.

Chemical and Metallurgical Engineering, September, 1929.

Coal Age, March, 1929.

Nature, Jan. 5, 19, 26, 1929.

Jour. of the Royal Aeronautical Society, January, February, 1929.

Society of Automotive Engineers, July, 1929.

For Sale

THE MAMARONECK FREE LIBRARY, Mamaroneck, N. Y., offers for sale the complete set of *A Record of European Armour and Arms Through Seven Centuries*, by Sir Guy Francis Laking, together with *A Record of Armour Sales, 1881-1924*, by F. H. Cripps-Day. The list price of the six volumes is £15-15-0; we are offering the same for \$57.50.

PRINCETON University Library has for sale *Anti-Jacobin Review*, Vols. 1-57, 1798-1820, bound, \$100.

Wanted

THE LIBRARIAN of the Public Library, city of Auckland, New Zealand, is anxious to secure a copy of Linderfelt's *Eclectic Card Catalog Rules*, published by the Library Bureau in 1890. If any library having a copy would like to sell it, please communicate with Miss Emily Miller, A. L. A. headquarters.

The Calendar

- Sept. 10-12—Maine Library Association, annual meeting at Bar Harbor.
- Oct. 1-2—Connecticut Library Association, annual meeting at New London, Conn.
- Oct. 2-4—Colorado Library Association, annual meeting at Denver, Colo.
- Oct. 7-9—Missouri Library Association, annual meeting at Sedalia, Mo.
- Oct. 8-10—Michigan Library Association meeting at Marquette, Mich.
- Oct. 9-10—Kentucky Library Association, annual meeting at Paducah, Ky.
- Oct. 13-18—New York Library Association, annual meeting at Albany, N. Y., in connection with Convocation of the University of the State of New York.
- Oct. 14-17—North Central Library Conference, including Minnesota, Wisconsin, Iowa, Nebraska, North and South Dakota, will be held in St. Paul, Minn.
- Oct. 15-18—Illinois Library Association, annual meeting at Moline, Ill.
- Oct. 15-17—Ohio and Indiana Library Associations, annual meeting (joint session) at Dayton, Ohio.
- Oct. 20-22—Montana Library Association, annual meeting in Billings.
- Oct. 21-24—Pennsylvania Library Association, annual meeting at Galen Hall Hotel, Wernersville, Pa.
- Oct. 22-24—Kansas Library Association, annual meeting at Salina, Kan.
- Oct. 29-Nov. 1—Southwestern Library Association meeting at Dallas, Tex.
- Nov. 6-7—New Mexico Library Association, annual meeting at Albuquerque, N. M.
- Nov. 10—Arizona State Library Association, annual meeting at Phoenix, Ariz.
- Nov. 20-23—Negro Library Conference and Dedication of new Library, Fisk University, Nashville, Tenn.
- Nov. 21—Illinois High School Library Association meets as Section of High School conference at Urbana, Ill.

Ten Books on Business (On the basis of Cognate Reading)

Selected by William F. Moriarty

School of Business Administration, University of Southern California, Los Angeles

1. Bogart—*Economic History of the United States* (Longmans).
2. Buckley—*Marketing by Mail* (A. C. Forbes).
3. Burt—*Psychology and Industrial Efficiency* (D. Appleton).
4. Cooley—*Human Nature and the Social Order, and Social Organization* (Scribners).
5. Dewing—*Financial Policy of Corporations*. (Ronald).
6. Kleppner—*Advertising Procedure* (Prentice Hall).
7. Lyon—*Hand-to-Mouth Buying* (Brookings Institution).
8. *Marketing*—Anyone of three:
Clark (Macmillan), Converse (Prentice-Hall), Maynard (Ronald).
9. Mazur—*This American Prosperity* (Viking).
10. Nystrom—*Economics of Fashion* (Ronald).
Store Operation—Vol. II of *Economics of Retailing* (Ronald).

IF THEY WOULD ONLY READ THEM— IN ECONOMICS

1. The last 125 pages of Taylor's *Principles of Economics* (Ronald).
2. Gide and Rist—*History of Economic Doctrines* (D. C. Heath).
3. Fetter—*Economics* (Century Co.).
4. Moriarty—*Economics for Citizenship* (Longmans).
Just about the level of a business man's mind, and enough fundamentals for a background of straight thinking.
5. Nystrom—*Economic Principles of Consumption* (Ronald).
6. Seager—*Principles of Economics* (Holt).

IF THEY WOULD ONLY READ THEM—FUNDAMENTAL PRINCIPLES IN ALL FIELDS

1. Lewes, Geo. Henry—*Principles of Success in Literature* (Allyn).
2. Spencer, Herbert—*The Principles of Economy*.
3. Ruskin, John—*Seven Lamps of Architecture* (cut out the architecture) (Crowell).
4. Stevenson, Robt. Louis—*Fables* (Longmans).

Presented before Business Libraries Section of Los Angeles Conference, June 23, 1930.

SILENT AND DURABLE

A Heavy-Duty Book Truck of strongest type of construction, equipped with 5 in. rubber tired Colson casters, two rigid and two swivel, ball bearing both in rotation and swivel. This mounting insures great strength and absolute silence in operation.

The vertical partition running lengthwise between the two lower shelves prevents books from slipping thru when placed on the bottom shelf. The 12¼ inches of space between shelves gives ample room.

This truck is manufactured of quartered white oak in attractive light or dark oak finish, and of birch with mahogany finish.

Dimensions — Length 40 in., Height 42 in., Width 16 in.

Who's Who in America

FOR 1930-1931 (Vol. 16)

EDITED BY ALBERT NELSON MARQUIS

THIS new volume contains concise up-to-date biographical sketches of 29,704 of the most notable LIVING Americans—Men and Women—in all parts of the world.

It includes, as nearly as possible, sketches of all LIVING Americans whose position, activities or achievements make them of general interest, telling just the things every intelligent person wants to know about those who are most conspicuous in every reputable walk of life.

Every sketch has been carefully revised, and brought down to date. There is scarcely a sketch in the book which has not been altered or amended in one or more particulars. Removals have been noted, deaths recorded, and 3,500 entirely new sketches have been added.

The 16th Biennial Edition

The first edition of *Who's Who in America* was issued in 1899—over 30 years ago. A new edition has been issued every two years since that time. Today "*Who's Who*" is recognized the world over as the standard Biographical Reference book of the United States.

*Full cloth, 2,620 pages, price \$8.75***THE A. N. MARQUIS COMPANY, Publishers**

New Library Bindery in Brooklyn

To give better service to many Public Libraries in New York City and vicinity, hitherto served by our West Springfield and Philadelphia Binderies, we shall open before September first.

New York Branch at No. 1 Junius Street, Brooklyn.

This bindery will be under the supervision of Mrs. K. E. Barry, assisted by an adequate staff familiar with the fine workmanship, special binding methods, and dependable service which all our branches have been privileged to offer to Public Libraries.

Modern machinery and equipment are now being installed in the new bindery, and we shall be able to give prompt attention to orders for re-binding used books and magazines, and also for new books in our various styles of binding.

Forthcoming Issues of THE LIBRARY JOURNAL

✱ Among the interesting articles scheduled for the September 15 special number on schools is that of "A Day in a School Library" by Charlotte S. Houston, librarian of the Montreal High School, and "The Story of a School Library" by Maud Minster, librarian of the Senior High School Library in Altoona, Pa. There will also be given an index to the material on libraries, books, and reading in some of the most recent readers compiled by Elizabeth O. Williams of the Los Angeles, Cal., City School Library, and the tabulated list of children's books which received the vote of twenty-one of the leading children's librarians of the country as the best books published in the year 1929. This promises to be an unusually good number!

✱ This year the special number for Children's Book Week will be issued October 1 in order that suggestions for celebrating the week in and out of the library may be gleaned from the articles, illustrations, and suggestions offered.

✱ One contribution to look forward to in the October 15 issue will be a list of the thirty or more most useful popular health books which ought to be in the average public library, prepared by Dr. R. S. Patterson and Dr. James A. Tobey especially for The Library Journal.

The Book Bus in the Arrowhead

By Ada Florence Fitch

Extension Librarian, Hibbing Public Library, Minnesota

INTO A COUNTRY of pine, fragrant balsam, spruce, where the birch gleams white, brown and green, the maple flaming its bright new leaves and flaunting its scarlet in the fall against its varied neighbors of this northland the Hibbing Public Library Bus has made its daily trips for more than ten years. A land of many lakes, still retaining much of its wild beauty. Charlotte H.

Clark, first librarian of the Bus, wrote: "I am assured forever it is the only country in the whole world." In this enthusiastic way she visited homes of foreign-speaking people of the mining locations. Inviting them in pantomime, and with the word books in their own tongue, to visit the wagon; making a house-to-house canvass; showing her interest in them, they were too courteous to refuse—they go with her to the wagon. Once there, the appeal of the books in their own language holds them. With the spirit of adventure and love of it all she caught and held the interest of the people of the locations, mining and construction camps, and it was through the human touch of Miss Clark that this work was established, and grew. There are now no mining and construction camps with their boarding houses, mining conditions have changed, and the Book Bus has become so well known in the community that everyone in all locations and rural routes knows its horn and gong.

The original suggestion for the Bus came

from Miss Dorothy Hurlbert, Hibbing Librarian. The vicinity of Hibbing has many little communities of miners, a score or more of different languages is spoken. The day came when the extension work, carried jointly by the Hibbing Public Library and the township by means of stations with volunteer service, was taken over by the Book Wagon; a White, four-cylinder bus, purchased by the Town of Stuntz, and the librarian, assistant and driver paid by them. Books were provided for in the regular budget of the Hibbing Library. Carrying at all times an extensive collection of books in Croatian, Serbian, Finnish, Slovenian, Slovakian, Italian, Swedish and Norwegian, each book has its own designation and is shelved accordingly.

The Hibbing Book Bus Gives Adequate Service Even at 40° Below Zero

Various nationalities make their own selections, those who read English taking both—or taking English for other members of the family. The collections of foreign books vary within themselves—fiction, of course, also history, travel, poetry, plays, funny stories, cook books, science, practical books—including dictionary, grammar and *Bible* in each collection. It has been found good practice to have some parallel editions in simple form in each collection; a book or two on Americanization, or some very easy books in English. Miss Hurlbert tells how, being unable to select and purchase an adequate collection of Serbian books, she wrote to the U. S. Secretary of State, who passed the letter to

the Serbian Consul where the request was carried to Serbia and the selection made by the University of Belgrade.

A janitress at the library, picking up some books fallen from the shelf, noticed the English version of Kivi's *Seven Brothers*. She was excited, for she had read this in Finnish in Finland and was delighted to learn the library also had it in Finn. When the *Song of the Blood Red Flower*, by Johannes Linnankoski, was given in the movies there were Finns here who had witnessed these very scenes overseas in their own northland, and there was a wild demand for both the Finn and English versions of this story. At one of the Little Italys, with its fringe of other nationalities, Dominica boarded the bus

with her Christmas gift on her arm, still wrapped in swaddling clothes, a veritable Bambino, and the librarian held the baby while this woman, interested in having her children learn Italian, selected from *The Booklist* a number of children's books in Italian. These have been purchased by the library.

A librarian coming to Hibbing from the hills of West Virginia and Southern Indiana, a State where the book wagon with outside shelving flourishes, wondered how adequate service could be given with any measure of comfort where the winters register 20 deg. to 40 deg. below. But this library on wheels is all within doors cozily warm from a small coal burner. Adult books on right, junior collection on the left, magazine racks on both sides in the rear, where there is also a leather upholstered seat; a seat for the assistant by the driver, librarian's seat and miniature desk just back of this.

At least four months of the year the Book Bus travels snowy roads, following the wake of the snowplow. There is so much pavement, and long stretches of well-graveled country road, it is only spring thaws that make any really bad roads. The truck weighs, with its load of books and three people, well over five tons. It is 15¼ feet long by 6½ feet wide, and 6 feet and a few inches high. In height it accommodates everyone except a couple of "Lindy's," one at Mitchell, another at Mahoning, who have to dodge the small

overhead lights. It easily accommodates a score of patrons, though often on Thursday night runs there are twenty-five or more; the more there are the more they seem to enjoy it, passing books from one to another, gabbling in several languages, as they scramble over those who are kneeling for the lower shelves. Each day the Bus takes on new books and periodicals and special requests and carries 1600 books to supply eleven schools, ten rural communities and sixteen mining locations. It is laid off during

August for a general overhauling while the staff is vacationing.

Monday's schedule: 1 P. M. Carson Lake, Harold—four stops, remaining in Carson Lake near the school until the last school bus has arrived from Hibbing.

Here is sent a

group selected for the principal of the school, on early history; a little later another group on the crusades; for another teacher good stories for primary reading, another grade specific things on the history of lighting, both indoor and out, transportation in air, on water and land. The Bus carries almost sixty periodicals—mechanical, outdoor and women's magazines.

Monday night: 6:30 to 9:00 in winter, returning earlier in summer. At Webb they are eager for late fiction, Western and mystery stories; the Seaman's are most in demand. At Morris there must always be outdoor magazines, travel books, all the Halliburtons including *New Worlds to Conquer*, magazines, and World War stories for the head of the house.

Tuesday: 9-11 A. M. Visit to the Pool School—two rooms—first and second grades. The pupils of one room rush to the Bus, followed by the teacher, who helps to fit them out with easy reading books—a novel or two and several periodicals for herself. One Tuesday in three weeks in the afternoon the Wagon goes south on Star Route, where they carry their books in baskets—one family will often take two dozen at a time. At two of these stops music periodicals are in demand. Mitchell School next, here they besiege the Bus by the time it stops. There is no small group that demands as great variety. Then to Kitzville, largely Italian and Slovenian. Stop is made

One Family's Supply of Books for Three Weeks in Hibbing, Minnesota

here until after school busses arrive. Then to Albany—on alternate weeks—almost all French who take armloads of English books. Then again to Mitchell.

Wednesday: Half day for work in the library.

Thursday afternoon: Three locations, Mahoning, making six stops, including a two-room school, waiting here for busses bringing high school students. Utica next. Many of the children get books for their parents, big brothers and sisters. Then Kerr, where the auburn-haired "twins" get loads of magazines for mother, always watching for any new stories for girls, and occasionally a book in French. After the school bus has come the trip is concluded by going to the Great Northern Power Plant, returning about 5 in winter, or 4:30 in warm weather. Evening: 6-9 in winter, 6-8 when warmer. Another mining location, Stevenson, one section Italian, another Finnish.

Friday: Three distinct country all-day trips, each in a different direction, which vary

from sixteen to twenty-three miles out, stopping both at farm homes and schools and including many more homes in summer as the pupils in winter take books not only for themselves but the rest of the family.

Saturday, 9-12:30 or later. Nelson—Slovenian community. Kelly Lake. A regular, a man who has lost his left hand, lives in an auto home of his own—a square collapsible tent mounted on the truck, which has within it every convenience—and a radio. He works for one of the mining companies for the six or seven months, then for southern lands with its fishing and hunting. Leetonia—Finnish and Croatian—with Louis Stone, "who has read everything"—but must be supplied with new books for boys. Morton—Croatian—a location with more boy patrons than any other.

The work has a charm all its own. One may come in dead tired, dirty, late for dinner, but what matter, if the day has been a happy one, if not, tomorrow is another day. Its informality opens a long, wide road of opportunity.

Yes! We Have a Library!

By Ruth Underwood

Librarian, Harris County Public Library, Houston, Texas

"**Y**ES! We have gas! Yes! We have lights! Yes! We have a LIBRARY!" reads the advertisement of a Texan real estate company. This real estate company is developing the Garden Villas Community, a suburb of Houston, outside of the city limits, and therefore within the service range of the Harris County Public Library. As an inducement to purchase property and build a home in Garden Villas the development company has turned its field office into a library, built shelves, furnished a reading table, comfortable chairs, librarian's desk, and monthly salary for their custodian.

That extension work lacks monotony is rapidly becoming a proverb among the librarians actively engaged in it. The envious question of, "Are you going out into the county today?" is a frequent one from an envious worker in another department of the Court House. Our boxes of books, lunches, thermos bottles, and dark glasses quickly mark us as travelers. Our car is parked on any one of the four streets around the court house square, where we have been able to find a parking space. The janitor loads it for a day's trip. The trips vary. Many are long ones, with stops at six, eight or even ten library stations, for Harris County, with its 1654 square miles, is

large. Our longest trip takes us forty miles to the county line, and visits to libraries off the main highway often makes our mileage for the day's trip 100 or 125 miles. Other trips are for a full or half day at a library that, perhaps, has a new custodian, or needs general changes in the bulk of its book collection. Each of our seventy-two stations is visited at least once every six weeks by the county librarian or an assistant. The visit is for the purpose of change of books and general supervision. These the county library furnishes. The community furnishes housing space and custodian. And what a vast field the phrase "General supervision" covers in county library work! It means, of course, intelligent work with the book collection. But it means so very much more. As a county librarian I have shelflisted, packed books, learned much about the mechanics of an automobile. I was taught the first principles of tire changing on a cross road that I had taken in preference to the well-traveled highway. I chauffeur daily. I have painted signs, washed windows in a country store where we had an exhibit of farm books, walked through acres and acres of cotton on a July day to learn that our custodian was in town that day since it was not "library day" and I had not written her I was coming.

Each library station that we have established is different, in needs and problems, and therein lies the secret of the joy in county library work. To those who know rural life and rural communities this difference is easily understood. To those who lack this understanding it must seem odd that we have no pattern cut for them all. The stations range anywhere from an isolated one-teacher school that gathers its pupils from surrounding farms so far away that they can scarcely be seen from the schoolhouse, to large towns that boast of a modern, brick library building, the gift of a wealthy citizen. In between the extreme types are libraries in homes, stores, post offices, city halls, schools and lodge buildings. Locations that will become community library centers are preferred to school stations, and are arranged whenever the school conditions are such that the library need not be housed there. The reason being that school people will use a community library, but the people of the average community will not use a school library.

When the library stations are housed in schools, collections of books are taken to meet the immediate need of the school; they range from fifty to seventy-five books in the smaller schools to as many as several hundred in the larger ones. In direct proportion do our facilities for circulating books vary. In the very small schools we use an open shelf. If the school owns a bookcase we are always given one or two shelves in it for our library books. Fortunately, the boxes, in which we carry our books, may serve as a stool to sit on and desk to work on, and often our equipment consists of nothing more. Many of the larger schools have found it worth while to arrange separate library rooms, nicely furnished, and books are circulated daily or weekly, according to the needs of the individual station.

Community library stations vary in the same manner as those located in schools. If the community is large enough we make every effort to secure at least a separate room for the library and work toward a library build-

ing. Our rural communities are building city halls, court houses and other public buildings, and if the physical conditions of the library are not satisfactory a room is included in the original plans. This assures us of comfortable library centers, accessible, and maintained at minimum cost. Five communities in Harris County have their own library buildings. One is the work of a library association that lived and almost died before the Harris County Public Library was organized. This gave us an

A Book Exhibit in a Small Town Furniture Store in Houston, Texas

excellent foothold in that small community. The largest and most pretentious library building we have to work with was the gift of a wealthy philanthropist to an industrial town thirty-five miles from Houston. One is the gift of a real estate company. Two were built by patrons within their communities from sheer

determination to improve the physical conditions under which their library station was working. In one of these towns the material was purchased at cost by the women of the Parent-Teachers' Association, all labor was donated. Hot lunches were served daily to the men who gave their time to the actual building of the library. This building cares for both the branch library and the Red Cross Health Center, in two rooms with separate entrances that may be opened into one large room. The other is largely the work of one woman who raised funds in every conceivable manner, secured a location through a man owning a large amount of property in the community and interested in its development. The patrons gave their time and effort to making the tiny, unpretentious building as attractive as possible. They cleared the lot, planted shrubs, painted the building and have periodic clean-up days on which they all turn out to beautify their little library. These buildings are libraries, and they serve a vital need. But they represent vastly more than just library buildings, for they are the tangible results of community efforts, among groups without organization of public nature.

These library stations and branches, both in

communities and schools, are opened for circulation for sufficient hours each week to meet the needs of the community they serve. No station is opened less than two hours each week, many are opened for nine or twelve hours, and the larger ones are opened daily. An opening schedule of three hours on Monday, Wednesday, Friday, or Tuesday, Thursday, Saturday, cares for circulation in a good-sized community, a community reading approximately 1250 books per month. Openings are in the morning, afternoon or at night, so arranged that the library station can serve the greatest number of patrons.

Rural people—and I say rural rather than country—do read, and the life of a county librarian is full of human interest incidents. Recently a little woman, crippled and worn, the mother of six children of ages from one-half to ten years, told me that she did so much appreciate the last books I brought her. Her husband was not nearly so cross when he had to wait for his supper if she had a good book for him to read. A boy of twelve attracted my attention because he repeatedly selected books of least interest to a boy of twelve. In talking with him I discovered his reason. If he took home the books he wanted to read he had to wait until his father read them before he could begin. Even the father was not interested in the books the boy was wading through. The idea of a card for father and books for father made the boy's face beam. In an oil town a boy returned *Kim* and said he had also read *The Jungle Book* and *Captains Courageous*, and "if that man has written any more books I'd sure like to have them." It was in the same town that a tall, lanky boy of perhaps sixteen was overjoyed when I took a copy of *Swiss Family Robinson* out of a box. He had read a chapter in an early reader and was surprised to find that there was a complete story. General reading tastes are normal. Library books are taking the place of movies and parks in our rural life, and there is the same demand for recreational reading in Harris County that there is in any other part of our country. The men like Van Dine, Service, Sabatini, but the same men enjoy Franklin's *Autobiography*, Durant's *Story of Philosophy* and Papini's *Life of Christ*. One woman's club is studying interior decorating, another early

Southern literature. A high school club is doing background reading, catching the things they missed. A group of Boy Scouts in camp want nature material, handicraft, and have combed my juvenile 600's for material on their various projects. They also want the usual boys' stories, "any good ones will do—you know the ones we like." A man of at least eighty visits his local library station on each of the three afternoons it is open. In talking about the new concrete

road the county was building over the twenty-five miles between his town and Houston, he emphatically did not favor it if it would ever mean less money for the county library. "No twenty-five miles of concrete could do for any town what our library is doing for ours!"

The above interests are typical. They lend humor, pathos and, above all, urge to the

work. The service is entirely through library stations, reached by automobile. A mud hole, a flat tire, a dead battery are all in the day's trip. We may sound like adventurous motorists, but remember that our library was begun as an experiment, that its growth has far exceeded the greatest expectations, and our efforts for good service are stimulated. Only once during the past year have I been able to drive within half a mile of the schoolhouse, where one library station is housed. Dirt roads in this part of Texas are rarely passable in the rainy winter months.

The demands on our book collection are constantly growing, there are many students and some scholars among our public, and we encourage requests from everyone. The result is, we search for material on hydrogenation that the men of a large oil refinery may continue their experiments along this line. We comb every conceivable source for information on barbed-wire fences and the part they played in pioneer life and early Southwest history. Calls for poetry, psychology, philosophy and history come every day. Teachers depend on this library for source material in extension courses. The book collection is supplemented by clippings, pamphlets and pictures. The circulation facilities are supplemented by a direct mail system for those who are not conveniently near a library station. Story hours are held, and the "Library Teacher" receives many calls for another story hour. We are able to sup-

The Goose Creek Branch, Harris County, Houston, Texas

plement programs with suggestions, and personal help, which means that there is no regularity to schedules of working. All phases of our service are supplemented by an interlibrary loan system with the Houston Public Library, for which we are very grateful, without which we would have great difficulty in meeting many individual requests that we are unable to buy

with the present book fund. Our library centers are serving their communities well. They are the gathering places for the people of the community, the meeting ground is a common one, the interest is an ever-present one. Their service develops the social life as well as the educational and recreational life of rural Harris County.

Equalizing Library Opportunities: Town and Country

By Margaret Winning

County Librarian, Public Library of Fort Wayne and Allen County, Indiana

QUITE OFTEN we hear the slogan, "Back to the farm," without stopping to think just what it means, without wondering why people have left the farms so they can go back. If we should ask several of our friends where they were born, we might be surprised how many of them came from the farm. Then, if we should ask a few more personal questions, we might learn why they left the farm. No doubt we would find many of the reasons would be educational, social, or economic.

Educationally, we think first of the schools. Naturally, the parents want their children to receive the best education that can be had in order to give them their rightful chance for the future, and, if possible, will live where this can be obtained. If they can secure this by leaving the farm and moving to the city, they will strive to do so. In many communities the "little red school house" is being replaced by the consolidated school, with its better qualified teachers and fuller curriculum. This change is being brought about by the higher State and national educational qualifications as well as competition. As these schools are improving and increasing in number, one reason for leaving the farm is done away with.

At one time, before the automobile, good roads, and radio, to say nothing of the party telephone line, each farm family was more or less of a social unit unto itself. Trips to town were an event to be reckoned with, and usually then only a select few could be spared for the journey. Since most of the money received from the produce must go back into the farm, or for necessary living expenses, there was nothing left with which to bring in outside cultural influences. Is it any wonder that whole families, or individuals, rebelled and moved to the city in search of a broader life?

The economic question is one that is always with us. To those who have been brought up on the farm is the vivid memory of "no cash

on hand." Supplies, food, and clothing were secured by trade. The wage of the city was the magnet drawing toward the city. Now, with quicker and better transportation, many prefer to stay on the farm and still take advantage of the city wage.

In all three, educational, social and economic, there is a tendency at equalization between town and country. What part do we have as librarians? What are we doing to give the country resident equal library privilege with the town resident? Statistics show us that practically every city with a population of over 25,000 has an adequate library, while nearly every city between 25,000 and 2500 is more or less adequately served by a library. There are about 93 per cent who do not have access to any library and 82 per cent who live in the rural communities. This, alone, is a challenge to every librarian.

The library idea is not a new one, although improved methods have developed efficiency in the past few years. As early as 1835 New York State passed a law authorizing any school district to levy a tax for a district library. In 1837 Massachusetts and Michigan did likewise; in 1839, Connecticut; 1840, Rhode Island and Iowa; 1841, Indiana, and others later. The necessity for libraries was seen, but the system was fundamentally defective due to lack of organization. In the early stages of law-making the county library idea was there, but it was not effective until 1898, when Van Wert and Cincinnati, Ohio, and Hagerstown, Md., made it practical. Since then figures for August, 1929, show that there are 291 county libraries operating in thirty-four States of the Union. However, with 3073 counties in the United States, there is much work yet to be done. In Indiana alone there are ninety-two counties with only fourteen counties having county library privileges.

In looking up the revenue of these 291 county

libraries we cannot say "equal library opportunities" because of lack of adequate funds in all. The A. L. A. report for 1925 shows that only thirty-eight out of the 223 county libraries existing at that time had a revenue of one dollar per capita, and all but ten of these were in California. One board of county commissioners doled out \$100 for a population of over 29,000, and another board granted \$150 for a population of over 28,000. The minimum set by the A. L. A. is one dollar per capita, although some extension workers advocate that a county library can be started on fifty cents per capita. The report for 1929 shows there are 220 county libraries receiving \$1,000 or more, thus leaving a number receiving a revenue much below the minimum.

The library world is awakening to the need of equal library privilege for city and county. The A. L. A. Council and the Committee on Library Extension have placed as their ultimate goal "adequate public library service within easy reach of everyone in the United States and Canada." According to the outline of their program incorporated in their report for 1929-30, the library service will be extended into the outlying districts. British Columbia is working toward an intensive rural library service, aided by an increased provincial appropriation to the Public Library Commission and by a grant from the Carnegie Corporation. The South Dakota Library Commission is working toward county libraries; after a State survey a rural library conference was called in October, 1929, and the officers of all State agencies were invited. A similar meeting was called by the State Library Association in Kansas in January, 1930. As a result, a county library plan was indorsed and a State library field agent to further the work was asked for. New York, North Carolina, Virginia, and other States are putting forth concerted State effort for county libraries. With such united efforts it must be only a question of time before the rural population will have equal library privileges.

We might well observe our territory of Hawaii and the way it handles its library situation. In 1913 the library of Hawaii was established and carried on extension work in the other three islands. In 1921 county libraries were established on these islands, so that at the present time there are equal library opportunities for all.

Panama operates its military library on the

same principle as a county library. The main collection is at headquarters with a trained person in charge. Branches and stations are located wherever there is a post or group of men on isolated detail work. Here a local enlisted man has charge of the book collection under the direction of an officer. This development has been in the last five years, and because of this centralization of all library activities at department headquarters, the work has been standardized.

Mexico is struggling to build up its library system, which, as a popular element, is only six years old. The plan is to extend the service from a central library to the rural districts through branches, deposits, and traveling libraries.

The growth of county libraries in other countries is rather interesting to note. Great Britain has made noteworthy strides. In 1914 nearly 99 per cent of the population had no public library privilege. The following year the Carnegie United Kingdom Trust offered grants of money of five years' duration. Then laws were passed giving public support, and the Trust gave \$10,000 to those adopting the laws. By 1925 there were eighty-nine county libraries organized in England, Scotland, and Wales, leaving one county borough, twelve municipal boroughs, and forty-eight urban districts without library service. Denmark has grasped the idea of equal library service and has developed its libraries similar to our county libraries, with all subject to the State Library at Copenhagen. Czechoslovakia went a step further, and by the law of 1919 made library service compulsory, standing equal in requirements to the schools. As a result, this country has practically equal library opportunities. Sweden provided for library state aid in 1905 and in 1929 passed a district library law. At the present time Russia and South Africa are working toward national, provincial, county and local library systems that will fit their country's needs.

To me it seems so clear that the county library is the answer to equalizing library opportunities in town and country. The problems that arise must be dealt with locally. First must come the vision of equal library opportunities, the State library law must be studied, the method of organization decided upon, local library conditions surveyed, and then determination, courage, tact and work will carry the vision through.

Cataloging Problems in County Libraries

By Anna Gertrude Hall

Librarian, Longview Public Library, Washington

It is difficult to make any hard and fast rules for procedure in library technique in county libraries from the fact that county libraries are still in the experimental state, especially as regards library methods, and a great variety of practice can be observed in different States, and even in different counties within the same State. Financial support for county libraries varies almost infinitely, and the organization follows the financial necessity. One library may have a very simple organization at central, carrying on the greatest variety of its work through branches; another may be a county center, especially for reference, with exceedingly simple and very dependent branches; another may reach its largest public through the schools. One library may have full organization, as well developed and well equipped as a good city system; another may be a loose federation existing on almost impossibly meager funds and giving to its branches little but books and casual supervision. The standardization of county libraries is still far in the future, and when made will call for careful study of types of service and grades of organization. No one rule for anything can, at present, be applied indiscriminately to all county libraries, even as regards so fundamental and necessary a record as the catalog. However, for our convenience in discussion, let us divide our problem into two sections, the central catalog and branch catalogs.

For the catalog at central let me be for once emphatic and unbending. It is the central pivot, the main bearing, on which all our machinery rests, no matter how loosely knit our organization, how inadequate our book collection, or how small our funds. One thousand books carefully chosen, intelligently classified and thoroughly cataloged make a foundation for a far more effective library, both for pleasure and for information, than thousands of books carelessly arranged and completely buried from the public by indifferent cataloging, or even, may I whisper it, in some counties by no cataloging at all.

Reference work of any value at all is absolutely dependent upon the catalog. Why make broad our phylacteries, embroidering them with human interest stories and the glad news of the placing of Zane Grey in nineteen more towns last year, when we have no way of showing ourselves and our public that one of the finest articles on humming birds is to be found in a

book called *Under Tropic Seas*? Subject headings and subject analytics may be poured forth lavishly. Every reasonable, possibly useful bit of information concerning the subject matter of the library's books should be carefully entered in the central catalog. On the other hand, bibliographical detail may be slight indeed. Only plates and maps of exceptional value need be noted. Paging may be given only for analytics. The publisher should always be named, but the place of publication, unless outside the United States, is not important. Size is of no value unless for folios of art reproductions. Separate entries for many of the translators and editors may be omitted, as well as those for unimportant societies. Series notes are often important and series cards are frequently life savers. Cross references may often be limited to *see* references only. One fair-sized county library that I know very well has existed seventeen years without *see also* references, although successive catalogers have been told that whenever they felt that service to the public was hindered by the lack of these references they might undertake the labor of putting them in. Such practice, of course, calls for more liberal use of subject headings, but these both the staff and the public use, while they merely gaze in baffled rage at a card filled with *see also* references, representing not the alphabet, but the chronological acquisition of certain material.

Classification of a county library requires some mental readjustment, for the same classes must be used in the branches, and if the branches remain uncataloged for some time the local custodian must depend largely upon the classification for finding what she wants. Books on the same subject may generally be classed together, in spite of varieties of relationship. The 913 class and even the 930 class can be dropped entirely. For instance, all books on Palestine may be placed in 915.69 instead of in Biblical geography, Antiquities of Asia Minor, Ancient History of Asia Minor and Modern History of Asia Minor. The branch custodian will probably learn one number for Palestine, but if four are presented to her she will remember none at all. Logic and consideration of shades of meaning, or of subtle values, must often give way in county library classification to practical consideration of the needs of a small, isolated branch and of a custodian who will be guided by the labels on the shelf in finding most of her material.

This brings us naturally to the more complicated problem of the cataloging of rural branches, with such questions as when, how and how much? Large branches in permanent communities should certainly have catalogs for all books on indefinite loan. Lack of adequate staff at central is usually the one great obstacle to the achievement, but librarian and library board should carry this need as a definite aim to be achieved as early in the history of the library as possible.

The smaller branches, where the short time loans represent a large proportion of the collection, or where changing conditions of rural life are depleting the population, present a more difficult problem, and one for which few general rules can be given. The character of the permanent population, the intelligence of the custodian, the demands of the public, the amount of work done with the schools, and the number of books on permanent loan, are all factors to be considered before a catalog is installed. The books lent for short definite periods, of course, should not be cataloged, but may be conveniently listed by making the shipment list on separate slips rather than on sheets.

The most perplexing problem of all is that of the method of handling branch cataloging, especially if the system has been in existence for some years. The apparently natural and most efficient method is to handle all the work in the central cataloging department, making all cards for each book in every branch at once, using L. C. cards liberally, and if the system is large, using some form of duplicator, multi-graph or mimeograph for fiction, children's books, and for analytics. The catalogs in the branches will grow slowly by this method, but will grow uniformly and consistently. This method, of course, means that the cataloger at central must have some organizing and executive ability, as well as plenty of clerical assistants.

The other method, which might be called the home method, as contrasted with the factory system, is to catalog each branch separately; librarian or cataloger going to the branch, using the branch shelf list as guide, and working with the local custodian and any other local helpers who may be available. In such cases, before leaving central, full notes of subjects and analytics must be made on the branch shelf list, and the librarian or cataloger must make the main card with tracings before setting others to work. This method has many marks of technical inefficiency and ample space for inaccuracies. However, it may be the only way to do the work in a system where clerical

help at central is inadequate, and where only a few branches are large enough or permanent enough to require cataloging. It is the antiquated method by which small libraries have long been cataloged by library commissions in Eastern States without county systems, and has certain human values that sometimes seem to overbalance its inefficiency. The many patient hours I have spent in small New York libraries, writing simple catalog cards by hand or by some borrowed typewriter have often been fruitful hours for filling the minds of local librarians, board members, club women, and others with my ideals of the proper aims and management of their library, for informal chats about the books we were handling, for learning more about the public the library was serving. The actual handling of the books and writing of cards by the local people usually aroused interest in books that long had gathered dust on the shelves. If your branches must be cataloged in this way, ask for local helpers who can write legibly; do not expect accurate or efficient work, but make the hours mean a new ideal of the library in that community.

After the new catalog is once installed, the problem arises of keeping it up to date. Can you send catalog cards with your shipments and expect the local custodian to file them? Alas, only in rare cases! The cataloger must follow the shipment as surely as night the day, and usually must attend also to the withdrawal of cards for books returned. For this reason, think long before you install catalogs in all your branches. Starting what you cannot finish is always poor policy. No catalog at all can be less irritating than one not kept up to date. Remember the New Englander who passed on to his children the aphorism, "It's just as well not to know so much, as 'tis to know so much that ain't so." If your library cannot afford to catalog its branches and keep the catalogs up to date, remember that you can compile many subject lists to be mimeographed and distributed from the branch desks, that you can sometimes call your custodians together for lively talks about their books, taking care to plan ahead for their participation—don't do all the talking yourself! And then, most important of all, your branch visits! Do they mean book talk with the custodian, stimulation and inspiration for her from your own fund of knowledge and enjoyment? Do they mean extending acquaintanceship with her and your public? Tools for our work seem often indispensable, but it is, after all, the spirit that quickeneth, and a live librarian may often fill for some time the place of a branch catalog.

The Library as a Culture-Museum

By Robert W. Marks

The Julius Rosenwald Fund

THE LIBRARY of today should be more than a mere resting place for books. It should be a potential culture center in the community in which it is located, endeavoring to group, to crystallize and to distribute the creative materials of its unique section. It should endeavor, by means of traveling school exhibits, sent out with the book-truck, to convey to the most rural districts culture-history works, which are important in the developing of a universal mind. By means of phonograph records and the correlating music material such as scores and reference works, the musically-appreciative side of associative education can be stimulated and developed even in communities most lacking in musical background and virtuoso facilities.

It should be the purpose of a librarian to engender and stimulate such culture-developing tendencies of a community, and the library museum should be her medium. Music can be sponsored in concerts given at periodical intervals, utilizing the modern electro-dynamic reproducing machines, and collections of recorded musical works with which the creative library should be supplied. This work should be supplemented by the loan of reference works and phonograph records, and the distribution of this loan material enhanced by means of the book-truck.

The appreciation of fine arts in color and plastic form can be aided by means of periodic loan exhibits of painting and sculpture, which should be obtained from central distributing museums. In all connections the library should

be regarded as a flexible, cooperative, cultural institution, whose essential purpose is to supply the community with such material as may be necessary for the definition and construction of its civilization. It should aim not at any formalized purpose, but at a broad humanitarian function in which every effort is made to encourage and guide the potentially creative spirits of a community.

It is the desire of the consultant in Library Service for the Rosenwald Fund to suggest this philosophy to the library institutions included in the Fund's program of aid. The purpose of the Rosenwald philanthropies is not to make an outright gift which in the course of time would be dissipated and eventually result in a condition approximating that which preceded a gift, but to stimulate and aid in the development and betterment of general social, educational, and cultural conditions. In this connection the Rosenwald aid to libraries is one designed to stimulate rather than support. Its library program is based on an effort to implant in the communities of the South a realization of the needs for cultural activity and a conception of the means by which this aid can be realized. Consequently it is dependent on each community during and after aid is effected to carry on and develop whatever cultural factors lie latent in the community, and autonomously to incubate the cultural nucleus which it is hoped that the aid is implanting. The process of standardization and of mass production in America has a tendency to wipe out the voice and expression of the individual. The consultant feels, however, that this is not a natural concomitant of modern civilization, but rather that phase which is characteristic of industrial selfishness, poor leadership, and unintelligent direction. When the attributes and the implements of our contemporary civilization are properly directed, the right of the individual to cultural and emotional self-determination, intelligently directed and cooperatively sponsored, will be determined.

The Fund is at present concentrating its attention in this direction, believing that the growing power of the mass, educated and fertilized with a desire for higher ethical and esthetic standards, will result in a momentum which will enable those who have hitherto been denied the cultural privileges of life to solve through their own economic and educational devices their internal problems.

A complete department of music, utilizing such media, has been developed and made operative in the Charleston Museum, by Miss Laura M. Bragg, director of the Museum. Miss Bragg, who is also a trained librarian, has had installed in the auditorium of the museum an electro-dynamic reproducing machine designed to play complete symphonies and operas without the usual break contingent upon the change of phonograph records. This machine, which cost about \$250, has the *timbre* and volume of a complete orchestra, and has been used, during the past season, for weekly lecture-concerts, in the course of which an extensive repertoire of symphonic works and Wagnerian operas was developed. The weekly concerts were supplemented with lectures on the history and appreciation of music, arranged in series for both children and adults. In addition, school-exhibit albums, containing recorded lectures on music history and appreciation, together with phonograph records illustrating the particular subject discussed, were prepared for circulation to the schools of the county. A comprehensive library of photograph records, embodying representative works of the classical and modern masters, was installed in the library of the museum, and made available to the public for loan and research.

Impressions of Toronto's New Library

By Emily Van Dorn Miller

Editor of Publications, American Library Association, Chicago, Ill.

THOSE WHO ATTENDED the 1927 A. L. A. Conference know that "they know how to do things in Toronto." One received with special pleasure, therefore, an invitation to the meeting of the Ontario Library Association

The high esteem in which Dr. Locke is held and the certainty that any project furthered by him is a good one added to its support. Andrew Carnegie gave Toronto its Reference Library, opened in 1909. The City Council in voting funds for this central circulation building have completed the unit and have reared a monument to their own wisdom.

An acoustical deficiency, soon to be remedied, forbade use of the library's auditorium for the ceremonies, which were held in the long, beautifully lighted open shelf room, in an appropriate atmosphere of books. Six hundred seats were accommodated here. Not an empty seat or a standing guest were evidence of the skill with which the affair was planned, and no thought of bodily discomfort allowed one's attention to stray from the evening's program. The guests were mostly townspeople representing many professions and interests, but

The Main Circulation Room, Toronto, Where the Newer and More Popular Books Are Placed

and the dedication of the new Toronto Central Circulating Library, and made every other plan fit into its acceptance. So, in a proper festive mood, two members of the A. L. A. headquarters staff journeyed up to Toronto for Easter and what Dr. Locke calls a Canadian week-end, from Saturday to Wednesday. Drives, dinners, luncheons, and the sessions of the Ontario Library Association filled the days with interest, and the dedication of the new building on Monday night was the high point of the visit.

The inevitable growth of all healthy institutions was never more strongly shown than in the extension of library uses and facilities in the city of Toronto. This city of homes and well-established families and social customs clearly appreciates and desires for itself all the rich and fertilizing results of a fine library.

Back View of the New Wing, Showing Closed Stack Room, Bindery, etc.

all united in their enthusiasm for the Toronto Library and its director. On a platform behind a mass of hydrangea blooms sat the speakers, whose chairman was Mr. T. W. Ban-

*The Receiving Desk, Card Catalog,
and Book Conveyor*

ton, chairman of the Library Board. After a historical survey of the library's growth by Mr. Justice Kelly, senior member of the board, Dr. Locke was called on to present Dr. Andrew Keogh, president of the American Library Association and guest speaker of the evening. Dr. Locke, as always, knew how to blend wit with wisdom, and the ovation he would have received in any event was made more tumultuous by the delight of the audience in his remarks. Dr. Keogh's was a scholarly discourse on the great libraries of the world, from earliest times to the present day. It is hoped that it will be made available, in print, to many more than could hear it given. Canon Cody, chairman of the Board of Governors of the University, and formerly Provincial Minister of Education, followed with some striking and pointed remarks on education and learning to use one's mind, after which Mr. Gash, board chairman during erection of the building, formally opened the structure to the public.

There was, of course, a tour of inspection, and the A. L. A. visitors were greatly impressed by the careful planning, by the spaciousness, by the beautiful Kipling room for young people, by the movable stacks, the book conveyor, the Treasure Room and the art gallery. They felt that children with the habit of frequenting the Kipling room would never be found in the juvenile court, and that grown-ups would find new inspiration in the Treasure Room and gallery. There are now about twenty buildings in the Toronto library system—four in the central group. In the eternal contest between the forces of good and evil, can a mightier ally be found for the right than such an

*Kipling Room for 'teen-age Boys and Girls. The Motto
Over the Fireplace Is Given Below*

institution manned by such a staff, holding riches which are not dissipated by use?

Within the last twenty years Toronto has erected fourteen branch libraries and one branch building has been purchased and remodelled. There are now seventeen branches.

The Game is more than the player of the game
And the ship is more than the crew.

—KIPLING.

Librarian Authors

BESSIE GRAHAM is a Philadelphian, which, of course, means that she was born there, for, according to the saying, "being a Philadelphian is like being a Jew, you can't be one unless you are one, you never can hope to become one." She is what Christopher Morley calls "a bibliophiladelphian," for since 1914 she has had charge of the Philadelphia Booksellers' School, which is now in its seventeenth year. Miss Graham resigned from the school in January, 1930, and the work is now being carried on by others.

She was educated at Bryn Mawr College and at Drexel Library School, and for four years she was librarian of the Apprentices' Library in Philadelphia. This is the oldest free circulating library in the United States and has a great past, although at present its situation in a neighborhood abandoned of readers makes it almost forgotten. In 1924 Miss Graham became director of Temple University Library School, which specializes in school library work. She states that the part of library work that she likes best is the teaching of it. "I adore teaching and I get a tremendous thrill out of it. It has always been my good fortune to teach people who know more than I do—only we know different things, and we exchange our learning. I could not bear to teach children. I should out-herod Herod in the massacre of the innocent."

The Philadelphia Booksellers' School is the only one of its kind in the United States. It is under the public school system, and therefore free, and anyone may attend who can pass the entrance examination. It is a school for booksellers, not for book agents; men and women who are trying to qualify for positions in bookstores. The course also trains for library work, for both professions require much of the same knowledge, and members of the class have the privilege of working as apprentices at the Apprentices' Library and obtaining practical experience in their training. An interesting feature of the class is the awarding of prizes for the best examination papers. These prizes are offered by leading publishing houses in the country. The Philadelphia Booksellers' Association has sponsored this class from the beginning and has done much for the students in giving them employment and in furnishing speakers to address the

class on special topics. The nature of the work done at the school is best described in Miss Graham's own words, "Do you love books? Do you know how to buy books intelligently? Can you tell people what books to read on certain subjects? Do you like book gossip? The

BESSIE GRAHAM

free course in Book Salesmanship and Library Work is a course for booklovers who like to work with books. To be a bookseller or a librarian it is not enough to know books individually—you must know them comparatively. The course is *about* books and deals with their authors, dates, publishers, editions, etc. In no respect is this course a study of literature, nor is any analysis or appreciative discussion of literature attempted."

Out of the lessons given in the Booksellers' School grew *The Bookman's Manual*, a guide to literature, now in its third edition and published by R. R. Bowker Company. This volume discusses the comparative merits of dictionaries, encyclopedias, Bible translations, etc., and lists the best books in the fields of biography, autobiography, history, etc. The only other thing she has written is the section of *The Author's Annual*, 1929, entitled "Famous Literary Prizes and Their Winners."

She has one hobby, that of collecting facsimiles of rare books. She now has a \$200,000 library in facsimile. "This make-believe gives me great delight," says Miss Graham, "and is indispensable to me in teaching my favorite subject, Bibliography."

THE LIBRARY JOURNAL

September 1, 1930

Editorial Forum

A TRUE spirit of internationalism is indeed growing in the library field, and it is gratifying to note that a library pilgrimage to this country is planned for German librarians with the intention of studying libraries, publishing houses, printing plants and book shops in this country. It is timed for Oct. 3 to 31 and is offered at the inclusive price of (2500 marks) \$625. The journey has been arranged by the North German Lloyd Steamship Company, and the itinerary has been worked out by Herbert Reichner, editor and publisher of *Philobiblon*, of Vienna, of which a special American issue will be published later this month. Dr. Oehler, librarian of the Frankfurt libraries, is planning to lecture while in this country, presumably after the general journey, and several library schools have arranged through Dr. Koch for illustrated lectures on German libraries, though he speaks only in German. The party will do their sightseeing at American speed in a crowded fortnight, reaching New York by the "Bremen," Oct. 9, sailing by the same steamer Oct. 25. They plan, meantime, to visit New York, Newark, New Haven, Boston, Cambridge, Washington and Philadelphia. Their kaleidoscopic views of American libraries will, let us hope, be sorted out on the return voyage, and the information and inspiration they take back ought to be of great service in future library development in Germany. Our German colleagues will certainly receive the heartiest of welcomes throughout their journeying.

ONE of the foremost figures in international library development on the continent of Europe is Dr. Isak Collijn, librarian of the Royal University Library at Stockholm, and it is proper that the international conference of 1930 should be held in the home country and city of the president of the International Association of Libraries, an office which Dr. Collijn is the first to fill. This was to take place Aug. 20 and 21, but as yet no advices have reached

this country as to its proceedings. About forty delegates were expected to be present, and Miss Bogle sailed Aug. 9 as the official representative of the A. L. A. Though this attendance will be small in comparison with that at international conferences, those at Edinburgh in 1927 and Rome in 1929, it will have great local importance and should be of service throughout Scandinavia, which has for many years been in close touch with American librarianship. From Norway will come to America within the current month the librarian of the Royal University Library at Oslo, accompanied by the architect for the new wings of that library, and this month also may be expected the visit of the Bodleian Library Commission with reference to the difficult problem of the enlargement of that historic library. One of the most interesting examples of library internationalism is the appointment as librarian of the International Institute of Agriculture at Rome, to succeed an American, of a German, Dr. Sigmund von Frauenhofer, whose technical library training was had at the Albany Library School, 1926, and the University of Illinois, 1927, holding also degrees from the German universities, where he completed the studies which gave him that of Doctor of Agriculture.

OUT OF THE 3073 counties or equivalent political units in the forty-eight States of the Union, only 291 county library organizations are to be found in thirty-four States, as reported to the A. L. A., and most of these are far below the income of one dollar per capita of population, which is the minimum set by library figures for adequate library support. Of these, seventy-one receive appropriations less than \$1,000 per year, which is certainly the irreducible minimum for effective organization. The standard minimum of one dollar per capita is perhaps scarcely to be expected, for many counties lack libraries because their populations are sparse and their pecuniary resources are sadly limited. On the other hand, of course, this does not mean that the people of 2782 counties are without library facilities for they are largely supplied from municipal and other libraries, Greater New York having five counties supplied from its three library systems, while other cities are coterminous with counties. Miss Winning's paper in this issue gives valuable emphasis to the endeavor of the A. L. A. through its boards and committees to facilitate county organization, toward which especial progress is now making in South Dakota and Kansas, while other States, as New York itself, are recognizing that despite

great libraries in centers of population there are thousands of readers whom the library does not yet reach. A new and distinctive endeavor comes with the appointment of a regional director for the South, where field organization is especially needed. The library millennium will not be approached until county and city are more nearly equalized in the library facilities they afford to their respective inhabitants.

TWO OF THE most remarkable counties in the whole of the United States are to be found near the north and south boundaries under remarkably diverse conditions. Minnesota has in Hibbing, centering St. Louis County, an exceptional industrial and educational development, in connection with which an enormous library bus has been put on the road containing selections of books in eight foreign languages to meet the needs of its varied population, capable of seating a score of readers and keeping them reasonably warm at the unreasonable temperature of 20 to 40 below zero. At the other extreme is Harris County, Texas, of which Houston is the center, noted politically rather than industrially, covering 1654 square miles, where 72 deposit stations in all sorts of places are visited every six weeks, one of these requiring a trip of 40 miles to reach it. These two counties make a remarkable illustration of the varied range of our national life linguistically, geographically, industrially, and otherwise!

THE SUCCESS of a county library system depends largely upon the organization of the central library, which is the nucleus and point of radiation. A chief problem is that of cataloging. Elaborate catalogs are neither possible nor desirable throughout such a system, and the suggestion is a good one, as Miss Hall points out, that subject lists of limited scope may usefully be circulated, indicating books available in the central library, these especially with reference to the character of population in the respective branches. Especially should it be emphasized that those who cannot find the books they need in the branch library will find facilities to meet their needs in the central library or in great libraries beyond. It can never be prophesied from what remote county district a Lincoln or an Edison may be growing up eager for books beyond reach, and for this reason it is worth while that wherever possible the system of interlibrary loans should be made known to the patrons even of the least important of these branch libraries.

Library Chat

HOWEVER could it have happened that the participation of so distinguished a member of the A. L. A. as Mary Eileen Ahern was overlooked in the statement that Dr. Frank P. Hill was the only member of the first library pilgrimage, in 1891, to the Pacific Coast, who was present at the Los Angeles Conference of 1930. Miss Ahern was then Assistant State Librarian of Indiana and already making her mark in the Association, then in its fifteenth year, and she is now close to the top in the record to her credit of attendance at A. L. A. conferences, the honor roll for attendance at the fifty-two conferences standing: Dr. Frank P. Hill forty, Mary Eileen Ahern thirty-nine, Edith Wallbridge Carr thirty-eight, F. W. Faxon thirty-six.

AN UNOFFICIAL A. L. A. visitor at the Stockholm conference was Miss Theresa Hitchler, who was invited as the personal guest of Dr. and Mrs. Colijn. Miss Hitchler, since her retirement as head cataloger of the Brooklyn Public Library and her subsequent residence with the friend whose death left her comfortably provided for through a life estate, has been using her leisure to advantage in wandering through Europe from the Atlantic to the Aegean, doubtless making herself friends wherever she goes, as was her wont in A. L. A. circles. That she had not forgotten library friends at home was proved by the post cards directed to this one and that one from here and there in her pleasant divagations.

THORVALD SOLBERG, who left Washington for a stay in Europe just previous to the termination of his service as Register of Copyrights because of age limitation, is now in his favorite habitat, the Balearic Islands, and writes interestingly from the Hotel Formentor, Puerto de Pollensa, Majorca, of recent experiences in Spanish libraries while continuing his researches into Balearic bibliography:

"I must not forget to speak of the dear little library at Barcelona, where I worked from ten to one o'clock each day. I had a great window embrasure, giving me a view of three of the five towers and spires of the cathedral. This library is in the palace of the Diputaci6n, a building whose interior architectural beauty moved me more, I think, than any I have ever felt. I sat daily in the charming peace and beauty of its patio as I came from my desk. The library service, too, was good. I worked by invitation also in the library in the monastery at Montserrat, where there is an unusual collection of Mallorcan literature—not yet arranged, however."

The September Forecast

A check list of books of general interest whose publication dates fall during the coming month

(Exact date of issue is given when known)

Biography, History and Travel

Ballard, G. R. *Kitchener*. Dodd Mead. \$3.50.

Barnes, Harry Elmer. *The Story of Punishment*. Stratford. \$3.

A clear, brief history of the methods wherewith society has tried to repress criminal behavior, especially as it refers to the prison system and its stupid anachronisms.

Bartlett, Lanier, ed. *On the Old West Coast*. Morrow (Sept. 4). \$5.

Episodes in life of Major Horace Bell, one of famous figures in early California and author of *Reminiscences of a Ranger*.

Benson, E. F. *As We Were: A Victorian Peep-Show*. Longmans, Green (Sept. 10). \$4.

A Victorian pageant recorded by one who lived with it intimately.

Birkenhead, Earl of. *The World in 2030*. Brewer & Warren (Sept. 8). \$3.

Present tendencies and a pursuit of them to their natural conclusions.

Blanding, Don. *Hula Moons*. Dodd Mead. \$3. Hawaii.

Blumenfeld, R. D. *In the Days of Bicycles and Bustles*. Brewer & Warren (Sept. 29). \$3.50.

The proprietor of the London *Daily Express* tells of the personalities and events of the fascinating period between Queen Victoria's Golden Jubilee and the opening days of the World War.

Carr, Philip. *The French at Home, in the Country and in Town*. Dial (Sept. 2). \$3.50.

A perfect travel book, both for those who go and for those who stay.

Childers, James Saxon. *Through Eastern Gates*. Appleton (Sept. 26). \$3.

Craig, Gordon. *Henry Irving*. Longmans, Green (Sept. 17). \$3.

The story of the colossus of the English stage in the last part of the nineteenth century by one of his pupils.

Darling, M. L. *Rusticus Loquitur*. Oxford Univ. Press. \$4.50.

A responsible book about India.

Davis, Robert H. *On Home Soil with Bob Davis*. Appleton (Sept. 19). \$2.

Bob Davis, world traveler and famous raconteur, has recently finished an automobile trip that completely encircled the United States.

Dekobra, Maurice. *The Perfumed Tigers*. Brewer & Warren (Sept. 2). \$3.50.

A travel book, informal yet complete in its descriptions of India.

Dermenghem, Emile. *The Life of Mahomet*.

Tr. from the French by Arabella Yorke. Dial (Sept. 2). \$5.

Drake, H. B. *Korea of the Japanese*. Dodd Mead. \$4.

Eckenrode, H. J. *Jefferson Davis, President of the South*. Macmillan. \$1.50.

New and cheaper edition.

Feiling, Keith. *Studies in Nineteenth Century Biography*. Longmans, Green. \$3.

Twelve leaders of English life of the last one hundred and thirty years.

Foster, Harry L. *A Vagabond in Barbary*. Dodd Mead. \$3.

Travel and wandering in the picturesque provinces of French North Africa, Morocco, Algeria, and Tunisia.

Garland, Hamlin. *Roadside Meetings*. Macmillan. \$3.50.

In this story of his young manhood, the author writes intimately of the authors, artists, and public men whose friendship he enjoyed.

Gates, Susa Young. *The Life Story of Brigham Young*. Macmillan. \$5.

Jones, Doris Arthur. *Taking the Curtain Call: The Life and Letters of Henry Arthur Jones*. Macmillan. \$4.

Ketchum, Alton. *Follow the Sun*. Farrar & Rinehart (Sept. 5). \$4.

A gay, round-the-world travel-adventure by a young man who became tired of Cleveland.

Lyman, George D. *John Marsh, Pioneer*. Scribner (Sept. 12). \$3.50.

The life story of a trail-blazer on six frontiers.

Marie, Grand Duchess of Russia. *Education of a Princess*. Viking (Sept. 19). \$5.

One of the last of the Romanovs tells the story of her life and through it the life of twentieth century Russia.

Mason, Edward S. *The Paris Commune: An Episode in the History of the Socialist Movement*. Macmillan.

May, Stella Burke. *The Conqueror's Lady: Inez Suarez*. Farrar & Rinehart (Sept. 26). \$4.

Mead, Margaret. *Growing Up in New Guinea*. Morrow (Sept. 18). \$3.50.

A fascinating book about a little known community.

Morison and Commager. *The Growth of the American Republic*. Oxford Univ. Press. \$5.

Nowak, Karl F. *Kaiser and Chancellor*. Macmillan. \$3.50.

Deals in detail with the first two years of the ex-Kaiser's reign, the period with the dismissal of his great Chancellor, Prince Bismarck.

Palmer, John. *Moliere*. Brewer & Warren (Sept. 8). \$5.

Papini, Giovanni. *Laborers in the Vineyard*. Tr. by Alice Curtayne. Longmans, Green (Sept. 17). \$2.

Papini rediscovers in this book the greatness of such persons as Petrarch, Michelangelo, Saint Francis of Assisi, and introduces the greatness of such fascinating figures as Giovanni Fattori and Oscar Ghiglia.

Patmore, Brigit, tr. *The Memoirs of Marmontel*. Dial (Sept. 29). \$4.

Eighteenth century memoirs very little known to English and American readers which deserve the translation they have now received.

Phillips, LeRoy. *Bibliography of Henry James*. Coward McCann (Sept. 17). \$1.50.

Prévost, The Abbé. *The Adventures of a Man of Quality*. Tr. by Maysie E. I. Robertson. Dial (Sept. 15). \$4.

Sassoon, Siegfried. *Diary of an Infantry Officer*. Coward McCann (Sept. 29). \$2.50.

Schmitt, Bernadotte E. *The Coming of the War: 1914*. 2v. Scribner (Sept. 12). \$10.

An exhaustive and critical study of the five weeks from the assassination of the Archduke Francis Ferdinand to the outbreak of the European war, early in August, 1914.

Book News

Book Club Selections

(for September)

BOOK-OF-THE-MONTH CLUB

Complete Works of Sherlock Holmes, by A. Conan Doyle. Doubleday, Doran.

Full contents includes forty novels and fifty-six stories.

BOOK LEAGUE OF AMERICA

Dance of Youth, by Hermann Sudermann. Liveright.

A novel finished just before the author's death.

BUSINESS BOOK LEAGUE

Introduction to Wall Street, by John F. Fowler, Jr. Harper.

CATHOLIC BOOK CLUB

Black Soil, by Josephine Donovan. Stratford.

CRIME CLUB

Strangler Fig, by John Stephen Strange. Doubleday, Doran.

FREETHOUGHT BOOK CLUB

Forgery in Christianity, by Major Joseph Wheless. Knopf.

JUNIOR LITERARY GUILD

The Book of Three Dragons (boys and girls 8-12), by Kenneth Morris. Longmans, Green.

The Blacksmith of Vilno (girls 12-16), by Eric Kelly. Macmillan.

Red Horse Hill (boys 12-16), by Stephen W. Meader. Harcourt, Brace.

LITERARY GUILD

The Edwardians, by V. Sackville-West. Doubleday, Doran.

The real hero is a house, Knole Castle, long celebrated in history and poetry.

Book League Board to Select Classics

BEGINNING with the September selection, The Book League Board of Editors will henceforth select each month the special classics that are to be presented to Book League subscribers. In the past the Book League Board has only chosen the new book of the month. The first classic selected in accordance with the new plan of The Book League of America, which is to provide a classic each month along with its new book, is Flaubert's novel, *Madame Bovary*.

French Academy Honors American Authors

JOHN MEYERS O'HARA and John Hervey have just been awarded a special medal by the French Academy for their translation of *The Trophies with Other Sonnets* of Jose Marie de Heredia, published last year by the John Day Company. So far as it is known, this is the first time that this honor has been paid by the Academy to a work in the English language. Mr. O'Hara, a New Yorker, is the author of *Pagan Sonnets*, *Threnodies*, and other notable volumes of verse. Mr. Hervey, a poet, journalist, and critic, has been for thirty-seven years a resident of Chicago.

John Masefield's New Book

IMMEDIATELY after John Masefield was appointed poet laureate, Ray Long, editor of *The Cosmopolitan Magazine*, boarded a boat for England. When he returned he had what he wanted—the manuscript of Mr. Masefield's new book, *The Wanderer*, a biography of a fine old sailing ship, told in verse and prose. It will be published in book form this fall by The Macmillan Company. The first English edition will be one of the smallest and rarest ever printed. Only the King and members of the royal family will receive copies. The Macmillan Company will publish not only the regular edition but also a special autographed edition, limited to two hundred and fifty copies.

Spanish Book Selection

THE COMMITTEE of the Association of the Best Book of the Month, in Madrid, Spain, selected from the books published in June, *La Isla de los Santos*, by Ricardo Baeza. In this book the author recounts his personal experience in Ireland during the most critical period in the terrible fight sustained by Sinn Fein against the British government.

Drama League Awards

JUDGES have announced the awards for the best full-length drama, one-act play, and religious play submitted in the 1929 Drama League, Longmans Green, Playwriting Contest as follows: Thomas P. Robinson for his four-act drama *Darick Clausen*; Elene Wilbur for her one-act play *The Table Set for Himself*; and Sonia V. M. Daugherty for her religious play *Esther*.

School Library News

A Tribute to Marion Lovis

SINCE the last meeting of this section (School Libraries) has come the death of Marion Lovis—a loss impossible to measure in words. Training and experience had given her a thorough knowledge of the educational fields covered by the public schools and the library world. Background, natural endowment, and rare insight into human needs had given her the ability to correlate the zest of work with the richness of life. Her broad vision of what organized book service could contribute to the education of a child made school libraries become basic elements in every educational project. And crowning these qualities came the initiation and courage to seek and attain whatever goal she set.

As Supervisor of School Libraries in one of our greatest school systems, she was peculiarly able to interpret schools to libraries and libraries to schools, and to develop a system which is serving as a model to similarly organized groups throughout the country.

As teacher in various summer schools in the country, she was able to give to many a new sense of the essential value of their work, since her own sound sense of values never failed her.

As leader and counselor in her various professional groups, her clear thinking, her enthusiastic willingness to meet life, her sparkling personality, made her a stimulating and inspirational force.

Indirectly, her influence will be far-reaching and of duration. To those who knew her, she will remain alive and vibrant, ever renewing her own and others' faith in the joy of work and life,

"like water up from a fountain springing."

Be it therefore resolved, That the School Libraries Section of the American Library Association place in its record an expression of deep appreciation of her friendship and counsel, of sincere gratitude for her inspiration and leadership.

HELEN HARRIS,
ELEANOR WITMER,
MILDRED POPE.

MARTINUS NIJHOFF, Bookseller

The Hague, Holland

**OLD AND MODERN BOOKS
CATALOGUES ISSUED REGULARLY**

Display Racks and Bulletin Boards

SOUTH GEORGIA Teachers College, Collegeboro, Ga., found display racks and bulletin boards of great help in creating the "library atmosphere" last year. In addition to correlation with school activities, current events and special days, they were used for introducing new books and featuring special subjects. Especially did they encourage reading. Often the mere act of calling attention to a book would put it in circulation. A book would become exceedingly popular after it had been placed on the display rack in its jacket and an annotation placed on the bulletin board. The circulation of books of biography was greatly increased in this way. The student-assistants took turns in arranging the bulletin boards and display rack. They took great pride in making them attractive.

Junior Literary Guild Announces New Age Group

AFTER a year of consultation with educators, parents, librarians, and child psychologists, the Junior Literary Guild announces that its age groups will be rearranged to include younger children than have heretofore been admitted for membership. Beginning with Oct. 1, books will be sent to four groups of children instead of three, ranging in age from six years to sixteen years. The present membership is from eight to sixteen years of age.

Service to Students and Faculty

SOUTH GEORGIA Teachers College Library, Collegeboro, Ga., cooperates with the school by offering the following service:

TO STUDENTS: Reference work; instruction in the use of the library; guidance in reading, both for information and pleasure; book service in extra-curricular activities, such as debating and literary societies; vocational guidance, by means of a collection of the best books, pamphlets and other references on occupations.

TO FACULTY: Notice of new books and current magazine articles in each particular field; clippings and visual material lent for classroom use; place arranged for displays and exhibits; books reserved for class use; material borrowed from other libraries.

In the Library World

Newark Book Truck

ON MONDAY, June 16, the Newark Public Library began a book truck service within the city of Newark to districts located more than one-half mile from the main library or any of its branches. These districts are estimated as covering about ten square miles and have been divided into seven districts with about equal population. The truck is scheduled to cover a different district each day, making eight or nine stops therein, ranging from 20 minutes to one full hour. This service is an experiment intended to supplement the work of the extension and school departments in establishing new centers of book distribution. While serving a great

many readers with its own books, the truck will also be of service in increasing the use of the main library and its branches, by advertising their resources. Books not in the truck collection will be supplied to borrowers from the main library. Borrowers with special needs that cannot be answered by the book truck collection will be sent to the nearest library building containing the desired information. All reference questions are referred to the main library, business branch or the nearest branches. The truck itself is a Ford, Model A, with a specially constructed body. Four bookshelves on each side carry between four and five hundred books. The upper two-thirds of each side turns up, forming a roof; the lower one-third turns down, forming a ledge. Glass panes reveal the books as the truck travels along. At stops, the back door is opened, one assistant receives books there and does most of the charging on a ledge fastened to the inside of the door. Another assistant takes applications, maintains order, and finds special books wanted.

Newark's New Ford Book Bus

Survey of Canadian Libraries

THE Carnegie Corporation Trustees have approved a grant of \$10,000 for a survey of the Canadian library field to reveal possible avenues of cooperation. John Ridington, librarian of the University of British Columbia, and Miss Mary L. Black, librarian of the Fort William Public Library, will cover the West-

ern Provinces of Manitoba, Saskatchewan, Alberta, and British Columbia; George H. Locke, librarian of the Toronto Public Library, and Mr. Ridington will do the Maritimes; and all three will co-operate in Ontario. They will seek interviews with ministers and departments of education, officials of library organizations and library schools; libra-

rians of representative public libraries, both large and small, parliamentary and legislative; university libraries and school libraries. They hope to get the basic facts as to present Canadian library organization and will be in a position to make suggestions or recommendations for improvement and for general library co-operation.

New Association Granted Sum

THE NEW BRUNSWICK Provincial Library Association, organized last spring without appropriation, has been granted a sum for organization purposes. Elizabeth H. Morton, formerly of the Toronto Public Library, has been appointed secretary and has established offices at Room 207, Provincial Building, 55 Canterbury Street, St. John, N. B. Traveling library and direct mail service are to be established and local library establishment encouraged. A budget to carry on this work is being presented to the House in November.

Model County Library Plans

PLANS are well under way for the establishing of a Model County Library in Black Hawk County, Iowa, next fall. Two thousand books donated by Iowa club women have been accessioned, and the experiment is to be financed through gifts and memberships. With the experiment a success, it is believed that other counties will petition for rural library service. The Board of Supervisors of Page County have made a five-year contract with the library trustees of Clarinda and Shenandoah for library service. It will cost the average taxpayer about \$1 a year for this service. This is the second county library to be established in Iowa, Hardin having the service since 1927. Mary Parmelee, Illinois Library School, will have charge of the model library.

Itinerary of German Librarians' Tour

- Oct. 3, Friday—Sailing from Bremen on the "Bremen."
- Oct. 9, Thursday, NEW YORK—Arrival at Hotel Knickerbocker, New York City.
- Oct. 10, Friday—Visit New York Public Library and Columbia University.
- Oct. 11, Saturday—Pierpont Morgan Library, Hispanic Society.
- Oct. 13, Monday—Jewish Theological Seminary Library, Metropolitan Museum, Grolier Club, private libraries (Altschul, Pforzheimer, Folger), *New York Times*, Pynson Printers, American Art Association, Rosenbach's, Lathrop Harper, Gabriel Wells.
- Oct. 14, Tuesday, NEWARK—Free Library. JERSEY CITY—Typographical Library of American Typefounders Co.
- Oct. 15, Wednesday, NEW HAVEN—Hotel Taft. Visit the Yale University Library and Elizabethan Club.
- Oct. 16, Thursday, BOSTON—Hotel Brunswick. Tour of city.
- Oct. 17, Friday—Boston Public Library, Boston Medical Library, Fine Arts Museum, Club of Odd Volumes, Merrymount Press.
- Oct. 18, Saturday, CAMBRIDGE—Harvard University Library, Fogg Art Museum.
- Oct. 19, Sunday, NIAGARA FALLS.
- Oct. 20, Monday, WASHINGTON—Hotel Lee, Mount Vernon.
- Oct. 21, Tuesday—Library of Congress, Surgeon General's Library, Government Printing Office.
- Oct. 22, Wednesday, PHILADELPHIA—Tour of city, Curtiss Publishing Co., Fine Arts Museum, College of Physicians' Library, Free Library.

- Oct. 23-24, Thursday and Friday, NEW YORK—Leisurely visits to libraries, general sight-seeing.
- Oct. 25, Saturday—Leave on the "Bremen."
- Oct. 31, Friday—Arrive in Bremen.

Honolulu Discusses Library Work

MODERN TRENDS in library work were discussed at the Second Pan-Pacific Women's Conference, held in Honolulu from Aug. 9 to 23 and attended by delegates from all countries bordering on the Pacific Ocean. The conference was held under the auspices of the Pan-Pacific Union, and each Pacific country was invited to send twenty-six delegates to the meeting. Julia Wright Merrill, as official delegate from the American Library Association, gave a talk on library work before the education section of the conference. Before returning to the United States, Miss Merrill will visit the county libraries of Hawaii. Her trip is being financed by a grant from the Carnegie Endowment for International Peace.

Rare Chinese Maps Received

A COLLECTION of rare Chinese maps and atlases made by Arthur W. Hummel, chief of the library's division of Chinese literature, during a residence of thirteen years in China has been presented to the Library of Congress through the generosity of Andrew W. Mellon, Secretary of the Treasury.

Psychological Index

THE PSYCHOLOGICAL INDEX, No. 36, for the year 1929, contains four hundred and fifty pages plus ten pages of introduction, classified, and with an index to authors. Six thousand three hundred and ninety-two titles are listed, a number that indicates the prodigious world-wide activity and interest in psychology. The editor, Walter S. Hunter, of Clark University, says there have been some minor changes in the scheme of classification without, however, altering the general plan.

Important Correction

IN THE LIST of Important Religious Books, 1929-30, presented to the Religious Books Round Table at its meeting during the conference of the American Library Association in Los Angeles, June 27, the title for E. Stanley Jones appears as *Christ of the Indian Road*. The title should have been *Christ of Every Road*. Abingdon Pr., 1930. \$1.50.

PUBLIC
LIBRARY

Library Organizations

Special Libraries Association

THE TWENTY-SECOND annual convention of the Special Libraries Association, held at San Francisco, June 18-21, brought together nearly 150 people from all sections of the country. The dominant theme of the first session was "The Development of the Industrial West"; the second session, the topic "Public Libraries for Business Use." In addition to the general sessions there was a business session and group meetings by the Civic-Social, Commercial-Technical, Financial and Newspaper Groups. Group luncheons were held by the Insurance and Museum Groups, and a breakfast conference by the Federal Reserve librarians. The mornings were devoted to the general sessions, the afternoons to Group meetings, and the evenings to special dinners: the first day the twenty-first anniversary dinner at the Hotel Mark Hopkins, the second day a dinner in Chinatown, and the last day a dinner at the Woodside Country Club. On Thursday a trip around the city preceded the dinner, and on Friday a trip to Palo Alto, with a visit to the campus of Stanford University, including glimpses of the Hoover War Library and the Stanford Chapel.

The principal feature of Wednesday morning was an address by Mr. F. T. Letchfield, industrial engineer, Wells Fargo Bank, San Francisco, on "Industrial West." The speaker presented a keen analysis of industrial conditions throughout the country, with special emphasis on recent developments on the Pacific Coast. Members of the San Francisco and Southern California Chapters of the Association, Mr. Thomas Cowles, Mrs. Amy Caya, Miss Annette Windele from San Francisco, Mr. Guy Marion, Mr. B. E. Edwards, Miss H. G. Percy, and Mrs. Ruth E. Creveling from Los Angeles, discussed "The Part the Library is Playing in the Development of the Industrial West." There was good-natured rivalry between the representatives of the two cities with an occasional sly allusion to the superior merits of one city or the other. Mr. William Alcott, in his presidential address, made reference to the great loss sustained by the profession in the death of John Cotton Dana, founder of the Association. Mr. Alcott considered in detail the activities of the Association during the previous year, which showed a substantial gain in membership and greater activity on the part of the various chapters, groups, and committees. He concluded with a review of the twenty-one years' history of

the Association and showed what had been accomplished in recent years.

The subject matter of the second session on Thursday morning was "Public Libraries for Business Use." Miss Marian C. Manley of the Newark Business Branch submitted a Summary of National Survey of Public Business Libraries and Suggestions for Cooperation between Them and Special Libraries. This survey covered business service activities in 109 large public libraries and was summarized in *THE LIBRARY JOURNAL* for May 1, 1930. After Miss Manley's talk, it was recommended that the incoming president appoint a Committee on the Relation of Service of Public Libraries to Business. Miss Josephine B. Hollingsworth, Municipal Reference Library, Los Angeles, discussed "The Municipal Reference Library and Its Service to Business," and Miss Rose L. Vormelker, Business Research Librarian, Cleveland Public Library, chose for her topic "What the Public Business Librarian Offers the Special Librarian and Vice Versa." A group of librarians from San Francisco showed how the libraries of that city render library service to business. Mr. Robert Rea spoke for the Public Library, Mrs. Mary O. Carmody for the Mechanics' Library, and Mr. William A. Worthington for the special libraries of the city.

The Group sessions covered a wide range of interest. Among the notable addresses before the Civic-Social Group were a talk on "Unemployment," by Dr. Louis C. Block, statistician, Division of Labor Statistics and Law Enforcement, San Francisco; a talk on "Metropolitan Districts," by Mr. Rolland A. Vandergrift, secretary, California Taxpayers' Association, and a report on "The White House Conference on Child Health and Protection," by Miss Edith M. Guerrier, supervisor of branches, Boston Public Library. A scholarly address on "Group and Branch Banking," by Mr. Howard Whipple, vice-president, Bank of America of California, and a talk on "Investment Research" were delivered before the Financial Group. The Commercial-Technical Group took for its main subject "Tools of Trade," with discussions by the members on Bibliographies, Indexes, Trade Directories and Special Tools.

The following topics were presented at the three sessions of the Newspaper Group: "The Newspaper Group, Its History and Achievements," by Mr. William Alcott, librarian, *Boston Globe*, and president of the Special Libraries Association; "Thoughts on Subject

Filing," by Mr. William Wallace Vaughan, librarian, *Oakland Tribune*; "The Cowles Reference Library," by Mr. Wilbur D. Kirkman, librarian, *Spokesman-Review*, Spokane; "Back Stage in a Newspaper Reference Library," by Miss Blanche L. Davenport, librarian, *Christian Science Monitor*, Boston; "Solving the Personnel Problem," by Mrs. Marjorie D. Brown, librarian, *San Francisco Chronicle*; "Los Angeles Daily News Reference Department," by Miss Gertrude Blackledge, librarian; "The Newspaper Library as Viewed from the City Editor's Desk," by Mr. Thomas Bellew, city editor, *San Francisco Chronicle*; "Can the News and Library Departments Get Along Amicably?" by Mr. Roy Harrison Danforth, assistant managing editor, *Oakland Tribune*; "Making the Reference Library the Hub of the Wheel," by Mr. Joseph F. Kwapi, librarian, the *Public Ledger*, Philadelphia, and chairman of Newspaper Group; "The College Newspaper and the Library," by Mr. William F. Calkins, managing editor, *Daily Californian*, Berkeley, Cal.

A business session was held on Friday, June 20, when reports from the various groups, local associations, and committees were received. The following officers were elected for the year 1930-31: President, Miss Margaret Reynolds, First Wisconsin National Bank, Milwaukee, Wis.; first vice-president, Miss Jessie Callan, Bessemer & Lake Erie Railroad, Pittsburgh; second vice-president, Miss Louise Dorn, Detroit Edison Company, Detroit, Mich.; treasurer, Miss Elizabeth O. Cullen, Reference Library, Bureau of Railway Economics, Washington, D. C.; director for three years, Angus Fletcher, librarian, British Library of Information, New York, N. Y.

Library Directory Ready October 1

THE AMERICAN LIBRARY DIRECTORY for 1930, a thorough revision of the 1927 edition and published by R. R. Bowker Co., 62 West Forty-fifth Street, New York City, will be ready Oct. 1. Approximately 12,000 libraries, including public libraries in the United States and Canada, Federal and State libraries, educational and professional libraries, business and special libraries, high school libraries, territorial libraries, and other groups, are classified and listed with the usual data. The price is \$12, but to libraries ordering before Oct. 1 copies will be supplied at the special price of \$6 in recognition of the librarians' help in its compilation. Order now at half price.

Michigan

DURING the current school year the Department of Library Science of the University of Michigan has continued its policy of building up a duplicate working collection of books for the use of its students. One outstanding advantage in the working quarters of the school is its location in the building of the General Library, with one of its exits leading directly into the eight-story book stack. A definite effort, moreover, has been made to duplicate for the study hall many of the books in the stacks and scattered throughout the library. This is true of numerous single volumes, as well as some of the more extensive sets which are needed in the Reference course, these volumes forming the basis of a working reference collection of use to the whole department. Among them may be mentioned several sets of encyclopedias, the *Dictionary of National Biography*, and the new *Dictionary of American Biography*. Duplication of such volumes obviously relieves the strain upon the resources of the Reference Department of the General Library. The section of Bibliography shows now a good array of library catalogs, the largest of which is that of the Bibliothèque Nationale; of national and trade bibliographies; of bound sets of library serials; and of books and pamphlets in various fields of subject bibliography. In addition, a number of professional journals and library publications are currently received, and a vertical file is maintained to care for ephemeral material. Many books have also been bought for other special courses. For Book Selection, 150 of the new spring books of 1930 have been chosen, which, after reviewing by the students, will pass into the collections of the General Library. The collection for use in the course in cataloging contains about 700 books, to which additions are frequently made to keep it timely and interesting.

THE DEPARTMENT of Library Science of the University of Michigan reports an attendance of fifty-eight in the Summer Session of 1930. Fifteen of this number are enrolled in the graduate courses, and the remaining forty-three have elected the undergraduate work. Twenty-six are residents of Michigan, while the representation from other States is as follows: three each from Indiana, Ohio, and Wisconsin; two each from Alabama, Illinois, Kansas, Louisiana, Nebraska, and Texas; and one each from California, Connecticut, Iowa, Kentucky, Massachusetts, Minnesota, Missouri, New York, Oregon, Pennsylvania, and South Dakota.

The Open Round Table

Tariff and Library Importation

To the Editor of THE LIBRARY JOURNAL:

Under Section 304 of the present tariff act there are instructions relative to the marking of containers of articles imported into the United States which has led to a number of inquiries being addressed to the undersigned.

In reply to a question as to how the provision of this act affected library importations, Edward Clifford, Assistant Secretary of the Treasury Department, replied that the department's regulations with respect to marking were not to be applied to books, catalogs, and other printed matter imported by and for the account of public libraries or library associations for their own use and not for sale. These instructions are to be applied at all custom houses under the new tariff act. It is probably advisable, however, for libraries importing books from abroad to ask their foreign agent or bookseller to mark the container or package, and even the packing case, as required by Section 304. Even though no penalty would apply, it would save delay in delivery.

C. L. CANNON,

Chairman of the A. L. A. Committee on Book-buying.

Law Libraries Amend Constitution

To the Editor of THE LIBRARY JOURNAL:

It has been suggested to me that many of your readers would be interested in knowing that the American Association of Law Libraries, at its Los Angeles Conference, amended its constitution to establish a new class of membership, i. e., Life Members.

This action was taken to honor such of its members and past members who are no longer actively engaged in library work, but who had rendered exceptional services to the association or to the profession of law librarianship or who have attained distinction in public life.

The following were unanimously elected to become life members by a vote of those present at the meeting of Wednesday, June 25:

J. Harry Bongartz, 45 Marlborough Ave., Providence R. I.

Mrs. Lucile Vernon Clark, R.F.D. 8, Scotia, N. Y.

James H. Deering, City Hall, San Francisco, Cal.

Charles F. Ebel, French Lake Park, Fari-bault, Minn.

John T. Fitzpatrick, First Deputy Supreme Court Reporter, Albany, N. Y.

John E. King, Hemet, Cal.

Elias J. Lien, Security Building, Minneapolis, Minn.

Hon. William V. Millard, Supreme Court, Olympia, Wash.

Dr. G. E. Wire, 22 Dean St., Worcester, Mass.

Miss Gertrude E. Woodard, Lock Box 288, Ypsilanti, Mich.

ARTHUR S. McDANIEL,

Secretary, American Association of Law Libraries.

A Vague Inquiry

To the Editor of THE LIBRARY JOURNAL:

A patron is very anxious to locate the name and author of the book which she describes as either in fiction or English travel, and all she can say is that it is the account of the authoress giving up an apartment in London and going on the railway for a few hours toward the south, then driving a somewhat long distance up a winding road to a house on the hillside; the description of the country and the people is very delightful. The author's name is either very odd or foreign (a woman).

I have seen inquiries in THE LIBRARY JOURNAL and hope to identify this book by some means.

L. F. PHILBROOK,

Librarian, McLean Hospital Library, Waverley, Mass.

Have You Read This?

LIBRARIANS who attended the Los Angeles Conference, going through the Southwest, who desire to know more about the country through which they passed after crossing the Missouri River, should read Duffus' *The Santa Fe Trail*, recently published by Longmans, Green & Co. It is most interesting, colorful, well written and, what is more worthwhile, in the main basically correct. For additional titles, those who desire to go into details of this glamorous section will find authoritative books by the author-librarian, the late Charles F. Lummis. He knew the Southwest.

PURD B. WRIGHT,

Librarian, Kansas City, Mo.

Wanted

A COMPLETE FILE of *Harper's Weekly*, 1857-1916, inclusive, or a run 1894-1916, bound or unbound. Will pay a good price. ACS.

Among Librarians

MELISSA ALDRICH, Los Angeles '29, is assistant at the new Memorial Branch of the Los Angeles Public Library.

ANN ARRANTS, Los Angeles '25, formerly in the Art Department of the Los Angeles Public Library, is acting librarian of James A. Garfield High School, Los Angeles.

MIRIAM BEALL, Los Angeles '29, recently with the Kern County Library, is now an assistant in the Santa Barbara Public Library.

ELSA BERNER, Columbia '27, is to succeed Ruth E. Sankee as assistant professor of Library Science at North Carolina College for Women.

BERTHA FLORENCE BLACKBURN, Illinois '21, was married on July 21 to William Sanford Thorne, of Des Moines, Iowa. Mrs. Thorne is at present assistant librarian of the Los Angeles City School Library.

PHOEBE LOVELL BONE, Michigan '30, is organizing the Reference Department of the Tyrrell Public Library, Beaumont, Tex.

PEARLE BURR, children's librarian of the Tyrrell Public Library, Beaumont, Tex., since its organization in January, 1926, will organize the Order and Accessions Department, a new department which has been recently created.

HARLAND A. CARPENTER, Columbia '28, has resigned his position as assistant to the librarian of the Rochester (N. Y.) Public Library to become librarian of the Brockton Public Library. He will assume his new duties Sept. 15.

MARY LOIS CROUCH, Illinois '30, has been appointed assistant in charge of circulation, Goucher College Library, Baltimore.

GLADYS ENGLISH, Western Reserve '17, has recently been appointed head of the Department of Work with Children in the Los Angeles (Cal.) Public Library, to fill the vacancy made by the resignation of Eva Leslie.

BERTHA M. FRICK, Columbia '29, has been placed in charge of a training class for clerical assistants in the Queens Borough Public Library. The first class will start in September.

MRS. HELEN W. GRANNIS, N. Y. P. L. '17, became branch librarian of the George Bruce Branch of the New York Public Library on Feb. 1.

J. CRAWFORD HARTMAN, Columbia '29, formerly temporary cataloger in the library of the Masonic Grand Lodge of New York State, in New York City, has been appointed assistant librarian.

MARION HORTON, Albany '17, after two years of service on the staff of the Columbia School of Library Service, is going back to southern California.

ELIZA LAMB, Albany '01, resigned her position as head cataloger at the University of Chicago, Jan. 31, 1930, to accept the position of assistant librarian in charge of cataloging and classification in the University of Wisconsin Library.

MARIAN McFADDEN, Columbia '29, branch assistant, Queens Borough Public Library, has been appointed children's librarian in the Lincoln Library, Springfield, Ill., and will begin her service there early in August.

WINIFRED H. SNIDER, Pratt '28, assistant county librarian of the Port Huron Public Library, Michigan, has been appointed county librarian of the Demonstration Library at Chilliwack, British Columbia.

MRS. IDA C. STORER was recently appointed librarian of the Public Library at Herington, Kan., to succeed Mrs. Ethel Tripp.

SAMUEL TSU YUNG SENG, director of the Boone Library School, Central China College, Wuchang, China, has made a Chinese translation of Susan Grey Akers' *Simple Library Cataloging*.

L. BELLE VOEGELEIN, Albany '23, who had charge temporarily of the *Education Index* published by the H. W. Wilson Company, has gone to Washington, D. C., to work with Dorkas Fellows on the Decimal Classification.

SIGMUND VON FRAUENDORFER, Illinois '27, of Hohenheim, Germany, has recently been appointed librarian of the Library of the International Institute of Agriculture at Rome, replacing James G. Hodgson.

ELIZABETH HOWARD WEST has been appointed by the Library of Congress to take charge of the work of transcribing material in the Archivo de las Indias, in Seville, Spain. She is taking the place of Dr. Roscoe R. Hill, who resigned Aug. 15.

CAROL WILFORD, director of the Children's Book Department, Robert M. McBride & Co., and previously of the Detroit Public Library and White Plains Public Library, married Daniel F. Bradley on June 21.

T. RICHARD WITMER, head of the Order Department of the General Theological Seminary Library, New York, resigned June 28 to become research assistant in the History of Science under the Council for Research in the Humanities of Columbia University.

Opportunities

This column is open to librarians

Wanted—Head cataloger for the University of Missouri, Columbia. Requirements: college or university degree, degree from a library school and executive ability. Salary \$2,400. Apply to H. O. Sevance, librarian.

Position wanted by cataloger with training and experience. I-14.

Experienced librarian with training wishes to make a change. Interested in any executive phase of library work. Z-15.

Library school graduate with experience in circulation department of large public library desires position in public or business library. California or Arizona preferred. I-16.

Experienced cataloger wants position organizing and cataloging public documents. I-17.

University graduate with library training and twelve years' experience, four years in the technical department of a large city system, desires position in a public or private library of the South or Southwest. I-18.

Trained librarian, now in charge of a summer library, desires position for the winter as librarian or assistant. Address, Miss Van Kirk, Cragmoor Free Library, Cragmoor, N. Y.

Position in library in Southwestern State wanted by a young woman with one year's experience and library training. I-10.

Young woman with college, summer library school training, and four and one-half years' experience in large public library desires position in library in Middle West or East. Especially interested in circulation work and book selection. I-11.

Library position in the East wanted by a librarian with ten years' experience, six years with major libraries. X-12.

Position in children's department wanted by responsible young woman with library summer school training and three years' experience, who has also had experience as teacher. I-13.

Experienced cataloger in a college library desires change of position Sept. 1. G-20.

Library position wanted by college graduate with one year college library and two years' junior high school experience. Public library work near Michigan preferred but not essential. Available at any time. G-21.

Librarian, now in charge of a summer library, would like engagement after Oct. 1. References. G-22.

University graduate, young woman, some library training, five years' good experience, desires library position in or near New York City. G-17.

Position in children's department, preferably as assistant in large system, wanted by college and library school graduate. Four years' experience. G-18.

College and library school graduate, with good experience in college teaching and six years' experience in college libraries, seeks position in a college or large public library. Available Sept. 1 as Head, Associate, Head of Reference or Circulation. G-16.

Free

PRINCETON University Library will send to any library, for the cost of transportation, the following volumes of the *Statesman's Year Book*: 1878-1896, 1898-1900, 1902, 1910, 1912, 1914, 1919.

The Calendar

Sept. 10-12—Maine Library Association, annual meeting at Bar Harbor.

Oct. 1-2—Connecticut Library Association, annual meeting at New London, Conn.

Oct. 2-4—Colorado Library Association, annual meeting at Denver, Colo.

Oct. 7-9—Missouri Library Association, annual meeting at Sedalia, Mo.

Oct. 8-10—Michigan Library Association, annual meeting at Marquette, Mich.

Oct. 9-10—Kentucky Library Association, annual meeting at Paducah, Ky.

Oct. 13-18—New York Library Association, annual meeting at Albany, N. Y., in connection with Convocation of the University of the State of New York.

Oct. 14-17—North Central Library Conference, including Minnesota, Wisconsin, Iowa, Nebraska, North and South Dakota, will be held in St. Paul, Minn.

COMPTON'S DURA-BINDING

*An outstanding
Compton feature*

Compton's Pictured Encyclopedia is *originally* bound by the method used when you send your books to be *rebound*.

ONE of the factors that has given Compton's such wide professional library sanction is its Dura-Binding. In daily use for more than five years in many of the country's most active libraries . . . this special lock-stitched binding has demonstrated that it lasts 2 to 3 times longer than ordinary binding. Coming to you originally bound by the method specified by librarians when they send their books out to be rebound . . . Compton's Dura-Binding saves you both inconvenience and expense.

*Bound to stay bound—Sketch
at top tells why*

The sketch shows graphically the secret

of the Compton Dura-Binding method. Note that the sewing is not by signature . . . but by the Singer Method. Extra heavy, strong, linen threads doubled to give double strength, run through each and every page in 12 different places. Then they are locked in such a manner so as to make each thread a separate and independent unit. Thus, if one thread is broken, it will not loosen the others. Joints are heavily reinforced with special heavy linen cloth. The threads are sewed right through this cloth, so all pages and hinges are as one.

Compton Dura-Binding is one of the features of Compton's which every librarian appreciates. No increase in price. Buckram binding, special library price \$55.00. Fabrikoid, slightly higher.

COMPTON'S PICTURED ENCYCLOPEDIA

*10 Volumes—4500 pages—an average
of 2 pictures to a page. 2 thoroughly
revised printings every year.*

Along Comes "Book Week"

November
16-22

At that time
you'll want to

Give Parents This Booklist of Carefully Selected Books

Just ahead looms BOOK WEEK. To you parents, teachers, boys and girls will turn to ask, What Books? Into the hands of inquiring people in your community you can place this catalog, The Bookshelf for Boys and Girls, confident that the list is carefully selected, pleased that you can offer so much help in such attractive form. For this catalog has a beautifully colored charming cover, is

filled with pleasant illustrations, is usefully divided into three indefinite age classifications and carefully indexed so that titles may be found. It is of handy size and can be mailed for 2 cents postage. Your library ought to distribute this catalog during BOOK WEEK. It is fine advertising for you and for books. Ask your local bookseller to share imprint and cost with you. Now it is September and soon comes BOOK WEEK. Take action.

Forthcoming Issues of THE LIBRARY JOURNAL

- ✿ The Children's Book Week number scheduled for October first has had to be postponed until October fifteenth, owing to the delay of one special article scheduled for inclusion. We trust this will not inconvenience any of our readers who had planned to use included suggestions.
- ✿ The October first number will be a general number, but one full of interesting articles. An article on "Cost Survey in a University Library," by Elinor Hand of the University of California, will be enjoyed by all those who were unable to hear her paper presented at the College and Reference Section in Los Angeles. Harold Wooster, librarian of the Scranton, Pa., Public Library has written the sort of a paper that many of us have wished to write; it is entitled, "This Job of Being a Public Librarian." There will be other articles besides these two, but as yet they are not definitely scheduled.
- ✿ The page devoted to biographies of Librarian Authors still continues to be one of the most popular features of the JOURNAL and we can look forward to including Clara W. Hunt, Frances Jenkins Olcott, Jacqueline Overton, Mrs. Lucia Borski, and Burton Stevenson in the not-too-distant future. We appreciate any suggestions of names to be included in this series, for it is our desire to make it quite complete.
B. E. W.

It's "Rough Going" In Reading Room and Open Shelves

This photograph might well have been taken in any library. It illustrates the severe treatment that books are subjected to, and also the urgent need for a cover material that will stand this abuse.

*—unless
your books
are bound in*
**LIBRARY
FABRIKOID**

BINDING inspectors know only too well what a hard life library books lead! Misuse and abuse in reading rooms . . . rough handling at open shelves . . . such treatment by patrons prematurely shortens the life of library books.

However, there is a way for you to lengthen the life of your book coverings—even under the severest conditions. It is through the use of a sturdy and beautiful new binding material that defies wear and tear. Its name is du Pont Library Fabrikoid. Impregnated with pyroxylin, the same basic substance as that contained in the famous du Pont Duco, Library Fabrikoid is durable, washable and waterproof. It contains no filler to fall out. It is even insect and vermin-proof.

Library Fabrikoid is extremely good looking, too. You can get practically any decorative effect you desire with it. Let us send you further information and samples, so that you may prove these facts for yourself. E. I. du Pont de Nemours & Co., Inc., Newburgh, N. Y. THE LIBRARY JOURNAL

SEPTEMBER 15, 1930

Training for Library Service with Young People

By Jean C. Roos

Stevenson Room, Cleveland Public Library

WORK WITH young people in public libraries and in high school libraries is very closely allied in that both kinds of librarians are dealing with the same middle adolescent group ranging from fourteen and fifteen to seventeen and eighteen years of age. However, the school librarian, because of necessity, is chiefly concerned with the use of books in relation to the formal school curriculum.

The three objectives of the school librarian as given by Miss Helen Harris in her article on "School Librarianship as a Career" are: "to lead children to love books and reading; to teach them to supplement their studies with other than text-books; and to train them to use public libraries intelligently." These same objectives can, with little change, be applied to work with young people in public libraries. Certainly our first concern is to foster the love of books and reading with this teen age group; the second objective, "to teach them to supplement their studies with other than text-books," is comparable, as the public library tries to meet the needs of this high school group both in the supplementary reading and reference work necessary in connection with the school curriculum, and also endeavors to stimulate recreational reading interests. This objective, however, must be enlarged to meet the needs of the group who have not completed their high school work. This out-of-school group is a very large and important one, a difficult group to reach and equally difficult to hold. The book interests of the boys and girls who say decisively, "I've quit school," are often negligible or of a poor quality and must be cared for tenderly if

they are to grow. The third objective of the school librarian, "to train them to use public libraries intelligently," can only be continued. If they have been trained to use the public library intelligently, it is our duty in the public libraries to meet them intelligently, to know the background of their school demands, and to help them by understanding their problems. Also, in order to meet them intelligently, we must be conscious of their reading interests and reading abilities, conscious of their sociological backgrounds and in addition have a thorough working knowledge of the literature for young people with its great variety of appeals.

Specialization in the training of young people's workers becomes necessary as public libraries are recognizing the importance of anticipating the demands and interests of this teen age group instead of using salvaging methods later. They are, after all, our future adult readers, and much can be done to make the reading of children and adolescents a continuous reading process by carrying over the reading interest fostered in the children's rooms and school libraries into purely adult reading.

A partial survey of the library field at present may serve to show the possibilities for service for these specially trained workers. The following are a few methods of administering young people's work which are found either separately or in various combinations in different libraries.

A specially trained young people's librarian in charge of:

(1) A special room for young people with a carefully selected collection of adult books chosen with the viewpoint of use with young people. This brings together in one place a

Paper presented at Young People's Reading Round Table, Los Angeles, June 25, 1930.

great variety of books, both fiction and non-fiction, and provides for reader advisor service. This is emphasis, not restriction.

(2) An alcove or corner with changing book collection and displays.

(3) A free-lance worker who works with young people wherever they happen to be in the library.

(4) Interchange of staff in various divisions of the library.

(5) An extension worker who makes contacts in stores, factories, social organizations, etc.

(6) A special worker in an adult education division to work with young people in organized groups, e. g., continuation schools, evening academic schools, vocational schools, business training classes, etc.

(7) The head of the school work in a public library who makes contacts with young people in the schools.

(8) Year round committees to work with social agencies, etc.

(9) Readers' advisor service for young people.

(10) Club work developed in the library for young people.

Many kinds of services are represented in these various methods, including individual work with young people themselves who come voluntarily to the library; contacts with adults who work with young people such as teachers, industrial workers, group leaders, parents, etc; work with groups; club work in the library; following up the boys and girls leaving school; making of individual lists; book talks and informal book discussions.

There are many articles on the training of school librarians, going into some detail on the subjects needed in a school library course and the qualities desired for this type of service. Miss Helen Harris' article already mentioned, Miss Marjorie Van Deusen's on "Training for High School Librarianship," "Essentials in Training for School Librarianship" by Miss Edith Cook are representative, and Miss Lucile Fargo has developed this subject in her text-book *The Library in the School*.

It is not necessary to go into the details of prerequisites and requirements, as this group is familiar with the standards of the Board of Education for Librarianship. Training for workers with young people should follow similar standards. Not less preparation but even more is desirable to enable librarians to create and foster in young people permanent reading habits, to encourage recreational reading interests and to develop from school reference work, which is a somewhat compulsory use of books, voluntary book usage. Previous

college work should include survey courses in education, courses in sociology and a study of both child psychology and adolescent psychology.

At Western Reserve University School of Library Science, the general course in the library school is the basis of the training for young people's workers with specialization in book selection and reference. Further specialization in technical subjects and administration is given for those planning to do high school library work. Field work, class discussions, seminar problems and conference periods are important parts of this training. A detailed study is made of the literature of young people and of their reading interests, working out methods and devices to stimulate and direct these interests. Methods used in group work are discussed and the planning and presenting of book talks to various types of groups are included. A knowledge of children's literature is very helpful in carrying over the book interests of our juvenile readers and in developing broader reading horizons. Library experience with the early adolescent group is also an asset.

The most encouraging factor is the increasing recognition by public libraries of the problem of service to the teen age group. This is exemplified in the increasing literature on both the reading and administrative problems of young people's work. Miss Effie Power has a chapter on "Library Service to Adolescents" in her text-book, *Library Service to Children*; Mr. Charles Rush has discussed, "Interdependence of Adult and Juvenile Departments"; Mr. C. P. Vitz has given us his views in "Standardization in Work with Children"; Miss Dorothy Newton, Miss Helen Watson and Miss Mabel Williams, also, have contributed helpful articles.

What may the library expect if it encourages special training for this middle adolescent group as it now demands training for those who work with children? First, the library may expect a trained worker to have an understanding of the importance of the problem in working with young people, the importance of carrying over juvenile reading interests into the field of adult interests and of reaching those young people who have not found pleasure in the reading of books. Secondly, the library may expect a trained worker to have an understanding of young people themselves, their psychological makeup, their educational background and their recreational interests. Thirdly, the library may expect a trained worker to have an understanding of the reading interests of this challenging group with all the many really thrilling experiences of opening into entirely new fields of reading. And lastly, the library

may expect a trained worker to have an understanding of the various methods of administering work with young people with the pros and cons of these varying methods, which should help to solve the problem as it is found in any particular library. And the problem

has to be faced in every library, for the young people are there, and the better we are able to face the situation squarely with this honest, vivacious and courageous group, the better adult readers and citizens will be ours to deal with in the future.

A Day in a School Library

By Charlotte S. Houston

Librarian, High School of Montreal

WILL you spend a day with us in our school library? Visitors are always welcome, and we should be delighted to show you our beautiful room and to have you see something of the part it plays in the life of the school.

If you arrive a little before 9 o'clock you will be able to inspect the library before the

day's work actually begins. You will see a long room, 30 by 80 feet, beautifully finished in chestnut, with oak furniture and equipment. Along one side seven large windows, facing southwest, allow the sun to brighten it during the greater part of the day. At right angles to the other side the book-cases are built to form twelve small alcoves, six on either side

The High School of Montreal really serves two schools—the High School of Montreal and the High School for Girls

of the double doors. Eventually, it is hoped the shelves will hold 10,000 volumes—at present there are about 8000. Seven long tables and chairs in the windows and at both ends of the room provide seating accommodations for 106. There are the usual built-in magazine cases, card cabinets and desks. Against its background of soft buff walls and mellow woodwork, pictures and busts, flowering plants and ferns add to the attraction of the room, while the musical chime of a grandfather clock marks the passing of each quarter of the hours.

It is necessary to explain that our school is really two schools in one building—the High

School of Montreal, founded in 1843, and the High School for Girls, founded in 1875. Their combined enrollment last year was nearly two thousand pupils. The classes are separate, but the assembly hall, swimming pool and library serve both schools. It is possible for the library to do this because the two schools follow

different time tables, and the crowded hours for boys and girls do not clash.

Another rather unusual feature of our work is that although the majority of our pupils are high school students, coming to us from the various elementary schools of the city, we have a junior department—even a kindergarten—for which the library must provide.

We count ourselves particularly fortunate in having some of our pupils during their entire school life, and we are encouraged to hope that through this long association we may be able to develop in them a love of reading that should prove a lasting joy.

We have just time on this Thursday morning for these few words of explanation because immediately after opening exercises at 9, the forty boys of the Sixth Year arrive to spend their usual weekly half hour. This week they are all very busy preparing for the writing of an essay which is to follow their next library visit. The teacher tells me that this time the

choice of topic has been left to the boys. They are expected to do in the library what reading is necessary, make any notes they need, and be prepared to write their essay in class. While they are at work, a smaller group of senior girls who do not study Latin, but substitute an extra course in English, are busily reading. The librarian directs any student who wishes help in finding information, and attends to the morning mail, stamping, entering and distributing the magazines it has brought.

At 9:30 there is a quick change. The librarian has spread on one of the tables about thirty selected books for the small boys of the First Year who arrive with their teacher. Those who are able to read return their books and choose new ones from the table—not until they have reached the Third Year are pupils promoted to the dignity of selecting from the shelves. When a book has been decided upon it is carried to the librarian, who writes the child's name and class on the book card. Meanwhile, those whose reading ability is still rather limited are enjoying picture books under their teacher's supervision. At this point a request comes from one of the Eleventh Year teachers for half a dozen books on Medieval Europe. These are noted in a day book and sent at once.

At 10 o'clock the small boys gather up their picture books, put their chairs in place, say "good morning" and return to their classroom. The "non-Latin" girls also leave the library, after an hour's work there. A fresh supply of books has been spread on the table because the next group will be from the Second Year, and these boys are ready for more advanced reading. The procedure is slightly different, as only those who wish to exchange books come to the library this morning, the teacher remaining downstairs with the balance of the class. When these boys have chosen their books and had them charged, they form in double line at the door and wait until the librarian dismisses them, when they march quietly back to their desks. This same period sees a class of Tenth Year girls who are studying history, and have visited the library to spend the time at their disposal on the Golden Age of Greece, books and pictures showing the wonders of the life of that period in its many phases having been selected and assembled for their use. A small girl appears to ask for *How To Tell Stories to Children* for Miss Black; Mr. Brown sends a messenger for a life of Wordsworth and a book on the Lake District; Mr. Green sends for the *Statesman's Year Book*.

At 10:30 a master arrives with a large Eighth Year class of boys. For half an hour they are to browse at their own free will, the teacher and librarian noting quietly what material is

being used, as an indication of the boys' interests. A note comes from Miss Blue asking for Holman Hunt's picture, *The Eve of St. Agnes*—the Eleventh Year girls are reading Keats. A hurried search fails to find the picture in any available book, and a messenger is dispatched to McGill University Library not far away, and the picture will be sent later to the class. Two Eleventh Year boys who are taking special courses have been working quietly at one end of the room for an hour. A request comes to have a quotation from Stevenson verified, and a messenger asks for a book of French nursery songs.

At 11 o'clock the boys leave, and there ensues a very busy ten-minute recess when senior girls in large numbers crowd to exchange their books, or perhaps to consult a reference one.

After that rush, which often leaves her breathless, the librarian cancels names on the borrowers' cards, and restores her desk to a semblance of order. The returned books are piled on a table, to be replaced later on the shelves by one of the two junior class teachers whose schedule allows them to help for fifteen or twenty minutes, three times a week, while the librarian is out at lunch. In order to allow the many boys who take lunch in the school cafeteria to spend their free time, or part of it, in the library, the librarian returns at a quarter to one, and from that time until they go back to their classes at two every seat is occupied by readers gloriously forgetting themselves in magazines or books. The bound volumes of the *National Geographic Magazine*, *Punch*, the *Illustrated London News*, *Nature Magazine*, *Scientific American*, *The Book of Knowledge*, the *Book of Popular Science*, the *Book of History*, and the many beautiful art books are in constant use. There is movement as the readers come and go, and one is conscious of a subdued murmur; but the room, with over one hundred boys of all ages in it, is amazingly quiet. No rule of absolute silence is enforced, but the boys know that anyone who is not careful to maintain that library quiet must leave the room—that is all. During this hour many of the junior girls, whose day is a short one, come to exchange their books before leaving for their homes. As a rule they do not remain for any length of time. Occasionally a few senior girls may come to do a bit of reference work, but generally they are all busy in their classes until they are dismissed for the day at 2 o'clock. Shortly before two the boys leave, two or three monitors remaining for a few minutes to put the room in order. From 2:00 until 3:15, the girls usually are in undisputed possession, though sometimes it is necessary for a class of senior boys to spend half an hour here. The girls exchange their

books, consult reference volumes, or read. Those who have music lessons, swimming or extra gymnastic classes after school hours often spend the intervening time in the library. At 3:00 some of the small boys from Third and Fourth Years find their way in for a short visit before leaving for home. From 3:30 to 4:30 boys of all ages come and go. At 4:30 the library is supposed to be closed, and I hope for the sake of our tired visitor that this will not be one of the times when the day must be stretched in order that a pupil may finish a special task, or to allow a teacher or the librarian to complete some work interrupted earlier in the day.

This happened to have been Thursday. Friday morning would see small girls instead of boys. The other days, differing only in the classes, are divided between senior girls and boys—each day having its particular visitors, while any day and any hour may bring its sudden request for books to be used in the class room, over 600 having been borrowed in this way last year.

Tuesday is exceptional, because on that day no books are exchanged, though pupils come to the library as usual. Of course, any book that is required for study may be taken. On that all-too-short day the librarian attends to correspondence, orders new books, checks and enters invoices, catalogs and accessions, sends notices of overdue books, does minor repairs and the hundred and one tasks that are always waiting for a spare minute. Perhaps a teacher wishes to compile for the use of a class a list of readable tales covering a particular period of history, to be found in the library; or one who wishes to have some research work done may send a request for enough books to supply each pupil with material for an essay—it may be on the various aspects of the Renaissance or on the different phases of the social history of the eighteenth century, or on the geography of a particular country. These must be selected from the shelves and sent to the teacher. With a borrowers' list of nearly 1500 and an annual circulation during the school months of over 15,000 books for home reading, in addition to the 600 volumes for class use already mentioned, it may be understood that only by having one day a week comparatively free is it possible to keep up these necessary parts of the library administration.

As the library serves the members of the staff as well as the pupils, the librarian tries to keep in touch with the teachers and to provide as far as possible books that will be of interest to them, as well as those that may be helpful in their work as set forth in the curriculum. It is essential for her to keep abreast of the changes and development in educational meth-

ods and thought, to be able to suggest the volume that may perhaps give the occasional touch of fresh inspiration so necessary if one is to avoid the danger of falling into a rut.

In order to enable the library to include more periodicals than its rather limited grant would allow, each teacher contributes a small amount annually toward the cost of the twenty-five or thirty magazines received.

For the pupils the school has tried to supply what the children's public library, so sadly lacking in our district, might be expected to provide. The collection of books is wide and general in range, in the hope that in it, apart altogether from the necessary volumes supplementary to the textbooks, may be found something to satisfy any healthy mental craving. The shelves contain not only history, biography, travel, the sciences, and so on, for both junior and senior readers, but hobby books of all kinds—books on postage stamps, gardening, chess, photography, boy scouts, girl guides, camping, boat building, fancy dress. The library may be called upon to supply costume suggestions for a dramatic entertainment; authentic styles of hairdressing among the women of ancient Greece; dialogues or little plays for very little players; directions for staging one of Shakespeare's plays; French folk songs, or rules and material for a debate. One never knows what may be asked for, from the building of a steam engine to a book on white mice; from the life of a fly to the invention of balloons; from the pleasures of a lady of fashion in Queen Anne's reign to the aims and achievements of the League of Nations.

"To wash down the drier morsels that every library must necessarily offer at its board," as Lowell says, there is a large collection of fiction and poetry, carefully chosen to suit all ages of readers and readers at all stages, from those whose ability is limited to words of one syllable upwards. Not only are to be found standard authors and classics, but in addition to these, preference has been given to books that have some historical background, however slight, that picture the life of a period or a people, that tell a wholesome tale and have some pretensions to literary merit.

Perhaps a few words concerning our organization may be added. The library as a department of the school under the jurisdiction of the Protestant Board of School Commissioners of Montreal dates from the opening of our new building in September, 1914, and so far as we know was one of the pioneers in the school library field in Canada. Before that date there was a reading room and reference library for the use of teachers, one of whom acted at times as librarian. Small groups of books in various rooms were available for

the use of pupils in school. When a proper room was provided with a librarian in charge, these scattered collections were brought together to form the nucleus of our present library.

There is a library committee consisting of the rector of the High School of Montreal, the lady principal of the High School for Girls, a representative from the staff of both the senior and junior departments of each school, and the librarian. This committee meets shortly after the schools reopen in September, when the general plans for the session are discussed, the list of magazines to be subscribed for is decided upon, and the librarian presents the annual report for the preceding year. Unless something unforeseen should render a second meeting necessary, no other is held.

The rector, lady principal and librarian form an accessions committee, which meets informally to discuss suggestions or requests for special additions to the library. Books are ordered by the librarian, the school board making an annual grant which must provide not only for the purchase of new books and for magazine subscriptions (in addition to the amount received from the teachers), but also for all binding of periodicals and rebinding of worn volumes. The ordinary rules for borrowers are observed. Only one volume of fiction may

be taken, but other books for study may be borrowed at the same time. A small fine is imposed for overdue books, unless there is some valid excuse, such as absence from school on account of illness.

With only one librarian in so large a school it has not been possible to give any formal course of instruction in the use of the library, but at the beginning of each session informal talks are given to new pupils on the various reference books and their use. An effort is made to direct the boys and girls at all times in such a way that they may be encouraged to do independent research, and each year seems to bring closer cooperation between the work of the classroom and the library.

It is difficult to put into words the part the library plays in the life of the school. An effort is made to meet it at every point, with help wherever that is possible—whether to the staff or the pupils, whether in work or recreation. Yet in the final analysis it is to the books themselves, “this company of the noble,” that we must look, trusting that in the course of our reading we shall “lay up in our minds a store of goodly thoughts in well-wrought words,” and hoping that for some at least it may “be our happy fortune to love for its own sake the beauty and the knowledge to be gathered from books.”

The Story of a School Library

By Maud Minster

Librarian, Senior High School Library, Altoona, Pa.

“I HOPE some day we will have a room full of books and a librarian.” While a student in high school, these words from the principal sang themselves in my ears, and the desire to be a librarian in that room full of books and to serve that school grew so strong that there was nothing to do but be a librarian. A few years later, with this secret in mind, I wandered back to the Alma Mater—a librarian. The principal was interested, but in this city of sixty thousand there was not a public library and no sentiment or available funds for a school library. “The demand and sentiment for it must be created,” said the principal. Just what would be the best way to go about creating the demand? My offer to try the work for two months, without compensation, was accepted. But public sentiment can neither be changed nor made in two months. Plans were then made whereby I should work indefinitely and be compensated at the rate of ten dollars a month. This amount to be secured through an enter-

tainment given by the school. After working five months under this plan, the School Board created the position of librarian, to which I was elected. This person also to be stenographer to the principal and assistant to the secretary of the School Board. The spare minutes during library hours to be devoted to writing school taxes. I had gotten more than I anticipated. Soon the original room became too small for the demand and the books were transferred to a larger room. The following year an adjoining locker room was added. This was soon not adequate, but plans were being made for an annex to the school, which would include a new library.

One thing of vital interest was the library budget. A library committee, composed of heads of the departments and the librarian, had been raising, in various ways, all the necessary funds for books. The library, being just as much a part of the school as the science laboratory, deserves the financial support of the

school. The words "Library Budget" had just no friends, so the use of that term was discontinued. How should one proceed toward school support? Permission was sought to have the library books sent with the text books for re-binding, thinking possibly the district would pay for the work. This was granted and paid from the general school funds. The following year the same plan was used, and in addition the need for current magazines was presented to the powers that be. This need was supplied and also paid from school funds. The next year these two policies were followed and in addition the need for a new encyclopædia presented. This was also provided. The idea then suggested itself to add the price of binding, the cost of the magazines and the encyclopædia, presenting this amount with the statement that this much was used for library purposes last

year. Could there be a possible increase? The result was that the amount of three hundred and twenty dollars was set aside for library work and called a budget. This amount increased until it reached eight hundred dollars. In the meantime graduating classes were being encouraged to leave some gift in the library in the form of furniture or books.

The checking of attendance needed careful thought. In the beginning, as in most libraries in those days, the class room teacher issued permit slips. This was a burden to the teacher and meant a loss of time for her students. In visiting other libraries and studying this problem, I learned that in schools where all students with free periods were housed in one or two study halls, the problem was quite simple, the study teacher sending the list of students excused for library work to the librarian at the beginning of the period and the librarian checking the list at the close of the period. But in schools where all parts of the building were used for study the problem was more difficult. With a knowledge of the plans of other librarians and our own local problem, the attendance card idea was

worked out. At the top of the card was a line for the name of the student, following this was printed: "Students wishing to use the library during a vacant period must get permission from the study teacher, enter the library at the beginning of the period, remain until the close of the period and have this card stamped with the date and time." This has worked out very satisfactorily for several years.

A great problem was that of students using the library for the study of textbooks. There

was an early idea that unless every chair was occupied the librarian was not working to the utmost of her capacity. To fill a room with textbook students, who can do their work in any room in the building, and crowd out those who need reference work, is far from the aim of the library. But to ask to keep study pupils from the library is a serious problem.

The Senior High School, Altoona, has now a fully-equipped library

Finally, permission was secured to use the library for readers only. The following year, rather than discuss the situation, it was presumed that the rules of the preceding year would be observed and a notice placed on the daily announcement sheet that students could sign for study in the library. This note also appeared in the school paper and on the library bulletin used in instruction work. Teachers checked registration cards to see that students did not sign for study in the library. In this day, with the study hall in most schools, the study question is not so much of a problem for librarians. The desk work, charging and checking of books, maintaining a library atmosphere in a room which seats from one to two hundred, and answering all kinds of questions from prehistoric dress to radio, is only half of the work of the librarian. The other half is getting materials ready for circulation, finding suitable books and helps in general, making clippings, keeping library problems fresh in the minds of the powers that be, making bulletins on special topics, keeping in touch with the needs of the school, finding out

in advance the next move of each department and being ready to meet the demands.

As the enrollment of the school became so great that one librarian could not possibly supply all the wants and teach library instruction two periods a day, student help was organized in the form of a library club. The aim of this club was to acquaint students with books, give them an opportunity to see if they would like to take up library work and to help the school. The club was divided into several committees: shelf reading—girls who kept the shelves in proper order and returned books; clipping—girls who filed the returned clippings and gathered materials from magazines and newspapers for additional clippings; program—girls who planned for Good English Week, Book Week, etc.; magazine—girls who checked new maga-

zines, placed them in their holders and filed the back copies in the magazine room. In this way the girls in their vacant periods did the work of an assistant in the library and while so doing acquainted themselves with the arrangement of a library and made friends with books.

The aim has always been to have the library the meeting place for the problem and its solution. Now, after sixteen years, the library has grown from its first little classroom to a real fully-equipped library with a seating capacity of ninety-five, a magazine room, a work room, a consulting room and a classroom. We have our own text book which fits our local needs, a student body learning how to use books and libraries, backed by a faculty enthusiastic for the work and authorities in full sympathy.

The Use of Pictures in the School Library

By Jessie F. Brainard

Librarian, Horace Mann School for Boys, Teachers College, Columbia University

WHY IS IT that the average European has greater knowledge and appreciation of art than the average American? The answer, it may well be, is to be found in the fact that from birth, the European has art, and often great art, always before him. In France, in Italy, for example, there is hardly a town that can not show some treasure of beauty. Here in America, as Mr. Lewis Mumford says, "we raise our eyes to buildings and with few exceptions they are ill designed and meanly proportioned." Such art as we have expressed in buildings, statues, museums and galleries is, in the main, confined to the large centers, and the average individual must have his artistic appreciation stimulated through other sources.

Some interesting work has been done in loaning or renting copies of paintings, as well as the originals, by such institutions as the Newark Public Library and Museum, the Philadelphia Art Alliance, the Chicago Galleries Association, and various State Departments of Education. Schools have done much, and are constantly putting forth greater effort but there still remain many schools in our country that offer no course in art appreciation, and beyond a few portraits of statesmen and literary figures, or prints of the Roman Forum, for example, on the walls, little is done to bring beauty of line, color, or subject matter to the attention of the student. There are many indications that there has been in recent years an increasing interest in the whole subject of art in America. One of these is the space that is given to the subject in current periodicals, as compared with those of earlier date. To

encourage this interest, offers an opportunity for the school library.

This year at Horace Mann School for Boys, we have tried the experiment of placing a bulletin board, 5 ft. 8 in. high by 13 ft. long, against the wall of the second floor corridor facing the stairs, for exhibition purposes. Through an error the board was made twice the height ordered, but, as use has proved, this mistake only made possible a wider service. For a brief history of art—part of an ancient and mediaeval history course—the library has for years, collected reproductions of paintings from such sources as odd magazines and Sunday newspapers. Recently the files of *The International Studio* have been cut for the collection. Rough grey paper, cut 10 in. by 15 in., and the brown and black papers obtained from Gaylord Brothers of Syracuse, are used for mounts. From the tourist offices of the French, Spanish, and Swiss railroads in New York, we have also secured very attractive posters. Some of these are given to schools and others may be had at slight cost. From Russia we have obtained a gay set of Polish posters; similar ones may be found in some of the Russian shops in New York. With these collections for a beginning, we have had exhibitions by one painter, miscellaneous collections of portraits and landscapes, modern paintings, portraits of young people, and miscellaneous objects of art, including armor, pottery, stained glass, and sculpture. Between each of the exhibitions of pictures on small mounts, we have used large colored posters, many of which could not be displayed were it not for the

unusual height of our bulletin board. Some of these are by recognized artists and reproduced in excellent colors, especially the French posters. The interest of the boys in this venture has been from the first one of approval voiced in various ways—through the columns of the school paper, by individuals, and by a careful examination of the exhibitions. After a period of two or three weeks, interest wanes and the pictures must be changed. As the bulletin board is placed 5 feet from the floor, where there is no danger of injury to material by the crowds passing between classes, a step-ladder is required to remove and place pictures above the first row. The work incident to the change of exhibits has been done by members of the Library Committee. In the future when an addition to the building permits of an art department, there are endless possibilities for the use of the bulletin board. Because of its height, it could serve as a display center for fabrics, drawings, and other types of work produced in the modern art department of a school. But until that time comes, we feel that the library has an opportunity limited only by the time available for work of this kind.

In common with most school libraries, we have collected illustrative material for all departments of the school. This material is both mounted and unmounted. Black and brown mounts cut to fit the legal-sized filing cabinet have been found attractive. We also use odd pieces of paper picked up here and there, and even brown wrapping paper has proved a good background for some pictures. For post cards and unmounted pictures, the celluloid picture holders, which may be obtained in any size

desired, are useful. Pictures may be slipped into these when needed and are more sure of preservation than when mounted and circulated uncovered. Pictures and clipping materials are arranged together under the proper headings in the vertical file. For the special needs of this school, we have divided the file into sections for Biography, Music, Art, Geography and History and Miscellany, alphabetized together. The Biography section has the widest use. It contains 275 names of authors, statesmen, etc., about many of whom it is difficult to find material elsewhere in a small library. There are two factors necessary to make such a collection useful; the desire of the teacher, and the active cooperation of the librarian. Some teachers need only to be shown available material, and thereafter come to the library, select what they need and place it on their classroom bulletin boards, or on one of those assigned for teachers' use in the library. Other teachers, who are more pressed for time, or who regard illustrative aids of minor value, never come for material, but are pleased if the librarian keeps in touch with their work and supplies their bulletin boards with appropriate pictures. Students also make use of the picture and pamphlet collection to illustrate talks and to supplement reference books. There is no doubt that the preparation and care of pictures can absorb an enormous amount of time, but time well spent, provided the selection is discriminating enough to be a contributing factor to that education which, in the words of Horace Mann, "alone can conduct us to that enjoyment which is at once best in quality and infinite in quantity."

Student Council and the Library

By Hilda M. Lancefield

Librarian, Washington High School, Portland, Ore.

THE STUDENT COUNCIL, which is a court for library offenders, established in Washington High School, Portland, Ore., has in the four years of its existence reduced the loss of books from the school library slightly more than 90 per cent. In a student body of 1750, with an annual circulation of between 60,000 and 70,000 books, it was found in the inventory of the spring of 1925, the first term of the Council, that 182 books had disappeared from the library shelves in the course of the preceding school year. In the corresponding inventory of 1926, forty books or less than one-fourth of the loss of the year before were missing. In the spring of 1929, seventeen books were missing.

The Council in its functions has the close supervision of the librarian, and in imposing penalties, the principal is always consulted. Through this system of checks and balances the Council control is regulated. However, with the above limitations, the Council acts as an independent court. The members conduct their sessions with no faculty members present, reach their conclusions, consult the principal for his approval of their decision, and then render their verdict. The personnel of the Council is largely responsible for the success of the plan. Its members include the Student Body president, Girls' League president, graduating class president, presidents of the larger clubs in the school, editors of the weekly newspaper and

the annual, and two members chosen from the student body at large. The membership now totals sixteen. These members through their strategic positions are capable of creating an attitude of library cooperation among the students in general. These students select from their group a president, a vice-president, two secretaries and a treasurer. The president sits as chairman of all meetings, and the vice-president acts as his alternate. The secretaries take notes of all trial procedure, generally in shorthand. The treasurer collects any cash fines imposed.

The work of the Council requires no great amount of time from any member. At the beginning of each term, Council members address registration rooms, and club meetings, explaining to the pupils the purpose of the Council: to keep as many books in circulation as possible and to give mutual service to all students. They post a copy of library rules in each room. An attendance record is made at the time of the talk, so that absentees may be interviewed later. Articles appearing in the school paper give further publicity to the need for student cooperation with the library system. About five times during the school year desk and locker inspections are conducted. Any library books found long overdue or not legally checked out are returned to the library. These are the basis for the Council trials. The first searches of the Council used to net between fifty and sixty books. At present the searches yield from three to seven books for council consideration. These searches are not made at any regular time, thus automatically checking the disappearance of special books during heavy assignments. After the search, the "book cases" are assigned by the librarian to individual Council members, who inquire into the history of the misplacement of the book. Having done so, a Council meeting is called, the student in whose possession the book was found is brought in, pledged to an oath of truth by the president, and then questioned by the Council member who has prepared the case. Other members are privileged to ask any questions deemed necessary, but it is understood that the selected Council member is to lead the discussion. After the explanation has been given, the student being tried is asked to leave the Council chamber and the question-answer notes taken by the secretaries are carefully examined. If any contradictory statements have been given, these are immediately thrashed out by

the Council with the student. After all such matters are made clear, the Council endeavors to reach a decision. If the student is found guilty, a penalty, which may vary from a fine of fifty cents up to the price of the book and suspension from the library, is proposed. Suspension does not remove the privilege of taking out library books after school, nor the use of the library before classes in the morning. It should be emphasized that in trials no high pressure conviction methods are used, even in cases in which the offender is untruthful.

In any decision of the Council, the student involved is given the privilege of appeal to the librarian or the principal. It is interesting to note that this privilege is seldom used. The Council has through its fair dealing won the respect of the vast majority of students tried. The capability of students of high school age to conduct such a court was questioned in the early days of this system. Several objections were brought forward, the principal one being that such power given to the students would tend to make them egotistical and arrogant; however, the Council with its sincerity and in its purpose of mutual benefit has removed all traces of such objections. Furthermore, the record of a 90 per cent decrease in lost books is an undeniable mark of the success of the system. Training in self-government on the parts of both Council members and offenders is in reality an outstanding point of merit in the system. In the trials the idea of preventing further theft or carelessness is paramount, rather than the idea of punishment for the offense committed. However, cooperation with the Council is insisted upon, and stress is put on the fact that severer justice will be meted out to second offenders.

An indirect result of the Council system is the solution of the discipline problem of the library. The spirit of self-government and cooperation with the librarian as well as with the student leaders has brought about a decided improvement in library conduct. The discipline problem is now practically negligible. Another significant outcome of the Council plan has been made recently. In some cases, if the offender is low in his studies and is dissatisfied with his school work, effort is made to bring him into more complete understanding of his possibilities. Council members have occasionally taken it upon themselves to tutor failing students brought to their attention through Council trials.

Librarian Authors

HARLAN HOGE BALLARD has been librarian and curator of the Berkshire Athenaeum and Museum, Pittsfield, Mass., since 1888. After graduating from Williams College in 1874 he was principal of the Lenox, Mass., High School for six years and principal of the Lenox Academy for another six years. In 1875 he organized and became a trustee of the Agassiz Association for the Study of Nature which has over 1000 branches. In 1882 he published *Three Kingdoms* and in 1892 the *World of Matter*. In 1896 came *Open Sesame* and in 1897 *Reopen Sesame*. In 1902 he translated Virgil's *Aeneid* into English Hexameters (the third edition in 1930 was called Bi-Millennial edition), in 1920 published a Masonic novel entitled *The Tiler's Jewel*, and in 1929 the *Adventures of a Librarian*.

In the *Adventures of a Librarian* Mr. Ballard relates incidents that actually happened in his library. The first chapter tells of "The Most Dangerous Adventure" and reads as follows:

"To publish these incidents as 'Adventures' is adventurous enough to justify the title.

"The telephone bell rang. I recognized the voice of the President of our Library.

"Our librarian is leaving us," he said. "The Trustees offer the position to you. Will you accept it?"

"I know nothing about running a library," I replied, "but if the present librarian will show me the ropes, I will try."

"When can you begin?"

"Now," I said; and immediately entered upon my first and most dangerous adventure.

"One of my good friends told me later that he had voted against my appointment because he thought I wouldn't stick it out more than six months.

"I have been at it forty years."

From this volume we learn that when he began work as librarian his assistants were "a dear old crippled Janitor, who looked very wise in his black skull-cap, and a bright young man who had been for several years with my predecessor and had acquired an accurate knowledge of the location of the books and a casual acquaintance with current criticism." Later he tells how the hardest problem of his professional life was the reclassification and recataloging of his library. "But I knew nothing about the Dewey system, I had had no training in 'Bibliography,' and of our own books I had only a superficial knowledge. Even if I had superintended the making of a catalog, I had no assistants qualified to do the clerical work. All the time of our little 'staff' was needed to meet the increasing demands of the public for regular daily service. Fortunately I had an intimate acquaintance with the most rigid economy; I had the cour-

HARLAN HOGE BALLARD

age of ignorance; and I had a sense of humor; and the greatest of these was the sense of humor. Accordingly, I resorted to the desperate plan of starting a Library Training Class. Big libraries had them. If we could induce two or three intelligent high school girls to give us their assistance for a few hours each week in return for instruction, it might turn the trick. The Trustees agreed to this experiment, and authorized the engagement of a trained 'Expert' to conduct the class and to supervise the reorganization of the Library. . . . We now had two teachers and six new assistants; and work on the new catalogue was begun. After each formal lesson there was an hour of 'practice.' The Expert moved to her alcove and became 'Head Cataloger.' Under her direction the others practiced the 'Library hand-writing,' and soon were writing cards from dictation, and later from printed rules. . . . After each lesson I took my place with the Expert to observe her methods and to learn the Dewey system."

THE LIBRARY JOURNAL

September 15, 1930

Editorial Forum

THE SCHOOL LIBRARY is probably the field in which there should and will be the greatest development in the next few decades. The library for the grade schools and the high school library each have their place, leading from the one into the other and particularly emphasis may rightly be laid as in Miss Roos's paper on the importance of the teen years when the young reader goes from one to the other. This age has been found in our public schools to be the hardest in which to create a reading interest, partly for the reason that the boy or girl of fourteen to sixteen does not want to be included in a children's branch and is not quite in the grown up class for the main library. This experience led in Brooklyn to the establishment at Brownsville of an intermediate library outfit for the tweenies of the "teen" age, a scheme which has proved admirably successful. The school libraries as they develop into full importance will become practically supplements for the public library and relieve that from otherwise uncomfortable congestion.

FOR SEVERAL YEARS the American Associations of Teachers Colleges has considered adopting a set of standards for teachers college and normal school libraries and it is to be commended that at this year's meeting they were accepted. To Dr. George W. Rosenlof goes the greatest credit for this step although during the last year the Committee on Standards and Surveys secured the assistance of a number of interested librarians in teachers colleges and members of various library associations who worked together on the problem. As a result of this cooperation the set of proposals embodied the essentials of Dr. Rosenlof's recommendations and some additional refinements which would make the standards easier to administer. The Standards state that each teachers college shall have at least 15,000 volumes and normal schools offering only two or three years curriculums the minimum shall be 10,000 volumes. It is recom-

mended also that by 1940 these minima shall be increased to 25,000 and 17,000 respectively. The books are to be distributed among the various Dewey decimal classifications in certain proportions which it is hoped will be revised from time to time in order that they may be adjusted to changing emphasis in the work of teachers colleges.

WHAT ONE WOMAN can do, if she sets her mind to it with heart and soul, and how much can come from incidental sowing of good seed are interestingly illustrated in the case of Miss Minster and the Altoona High School Library. When its principal expressed the hope that some day there would be a room for books and a librarian, Miss Minster decided that this should come to pass and that she should be the librarian—and so it proved. The Altoona High School Library sets the pace for many others and Miss Minster may well be patterned in many a community.

NOT ENOUGH general attention has been paid to the very democratic and most excellent scheme worked out at Portland, Ore., of a student council within the school system, with especial reference to the school library, particularly where books are loaned from a central library for school use. There is apt to be more or less stagnation in circulation within the school as well as waste and loss in the handling and return of books. The student council in Portland faces this difficulty to good result by inspiring the use of books and by making sure of books being returned either to the central library or the school library. Incidentally, where books are loaned from a central library for school use there is quite a problem as to how circulation should be counted. The scheme of allowing for the circulation of each book every two weeks is perhaps as fair an estimate as can be made. The student council idea is not only of use in the library, but should lead up usefully to the wider application of this democratic method when the boys and girls become college students.

NEW YORK, with the births since the census date, has reached its desired seven million population and is recognizing at last the fact that it must be great in its library development, as well as in other respects, and must keep up with

the procession. Manhattan Borough, with the greatest of public libraries and with its forty-five branch libraries and eleven sub-branches for its diminishing population, is adequately supplied, but the great division of the Bronx, which is included with Manhattan in the original New York Public Library system, has a fast growing population which needs more branches and particularly demands a central reference library nearer than that at Forty-second Street. Brooklyn is making a new start on its central library building, and the Board of Estimate has provided for seven new branch libraries for which it is hoped to select sites within the present month, thus rounding up Librarian Hill's great record of more than a quarter of a century before he turns over his responsibilities to Mr. Ferguson. Queens has now its central library building, but also needs new branches for its rapidly expanding population and the Board of Estimate has provided for six here. Brooklyn is taking the lead in expansion of population and its library board receives one application after another for a branch in a district whose population has become that of a small city, and Queens and the Bronx are little behind it in population growth. There is naturally a good deal of criticism of the enormous budget for which Greater New York must provide, but when the total library appropriations are divided by the number of inhabitants it will be noted that the figures fall far short of the dollar per capita, which is the A. L. A.'s minimum standard.

ONE OF THE EARLIEST legislative acts of the new Republic of Czechoslovakia under President Masaryk—possibly inspired by his American wife, a sister-in-law of Frederick Leyboldt—was the establishment, at least on paper, of the most complete library system in the world. The visitors from other countries at the Prague Library Conference of 1926 were surprised and gratified at the progress which had been made in a decade and the figures reported on another page seem colossal. It is to be noted, however, that the number of books, of readers and of circulated volumes when averaged for each library proves rather small and a compulsory law if prematurely put in operation sometimes produces results like the ill success of the New York district school law of years ago which arbitrarily created libraries in each school district so insignificant that they were soon forgotten and disappeared from view. Nevertheless each library, however small, is a beginning and Czechoslovakia bids fair to rival Finland, which far outranks the United States in literacy.

Library Chat

ON THE lonely island of St. Joseph, on the north shore of Lake Huron, there is a small building that, owing to its dual functions of jail and library may well claim the title of Prison Library. Built about thirty years ago to house the local lawbreakers until the Canadian government could remove them to the mainland, it was little used. In an island eight miles wide and about twenty long, crime conditions were so satisfactory that the one-man police force rarely locked up more than two persons per year.

Fifteen years ago the islanders became "library-minded," but no funds were available for a suitable structure until the little-used jail was chosen. Soon the walls of the two cells were transformed by bookshelves and the corridor fitted up with more shelves and a large kitchen table installed to act as librarian's desk. In one of the cells the children's books were placed, while the other one served to store the weighty volumes on philosophy that kind friends discarded and sent to the library.

The heating plant of the building was, and is, a large black stove of the general store variety that provides ample heat only within the three-foot limit. Fuel is supplied by the village, but the librarian is required to light the fire, sweep the floor and keep the building open three afternoons per week, all for a yearly salary that does not reach three figures.

Recently some confusion was caused by the robbery of a store and the consequent arrest of the suspect. Naturally, the jail was again in demand, and the librarian, after a conference with the policeman, decided to house the suspect with the philosophical treatises rather than the children's books as less moving was necessary.

~ H. C. Gourlay.

THE UNIVERSITY OF ARIZONA reports another publication which its library staff prints on a hand-press. It is about 3 x 5 inches in size, each issue is printed on a different color of paper, and it is called *The Bookmark*. There was a special number to welcome the new students, which contained a guide to the library and library regulations in brief. The November issue started as follows:

THE LIBRARY'S EIGHTEEN DAY DIET

If it takes 1200 pounds of fish daily to satisfy Goliath, the sea elephant, it must take two pounds of reading matter per day to ease the hunger of a Senior, and at least that much per week for a Freshie. Reckoning 200 calories for a Zane Grey book and 800 for Einstein, we have a total of 1600-2400 calories per student. Have you had your calories today?

Current Library Literature

Intended to index with brief annotation, or excerpts when desirable, articles in library periodicals, books on libraries and library economy and other material of interest to the profession. The subject headings follow those in Cannons' "Bibliography of Library Economy," to which this department makes a continuing supplement. Readers are requested to note and supply omissions and make suggestions as to the development of this department.

ALLEN LUMBER COMPANY, PEORIA, ILL. HOME LOVERS' LIBRARY

Dealer's library leads way to better business. illus. Chicago. *Building Supply News*. 39:123-126. 1930.

The Home Lovers' Library of the Allen Lumber Company, Peoria, Ill., is open to the public. It has 300 textbooks on architecture, and as many more on decorating and landscaping. There are in addition current architectural and building periodicals, household magazines which devote space to home building and beautification, and about 2500 catalogs of manufacturers of building materials.

BOOK PRICES

Lewis, L. J. Low-priced book editions. *South Dakota Lib. Bull.* 16:28-33. 1930.

With classified list of low-priced books—nature, literature, travel, biography, novels of distinction, popular novels, children's books, etc.

BOOK SELECTION

Brigham, H. F. Book collections and book service. *Booklist*. 27:1-6. 1930.

"Three problems which must be met if the selection of books and the book service in public libraries are to be improved are the organization and systematization of book selection and routine and practices, the organization and systematization of discarding routine and practices, and the collection and intelligent use of government documents. The two important problems of book selection is limiting the selection aids which are used regularly to a small number carefully chosen to meet the needs of the particular library; and second, the desirability of using all qualified members of the staff in the selection routine for the good of the staff members as well as of the library as a whole."

BOOK WAGON DELIVERY

Fitch, A. F. The Book Bus in the Arrowhead. illus. *LIB. JOUR.* 55:679-681. 1930.

A typical week's program of the Hibbing (Minn.) Public Library's Book Bus.

BOOKMAKING

Kittredge, W. A. The book as a work of art. illus. *Booklist*. 26:419-428. 1930.

"I wish that librarians might concern themselves more with the physical form of books and thus encourage the publishers and designers who are doing what they can to improve the arts of bookmaking. In almost every community there are typographers and printers who would find much interest in books selected on account of the thorough and fine way in which they are made. Every year there are special editions of illustrated books, printed at reasonable prices—books which might well be included in the collections of public libraries. In the making of children's books, a special taste and talent is shown. . . . There are various publications about book collecting such as *The Fleuron* from England, and *The Colophon*, now being issued in the United States. These publications are not too expensive, and would be desirable acquisitions to the library. They will give the librarian a clue as to where much material can be found."

BORROWERS

Clarke, G. E. Borrowers. *Lib. World*. 23:3-4. 1930.

"There are three classes of borrowers—those who want a particular book; those who want a book on a particular subject; and those who simply want a book to read. . . . What can be done with them [the third class]? Have they really got individual feelings and desires or have we to deal with them in the mass? I think, a little regretfully, that we must take the latter alternative. It is missionary work, and work that we might well be proud to do."

CATALOGING

Hall, A. G. Cataloging problems in county libraries. *LIB. JOUR.* 55:686-687. 1930.

"For the catalog at central let me be for once emphatic and unbending. It is the central pivot, the main bearing, on which all our machinery rests, no matter how loosely knit our organization, how inadequate our book collection, or how small our funds. One thousand books carefully chosen, intelligently classified and thoroughly cataloged make a foundation for a far more effective library, both for pleasure and information, than thousands of books carelessly arranged and completely buried from the public by indifferent cataloging, or even, may I whisper it, in some counties by no cataloging at all."

CHILDREN'S LITERATURE

The July, 1930, issue of *Wis. Lib. Bull.* (26:204-221, 1930.) is chiefly devoted to the subject of children's reading, with articles by Mary D. Rains on "The Child and the Book," "The Child's Joy in Reading," by Flora Emily Hottes, "Books for the Between Ages," by Sterling Andrus Leonard, a list of books of interest to boys and girls—grades seven and eight; plans for children's summer reading; and aids for librarians in children's reading and work.

COLLEGE LIBRARIES

College and Reference Library Yearbook Number Two. Compiled by a Committee of the College and Reference Section of the American Library Association. A. L. A., 1930. pap. 146 p. \$2.

Partial contents: College Library News, 1928-1929; Bibliography of American College Library Administration; University, College and Reference Library Statistics; Recent Bibliographical Undertakings; Suggestions for Minimum College Library Standards; Building Plans (Universities of Illinois, Rochester, Cincinnati and Loyola University); Directory of Librarian in College and University Libraries; Directory of Reference Librarians in Public Libraries.

COUNTY LIBRARIES

Underwood, Ruth. Yes! we have a library! illus. *LIB. JOUR.* 55:681-684. 1930.

Service library stations of the Harris County Public Library, Houston, Texas.

Winning, Margaret. Equalizing library opportunities: town and country. *LIB. JOUR.* 55:684-685. 1930.

An historical, statistical, and international survey of county libraries by the county librarian of the Public Library of Fort Wayne and Allen County, Indiana.

See also CATALOGING.

EDUCATION, ADULT

Willard, J. D. Rural adult education and libraries. How far have forces of all agencies been mobilized to forward library development? *Adult Ed. and the Lib.* 5:67-74. 1930.

"The extension service in home economics and agriculture has done more than any other force in the United States to focus thinking of communities and leaders on community needs. . . . How many of the 5,800 extension workers themselves know what service the county or state library can give or should be enabled to give? How many of the 5,800 know how to make effective use of the library for themselves? How many of the 273,518 volunteer leaders in the extension service projects last year ever heard of a county library or have any understanding of the possibilities in library books and their use?"

This article is followed by another by F. K. W. Drury and Elta Lenart of the A.L.A. Adult Education Office, entitled "What Some Libraries Are Actually Doing for Rural Readers," which presents in brief form a few answers to a questionnaire asking county librarians what they actually do for their patrons. (p. 75-84.)

ETHICS, PROFESSIONAL

Suggested Code of Ethics for Librarians. A. L. A. 1930. pap. 4p. Rates in quantities.

Adopted by the Council of the A.L.A., December, 1929, as a suggested code of ethics, and voted to be published as a basis of any future code.

GOVERNMENT DOCUMENTS

Horrocks, Sidney. Government publications. *Lib. Assn. Record.* n. s. 8:93-104. 1930.

"This article is concerned chiefly with Sessional papers (1a, 2a, 2b), Command papers (3), and non-Parliamentary papers; for information regarding 1b, 1c, 2c, 2d and 2e, the reader is referred to the excellent article by Mr. H. B. Lees-Smith on 'Parliamentary and Official Papers' in the *Library Association Record*, 1924, vol. ii, new series." An appendix of approximately three pages lists selected government publications (1928) with prices.

HIGH SCHOOL LIBRARIES

Webb, H. A., comp. *The High-School Science Library for 1929-1930.* Reprinted from the *Peabody Journal of Education*, vol. 8, no. 1, July, 1930. pap. 14p. 1930.

Sixth annual compilation by the editor of *Current Science*. Classified: Science in Home and Community, The Forms of Land and Water, Exploration and Travel, Flying and Fliers, Living Creatures of Earth, etc.

JUNIOR COLLEGE LIBRARIES

Eells, W. C. *Bibliography on Junior Colleges.* Washington: Govt. Prtg. Off., 1930. pap. 167p. 25c. (U. S. Dept. of the Interior, Office of Education, Bull., 1930, no. 2).

Contains about 25 bibliographical references to libraries.

LIBRARIES

Société des Nations. Institut International de Coopération Intellectuelle. *Guide des Services Nationaux de Renseignements du Prêt et des Echanges Internationaux.* Paris: Institut International de Coopération Intellectuelle, 1930. pap. 49p. (Coordination des Bibliothèques).

Successor to a previous brochure, *La Coordination Internationale des Bibliothèques*, published by the Institut in 1928. Arranged alphabetically by countries. Enumerates briefly the address, organization, aims, resources, conditions of use and means of reproducing material of the principal libraries of the world.

CALIFORNIA

Los Angeles County. Civic Bureau of Music and Art. *Los Angeles County Culture and the Community.* Chamber of Commerce Building, Los Angeles, Calif. pap. illus. No pagination.

The six-page section on Literature describes briefly and gives views of the Los Angeles Public Library, Huntington Library, etc.

LIBRARY ASSOCIATION

Chubb, L. Amalgamation—and after. *Lib. Assistant.* July, 1930. p. 141-148. 1930.

Presidential address delivered at the 35th annual meeting, held at Norwich, England, June 11, 1930. The Association, conducted on more liberal lines than in the past, has a membership of 3,000, as compared with 850 in 1927, and is the largest organization in Europe of librarians and persons interested in the bibliographical sciences.

LIBRARY OF CONGRESS. See PUTNAM, HERBERT

LIBRARY SCIENCE

Ballou, C. A. A laboratory course in applied library science—a study. *Mich. Lib. Bull.* 21:207-208. 1930.

Paper read at the library section of the Michigan Schoolmasters' Club, April 18, at Ann Arbor. The outline of study arranged for Detroit high school libraries used the laboratory method with supervised study, which seemed to be the logical as well as the entertaining method of instruction. Two and one-half hours credit per semester is allowed, and in two years about fifty pupils have been enrolled.

LIBRARY WORK WITH CHILDREN

Bowerman, G. F. *A Chief Librarian Looks at Work with Children: Pittsburgh's Contribution Thereto.* Pittsburgh, 1930. pap. 22p.

Address delivered by the librarian of the Washington (D. C.) Public Library at the twenty-ninth annual commencement exercises of the Carnegie Library School in Pittsburgh, June 7, 1930, the last before its merger with the Carnegie Institute of Technology. Discusses the scope, purpose, and ideals of sound library work with children; its relation to library work for adults; the desirable qualities of children's librarians—their personal and educational equipment, fundamental training and continuing education and training; the status of the children's librarian; her recognition as to salary and her rank in her own library.

PITTSBURGH, PA. CARNEGIE LIBRARY. See LIBRARY WORK WITH CHILDREN; SCHOOL AND LIBRARY COOPERATION.

PUBLIC LIBRARIES

Hodges, Ella. Can we have a service measuring stick? What good is it? *Lib. Occurrent.* 9:224:226. 1930.

"Thus to see our library as one of the important agencies of the community, to see the special needs of the community in the principal phases of common life activities, and then to consciously measure our service against these needs in a manner of their relative importance is to demonstrate wherein the library is a real piece of the texture of the community and not merely a cultural appendage."

PUTNAM, HERBERT

Hard, Anne, The nation's librarian. illus. *New York Herald Tribune Magazine.* July 6, 1930. p. 12-13; 24. 1930.

"Significantly in this age, Herbert Putnam, impersonally serious, delicately humorous, penetrating and above all creatively executive, stands as a combination in himself of librarian and educator."

RADIO AND LIBRARIES

Nowell, Charles. Broadcasting and public libraries. *Lib. Assn. Record.* n. s. 8:81-92. 1930.

Abridged from a lecture to the members of the North Western Branch of the Library Association. "Broadcasting, by its talks and lectures, has introduced to thousands of listeners many subjects of absorbing interest, and librarians have been made aware of the relatively large number of borrowers who strive in their own way to follow up this listening by reading one or more of the books recommended. What happens to individuals listening by their own firesides is intensified when a group is listening, a group which not only hears the broadcast lecture, but discusses it afterwards." For a successful group there are three important points to watch: The instrument should be a good one; the group leader should be able to elucidate points which the lecturer cannot fully explain in the limited time at his disposal; and the group nucleus should be local societies interested in the subjects under discussion. Two (British) publications of value are *The Radio Times* and *The Listener*.

REFERENCE LIBRARIES. See COLLEGE LIBRARIES

ROSENWALD FUND

Marks, Robert. The library as a culture-museum. *LIB. JOUR.* 55:688. 1930.

"The Rosenwald aid to libraries is one designed to stimulate rather than support. Its library program is based on an effort to implant in the communities of the South a realization of the needs for cultural activity and a conception of the means by which this aid can be realized."

SCHOOL AND LIBRARY COOPERATION

Foster, M. E. The possibilities in a cooperative plan of school library administration. *Penn. Lib. Notes.* 12:134-136. 1930.

The administration of school libraries in Pittsburgh now covers a professional library at the Board of Education Building; a library in a teachers' training school; 16 high school libraries with 31 trained librarians; 83 elementary school libraries; class-room collections in 24 schools, and two stations.

(Continued at foot of page 736)

The Children's Librarians' Notebook

Berry, Erick. *Penny Whistle*. Macmillan. \$1.

Glad that Erick Berry has made her Africa live in a book for the smaller children. I think that children will enjoy it nearly as much as *Little Black Sambo*, especially those who can reproduce the music notes Penny Whistle learned.—M. W.

Davis, Mary Gould. *Baker's Dozen*. Harcourt, Brace. \$2.

This selection of stories which has proved to be of lasting interest to children will be most valuable to both teachers and parents for telling or reading aloud. The collection is so varied that it will be of interest to all types and would be a decided asset wherever there is a demand for such material.—M. P.

Everson, Florence M. *Puppet Plays for Children*. Beckley-Cardy. \$1.

A collection of four plays for puppets and one shadow play, with easy and simple directions for making and staging the puppets. Would be most helpful for school project work and simplest book of its kind I have found. May be able to interest the county school children with a few copies and hope the demand will grow to warrant a larger order.—M. W.

Field, Rachel. *Pointed People*. Macmillan. \$1.25.

A new edition with added poems which will delight all ages of children and will help to interest the uninitiated in the reading of poetry. Black and white silhouettes are most attractive. Must check shelf list before ordering for all branches and school collection.—M. W.

Hader, Berta and Elmer. *Lions and Tigers and Elephants Too*. Longmans, Green. \$1.25.

Just the sort of book needed for primary children, both in school and out. Because of paper binding will order reenforced binding for the school collections.—M. W.

Morris, Kenneth. *Book of the Three Dragons*. Longmans, Green. \$5.

This is a most attractive retelling of old Welsh legends. The book is beautifully bound and contains several striking illustrations which are well suited to the theme. However, its appeal is quite limited and since the book is fairly expensive its use in our library would not be great enough to warrant its purchase.—M. P.

O'Donnell, Elliott. *The Boys' Book of Sea Mysteries*. Dodd, Mead. \$2.

I doubt if this type of book would interest the mid-Western "land-locked" boy. It is made up of many short, curt reports of unusual happenings at sea and would interest only those brought up on sea lore. Will not buy.—M. W.

Palm, Amy. *Wanda and Greta at Broby Farm*. Longmans, Green. \$2.

Story of the happenings to two girls on their farm home in Sweden. Will not buy—too far remote from life on an ordinary farm home. The story does not ring true.—M. W.

These books are actually reviewed by different children's librarians in the field. The name of the reviewer of any book will be given upon request.

SELIGMAN ECONOMIC LIBRARY

Hill, E. C. A priceless treasure of business. *Nation's Business*. 18:33-35, 164, 166. 1930.

An account of the economic library of 50,000 books, pamphlets, autograph letters, broadsides and handbills collected over a period of fifty years by Edwin R. A. Seligman, professor of Political Economy in Columbia University, recently sold to the university library, where it is known as "The Seligman Collection." It includes the library of American finance collected from 1830 and 1880 by Albert S. Bolles of Philadelphia, given to Professor Seligman by his brothers in 1887 as a wedding present; and half of the remarkable collection assembled by Francis Place. It is especially strong in British patent office reports, German Socialistic and Communistic literature, early English and American labor periodicals, and the early literature of fire and life insurance. The collection on the Bank of England and the early projects for land banks is probably unique. The Americana of the library is of the greatest interest and importance.

TEACHERS COLLEGE LIBRARIES

American Association of Teachers Colleges. A Department of the National Education Association. *Ninth Yearbook* 1930. pap. 160p.

Standards recommended for the libraries of teachers colleges and normal schools, p. 134-135. "Each teachers college shall have at least 15,000 volumes, exclusive of public documents and bound periodicals. For normal schools offering only two and three year curriculums the minimum shall be 10,000 volumes. It is recommended that by 1940 these minima shall be increased to 25,000 and 17,000 respectively. In computing the number of volumes in a library not over 15 per cent shall be allowed for duplicates." Recommended percentages for the distribution of books among the Dewey decimal classifications are given. (See p. 741 of this issue.)

THEFTS, BOOK

Partridge, Robert. Public library thefts. *Ln. and Book World*. 19:387-388. 1930.

"The psychological explanation is that these thefts arise from a misconception on the part of the pilferer regarding public property. If his conscience ever pricks him he argues to himself, curiously enough, that the things in the library, being public property, are there for anyone to take. If he does not avail himself of the opportunity, somebody else will. . . . The power of publicity has not been sufficiently utilized. Occasional articles in the local newspapers, honestly informing citizens of the losses sustained by their libraries, and appealing to the good nature of the public, soliciting its aid to protect its own property, might also help."

THORDARSON LIBRARY

Bay, J. C. *Bibliotheca Thordarsoniana*; a private collection of scientific and technological literature. illus. por. In: *Bibliographical Society of America. Papers*. v. 23. Part One, 1929. p. 1-17.

The private library of Chester H. Thordarson of the Thordarson Electric Company, Chicago, contains about 25,000 books, comprising original sources and monumental works covering the history and development of science and technology. His collection of Icelandic and Islando-Americana ranks third in the country, Cornell University (the Fiske Collection) and Harvard University having more extensive collections.

TORONTO (ONT.) CENTRAL CIRCULATING LIBRARY

Miller, E. V. D. Impressions of Toronto's new library. illus. *LIB. JOUR.* 55:689-690. 1930.

Brief account of the dedication of the new Toronto Central Circulating Library.

School Library News

Index to Material on Libraries

THE FOLLOWING INDEX to the material on libraries, books and reading in some of the most recent readers has been compiled by Elizabeth O. Williams of the Los Angeles City School Library to aid the teacher in bringing a wider understanding of the use of books and libraries to every boy and girl from the first through the upper grades of the elementary school.

I. HISTORY OF BOOKS

- Learn to Study Readers.* Horn, Ernest, and others. Ginn.
 Book III. Horn Book and New England Primer. p. 271-274.
 Book IV. Story Books of Colonial Children. p. 247-253.
 Book V. Story of How Man Has Left Records. p. 190-209.

V. BOOKS AND READING—BOOK LISTS

- Child Story Readers.* Freeman, F. M., and others. Lyons & Carnahan.
 Book IV. *Keeping a Record of Your Reading.* p. 19-20.
 Books V and VI. "Books to Read"—following each selection.
Facts and Fancies. Lewis, W. D., and Rowland, A. L. Winston.
 Fourth. *Aboard the Good Boat "Books."* p. 36-39.
Laidlaw Readers. Dressel, Herman, and others. Laidlaw.
 Primer. *Good Stories.* p. 62-64.
 First. *Good Stories.* p. 16-17.

- Learn to Study Readers.* Horn, Ernest, and others. Ginn.
 Book IV. *What to Remember About Stories and Poems.* p. 26-32.
Lincoln Readers. Davidson, Isobel, and Anderson, C. J. Laurel.
 Fourth. *Never Without a Book (Abraham Lincoln).* p. 2.
Newson Readers. Hardy, R. L., and Bryce, C. T. Newson.
 Book I. *Good Times. For Our Bookshelf.* p. 127.
 Book II. *Open Door. For Our Bookshelf.* p. 206-207.
 Book III. *Storyland. For Our Bookshelf.* p. 286-287.
 The Land of Story Books. p. 16-17.
 Book IV. *Book Friends. Authors and Artists We Like.* p. 327-328.
 For Our Bookshelf. p. 349-351.
 Making Stories Come Alive. p. 252.
 Interesting Books About Birds. p. 157-158.
 Lewis Carroll and His Books. p. 59-62.
Pathway to Reading. Coleman, B. B., and others. Silver, Burdett.
 Second. *When Mother Reads.* p. 164-165.
Reading Hour. Rowland, S. V., and others. Winston.
 Book IV. Johnston, A. F. *Book Houses.* p. 1.
 Booklists. p. 21.
 A Book-House Friend. p. 259-261.
 Brief Book lists follow each chapter.
Scouting Through. Lewis, W. D., and Rowland, A. L. Winston.
 Sixth. *Reading Poetry.* p. 187-195.
Silent Readers. Lewis, W. D., and Rowland, A. L. Winston.
 Fifth. *What Shall I Read?* p. 126-129.
Stone's Silent Reading. Stone, C. R. Houghton Mifflin.
 Book IV. *What Do You Read at Home?* p. 155-156.
 Book V. *Books That Boys and Girls Like.* p. 280.
 Interesting Informational Books. p. 282.
 Book VI. *Books That Boys and Girls Like.* p. 54-59.
Study Readers. Walker, Alberta, and others. Merrill.
 Primer. *Making a Bookcase for Father.* p. 26-35.
 First. *Books and Reading.* p. 28, 34, 35, 40.
 Third. *Story Book Friends.* p. 15-16.
 Fourth. *What Books Give Us.* p. 1-3.
 Sixth. *Making Book Friends Come to Life.* p. 130-136.

Bookbinding Exhibit in Brussels

BOOKBINDINGS belonging to periods from the twelfth to the sixteenth century are being shown at the Royal Library in Brussels. A second exhibit of bookbindings from the seventeenth century down to our day will follow within a few months. About 550 bookbindings figure in the first exhibit. They are of great variety and yet every one distinctly belongs to its epoch. As the organizers of the exhibit point out, only the twentieth century has dared to break away from symmetry in book covers and all these bindings from the twelfth to the sixteenth century observe the same laws of harmony and symmetry.

In The Library World

Los Angeles County Dedicates Branch

ON Friday, June 27, over a hundred librarians, attending the A. L. A. convention in Los Angeles, motored to Palos Verdes Estates to attend the dedication exercises of the new library building, a branch of the Los Angeles County System.

The building of reinforced concrete and designed by Myron H. Hunt, was erected at a cost of \$60,000 provided through a bond issue voted by Palos Verdes Library District. Another \$30,000 was used for the site, landscaping, and furniture. On the main floor entering from the park is a long reading room 80 by 26 feet, adjoining which is a children's room 35 by 24 feet, and the main stack 34 by 26 feet. There is also a work room on this floor with a rest room for employees. Opening off of this floor there is a large garden enclosed open air reading room or patio, with covered porch. On the floor below is an exhibit hall, 48 by 24 feet, for month to month shows of paintings, sculptures, prints, etc.; it will also be used for chamber music, lectures, and meetings of local bodies. Back of the exhibit hall is a large storage vault for paintings, rare books, and art objects, a large unpacking room, and boiler room. The high ceilings on both floors are arranged for two additional mezzanines for stack space, ultimately estimated to take care of 30,000 volumes.

The hand-made walnut furniture is patterned after real pieces of antique Italian design and was all made by the Palos Verdes Guild at Portuguese Bend. The books, librarian, and cataloging are furnished by the Los Angeles County Library under contract with Palos Verdes Library District, but the trustees plan to purchase some books each year and expect to receive gifts.

Palos Verdes Estates Library, a branch of Los Angeles County

Bronx Library Urged

A MOVEMENT to obtain from the Board of Estimate funds for a public reference library in the Bronx was started August 29, when 200 residents of that borough attended the first of a series of rally meetings in the auditorium of the Fordham Branch Library. Colonel Daniel P. Sullivan, civic worker, presided. Letters in support of the movement were received from Chancellor Elmer Ellsworth Brown of New York University and the Rev. William J. Duane, S. J., president of Fordham University, both of whom had been invited to attend the meeting. Colonel Sullivan, in stressing the need for the proposed library, asserted that agitation for it had been in progress for two months.

He said that as a result of this movement an item of \$25,000 had been included in the Board of Estimate's next budget and would come up for a hearing in October. Of this amount \$20,000 would be used for the purchase of books and the remainder would be set aside to pay the librarian and other expenses, he said.

Library Station in Business Arcade

THE CARNEGIE LIBRARY at Alliance, Ohio, has a library booth which forms a part of the Arcade News Stand near the entrance to the principal business arcade on Main Street in Alliance. This station was opened in 1927 with approximately six hundred adult volumes. The contract has been on a monthly rental basis, the rent to include the service of attendance on the public, except on Saturday afternoons and evenings, when a representative from the Main Library is in charge. Almost from the beginning the station attracted many people who had not been in the habit of using the Main Library, while others began to take

books more frequently because it was convenient for them while shopping. The counter for charging books opens directly on the arcade and beneath is a glass case for the display of books. During the past three years it has proved that the publicity received by the Library as a whole has been of as great benefit as the circulation of books from the booth. Many patrons who register at the station begin later to frequent the Main Library, which is on a hill several blocks from the business section of the city. The station is open very nearly as many hours as the Main Library. Requests to have books reserved are received there in the same manner as they are received at the Library. Patrons are told, however, that because of limited space at the station they cannot return Main Library books there and must return all station

books to the station. About a year ago a collection of approximately one hundred attractive books for little children, mostly "easy books," was placed at the station as an accommodation to parents, who are permitted to borrow them on their cards. The lessees of the building appreciate having the library station in the arcade and when the news stand was temporarily vacant during a change in ownership, they permitted the library to continue the station without rental charge, except for heating and lighting. The rent has been reasonable and it has been found that the cost per book circulation, even with a liberal allowance for Main Library overhead expense, has been less than that of the library system as a whole.

Prizes For Best Essay

THE NEW YORK LIBRARY ASSOCIATION is offering prizes for the best essay on Library Publicity, submitted at the annual meeting in Albany, October 14-17. The paper may be either an account of Library Publicity achieved, plans for such publicity, or attractive ways of calling attention to the library service within the building or through window displays, club meetings, newspaper, or any other sources. Papers are not to exceed 500 words in length.

Graded List of Children's Books

UNDER the direction of a committee of the American Library Association, Nora Beust, librarian of the School of Education Library, University of North Carolina, has compiled a *Graded List of Books for Children* with the needs of both teacher and librarian in mind. No text-books as such are included, only books for general reading, supplemented with titles

which meet local school needs. For the convenience of teachers and librarians, a list of reference books useful for the first nine grades has been added and the editor has provided a general subject index, basing the choice of subject headings largely on those indicated in the *Children's Catalog*, compiled by Minnie Earl Sears. There are

Alliance Book Station in the Business Arcade

three lists: Section A, picture books and easy reading books for children in grades one, two, and three; Section B, titles for fourth, fifth, and sixth grade pupils; Section C, for seventh, eighth, and ninth grade children. All grades in which a book may be used are designated after the individual entry. The volume is published by the American Library Association, Chicago, Ill.

Two Cities Cooperate Over Radio

PROBABLY the first case to be recorded where two libraries in different cities cooperate on weekly radio book talks is that of the Des Moines, Iowa, Public Library and the Davenport, Iowa, Public Library, which are 175 miles apart. Every week during the past two years the Des Moines Public Library has broadcast a program consisting of book reviews, but since the synchronization of stations WHO at Des Moines and WOC at Davenport, the two libraries have decided to cooperate with the book programs, although all programs will be broadcast from the Des Moines studio.

Standards for Teachers Colleges

AMONG THE ITEMS to be considered by the Committee on Standards and Surveys, American Associations of Teachers Colleges, during the year were the standards for teachers college and normal school libraries, which were presented to the Association in Boston, again in greater detail by Dr. George W. Rosenlof at Cleveland last year, and which were laid on the table for consideration at this year's meeting. During the year the Committee secured the assistance of a number of interested librarians in teachers colleges, and members of various library associations working on the problems of library standards. As a result of this cooperation the Committee was able to prepare a set of standards for teachers college and normal school libraries which embodied all the essential elements of Dr. Rosenlof's proposal of last year and some additional refinements, approved by the representatives of the library groups and by Dr. Rosenlof, which would make the standards easier to administer. The Committee recommended the substitution of the revised standards for the standards as submitted last year. The standards adopted are as follows:

1. *Books and Periodicals:* Each teachers college shall have at least 15,000 volumes, exclusive of public documents and bound periodicals. For normal schools offering only two or three year curriculums the minimum shall be 10,000 volumes. It is recommended that by 1940 these minima shall be increased to 25,000 and 17,000, respectively. In computing the number of volumes in a library not over 15 per cent shall be allowed for duplicates. The books should be distributed among the various classifications in approximately the following order:

CLASS	SUBJECT	PER CENT
000-099.9	General Library Bound Periodicals...	7.5
100-199.9	Philosophy and Psychology.....	5.0
200-299.9	Religion and Bible Stories.....	2.5
300-399.9	Sociology and Education.....	20.0
400-499.9	Language and Philology.....	2.5
500-599.9	Sciences	7.5
600-699.9	Useful Arts	7.5
700-799.9	Fine Arts	5.0
800-899.9	Literature	20.0
900-999.9	History and Geography	20.0

(These proportions should be revised from time to time in order that they may be adjusted to changing emphasis in the work of teachers colleges.)

Each teachers college library shall provide not less than 150 periodicals appropriate to the academic, cultural and professional needs of the institution. *Parts 2, 3, 4 and 5 are to be considered only as recommendations.*

2. *Training School Library:* Each teachers college or normal school should also provide at least one (if elementary and secondary training

schools are separately housed, separate libraries are desirable) training school library, which will be administered by the teachers college library and which will serve the needs of the training school students and serve also as a model and practice unit for the teachers college students. The books in the training school library may be counted in the minimum total but not to exceed 20 per cent of the total.

3. *Staff:* Each teachers college or normal school with an enrollment of less than 1000 "full-time" students should employ at least two full-time librarians in addition to the librarian or librarians in charge of the training school libraries. An additional full-time librarian should be employed for each additional 500 full-time students or major fraction thereof above 1000. These librarians should have academic qualifications equal to those prescribed for regular faculty members in Standard V-B. This training should include at least one year's work in an approved library school. These librarians should be accorded the same privileges as any other members of the instructional staff. Assistants should be employed as needed to care for necessary clerical and routine work in the library. Additional assistance should be provided as needed in colleges offering a definitely organized curriculum for the training of special teacher-librarians.

4. *Budget:* Each teachers college or normal school with an enrollment of less than 1000 "full-time" students should apportion annually to the library not less than 7 per cent of the entire college budget for current expenses exclusive of capital outlay and such supplementary business operations as dormitories, cafeterias and book stores. For enrollments more than 1000 and less than 1500 the per cent should not be less than 6 and for enrollments over 1500 the per cent should not be less than 5. This amount should be apportioned to salaries, books and other items in approximately the following proportions:

	PER CENT
1. Salaries and wages.....	55
2. Library supplies.....	2
3. Travel	1
4. Printing and publications.....	2
5. Binding and repairs	5
6. Books	25
7. Periodicals	5
8. New equipment	3
9. All other items.....	2

5. *Physical Equipment:* The library should be housed so as to provide reasonable safety from fire for the stacks; adequate provision for reading, reference work, and use of periodicals; accessions, cataloging and work rooms; librarian's office, reserve book and loan desk service; library methods classrooms, and the equipment necessary for efficient service in all departments of the library.

Important Italian Books Published Within the Last Five Years

Compiled by LEONILDA I. SANSONE
Italian Librarian, Aguilar Branch, New York
Public Library

Historical Novels

- Bacchelli, Riccardo. *Diavolo al Pontelungo*. Ceschina, Milan. 1927. 2 vol.
Corra, Bruno. *Passatore*. Alpes, Milan, 1929.
Gasparotti, Luigi. *Sparvieri*. Treves, Milan, 1928.
Monti, Alessandro A. *L'Avventura di Luchino Tarigo*. Ceschina, Milan, 1929.
Novelli, Enrico. *Fiamma su la balzana*. Bemporad, Firenze, 1928.
Zuccoli, Luciano. *Scandolo delle Baccanti*. Treves, Milan, 1929.

For Students of Italian (edited with notes and vocabulary)

- Bracco, Roberto. *Piccolo santo*. Century.
Cowper, F. A. G. *Italian folk tales and folk songs*. Chicago Univ.
Farina, S. *Fra le corde di un contrabasso*. Chicago Univ.
Fucini, Renato. *Novelle e poesie*. Chicago Univ.
Marraro, H. R. *Contemporary Italian short stories*. Holt.
Pirandello, Luigi. *Così e se vi pare*.
Reinhard and de Filippis. *Novelle Italiane moderne*. Century.
Wilkins and Altrocchi. *Italian short stories*. Heath.

Books Reflecting Contemporary Italian Thought

- Angiolietti, G. B. *Giorno del giudizio*. Ribet, Torino, 1928.
Borgese, G. A. *Ottocento Europeo*. Treves, Milano, 1927.
Croce, Benedetto. *Storia d'Italia*. Bari, Laterza, 1928.
Gentile, Giovanni. *Educazione e la scuola laica*. Vallecchi, Firenze, 1927.
Gentile, Giovanni. *Fascismo e cultura*. Treves, Milano, 1928.
Pagano, Luigi. *Fionda di Davide. Saggi critici*. Bocca, Torino, 1928.
Papini, Giovanni. *Sant' Agostino Vallecchi*. Firenze, 1929.
Volpe, Gioacchino. *Guerra, dopoguerra fascismo*. La Nuova Italia, Venezia, 1928.
Volpe, Gioacchino. *Italia in cammino, l'ultimo 50 anni*. Treves, Milano, 1928.

Contemporary Fiction

- Andrea, Duchessa d'. *Rovine di stelle*. Ceschina, Milano.

- Avancini, Avancino. *La sensitiva*. Ceschina, Milano.
Bacchelli, Riccardo. *Citta degli amanti*. Ceschina, Milano.
Bontempelli, Massimo. *Figlio di due madre*. Mondadori, Milano.
Brocchi, Virgilio. *Miti*. Mondadori, Milano.
Chiesa, Francesco. *Villadorna*. Mondadori, Milano.
Comisso, Giovanni. *Gente di mare*. V. Treves, Milano.
Deledda, Grazia. *Vecchio e i fanciulli*. Treves, Milano.
Maj, Bianca de. *Pagare e tacere*. Treves, Milano.
Moretti, Marino. *Casa del santo sangue*. Treves, Milano.
Parodi, Mario. *Fanciullo e la preda*. Treves, Milano.
Perri, Francesco. *Emigranti*. Mondadori, Milano.
Vergani, Orio. *Io, povero negro*. Treves, Milano.
Viani, Lorenzo. *Angio, uomo d'acqua*. Alpes, Milano.

EASY ITALIAN BOOKS FOR ADULTS

Tales of Chivalry

- Causa, Cesari. *Racconti delle fate*. Salani. *I cavalieri della tavola rotonda*.
Cavezzi, Carlo. *Storia dei paladini di Francia*.
Fulvia, pseud. *Novelle indiane*. Hoepli.
Guerino il meschino. Bertieri, 1928.
Mille e una notte.
Povero Fornaretta (ill. by Marini). Bertieri, 1925.
Reali di Francia.
Schmidt, Christopher. *Genoveffa*.
Lorenzini, Carlo. *Avventure di Pinocchio*. Bemporad (ill. by Mussino).

Religious Books

- Dandolo, Milly. *Storia di Gesù*. Internazionale.
Gallina, P. C. *Parabola di Gesù*. Fiorentina, 1927.
Lucarini, Ostilio. *Racconto della bibbia*. Mondadori, 1924.
Revelli, Mariz. *Racconto degli Evangelii*. Treves, 1928.
Lives of the following saints:
St. Luigi Gonzaga
St. Augustine
St. Catherine
St. Clara of Assisi
St. Jeanne d'Arc
St. Francesco d'Assisi (simplest is by Mariz Revelli)
St. Teresa

Recent German Books

Selected by DR. JOHN A. WALZ,

Professor of the German Language and Literature,
Harvard University

Bonsels, Waldemar. *Himmelsvolk. Ein Buch von Blumen, Tieren und Gott.* (Heavenly People. A Book of Flowers, Animals and God.) Berlin, 1921, Schuster & Loeffler.

Not an animal book in the usual sense, but a book showing the divine spirit in animate and inanimate creation, appealing to children and adults. Bonsels is the author of the widely known *Die Biene Maja und Ihre Abenteuer* (The Bee Maja and Her Adventures), also of *Das Anjekind* (Anna, the Child), Schuster & Loeffler (Berlin, 1921), the tragic story of a strange girl living a lonely life with her father in the wildness of the North German heath; of *Indienfahrt* (My Journey in India), Rütten & Loening, Frankfurt a. M., 1916 and later, a strangely fascinating account of the weirdness and mysticism of nature and life in India.

Grimm, Hans. *Volk Ohne Raum.* (People without Land.) 2 vol. A. Langen, Munich, 1926.

The plight of the German people as the result of the war, as seen by a German patriot; realistic and well written.

Kolbenheyer, E. G. *Amor Dei. Ein Spinoza-Roman.* Munich, Geo. Müller, fifth ed., 1917.

Kolbenheyer, born in Hungary, is one of the leading German novelists—though little known outside of Germany. His Spinoza novel gives a sympathetic picture of the great philosopher on the background of Jewish and Dutch life in Amsterdam and The Hague during the seventeenth century; somewhat impressionistic. Kolbenheyer is also the author of three strong novels dealing with the life and times of Paracelsus.

Löns, Hermann. *Sammtliche Werke.* (Collected Works.) 8 vol. Hesse & Becker, Leipzig, 1924.

Löns is one of the best writers on nature and animal life. *Aus Forst und Flur* (From Forest and Meadow) gives realistic and at the same time poetic pictures of animal life in Northern Germany, especially the Luneburger Heide in Hanover. *Niedersächsisches Skizzenbuch* (Low Saxon Sketchbook) pictures the North German landscape and country life. *Widu. Ein Neues Tierbuch* (Widu. A New Animal Book), A. Sponholtz, Hanover, 1917, describes the daily life of animals in the woods and fields of Northern Germany. Animals are to Löns individualities. His novels give realistic pictures of German life. *Dahinten in der Heide* (Back Yonder in the Heath) is a wholesome story of a man who meets defeat in the city but builds for himself a new life as tiller of the soil. *Die Häuser von Ohlendorf* (The Houses of Ohlendorf) is a romance of a German village. *Der Wehrwolf* (The Werewolf) is a powerful story of the horrors of the Thirty Years' War as experienced by the peasants of a North German village.

Mann, Thomas. *Gesammelte Werke.* (Collected Works.) 10 vol., Berlin, S. Fischer, 1922ff.

Including *Buddenbrooks*, *Novellen* (Short Stories), *Der Zauberberg* (The Magic Mountain), *Betrachtungen eines Unpolitischen* (Meditations of a Man Outside of Politics). Thomas Mann's latest story is *Mario und der Zauberer* (Mario and the Magician), Berlin, S. Fischer, 1930; an interesting experience in an Italian summer resort with a tragical ending, showing the author's power of realistic description and keen psychological analysis.

Toller, Ernst. *Masse-Mensch.* (Mass-man.) G. Kiepenheuer, Potsdam, 1925.

A strong and characteristic expressionistic drama representing the proletarian upheaval in Europe.

Wassermann, Jakob, *Das Gansemannchen.* (The Goose-man.) Berlin, S. Fischer, 1915.

The story of a musical genius who learns through bitter experience that life demands humanity even from the genius, not merely singleness of purpose and devotion to work. A powerful novel of German life in the second part of the nineteenth century.

Zahn, Ernst. *Helden des Alltags.* (Everyday Heroes.) Stuttgart, Deutsche Verlagsanstalt, 1905 and later.

Stories of Swiss life showing the heroism of ordinary men and women; clear and vigorous style. *Herrgottsfaden* (Gossamers), forty-first ed., 1921; the conflict of two strong personalities on the background of a peasant community in the Swiss Alps; interesting plot, lifelike characters, vigorous style.

Series

Deutsche Literatur. (German Literature.) Leipzig, Philip Reclam jun., 1930ff. Ed. by Professors Kindermann of Danzig, Brecht of Munich, Kralik of Vienna.

A collection of the most important literary and cultural documents of the German people extending from the early Middle Ages to the end of the nineteenth century. It is divided into twenty-five. Each of the series may be purchased separately. When completed, the collection will contain all that is most worth while in German literature. Several volumes have appeared so far.

Work of Reference

Reallexikon der Deutschen Literaturgeschichte. (Encyclopedia of German Literary History.) Ed. by P. Merker and W. Stammer, Berlin. 3 vol. De Gruyter, 1925-29. (A fourth supplementary volume is announced for 1930.)

An up-to-date and thoroughly reliable presentation of the various literary forms, schools, influences, etc., to be met with in German literature, with valuable bibliographies.

Magazines

Velhagen und Klasings Monatshefte. Berlin, Velhagen & Klasing.

Westermann's Monatshefte, Braunschweig, G. Westermann, high-class, illustrated monthly magazines for the general public, with a wide range of subjects.

Library Organizations

Rural Library Extension Institute

THE FIRST Rural Library Extension Institute was held at the College of Agriculture of the University of Wisconsin, Madison, June 30-July 18, 1930, in connection with the ninth annual Rural Leadership Summer School of the College of Agriculture. The Institute was held under the auspices of the American Library Association Committee on Library Extension, with the cooperation of the A. L. A. Board of Education for Librarianship and the Carnegie Corporation. The cooperation of the University of Wisconsin in providing class rooms on the agricultural campus, and adequate dormitory facilities and a hospitable environment; and the cordiality and helpfulness of the Wisconsin Free Library Commission through its secretary, Mr. C. B. Lester, in making their facilities available and releasing Miss Harriet C. Long, head of the Traveling Library Department, for conducting the course in County Library Service, were important factors in making the Institute a success. The fine spirit of interest and cooperation on the part of the Wisconsin Library School through the Principal, Miss Mary Emogene Hazeltine, and others of the faculty, and their willingness for Institute students to make use of material at the Library School, were greatly appreciated.

An outstanding feature of the Institute was its connection with the Rural Leadership Summer School under Professor J. H. Kolb of the University of Wisconsin. Association with other workers in the field of rural advancement, including chiefly social and religious workers and ministers, gave to the library students a broader view of rural conditions; and the opportunity for daily classes in Rural Sociology under Professor Kolb, a recognized master of the discussion method with adult students, was stimulating and informing. The course on Adult Education with the larger group, under Mr. John D. Willard, Rural Specialist with the American Association for Adult Education, was also a helpful and broadening discussion of rural problems closely related to the work of the library.

In the distinctly library field there were two class periods daily—one on general and state library extension in charge of Miss Alice S. Tyler, and the other on county library service, by Miss Harriet C. Long. In these courses each member of the Institute was assigned a project in either state or county library extension at the opening of the Institute; these en-

tailed as much reading and research as was possible in so brief a period, with presentation and discussion at the end of the three weeks. The number of (estimated) hours of work on the projects reported by seventeen members varied from eight to fifty hours, with a total of four hundred and forty-nine hours and an average of twenty-seven hours (Median 28). Some of the larger and more detailed projects were assigned to two members in collaboration, and one project was assigned to three persons.

In addition to the four daily classes during the first two weeks, there were visiting lecturers during the third week, after the Rural Leadership group had gone. The visiting lecturers with their subjects were: Miss Essae M. Culver, Secretary Louisiana Library Commission, "Intensive Promotion of Library Service," and "Library Service, State and County"; Miss Harriet A. Wood, State Supervisor of School Libraries, Minnesota State Dept. of Education, "Library Service to Rural Schools"; Miss Gratia A. Countryman, Librarian of the Minneapolis and Hennepin Co. Public Library, "County and City Relations in County Library Service"; Miss Mary G. Lacy, Librarian, Bureau of Agricultural Economics of the U. S. Department of Agriculture.

The Institute was frankly an experiment and all concerned in it, faculty, members and promoters, entered into the spirit of friendly cooperation. The scope was necessarily limited in many ways, but chiefly as to time. The method was that of discussion, with such use of lectures as seemed necessary in presenting subjects in outline for discussion, or certain informational topics. The Institute group consisted of twenty members from sixteen states. The number was definitely limited upon Professor Kolb's advice, in order that the discussion method could be made more effective. Of the twenty students, thirteen were engaged in some phase of state extension work and seven in county work. Six Southern states were represented with state workers, connected with the library extension program in the South made possible by the Rosenwald Fund.

Free

A RESEARCH ARTICLE "How the Kindergarten Found Its Way to America" by Elizabeth Jenkins, is published in the September, 1930, number of *The Wisconsin Magazine of History*. Reprints of this article may be had free of charge by applying to Dr. Joseph Schafer, Superintendent, The State Historical Society of Wisconsin, Madison, Wisconsin.

Extracts from the Minutes of the Executive Board Meeting (Los Angeles Conference)

Agents in Great Britain for A. L. A. Publications.

March 19, 1930.

VOTED, That the Executive Board approve the appointment of The Woolston Book Company of Nottingham, England, as agents for A. L. A. publications in accordance with the terms outlined in the Secretary's letter of March 19, 1930.

Copyright Bill. April 15, 1930.

VOTED, That the Executive Board approve the action taken by Carl L. Cannon, chairman of the A. L. A. Committee on Book Buying, at the hearing on the copyright bill, as outlined in his letter of April 9, 1930, and that it indorse the proposed amendment to Vestal Bill, H. R. 6990, transmitted with Mr. Cannon's letter of April 9, 1930.

Committee on Annuities and Pensions. May 23, 1930.

VOTED, That the President be authorized to appoint a special Committee on Annuities and Pensions to study and promote the development of annuities, pensions and insurance for librarians.

Basic Books for the Junior College Library. June 10, 1930.

VOTED, That the Executive Board approve the recommendation of the Editorial Committee that the manuscript "Basic Books for the Junior College Library," by Edna Hester, be accepted for publication.

Index to Club Program Material. June 10, 1930.

VOTED, That the Executive Board approve the recommendation of the Editorial Committee that the manuscript "Index to Club Program Material," by Elizabeth Henry, be accepted for publication.

The Program for Elementary School Library Service.

VOTED, That the Executive Board approve the recommendation of the Editorial Committee that "The Program for Elementary School Library Service," by Lucile Fargo, be published by the American Library Association.

Library Service to Children.

VOTED, That the Executive Board approve the recommendation of the Editorial Committee that the manuscript "Library Service to Children," by Effie L. Power, be accepted for publication.

VOTED, That the next Midwinter Conference be held in Chicago.

Pensions and Annuities.

VOTED, That Mr. Brigham be appointed as chairman of the Special Committee on Pensions and Annuities and that the president be authorized to make other appointments after consultation with the chairman.

Children's Librarians Select Best Books of 1929

Contributed by MARY E. EASTWOOD

THE FOLLOWING tabulation represents the vote of 21 of the leading children's librarians of the country as to the best books published in the year 1929 for the children's shelves of the smaller public libraries, the vote being based upon a tentative list of 150 titles selected and presented by the Book Information Section of the New York State Library. The titles are arranged in order of the votes received by each, the **, * and — votes being evaluated on a percentage basis. The sign ** indicates that in the voter's judgment the book in question should be included in a recommended selection of about 75 of the best books of the year; * means that it is considered by the voter to be deserving of favorable consideration; — indicates that for one reason or another the book may be ignored by the small public library. In the tabulation, the new titles of the year and the new editions of older books have been listed separately. *Children's Books of 1929* prepared by the Book Information Section of the New York State Library is based largely upon the votes of these 21 children's librarians. This list was published in *New York Libraries* August, 1930, and appears also in leaflet form. The titles are grouped according to the ages of the children to whom they will appeal; publishers, prices and classification numbers are given, and each title has a descriptive note.

Among Librarians

New Oregon State Librarian

HARRIET C. LONG, since 1920 Chief of the Traveling Library and Study Club Department of the Wisconsin Commission, has resigned to accept the appointment of State Librarian of Oregon. Miss Long has made a notable contribution to the upbuilding of library service in Wisconsin. She has been a liaison officer in the contacts of the Commission work with the women's clubs and many other state-wide organizations. She has been a leader always in preaching the gospel of county library development. She has met and solved difficult problems of administration in the rapidly growing work of the Department. The number of books sent out from the Traveling Library has more than doubled in these ten years, from 82,000 to 177,000. She has carried on courageously in inadequate quarters and now will miss the satisfaction of adjusting the work of the Department in the new State Office Building next year.

Miss Long has given self-sacrificing and tremendously vital service to library work in Wisconsin. Her name belongs on the honor roll of those from Hutchins and Stearns onward, who have visioned what might be done in library service in this state and have worked untiringly for its accomplishment. Twenty-five years ago Wisconsin gave Cornelia Marvin to the Oregon State Library. She has made it one of the leading state agencies of the country. May Miss Long have an equally long and successful career.

College and University Libraries

DR. EPHRAIM DOUGLASS ADAMS, one of the founders and a director of the Hoover War Library, died September 3 at his home on the Stanford University campus after a year's illness. He had been professor of history at Stanford for twenty-eight years.

WALTER HAUSDORFER, Columbia '27, has resigned his position as assistant in the Economics Division of the New York Public Library to become librarian of the School of Business, Columbia University.

MARION H. HOFTYZER, Michigan '30, joined the staff of the University of Iowa Library as a cataloger on Aug. 1.

EULIN P. KLYVER, Columbia '29, has been appointed librarian of Skidmore College, Saratoga Springs, N. Y., beginning September 1.

O. GERALD LAWSON, Columbia '29, has accepted the position of acting librarian of Drew University Library, Madison, N. J. He was previously in the Reserve Book Room, Washington Square College Library, New York University.

ALICE H. LERCH, for the past thirteen years a member of the staff of the New York Public Library, has been appointed librarian at Rollins College, Winter Park, Fla.

WILLIAM D. LEWIS, N. Y. P. L. '29, formerly on the staff of the Reference Department of the New York Public Library, has now been appointed librarian of the University of Delaware.

ANNA O'DONNELL, Michigan '30, has accepted a temporary appointment as cataloger in the University of Iowa from Sept. 1, 1930, to July 1, 1931.

JOHN PAUL STONE, Illinois '30, after teaching at Louisiana State Teachers' College, Natchitoches, this summer, will begin work as librarian of the State Teachers' College, San Diego, Cal.

E. R. B. WILLIS, hitherto assistant librarian of the Cornell University Library, has been made associate librarian.

ALLEN D. WILSON, Illinois '30, has been appointed librarian of the Virginia Junior College, Virginia, Minn.

* * *

Special Libraries

HELEN G. CUSHING, Albany '20, has joined the staff of the H. W. Wilson Company as cataloger.

CLARISSA L. GOOLD, Columbia '28, has resigned from the H. W. Wilson Company, where she has been doing cataloging, to succeed Marion Horton as supervising instructor of Home Study courses, School of Library Service, Columbia University.

ANNA LENSCHOW, Albany '23, has accepted a position on the staff of David J. Haykin at the Library of Congress.

HELEN R. L. PEASE, Columbia '27, who has been a children's librarian in the Muhlenberg Branch, New York Public Library, has resigned and will succeed Caroline S. Jenkins at the Ethical Culture School.

MIRIAM TOMPKINS, Chicago '30, has been appointed instructor in book selection at the Emory University Graduate Library School for the year 1930-31.

Public Libraries

FLORENCE E. ANDERSON has resigned her position in the New York Public Library to join the staff of the Order Department in Portland, Oregon.

MRS. ARTHUR E. BOSTWICK died suddenly, August 31, at her summer home in Maine.

ELIZABETH C. BUTTERWORTH has resigned her position of cataloging assistant in the Columbia University Library to go to the Library of Congress as cataloger of periodicals.

ANNETTE CROGSTER has been appointed children's librarian of the Arleta branch, Library Association of Portland.

BONNIE BELLE FIELD, Pittsburgh '30, has accepted the position of children's librarian in the Tyrrell Public Library, Beaumont, Tex., starting Sept. 1.

MAUD GRILL, Columbia '29, accepted an appointment in February as county librarian of Jackson County, Mich. Miss Grill has been connected with the Michigan State Library since 1924.

JAMES G. HODGSON, Albany '17, has been appointed superintendent of the Business and Municipal Library of the Queens Borough Public Library, Jamaica, N. Y.

MARGARET O. MEIER, Columbia '29, who has been in the Reference Department of the Free Public Library, Newark, N. J., has accepted the position of assistant librarian at the Central Library of the Rochester Public Library.

CHARLES M. MOHRHARDT, Columbia '28, has left the Toledo Public Library to become chief of the Technical Department at the Detroit Public Library.

LILLIAN F. NISBET, Simmons '14, for three years librarian at the United States Veterans Hospital in Portland, Oregon, has been appointed readers' adviser in the Library Association of Portland.

ROSE B. PHELPS, Columbia '27, has accepted a position as supervisor of branch reference work and instructor in reference and bibliography at the Queens Borough Public Library, starting in September.

ARTHUR G. RENSTROM, Columbia '30, has sailed for Europe to take a library position in Stockholm, Sweden.

MARY E. ROSSELL, N. Y. P. L. '15, has accepted the position of children's librarian in the Roanoke, Va., Public Library, starting September 1.

ELIZABETH STEWART, N. Y. P. L. '17, has resigned from the Fifty-eighth Street Branch of the New York Public Library to become the branch librarian of the Fair Haven branch of the Free Public Library, New Haven, Conn.

CAROLYN SMITH, formerly a member of the staff of the Portland, Oregon, Public Library, has been reappointed children's librarian of the North Portland branch.

IRMA WEGENER, Columbia '27, who has been assistant librarian of the Madison, N. J., Public Library, has been promoted to the position of librarian.

KATHARINE R. YETTER, Columbia '29, resigned her position in the Brownsville Children's Branch of the Brooklyn Public Library to become children's librarian in the Hosmer Library, Minneapolis, starting September 2.

School Libraries

RUSSELL S. JONES, of the Russell Sage Foundation Library, New York, has received an appointment in the library of the Technical High School of Brooklyn, to take effect in September.

MRS. GERTRUDE H. MATHEWSON, for eighteen years librarian of the Berkeley (Cal.) High School, died July 2.

ELIZABETH SCRIPTURE, Albany '13, who has been librarian of the Marshall High School, Minneapolis, since 1924, has recently resigned to become supervisor of School Libraries in the Denver Public Schools, starting September 1.

Twelve Thousand Libraries

ACCORDING to reports received by the Department of Commerce from its trade commissioner at Prague, nearly 12,000 public libraries show the result in Czechoslovakia of a law requiring such institutions in every city and town. Education and entertainment of the Czechoslovakian public have been greatly assisted by this law, which makes the establishment of public libraries in all municipalities of the republic compulsory.

In Slovakia the law providing for the establishment of public libraries did not become effective until 1924. In 1927, three years after the law became effective, 92 per cent of the 3451 municipalities of this province had public libraries. The libraries had a total of 399,938 books and during the year had 160,310 readers, who borrowed 983,022 books.

In the provinces of Bohemia, Moravia and Silesia there are now a total of 12,840 municipalities. Of these 11,633 have public libraries with 5,002,840 books. During the year these libraries have 712,752 readers, who borrow 13,380,121 books. Cost of maintaining these libraries for the year amounts to \$37,425.

In Sub-Carpathian Ruthenia complete data covering the public libraries are lacking but it is known that there are 271 public libraries with 42,106 books. In 1927 these libraries had 7264 readers who borrowed 77,450 books.

Opportunities

This column is open to librarians

United States Civil Service Examination

The United States Civil Service Commission announces the following open competitive examination:

HOSPITAL LIBRARIAN

Applications for hospital librarian must be filed with the United States Civil Service Commission at Washington, D. C., not later than October 7, 1930.

The examination is to fill vacancies in Veterans' Bureau hospitals throughout the United States.

The entrance salary for hospital librarian is \$1,800 a year. Higher-salaried positions are filled through promotion. Appointments may also be made from this examination to positions of assistant librarian at an entrance salary of \$1,620 a year.

The duties of hospital librarians in Veterans' Bureau hospitals are to stimulate through personal contact with bed and ambulatory patients their interest in recovery by the therapeutic application of general reading; and to maintain and administer a library of standard and current literature, and a medical and professional library for staff use.

Applicants will be examined on (1) mental tests; (2) library economy; (3) cataloging and classification; and (4) modern language.

Full information may be obtained from the United States Civil Service Commission, Washington, D. C., or from the Secretary of the United States Civil Service Board of Examiners at the post office or customhouse in any city.

Wanted—Eastern library is developing its Italian collection. Cataloger wanted who speaks and writes Italian with grace and accuracy. J13.

Qualified library assistant with experience in indexing, cataloging, reference, bibliographical work, in work with periodicals, pamphlets, and documents would like responsible position in college, university, special, public library, or with publishing house. J10.

Trained school librarian, four years' experience, desires position in the East. Salary \$2,500. J11.

Advance Announcements of Fall Books of Interest to Libraries

NORMAN W. HENLEY PUBLISHING CO.

2 West 45th Street, New York, N. Y.

New Fall Books

HENLEY'S ABC OF GLIDING AND SAILFLYING

Edited by Major Victor W. Pagé

This book tells you all about gliding and sailflying, and is based on practical American and German experience, extending over a period of years. The leading types of gliders and sailplanes and their construction, control and launching are described. Instructions are given for forming a glider club and for building a strong yet simple primary glider, including working drawings. 290 (6x9) pages, 72 illustrations. Bound in cloth, \$2.00. Bound in antique paper, \$1.50.

AVIATION ENGINE EXAMINER

By Major Victor W. Pagé

A complete and informative work on all types of airplane engines, written in **Question and Answer form**, for those wishing to qualify as aircraft engine mechanics. The book is also of value to pilots or students wishing a general and diversified knowledge of aviation engines and their accessories. It details many fine points of engine design and construction, discusses timing and adjustment of parts, and shows numerous examples of current practice in aviation engine building as it illustrates and describes leading American and foreign engines and their components. The book is written in simple language and is fully illustrated with specially posed photographs and factory drawings. 440 (6x9) pages, 244 illustrations, \$3.00.

ELECTRICITY FOR BEGINNERS

By Edward Harper Thomas, E.E.

This treatise, prepared by an experienced instructor, is written in language and terms that can be understood by all who want to begin at the bottom in their study of electricity. The book prepares the reader for a more advanced study of the subject, and considers and explains many of the common terms and everyday manifestations of electricity that form an excellent groundwork and a basis for more thorough study. 196 (5x7) pages, 24 illustrations, \$1.50.

INDUSTRIAL REFRIGERATION, COLD STORAGE AND ICE MAKING

By A. J. Wallis-Taylor, A.M.I.C.E.

An encyclopedia of world-wide practice in refrigerating machine design and application, concisely written, fully illustrated, and covering every application of the refrigerating plant. No book compares with this in recording for reference the varied types and design of compressors or in length of discussion of the apparatus for making ice, or the evolution of cold storage applications. Formulas and cold storage data for food preservation are also given. This book provides a mine of information for all interested in refrigeration, and is an indispensable work of reference. 780 (6x9) pages, over 500 illustrations, \$10.00 net.

ARITHMETIC OF ELECTRICITY

By Prof. T. O'Connor Sloane

A practical treatise on electrical calculations of all kinds reduced to a series of rules, all of the simplest forms and involving only ordinary arithmetic; each rule is illustrated by one or more practical problems, with detailed solution of each one. This is one of the most useful books published on the subject of electricity, covering, as it does, the mathematics of electricity in a manner that will attract the attention of those who are not familiar with algebraical formulas. 230 (5x7) pages, illustrated, \$1.50.

GOLD ALLOYS

By George E. Gee

A practical business guide to the preparation, composition and melting of gold alloys of every description and caratage, for the use of goldbeaters, goldsmiths, jewelers, watchcase makers, enamellers, setters, pen makers, stampers, gilders and all kindred workers in the precious metals, showing how difficulties and failures are met with simple remedies; compounding the different color-tinted alloys; reducing and improving the various carats of gold; metals which impair the physical properties of gold and its alloys; fluxes and their uses; recovering gold from solid waste products; imitation platinum and palladium alloys; tables of gold values; tables of weights; and many other tables of interest to dealers in the precious metals and diamonds. This book contains such a fund of valuable information that it will long serve as a textbook for the trade. It covers everything the jeweler or silversmith should know. 344 (6x9) pages, \$5.00 net.

WATCH AND CLOCK MAKERS' MANUAL

By F. W. Britten

A thoroughly practical book dealing with various phases of watch and clock repair and adjustment. It contains a very useful section dealing fully with the watchmaker's lathe and its operation, a subject which has not received sufficient attention in other books. The subject of cleaning and lubrication of watches, various escapements, repairs, adjustments and other matters relating to watches are also dealt with. Similarly there is a comprehensive section occupying about one-third of the book relating to the repair of clocks and to allied subjects. Altogether it will be found an indispensable book for the professional watch and clock maker and amateurs. 340 pages, 136 illustrations, \$3.00 net.

PUNCHES, DIES AND TOOLS

for

MANUFACTURING IN PRESSES

By Joseph V. Woodworth

This is the fourth revised and enlarged edition of what may be called an encyclopedia of die making, punch making, die sinking, sheet metal working, and making of special tools, sub-presses, devices and mechanical combinations for punching, cutting, bending, forming, piercing, drawing, compressing and assembling.

Advance Announcements of Fall Books of Interest to Libraries

NORMAN W. HENLEY—(Continued)

bling sheet metal parts and also articles of other materials in machine design. Two hundred and twelve processes are clearly described and fully illustrated. This book contains 530 (6x9) pages and nearly 750 engravings, \$5.00.

STEAM TURBINES

By T. M. Naylor

This volume is intended to meet the requirements of those engaged in the design, construction and maintenance of turbine installations, and for students at universities, technical colleges and schools. The book deals with the classification of steam turbines followed by illustrated descriptions of the various types taken from present day practice. Chapters are included on reduction gears, heat accumulators and condensers. A chapter on high pressure steam deals with improvements brought about by the increase of steam pressure, superheat and the use of tapped steam for feed heating. The application of high-pressure steam to existing plants is adequately covered. 207 pages, 171 illustrations. \$4.50 net.

Watty Piper

This story, retold by Watty Piper, from The Pony Engine, is loved by children of all ages.

Boards, cloth back, boxed with picture cover.

60 cents

PELLE'S NEW SUIT

Elsa Beskow

An interesting little story of how Pelle's new suit is made starting with the lamb and through the different steps to its completion by the tailor.

Boards, cloth back, boxed with picture cover.

60 cents

REILLY & LEE COMPANY

536 Lake Shore Drive

Chicago, Illinois

THAT MAN DAWES

By Paul R. Leach. \$4.00

The intimate, engaging story of America's most colorful statesman by the well-known political writer of the Chicago Daily News. In addition to presenting a comprehensive, vivid picture of Dawes himself, Mr. Leach has drawn judiciously from his thorough knowledge of present-day politics to unite his study significantly to a clearly outlined, sweeping background of modern governmental affairs. Illustrated.

THE PRAIRIE PRESIDENT

Living Through the Years with Lincoln

By Raymond Warren. \$3.00

A new and strikingly original biographical narrative of Abraham Lincoln, carrying him through boyhood and his law career up to the time he assumed the Presidency. The story, which follows carefully the known facts of his life, is projected mainly through episodes, closely knit, which are illumined by the use of dialogue, reproduced faithfully with remarkable creative insight. Illustrated by the author.

DESERT WINGS

A Modern Aviation Story for Boys

By Covington Clarke. \$1.50

A dashing new aviation story for boys in which Red McGee and his buddy Dan use an airplane in a thrilling exploration flight into unknown regions of the Sahara Desert. The heroes of "For Valor" and "Aces Up" are swept into a series of dangerous episodes involving the discovery of the fabulous emerald mines of the Garamantians.

CAPTAIN REDLEGS

A Pirate Tale for Youthful Readers

By Sabra Conner. \$1.50

The glamorous, adventurous and historically accurate tale of Sir Ronald Greaves, 17th century pirate, born with a gentle poet's soul, but endowed with a will of steel forged through a youth of terror. With a cultured distaste for violence he fights his way, nevertheless, with unbelievable fury across a stormy page of history to regain the estate from which misfortune thrust him.

EYES OF THE WILDERNESS

By Arthur M. Parsons. \$1.50

An Indian story for boys, clear, swift and direct in narration and crowded with suspense and action. The scene is Northeastern Ohio during the last years of the Revolutionary War. The novel includes vivid portraits of Lewis Wetzel, famous frontiersman, and the renegade, Simon Girty.

THE GOOD FAIRY

By Grace Bliss Stewart. \$1.50

A delicate, enchanting fairy tale for children, with a foreword by Jessie McCutcheon Raleigh, creator of the famous statuette "The Good Fairy," by which the story was suggested. The thrilling adventures of Jane and Jerry in Fairyland; how they came to know the Good Fairy and were permitted to bring her back with them and how she taught them many new joys of unselfish companionship. Charming illustration.

Amazing New

ENCYCLOPAEDIA BRITANNICA

IN all the history of publishing no work has received such striking endorsement as this *new* Encyclopaedia Britannica. Leading critics, world-famous statesmen, scholars, scientists—and 50,000 purchasers—pronounce it the finest encyclopedia in English.

World's Finest Encyclopaedia

The chief critical journals of the world—the New York Times Book Review, the Saturday Review of Literature, the Quarterly Review and scores of others agree that its equal does not exist.

"The sum of human knowledge is here more available than ever before, and the possible rewards are great", says J. Arthur Thomson, editor of *The Outline of Science*.

It is amazing what you find in these 24 volumes. 15,000 illustrations, for one thing. 500 new maps, a complete atlas, for another.

3,500 Expert Contributors

But most amazing of all is the sheer genius behind this book, thirty-five hundred world-famous authorities have written its thousands of articles—made clear and vivid the whole sum of human knowledge.

"When one finds men like Bohr and Rutherford and Michelson and Millikan responsible for leading articles", says President Angell of Yale, "there can be no further question of the scholarly reliability of the work."

Everyday information for everyday needs—that is what the *new* Britannica offers. Women find it an invaluable help at home and outside.

A Book of Opportunity

Men use it to keep up-to-date on recent developments in every field. But for children especially it is a book of real opportunity. It is amazing how children have taken to the *new* Britannica.

"The editorial function has been organized and applied to scholarship in a manner and to a degree that must certainly give the Britannica the premier place in our public as well as university libraries and in the homes of the American people", says Joseph L. Wheeler, Librarian, Enoch Pratt Free Library, Baltimore.

Lowest Price in 60 Years

Yet this *new* Britannica is not expensive. It is now available at an extremely low price—a price lower, in fact, than that of any completely *new* Britannica in 60 years.

Order your set today. *Special Form for Library Use.*

Dogs-eared Magazines

No, they aren't attractive. But they surely indicate your patrons' interest in them.

Over 1,400,000 families depend on Better Homes and Gardens for authoritative information on the home. Interest of all your patrons in this magazine is assured.

Better Homes and Gardens is filled with practical, authoritative information on landscaping, flower growing, home building and furnishing, books, music, child care and training, foods, and recipes.

Your patrons will appreciate your ordering a subscription to Better Homes and Gardens for the library. The evidence of interest in this magazine revealed in its dogs-eared pages in months to come will prove its value to your library.

Subscription rates are only 60c for one year, \$1 for two years.

At these reasonable rates can you afford not to have Better Homes and Gardens on your reading tables? Be sure to include Better Homes and Gardens in your magazine order this year—it will delight your patrons.

INTERNATIONAL STATISTICAL YEARBOOK 1929

The 1928 edition was *sold out* early this spring. It had proved so useful to American readers, that the demand far exceeded anticipations at the League of Nations. Here is a new edition which brings the figures forward by another year during which the tides of commerce, finance, production and employment have been far from static.

Bound in cloth, 262 p. \$3.00

HANDBOOK OF INTERNATIONAL ORGANIZATIONS

We inserted a modest advertisement of this book early this year, and *presto* the entire edition was sold out. We have just secured a reprint, in paper covers, at a price which wholly belies the usefulness of this book at the reference desk.

It lists international organizations of all kinds, supplies the names and addresses of their executive officers, furnishes condensed statements of their origins, functions, plan of organization and operation.

Bound in paper, 348 p. \$2.00

Just published

ARMAMENTS YEARBOOK 1929-1930

The sixth edition of this popular reference annual appears as debaters in universities, colleges and high schools from coast to coast begin a demand for source material on world armaments, which, after the London Conference, will not be satisfied with rhetorical generalities. Here are the figures, tables, graphs and the text of the London Naval Treaty.

Bound in cloth, 1152 p. \$5.00

TEN YEARS OF INTERNATIONAL COOPERATION

At last members of the League of Nations Secretariat themselves tell the story of ten years' achievement in a single volume. Edited by the Information Section, with a foreword by Sir Eric Drummond, the Secretary-General, it consists of nearly five hundred pages of narrative which, contradictory as it may seem, is both readable and official.

Delivery from Europe is promised about October 20. Order now and secure your copy from the first shipment.

Bound in cloth, about 500 p. \$3.50

* An article in the *Children's Library Yearbook*, Number Two, entitled "Children's Book Week: An Appraisal of Activities," by Clara Whitehill Hunt, Superintendent of the Children's Department in Brooklyn Public Library, gives such full justice to the fine possibilities of Book Week while, at the same time, warning against the enthusiasm for a popular custom that may sweep the children's librarian into schemes out of harmony with her own work, that **THE LIBRARY JOURNAL** has asked and received permission to reprint it in full in the Book Week number of October 15. Other articles scheduled for this number include "Boys' Reading" by Lillian H. Smith, head of the Boys' and Girls' Division of the Toronto Public Library; "Children's Books by Southern Writers" by Emma Lee of the Rosenberg Library, Galveston, Texas, and "Books and the Discipline Problem Boy" by Mrs. Nell Steinmetz of the Los Angeles Public Library. An article on Girls' Reading had been planned for but unexpectedly has been cancelled too late to obtain another author on the subject.

The Department devoted to the Forecast of new books, given in each first of the month issue, is growing more and more complete as publishers send in their lists each month. We hope that you are finding the brief annotations of titles more helpful than the previous straight list of publications.

B. E. W.

We design book-storage systems that are practical and workable . . . Every detail is taken into consideration by our Plan Department.

A Snead Bookstack installation is more than steel bookshelving. A Snead Bookstack installation means that the heating and ventilating of the stack room has been studied, so that the temperature and humidity which are best for preserving the books, may be maintained. Present and future needs of the library are studied. Elevators, book-lifts, book conveyors, study compartments, lighting arrangements and fixtures, special provision for rare volumes are all necessary in large library installations, while in smaller private libraries only one or two free standing bookstacks, together with card files, are necessary. We can aid you in planning for all these.

A Cost Survey in a University Library

By Elinor Hand

Librarian's Secretary, University of California Library

IN LIBRARY PRACTICE if there is one thing that seems to be less clear and more productive of misunderstanding and misinterpretation than another, it is the question of costs. This is due in part, but only in part, to variations in practice; more particularly it is due to the lack of a generally accepted terminology and of a uniform method of keeping statistics and compiling data. If anyone doubts this, let him attempt to work out some comparisons between libraries of the same type from the figures published in the annual reports of the institutions concerned. If he still doubts, let him accept membership on one of the statistical committees of the A. L. A. and wrestle with the replies to the committee's questionnaires. If he is totally without conscience and circulates a questionnaire of his own, of course he deserves what he gets and infinitely worse; but the question of an appropriate punishment for him is outside the scope of this paper. The point is that when he has finished tabulating the replies he will probably be more at sea than when he started.

Consider Mr. Windsor's paper on the cost of cataloging, presented at the Chicago mid-winter meeting of 1925-26. As reported in *THE LIBRARY JOURNAL* for Feb. 1, 1926, Mr. Windsor stated that the cost of cataloging the University of Illinois Library "roughly . . . might be estimated at an average of 77 cents a book." That sounds like something fairly definite—until the next sentence, which reads: "For three years he gave figures from five other libraries as follows: 50c., 56c., 66c., 76c. and \$1.03." When more than 100 per cent variation in the extremes of cost is reported from

six libraries engaged in practically identical work, there would seem to be need for revising our methods of compiling data; or at least for reaching some common ground on which to base a comparison of results that would mean something.

In view of the amount of money the libraries of this country are spending, detailed information as to costs should be available, and available in shape to permit ready comparison of the figures from similar institutions. Administrative officers and governing bodies have a right to know how, and how efficiently, libraries are spending the funds granted them. Librarians themselves can learn much by comparisons that really compare. Incidentally, comparative figures which can be trusted may prove a valuable weapon for either defence or offence, and an invaluable text in a campaign to educate the power controlling the purse strings. For even though that power be well disposed, misconceptions may easily arise through lack of detailed information; and the librarian who cannot produce the facts readily and in a form comprehensible to persons unfamiliar with the mechanics of library work, may find himself responsible for a situation inimical to the institution under his care.

That quite honest misunderstandings may arise despite the best efforts of the parties in interest to get together, was borne in upon us at the University of California some months ago, when in the course of a conversation over certain appropriations for the following fiscal year a member of the budget committee said to the librarian, in substance: "What the committee has never been able to understand is, why it should cost this library ten dollars to put a book on the shelves." Inquiry brought

Paper read before the College and Reference Section of the A.L.A., Los Angeles, June 25, 1930.

out the fact that this had been an article of faith with the budget committee for some years. Of course, what had happened was, that some member of the committee had conceived the idea of dividing the number of dollars appropriated for all library purposes in some one year by the number of volumes added to the library in that year, to find the cost of putting a volume on the shelves. It was a simple matter to show up the fallacy in this reasoning, but the damage had been done. It is not always easy to eradicate an idea that has become fixed, even when the premise is proved wrong. The budget committee's feeling that the administrative expense of the library was excessive still persisted, and the way to overcome it obviously was to present the facts. The next step was to ascertain the facts. It would have been easy enough to make general statements based upon the usual statistics: to divide the payroll of the accessions and catalog departments by the number of volumes put through and to offer the quotient as the cost of placing a volume on the shelves. But there were reasons inherent in our organization and in the nature of some of our problems which would make results so obtained rather too sketchy for our purposes. Accordingly, those members of the staff responsible for various phases of work in the library were called into consultation, a plan of operations outlined, a month given to testing out the plan to discover where it was weak, and the attack launched on Jan. 1, 1929. We little knew what we were getting into.

For six months, every member of the staff was required to keep a daily record of the actual disposition of his time for every hour of the day, under one or more of several headings worked out for his department. These daily records were kept on time sheets covering one month. At the end of the month the individual time sheets were collected by the department heads, each of whom consolidated the data on a single time sheet covering the work of his department for the month. This proved an effective way of gathering the essential facts, but for some reason it never seemed to acquire much popularity with the staff, some members of which relieved their feelings without resorting to profanity by inserting an additional heading on the sheets: "Time spent in keeping this record." Within a few months the librarian felt it wise to depart for Europe, there to remain until the storm blew over. Upon his return in September he found his secretary wrestling with about a ton of accumulated data; and the number and variety of the unexpected questions which they raised were an object lesson in the complications of detail inherent in the operation of what is probably

a fairly smoothly running library machine.

In analyzing the data we excluded from consideration general, that is, undistributable, overhead and capital expenditure, such as repairs to plant and the cost of new equipment. Each process was debited with its exact, or where this was impossible with its carefully estimated share of the cost of supplies, postage, printing, freight and other items of operating expense. Distribution of the cost of student assistance presented no difficulty since the distribution of time appeared on the time sheets, and no more was involved than adding up the hours each student assistant had put in under each of the heads, and multiplying by his hourly rate of pay. The case of the salaried staff was less simple. The plan finally adopted for this group was to treat each monthly time sheet separately, dividing the monthly salary rate by the number of hours the individual had actually worked during that month, to obtain the cost per hour of that individual's services. Of course, this gave an hourly rate which varied considerably from month to month for the same individual; but the method insured a proper allocation of the element of distributable overhead represented by vacations, sick leaves and other absences not involving deduction of salary. Like the original one-cylinder automobile, it was clumsy but it worked. In this connection it should be noted that the months covered by the investigation, January to June, take in just about half of the staff vacations, since at the University of California the regular session extends approximately from the middle of August to the middle of May, and vacations are supposed to be and generally are taken between May 15 and August 15, or during the Christmas holidays.

From chaos, order gradually emerged; and with it a picture or rather a diagram of an average half year of work in a large university library, as it might appear to an efficiency engineer. All of the results were interesting, some were surprising; at least we found them so. But judge for yourselves.

Let us first look at cataloging. In our cataloging statistics the word "volume" is used to designate a publication traveling under its own title page, so to speak, rather than the mass of matter included between two covers. Sixteen thousand, six hundred and fifty volumes were cataloged during the six months at a cost of \$10,921, or 65½c. per volume. Inclusion of the processes of accessioning, plating, pocketing, etc., preliminary to cataloging proper increases the gross cost by \$1,168, and the cost per volume rises to 72 6/10c. This is lower than Mr. Windsor's five-year-old figure of 77c. for the University of Illinois, but higher than

the 67 7/10c. given by Mr. C. H. Brown for Iowa State College for 1929. The average cost of cataloging in the three institutions is a trifle over 72 4/10c. Perhaps the evidence is sufficient to justify acceptance of the figure of 72½c. per volume as the norm for cataloging costs in a large college or university library in this country at the present time.

Rather strangely, the unit cost of recataloging proved to be well below that of new cataloging; 53 1/10c. as against 72 6/10c. The number of volumes recataloged during the six months was 10,333 and the gross cost \$5,498. We shall be interested to learn whether the experience of other libraries engaged in recataloging generally agrees with ours. Evidently it does not everywhere. Mr. C. H. Brown writes from Ames, Iowa: "I should expect that the cost of recataloging and reclassification would be more than for cataloging. I am quite sure it has been with us." Of course, the terms of the problem differ somewhat in different institutions.

The most unsatisfactory part of our survey was also that which yielded the (to us) most surprising result, namely, the part relating to the cost of acquiring a book for the library. The processes of acquisition by purchase, by exchange and by gift proved to be so intertwined with one another and with other processes in and outside of the accessions department as to render it practically impossible to distribute costs accurately without imposing upon the organization of the department a rigidity it was desired to avoid, as well as a burden of record-keeping disproportionate to the object aimed at. The result of tabulating the figures as set down is, that each volume accessioned appears to carry a load of cost much of which would be lifted from it by a more detailed analysis of the work of the department on different lines; and such a restudy is now under consideration.

The number of volumes issued from the loan desk during the six months was 164,703. The actual cost of paging books, recording charges and discharging and reshelving books returned was comparatively light, but the desk carries the burden of a good deal of miscellaneous auxiliary work. This has to be included in computing the cost of the service, which for the period amounted to \$13,040, or 7 9/10c. per volume issued. In this connection it may not be out of place to mention another figure, though it has nothing to do with this cost survey. A time check made in November, 1927, to determine the speed of loan desk operation gave 5 9/10 minutes as the average time of a transaction. The day chosen was a normal day in one of the heavier months; the number

of transactions recorded being 1400. Of this number 926, or more than two-thirds, were completed in five minutes or less. At present we should probably not be able to equal this record, as the stack is 50 per cent larger than it was in November, 1927.

Bookbinding on the Pacific coast is said to be considerably more expensive than in the Middle West and on the Atlantic seaboard. The following figures should throw some light on the subject. It cost us about \$11,000 to bind some 6,300 volumes during the period under consideration, the unit cost working out at approximately \$1.74 per volume, of which \$1.53 was the average price charged by the binder and 21c. the operating cost to the library. The work was done at the bindery operated by the university in connection with the printing office.

To deal with the remaining data *in extenso* would make this paper sound too much like the directors' report of an industrial concern, if one can imagine an industrial concern continuing to operate when only one department can be kept out of the red. That honorable exception is the photostat service, which showed a profit of \$57 on a volume of business aggregating \$528. We cannot even stabilize our financial position by using the receipts from fines, since all such are covered into the university treasury. Not only does the library derive no direct financial benefit from fines, but thanks to the wonders of accounting in a state university it actually costs us money to levy them, which must bring vast satisfaction to the victims.

Many of the data assembled and the facts brought out in our survey are of local rather than general interest, but one subject refuses to be ignored: Inter-library loans. In the period surveyed we responded to 406 requests for inter-library loans, sending out 556 volumes; in the same time we borrowed 233 volumes. We found that the unit cost of handling books lent and books borrowed was practically the same. We had always assumed that it was more costly as well as more blessed to give than to receive, but the figures fail to bear out the assumption. When a member of the university community wishes to borrow a book through the library, we always endeavor by reference to our union catalog or other sources of information definitely to locate a copy, and not, like Mr. Longfellow, to shoot our arrows into the air. We also try to verify doubtful and to complete imperfect references before writing. This work takes the time of highly trained assistants and is expensive, but there seems no good reason why it should be put up to the library from which we wish to borrow, to do it. On the

other hand, most of the requests to borrow from us come from smaller institutions of collegiate rank, or from branches or divisions of the university outside of Berkeley, where bibliographical equipment is limited or non-existent. We spend many hours in verifying blind references received from such sources because we realize that in most cases they have given us all the data they have or are in a position to get, and that an obligation rests upon us to make good the deficiency. The result is that the library is put to considerable expense to maintain this service, quite apart from packing and shipping costs. During the period of the survey its inter-library service cost the library \$1,255 exclusive of carriage charges, which were repaid; or an average of \$1.59 per volume handled. There seems to be sound basis for the suggestion which has been made more than once at library meetings and in our professional literature, that a borrowing library should pay for the service it receives. The

larger libraries may and very generally do feel a certain moral obligation to render aid outside their legitimate spheres of activity; but it would be difficult to show good reason why they should be penalized for doing it.

We have found out a great many things from our survey, and many of them we shall be able to turn to good account. If any librarian finds life becoming dull, it is recommended that he initiate an investigation of this kind in his own library: he may anticipate plenty of excitement, if no other result. But there ought to be other results, especially if several institutions of the same kind would conduct their surveys in the same way and would compare their findings. Our program was home-made and in many respects crude and clumsy; it should be possible to better it without great difficulty. Anyone who undertakes to do so will have our blessing and our warmest admiration. He will have an interesting time. He may not want to repeat the experiment, but he will learn a lot.

This Job of Being a Public Librarian

By Harold A. Wooster

Librarian, Scranton Public Library, Pennsylvania

THERE WOULD be certain advantages if a public librarian could be several people instead of one lone individual with natural human limitations. When the public library was a literary institution for a cultured few it was a fairly easy matter to secure a librarian who represented the tastes, viewpoint and ideals of the limited group which made up the patrons of the library. Now that the public library is a many-sided institution, trying to serve the daily needs and varied cultural aspirations of an entire community the task of being a representative librarian is far more difficult. In fact, a librarian should be male and female black and white, Jew and Gentile, capitalist and laborer, Catholic and Protestant, radical and conservative, old and young and of many nationalities, many professions, many trades and with many different experiences and viewpoints, to have the proper background for his work. A calm survey of the present situation with a consideration of some of the points involved may be of interest.

It is perhaps a natural viewpoint, and within proper limits desirable, for different groups in a community to be interested in the public library and to desire that one they consider as especially representing and understanding themselves to be the head of this increasingly important institution. There seem to be three

inescapable facts. First, that the important factor in regard to a librarian is not what group does he represent but what is his fitness for the position. An able person will benefit all while an incapable person will not bring genuine satisfaction to any group. Second, that underneath apparently different aims and viewpoints there is a common meeting ground especially in matters of genuine culture and self-development. Human nature and ideals are the same in spite of artificial names and classifications. Third, that through knowledge, tolerance, sympathy and imagination, it is possible for an individual to be of several ages, nationalities, religions and viewpoints. Realizing these facts, librarian and library supporter can live and work together with complete mutual respect, good will and understanding.

The matter of any special religious qualification in regard to a public librarian seems most unfortunate. This is, of course, entirely proper in the field of denominational libraries. In private life, a librarian should be allowed, as a human being, entire and unbegrudged religious freedom. Religious faith is such a personal matter depending on uncontrolled circumstances of family and birth that to punish or reward a person for their religious connections appears illogical. Nor is religious faith a cloak to be doffed, changed, altered, apologized for or

gloried in. As a public official, on the other hand, a librarian does not have a right to any religious preference and no librarian worth hiring would use his office for the advantage of any religious group at the expense of another.

As a matter of fact, in the daily work of a public librarian matters of different religious viewpoints play a very small part. A public library is not a book monopoly and does not expect to supply all of the book needs of a community. The field of religious books is so special, so changing, so personal that except for a very safe middle ground of a non-controversial nature the average public library leaves this type of book for individual or special library purchase. The book of confession, of indictment, of destructive criticism or of propaganda will always have writers and readers but as a usual thing does not have to be supplied for public consumption by the taxpayers' money. In purchasing a book of general literature you question why it should be bought and the reasons which convince you deal with the skill, ability, reputation and authority of the author, but rarely touch on matters of religion. Any librarian of character and professional ideals will in scrupulous manner guard and protect the religious rights and interests of the entire community when it comes to the spending of public money. On the other hand to try to scrutinize and guarantee that every book in every way will suit every reader and displease none is an impossible and undesirable ideal. Readers must be able to use discrimination, to select and reject, to make allowances and discount and to consider the viewpoint of the author.

While a librarian may not inherit his religion he certainly does his nationality. Yet nationality is a minor consideration in the world of books. One of the great discoveries of reading is that human nature changes very little as between the past and the present and that beneath the surface people of different nationalities and different circumstances of life are the same. As a boy I remember, vividly, lying on my stomach, heels in the air, utterly absorbed in *The Last of the Mohicans* and *The Talisman*, and realizing for the first time that a foe, the red-skin and the Saracen, could be a hero and a gentleman. A librarian can not look down on

any nationality or believe that any group has a monopoly of human virtues for acquaintance with history, art, science, biography; literature tells so clearly the need of respect and tolerance for all.

Although a librarian's religion and nationality do not seem to matter so very much it is a great loss that he can not be both old and young at the same time. Age does have an accumulated experience, a laboriously acquired wisdom, a seasoned and tried philosophy of life, which is a great advantage. Yet youth with its courage, dash, idealism, energy, gambling spirit, dissatisfaction and originality, is greatly needed as a motive force. The old may try to be young and the young to be old but it never seems possible to truly be both at the same time. It is also probably true that a woman librarian has certain special gifts and qualifications and that the man has other gifts and qualifications, but the solution of this problem is not the effeminate man or the masculine woman.

Being professionally trained and untrained at the same time would also have its advantages. The professional training often shows the right and proper way to do things according to tried and established standards but has the danger of tying a person to theory, tradition and routine. The untrained person may start in the wrong direction, wasting time and energy, but he may also have certain advantages in a fresh viewpoint, a willingness to experiment and a close touch with the untrained user of the library. The professional somehow must try to retain the enthusiasm and the viewpoint of the amateur, the beginner, while the untrained person must bend every energy to securing the skill and technique of the professional. Possibly a librarian should be both educated and uneducated at the same time (as most of us are). The person who has climbed to the top of some small educational hill often looks down upon and forgets his brotherly sympathy with those struggling up a slope. The librarian must remain both a learner and a leader.

No librarian can possibly be big enough for his job, it is too special, too general and too many sided. Yet it is possible for a librarian, no matter what his race, creed or special experience in life, to serve an entire community in a loyal, faithful, capable, satisfactory manner.

The Okayama Prefectural Library in Japan

By Masaharu Muto

Chief Librarian

THE OKAYAMA PREFECTURAL LIBRARY had its beginning in 1908 with a donation of twenty thousand books by Marquis Ikeda, whose ancestors governed Okayama district in the Hoken era, comprising the main portion of the collection. Although public libraries in Japan

draw out books from the library for one year. The library was open to all, and there was no charge for reading of books inside the building.

In order to extend the use of the library over the entire prefecture, printed catalogs were sent to the outlying districts within the prefecture. The result was a demand sufficient to warrant the establishment of a "traveling library," by means of which individual schools, small libraries, or organized groups might upon registration with the library have sent to them any books which they might desire. These books were sent by mail, railroad, busses and private carriers.

Two drives were made in 1918, one for the establishment of a local collection, and another to cultivate the "library spirit" among the students and younger children. A canvass was made of the entire prefecture, and to date the collection contains some thirty-five hundred articles, including many valuable

The General Reading Room

date as far back as 770, when the Yakatsugu Isonokami "Untei" or "Yakatsugu Library" was established, they were just a museum type of library, where one might examine some rare but little understood Chinese classics. When I entered the library staff in 1914, our library was just such a reading place, with an attendance of about two hundred people a day.

In order that we might increase the utility of the library, nine library workers and I set to the task of collecting more popular and useful volumes. We gathered such as a very limited allowance from the prefectural authorities could purchase, and what we could acquire through donations. The total number of books was raised to about forty thousand volumes.

The library assumed quarters in Okayama City, in a small wooden four-story building which faced the prefectural offices. The books were placed in order, and a "lending system" was arranged whereby for one yen¹ one might

The Catalog Room

manuscripts. The latter drive was carried out with the cooperation of the schools. Lectures were given both at the library and at the schools. Reading certificates were awarded to students reading a designated number of books from lists made according to the age of the child. Special loans were made to the schools, small libraries, and organized groups. An annual summer course was established in library administration to acquaint the teachers with the

¹One yen = 49c. American money.

library and its uses. A separate children's room was also established.

To make the books more accessible to all, temporary branches were established in the various public congregating places. The first was placed in the local park, Korakuyen,

room, disinfecting room, binding room, packing room, and store room.

Old systems were discarded and replaced with new ones. The Dewey system of cataloging was installed to replace the old Japanese system. A book consulting office was established where all reference questions could be brought. The board of advisors was increased to thirty-seven members.

For a prefecture of one million two hundred and thirty-eight thousand people, and a population in Okayama City of one hundred and twenty-five thousand people, our library is not up to the American standard. The atmosphere also is very rural when compared to the large libraries at Osaka and Tokyo. There are two hundred and fifty very small libraries and a city library of thirty-nine thousand five hundred and eighty-six volumes,

The Children's Room

known as one of Japan's three most beautiful parks. It was placed in a picturesque little cottage at the foot of a hill. It was named "Shikibunko" (Library of the Seasons); in spring it was called "Cherry Blossom Library"; in summer, the "Waterfall Library"; in autumn, "Maple Leaf Library," and in winter, "Snow Library." Other branches were established at the bathing beaches in summer and the hot springs in winter, all outside the City.

By 1922 our old building was overcrowded, and a drive started for a new structure which might be more modern and spacious, if not more beautiful than the one then occupied. With the kind guidance of the architect, Dr. Riki Sano, plans were completed, and in the spring of 1923 our new quarters were ready for occupancy. The building was completed at the cost of one hundred and thirty-six thousand yen.

The floor space amounts to twenty thousand square feet. It is a two-story building of thirty-four rooms, including a reference room, general reading room, ladies' reading room, children's room, lecture and special exhibit hall, special display room, lunch room, smoking

A Temporary Branch, Shikibunko, Placed in a Local Park

from which a prefectural club has been formed. However, the modern public library is a comparatively new thing in Japan, and it is indeed gratifying to note the encouragements from the government and the prefecture by the awarding of a bounty at various times. The realization of the need for better libraries is leading to a constantly improving standard of library work, and holds bright hopes for the future.

Pacific Northwest Regional Cooperation— Periodical Holdings

By Charles W. Smith

Librarian, University of Washington, Seattle

GEOGRAPHICALLY defined, the Pacific Northwest is the area bounded upon the north by Alaska, upon the east by the crest of the Rocky Mountains, upon the south by California, and upon the west by the Pacific Ocean. Historically speaking, it is the Territory of Old Oregon. It comprises the Province of British Columbia and the States of Washington, Oregon, Idaho and the western part of Montana. Within this area there exists much of historical, economic and cultural unity, disturbed only by the fact that it is crossed by an international boundary line. One of the unifying factors within this region is the Pacific Northwest Library Association. Through the Annual Conference of this Association and by means of its special and standing committees, a number of cooperative enterprises have been sponsored and carried to completion. Among these have been a location list of books for the blind, a location list of books relating to the Pacific Northwest, and a list of books on the Pacific Northwest for small libraries. It has prepared also a Union List of Manuscripts now awaiting publication, and has sponsored cooperative advertising and cooperative information on subscription books. Relating to the matter of periodicals, the P. N. L. A. has taken no official action. At its last Conference, held in August, 1929, however, the topic of Coordination of Periodicals was discussed and initial steps were taken to secure cooperative action. Let me state very briefly the nature of the problem as it appears today.

For many years librarians have recognized the importance of cooperating so as to prevent needless duplication in the purchase of books. The folly of competing with each other for the possession of rare and expensive sets has been particularly evident with regard to highly specialized periodicals. Nevertheless, much remains to be done by way of working out a satisfactory technique of coordination. The cost of serials and their number continues to mount. The cost of binding has been increased by the tendency of magazines to go to the "flat size" and by the intermingling of text and advertising, thus greatly increasing the quantity of matter that must be preserved. College and university and all large public libraries are concerned with the growing costs of periodicals

and essential serials, and must devise ways and means of securing the most necessary material without too seriously depleting the book funds available. The problem of coordination with regard to periodical and serial publications is most important, and it must be admitted that little progress has as yet been made. The situation, however, has been greatly improved by the publication of the *Union List of Serials*. This national survey of the periodical resources of America furnishes sufficient information to enable librarians to work with some degree of knowledge in planning for the future. It shows at least where sets of the various periodicals are to be found and indicates the degree of completeness of the holdings reported.

During the winter and spring of 1929, the University of Washington Library submitted the following proposals in the hope that some plan for future coordination might be adopted:

1. That each *Union List* library of the Pacific Northwest keep that work up to date by a card supplement of additions as made.
2. That each *Union List* library exchange cards with the others so as to keep the *Union List* up to the minute so far as the Pacific Northwest is concerned.
3. That an annual meeting be held to pass on proposed periodical subscriptions with view to dividing the field and fixing responsibility for the acquisition of local serials. Each library to be represented by a delegate empowered to act for his institution.
4. That special interlibrary loan obligations be recognized among the libraries of the Pacific Northwest.
5. That periodic revisions of the *Union List* should be urged and that an effort should be made to induce the cooperation of important libraries strategically located but not yet participating.

These proposals with slight reservations or modifications were unanimously indorsed as to principle, with the intent of working out some practical method of procedure at a meeting to be held for the purpose in connection with the next annual conference of the P. N. L. A. At this conference, which was held in Spokane, I outlined the need for cooperative action, and after some discussion it was proposed that those specially interested in the coordination of serials should meet to work out a plan of action. An adjourned meeting was held as proposed, which was attended by the executives of all save one of the *Union List* libraries in

Paper presented before the Periodical Section, A. L. A. Conference, Los Angeles.

the Pacific Northwest. The following agreements were unanimously approved:

1. That the libraries of the Pacific Northwest represented in the *Union List of Serials* request the following other libraries to cooperate in the co-ordination of periodical purchases:
 Legislative Library, Victoria, B. C.
 Vancouver Public Library, Vancouver, B. C.
 Washington State College, Pullman, Wash.
 Whitman College, Walla Walla, Wash.
 Spokane Public Library, Spokane, Wash.
 Tacoma Public Library, Tacoma, Wash.
 Portland Library Association, Portland, Ore.
 Reed College Library, Portland, Ore.
 Oregon State Library, Salem, Ore.
 Montana State School of Mines, Dillon, Mont.
 Montana College of Agriculture, Bozeman, Mont.
 Boise Public Library, Boise, Idaho.
 This cooperation is needed in the selection and purchase of serials, and will be useful also in connection with interlibrary loans.
2. Each of the libraries above listed is requested to check the *Union List* for its holdings, and to prepare in typewritten form on letter-size paper a list of its serials to be forwarded to each of the *Union List* libraries of the Pacific Northwest and to each other.
3. It was suggested that this list of serials be distributed about Jan. 1, 1930, and annually thereafter.
4. It was agreed that *Union List* libraries send to each other at that time lists of additions which they have made supplementary to the *Union List*, such supplementary lists to be sent also to such new libraries as may agree to cooperate as above.
5. It was further determined to ask one *Union List* library in each State or province to assume the responsibility of cooperating with other libraries in that State or province to see what can be done to improve the situation with regard to completing sets of locally published serials.

These, then, were the Spokane agreements of August, 1929. What progress has been made to date? The first important development was the announcement by the H. W. Wilson Company of active work upon a supplement to the *Union List of Serials*. This altered the local situation radically, and made unnecessary the annual typewritten supplements which had been proposed. It left, however, two important lines of work for local cooperation, namely, an increase in the number of participating libraries, and a division of responsibility for the acquisition and completion of sets of locally published serials. The number of libraries has already been increased. The Library Association of Portland and the Tacoma Public Library are contributing entries to the *Union List Supplement*, and the Library of Washington State College at Pullman promises to contribute when a complete revision of the *Union List* is made. Whitman College of Walla Walla, Wash., has prepared a complete typed list of its periodical holdings in accordance with rules of the *Union List*, and this is available to local libraries as a basis

of interlibrary loans. With regard to sponsorship for complete sets of locally published serials, there is still much to be done. It has been left to the librarian of each State and provincial university library to act as leader in this phase of coordination within his own State or province. In Idaho and Montana, action awaits meetings of the State library associations. British Columbia has reported no progress to date. In Oregon, a meeting was held last December, with the result that Miss Ruth Rockwood of the Library Association of Portland has undertaken the preparation of a list of all serials published in Oregon. This is to be used as a basis for coordination in the State of Oregon, and good progress will doubtless follow the completion of her list. In Washington, several conferences have been held by the Seattle Public Library and the University of Washington Library. A list of the principal serials published in the Pacific Northwest as reported in the *Union List of Serials* has been studied. It was found that some two hundred titles, or fully half of the list, are not reported complete in any library in America. The Seattle Public Library has assumed responsibility for completing thirty-eight of these titles, and the University of Washington Library has sponsored sixty-seven others. It is not expected that all of these sets can be completed, but much can doubtless be done.

A word needs to be said in regard to the type of responsibility assumed by libraries co-operating under the Spokane agreements. Such obligations as are assumed shall be self-imposed and self-enforced. No attempt at co-operative purchasing is intended. Each library will continue to buy its own sets as at present. It will place its own periodical subscriptions and pay its own bills, without interference from any outside person or agency. A knowledge of holdings is the first requisite in such a scheme of cooperation. This fortunately is being supplied by the *Union List of Serials*. The next requisite is the willingness and the ability to define one's own field of acquisition. If each library were to insist upon running its own affairs without regard to its neighbors, little progress could be expected. In the Pacific Northwest, advantage of regional conference has been taken in working out library relationships, and libraries are coordinating with regard to the welfare of the entire area. If similar group action is taken in other areas, it will be possible to look forward to vastly augmented periodical resources, even within the course of the next decade. The ultimate goal of library cooperation should be nothing less than the nationalization of the book resources of America.

A Merit Badge for Reading

By Vera J. Prout

Head, Children's Department, Kansas City Public Library

A VERY INTERESTING experiment is being worked out in the Kansas City (Mo.) Public Library, made possible through a recent action of the local Boy Scout Council. Realizing the influence which good books and the reading habit play in the life of a boy, these men felt that the national Merit Badge for Reading was not furnishing all the impetus needed. A reading committee was authorized to determine how the use of books might be fostered and the Merit Badge idea expanded with greater effect among our own boys. Serving with this committee were the librarian of the public library and the Educational Director of the Boy Scouts. It was decided to inaugurate a local Reading Program and Book Badge, with the hope that it might have a far wider than local interest. The new plan is designed to include every Scout, even a Tenderfoot, instead of waiting until he is a Second Class Scout; but does not prevent his getting the national Merit Badge when he is ready for it. The requirements of the program are as follows:

1. Any Boy Scout registered in the Kansas City, Mo., Council is eligible for this program.
2. The program consists of reading a minimum of six books during any period of three months.
3. These books are to be taken from this selected list of 400 books chosen by the Reading Committee of the Kansas City Council with the aid of the public library.
4. This list of books may be obtained from the main or branch libraries, Scout headquarters and Scoutmasters.
5. The Scout must have or secure a library card.
6. He must secure a book badge registration card from a librarian, at the main or any branch library. This card must be signed by a librarian upon completion and review of the reading of one or more books.
7. This book badge registration card is to be turned in at headquarters to obtain the book badge.
8. The badge will be presented at a court of honor.
9. There is no limit to the number of book badges which a Scout may obtain.

The first task of the library was to prepare a book list that might be used as a guide, and this was done by the Boys' and Girls' Department. The book reviews submitted for the national badge had not been presented in great numbers, but one thing they had done very forcibly; we realized more than ever the fact that there are a great number of boys whom we have never reached, despite the fact that we are serving thousands and really influencing their reading. Some of the books reported on were rather appalling, causing dismay alike to the children's librarians who received them and, when they

were refused, to the boys who handed them in. A great deal of tact was necessary to convince him that there could be books more worthy of consideration, and to prove our point by finding him one he could appreciate. With these experiences in mind, we approached the making of this list. The good reader gave us no concern beyond providing some things which he is sure to like, but a great deal of thought was put on the boy who has read very little and very poorly. For the benefit of these we included, under the heading "Other Good Books," many titles popular in type, which will never pass muster as literature. They are merely bait which we hope will soon be outgrown by the boy to whom they make their present appeal. Nothing below the library standard of inclusion is there, for we must always have some stepping-stones. The other divisions of the list, borrowed from the national requirements, are "Some Standard Books" and "Some Phases of Scouting," with a very liberal interpretation of each phrase. In a list of 400 titles it is manifestly impossible to more than skim the surface of books for boys, and in our examination we will accept any other books of equal merit.

After the lists were distributed and the campaign launched by the Educational Director of the Boy Scouts, it was found that the response from the Scoutmasters was very slow in coming. With a majority of them it was just one more thing added to the many already required. Something must be done to "sell" the idea to those directly responsible for its administration. To meet this situation the Scout troops were divided into groups and assigned to the branch library nearest their meeting place. The branch children's librarians, all of whom are Councilors, issued a verbal invitation to each of these Scoutmasters to come to the library on a given evening and talk over the reading program. The attendance the first evening exceeded expectations, although some of them wondered what it could all be about. The children's librarian gave an informal talk on the value of reading, and suggested some ways of interesting boys in books. The head of the department talked about the list, the interest displayed by the boys and the part the library plays in this new project. The chairman of the Reading Committee and the Educational Director talked from their angle and drew the men into animated discussion of the subject and ways and means of promoting it. Similar group meetings are

planned for every branch in the city where there are Scout troops, and if they all end on as enthusiastic a note as the first one the problem of the Scoutmasters' attitude is easily solved.

Our last school visits were being made just after the lists were ready, and in each of the upper grades the boys were told about the plan and given lists. Posters were put in our boys' and girls' rooms, and we talked to the Scouts with whom we came in contact. Our efforts met an immediate response, which promises great possibilities as the idea becomes more generally known. An unexpected number of entries have been made, and two boys have turned in their first group of six books.

When the national Merit Badge was first started each branch children's librarian was made a Councillor, which made it much easier to handle than having only one for the entire city. The same plan is being used with the local program. Upon entering, the Scout is given a card upon which is written his name, address, library card number and telephone number. A duplicate is kept in our file. On the card is

room for the list of books read, when reviewed and by whom. When he has completed his six books the boy hands his card in at a Court of Honor and receives his badge.

To make it easier for us and because we find he puts more thought into it we ask that the reviews be written. Some of them have been very amusing, but they all show sincerity and effort. One tells us naively that "A person without a good literary background is just out of place in society." Another traces the progress of civilization to the development of the reading habit: "A long time ago men did not have many books so they were not very smart and did not progress very much. Now men have plenty of books to read and are far more advanced than their ancestors." A review of *Boots and Saddles* begins, "Principle characters: Mr. General Custer, Mrs. General Custer," and ends with this bit of information, "After the battle the only thing left on the field was a poor old horse. This horse is now in the Museum in Lawrence."

With the idea just beginning we are sure of its ultimate success.

Bibliography: An Indispensable Aid to Sociological Research

By Mary Moran Kirsch

Librarian, Wisconsin Legislative Reference Library, Madison, Wisconsin

THE GREAT and manifold interest in social and economic problems awakened to an unprecedented degree in the American public, as a result largely of developments in the economic life of the country since the close of the World War, has had the effect of tremendously increasing the volume of printed matter dealing with all the phases of these problems. The consequence is that a man in public service or academic life, or a forward-looking, constructively-minded business man, manufacturer or financier, is well-nigh bewildered by the mass of printed matter on any subject of particular interest to him that comes daily to his desk, or that is to be found in the numerous general and special libraries with which America is blessed more than any other country in the world.

This presents a particularly difficult problem to all those who in their work are called upon to propose or determine social and economic policies. As a rule, these men and women have no time for exhaustive research, but their policies, particularly if they are legislators or high administrative officers, have a considerably greater immediate influence on

the daily life of the people than years of laborious and scholarly research of economists and sociologists. The equipment which they need in reference to a given question consists of information relating to the present status of the problem with which they deal, all that has been done in connection with it, and many facts and data which have been collected on subjects closely related to this problem. They must have a guide, and that guide naturally appears in the form of a bibliography.

In order to fulfill this mission a bibliography should be more than a mere list of books and manuscripts relating to a given subject, and even more than the history or description of them with the notices of dates, editions, and so on. It must be a living record of what has been done in any given field; it must be an eloquent description of the thought which forms the most essential principle of the subject. The material in a bibliography must be so arranged as to present the history of a movement from the time it first begins to take shape in the form of a timid idea, as it works upward against obstacles of all kinds, and as it finally gains recognition as a factor in life,

whether from a scientific or social point of view. To accomplish this, bibliographical material should be arranged as often as is possible in a chronological order, for generally such an arrangement is helpful in gathering up the superficial history of a particular problem. Next, the content of the annotations must unfold the exact point of view of each of the publications under consideration. That is to say, annotations should be arranged and worded so as to bring out the true meaning of the various contributions in relation to the time they were written and the status of the problem at that time. An accurate description should, of course, be given of all the factual information contained in the different articles, pamphlets, and books examined, but, generally, the comments made should not be in the form of criticism. A bibliography which is arranged in the order of time and which is carefully annotated gives not only a picture of the history and present standing of a given question, but it serves as a powerful suggestion as to the lines of rational thought and action that should be followed in the future.

Such a conception of bibliography is of special importance in an institution like the Wisconsin Legislative Reference Library, which aims to place at the disposal of its patrons the most comprehensive and accurate information which it is possible to obtain, and where legislators and public officials come for information and enlightenment on public questions which will form the subject of future legislative or administrative action.

Because of the nature of its work the reference library finds it necessary to compile many bibliographies, beginning with simple lists of references especially requested by legislators, public officials, students and private citizens, and ending with select or comprehensive bibliographies which, also, are compiled upon request, or which are prepared to serve the librarians and assistants in working with theories, policies, and opinions on economic, social and political questions.

The preparation of great numbers of bibliographies of the latter type, the demand for which is increasing, is beyond the powers of such a small staff as is that of the Wisconsin Legislative Reference Library; hence, the library has found it profitable to lean heavily on the students who are enrolled in the University of Wisconsin Library School, and who are required to submit a bibliography to the Library School as one of the requisites for graduation. It has been the practice of the Legislative Reference Library to undertake the supervision and instruction of students who are interested in bibliographies of a sociological, economic and political character. In this way,

the library receives a number of bibliographies which are exceptionally well done, and the students find it possible to work with subjects which undoubtedly would remain unknown to them were the library not at hand to furnish the necessary background in subject matter and library technique. The distinctive qualifications of the students of the Library School from the point of view of education, training, and earnestness of purpose, and the further fact that in working out their bibliographies they come in contact with specialists in various fields at the state capitol and the University of Wisconsin, make their work most valuable in the attempt of the Wisconsin Legislative Reference Library to reach the high ideal of a constructive and stimulating collection of bibliographies, the subject matter of each of which is concerned with practical problems of immediate importance.

The following bibliographies which have been compiled during the past two years for the Legislative Reference Library by University of Wisconsin Library School students serve as good illustrations of an approach to model bibliographic studies on subjects of current and social interest:

- Large scale agricultural marketing.
- Economic and sociological research in agriculture.
- Police power.
- Chain stores.
- State advertising.
- Maternity as a public health problem.
- Branch and chain banking.
- Utilization of farm and forest waste.
- Cold storage and refrigeration of food.
- Elimination of illiteracy.
- Public opinion: its nature and agencies for creation and dissemination.
- Land utilization and land economics.
- Lobbying.
- Roadside development.
- Sale of drugs other than by pharmacists.
- Commercial and political expansion in the Caribbean region.
- Training of employees by corporations.
- Has woman suffrage benefited the United States?
- Waterpower and superpower.
- Commercial canning for the last half decade.
- Dairying in the South since 1920.
- Satellite cities.
- Road building problems.
- Crop and market reports: their history and present status in the United States.
- Fish culture.
- The American woman at work.
- The machine age in industry.
- Newest fads in education.
- Petty forms of gambling.
- Migratory farm labor.
- The financing of public education.
- Sterilization of abnormals.
- Methods of identifying criminals.
- Leadership.
- The trend of progress of the movement to improve small load conditions.
- Legal phases of agricultural marketing and agricultural cooperation.

Librarian Authors

BURTON EGBERT STEVENSON, born in Chillicothe, Ohio, has been writing ever since he was a boy. At the age of twelve he started a printing office and an amateur paper of his own called *The Boys' Own*, a monthly publication which he continued until he went to college. While at Princeton he acted as correspondent for *The New York Tribune* and the old *United Press* and after college he took a newspaper job in his home town. In 1894 he was City Editor of the *Chillicothe Daily News* and in 1898 of the *Chillicothe Daily Advertiser*. In 1899 he was chosen librarian of the Chillicothe Public Library and has held this position ever since, the trustees giving him leave of absence for service in France, twenty-five months during the war, as European Representative of the A. L. A. Library War Service, and four and a half years recently as Director of the American Library in Paris. At the time Mr. Stevenson became librarian the Chillicothe Public Library was quite small and occupied a room in the city building. Now it has a handsome Carnegie building of its own, built in 1907. Its circulation has grown from 19,752 in 1900 to 166,352 in 1929.

His most widely known work is *The Home Book of Verse* published in 1912, but he has many other volumes to his credit. In 1900 he published *At Odds With the Regent*, a story of the Cellamare Conspiracy; in 1901 *A Soldier of Virginia*, a story of Colonel Washington and Braddock's defeat; in 1902 *The Heritage and Tommy Remington's Battle*; in 1903 *The Holladay Case*; in 1904 *Cadets of Gascony*, two stories of old France, and *The Marathon Mystery*; in 1905 *The Young Section Hand*; in 1906 *The Girl With the Blue Sailor and Affairs of State*; in 1907 *The Young Train Dispatcher and That Affair at Elizabeth*; in 1909 *The Quest for the Rose of Sharon and The Young Train Master*; in 1910 *The Path of Honor*; in 1911 *The Spell of Holland*; in 1912 *Mystery of the Boule Cabinet and The Young Apprentice*; in 1913 *The Gloved Hand and The Destroyer*; in 1914 *The Charm of Ireland*; in 1915 *Little Comrade*; in 1917 *A King in Babylon*; in 1918 *The Girl from Alsace*; in 1922 *The Kingmakers*; in 1923 *Famous Single Poems*; in 1924 *The Storm Center*, and in 1926 *The Coast of Enchantment*. He is also editor of Theodore Winthrop's posthumous novel, *Mr. Waddy's Return*, 1904; Condensed Classics edit. *Tom Jones*, 1904; Editor and Compiler of *Days and Deeds* (verse), 1906; *Days and Deeds* (prose),

BURTON EGBERT STEVENSON

1907; *Poems of American History*, 1908; *A Child's Guide to American Biography*, 1909; *Home Book of Verse*, 1912; *Home Book of Verse for Young Folks*, 1915; *Home Book of Modern Verse*, 1925. A dramatization of *The Boule Cabinet* was successfully produced by Winthrop Ames.

This summer Mr. Stevenson returned to America and has plunged into his literary work again. He hopes to have a new novel ready for next spring and then he will go ahead with a thorough revision and amplification of *The Home Book of Modern Verse*. These are only two of the many projects he has on hand which, as he says, "have been accumulating, so to speak, ever since 1925 when I went to Paris. I have had no book since January, 1926, when *The Coast of Enchantment* was published. I was home for four months last summer and managed to revise and enlarge *The Home Book of Verse for Young Folks*, but that was all I had time to do." Mr. Stevenson is a member of the Century Club and the Authors Club of New York; of the Union Interallié of Paris; of the National Institute of Arts and Letters and of the Library Institute.

THE LIBRARY JOURNAL

October 1, 1930

Editorial Forum

THE GREAT regional conference representing the librarians of the Northeast, which brought together eight hundred attendants at Swampscott last June will be patterned by the regional meeting of librarians of the Northwest at St. Paul, October 14-17. Here the state meetings of Minnesota, Wisconsin, Iowa, Nebraska and North and South Dakota will be jointly held and the occasion will be of first importance. Both Minnesota and Wisconsin have long been noteworthy as leading library states and the other states of the great Northwest are following their example. These regional meetings serve the double purpose of bringing together men and women who are leaders in the profession and giving the younger folk better opportunity to participate than at the crowded and often distant national conference.

IF SEVERAL institutions would conduct surveys in the same manner as the University of California and compare findings, a very definite estimate of the cost of library operation in a university library could be made. In view of the amount of money the libraries of this country are spending, detailed information as to costs should be available and available in shape to permit ready comparison of the figures from similar institutions. For six months every member of the library staff of the University of California was required to keep a daily record of the actual disposition of time for every hour of the day under one or more of several headings worked out for the department. At the end of each month the individual time-sheets were collected by the department head, each of whom consolidated the data on a single sheet covering the work of the department for the month. This proved an effective way of gathering the essential facts. Miss Hand in her article states that a great many things were learned from their survey and many of them

they will be able to turn to good account. She recommends, if any librarian finds life becoming dull, that he initiate an investigation of this kind in his own library.

FOR MANY YEARS librarians have recognized the importance of cooperating to prevent needless duplication in book purchase. The problem of competing with each other for the possession of rare and expensive sets has been fully appreciated by libraries, but not as yet worked out. In this number Charles W. Smith tells of how the Pacific Northwest has cooperated in its periodical holdings, and he suggests that if similar group action is taken in other areas it will be possible to look forward to vastly augmented periodical resources. Certainly the ultimate goal of library cooperation should be nothing less than the nationalization of the book resources of America. In the July issue of THE LIBRARY JOURNAL, Dr. Jurgens of the Notgemeinschaft der Deutschen Wissenschaft, Berlin, gave a short description of the German Cooperative Clearing House for Duplicates in use since 1921. The main differences from the Wilson plan, outlined in THE LIBRARY JOURNAL of February 1, 1930, are that there is no money involved; service is limited to certain libraries but includes both books and journals; and that all orders can be filled as there is no waste of time by making demands on exhausted stock.

A BOY SCOUT Merit Badge for Reading is an interesting experiment being worked out in the Kansas City, Mo., Public Library and one sure of ultimate success. The Boy Scout local Council, realizing that the national merit badge for reading was not furnishing all the impetus needed, appointed a reading committee of which Purd B. Wright, librarian of the Kansas City Public Library, was a member, to determine how the use of books might be fostered and the merit badge expanded with greater effect. It was decided to inaugurate a local reading program and book badge which would include every Scout, even a Tenderfoot, instead of waiting until he is a Second Class Scout. The program requires that each boy read a minimum of six books, taken from a selected list of 400 books chosen by the Reading Committee, during any period of three months. Written reviews of each book must be accepted by a children's librarian, either at the main library or at one of the branches, and some reviews have

been very amusing. One boy went so far as to trace the progress of civilization to the development of the reading habit and another told naively that "a person without a literary background is just out of place in society."

ANOTHER veteran is gone, of the A. L. A. in its beginnings, leaving Melvil Dewey and R. R. Bowker of the original trio and Charles Evans, bibliographer, still active in their several ways, remaining from the roster of 1876. The present generation can scarcely appreciate the value of the early work which William Eaton Foster, like Charles A. Cutter and others, gave to moulding the association in the seed-sowing days, fore-shaping it for the blossoming into such rich fruition in these later years. Mr. Foster's initial service was in preparing the valuable reference lists as to American history printed in the early volumes of this JOURNAL and reprinted by the Society for Political Education. He had the unique record of growing up with the library which he made famous and which made him famous in the profession, for he was called to the librarianship of the Providence Public Library at its inception, and at the end of a half century saw it one of the most notable among our public libraries. He was a man of modest and gentle mien, but his modesty could not conceal his ability as administrator and scholar, and his indefatigable industry produced many valued contributions to history and bibliography. He had the wisdom to suggest an associate who should become his successor and in his case the oft repressed query, "How soon will the old man go?" was never in thought because he rightly belonged in and to the library until the day of his death. Happily the appreciation of him from the pen of Dr. Koopman and the latest portrait appeared ante-mortem in the May, 1930, LIBRARY JOURNAL, so that he had the satisfaction of reading what would be said of him after his passing. Long may his example and the tradition of his good work remain active in his library and in the chosen profession which he honored.

WORD COMES at the last moment from the North German Lloyd Steamship Co. that the proposed trip of the German librarians has been cancelled, probably for the reason that German librarians are not so amply paid that sufficient of them could venture the modest cost of the journey. We voice the regret of the American library profession that they may not entertain their German brethren as had been planned.

Library Chat

ONE OF the quaintest and most successful reading centers in the South is told about in *The Christian Science Monitor* of September 9. It is a free library of more than 3,000 volumes that has been established far out in the Ozark Hills by Mrs. Ada Check, 72-year-old housewife and book enthusiast. The library at Check's Corner, Arkansas, is run strictly in accordance with the ways of pioneer neighborliness; its door is never locked and the books are free to whoever wishes them. Country people are at liberty to come at any hour of the day, take out whatever books they wish, and keep them until they have finished reading them. Not a volume has been stolen during all the history of the project and no more than half a dozen have been lost in as many years.

Nearly a quarter of a century ago, Mr. and Mrs. Check organized the first community club of their countryside and at that time Mrs. Check conceived the idea of a community library, although the club was much wanting in funds as were its founders. But one day a means presented itself; it came in the form of a stray sheep, a bedraggled ewe, which stumbled into the Check premises one night. Mrs. Check fed the straggler and gave it quarters for the night and next morning she found herself possessor of two sheep instead of one, for during the night a lamb had been born. The self-elected hostess advertised for an owner, but as no owner appeared she resolved to found her library with the flotsam of a rainy night. It happened that in her girlhood she had learned the art of carding and spinning wool, so when summer came, Mr. Check sheared the ewe and his wife carded the wool, spun it into thread, and wove a coverlet which she sold. From that start the holding of sheep increased to more than twenty head, which gave abundant wool for long winters of carding, spinning, and weaving. Within three years Mrs. Check had made and sold more than two dozen hand-woven coverlets and at least fifty hand-made patch quilts and put the returns into her community library. Six years ago, when sufficient funds had accrued, Mrs. Check bought the furnishings for a one-room library and an initial stock of about 200 worthwhile books, and Mr. Check put up a frame building immediately behind his store to house the beginnings. The quaint backwoods library has grown steadily since that date until now there are more than 3,000 volumes, of which more than 500 were contributed gratuitously the first year.

The October Forecast

A check list of books of general interest whose publication dates fall during the coming month

(Exact date of issue, when known, is given directly after publisher's name)

Biography, History and Travel

Addams, Jane. *The Second Twenty Years at Hull House*. Macmillan. \$4.

With autobiographical notes and reflections.

A Yankee Trader in the Gold Rush. Houghton Mifflin. \$3.50.

The letters of Franklin A. Buck, 1846-1880.

Beard, Charles A. and William. *The American Leviathan*. Macmillan (28). \$5.

A popular yet serious study of that American Leviathan—the Government of the United States.

Beard, Miriam. *Realism in Romantic Japan*. Macmillan (7). \$5.

Beaux, Cecilia. *Background with Figures*. Houghton Mifflin. \$5.

The foremost woman painter in America has written a delightful autobiography.

Brewerton, George D. (edited by Stallo Vinton). *Overland with Kit Carson*. Coward McCann (24). \$4.

Carswell, Catherine. *The Life of Robert Burns*. Harcourt (16). \$3.75.

Charpentier, John. *Rousseau, the Child of Nature*. Dial Press (28). \$5.

Churchill, Winston. *A Roving Commission: My Early Life*. Scribner (1). \$3.50.

First complete account of Churchill's early life.

Clemenceau-Jacquemaire, Madeline. *Madame Roland*. Longmans, Green (1). \$4.

Colum, Padraic. *Cross Roads in Ireland*. Macmillan. \$3.50.

Not only the look and voice of Ireland today, but the tradition from which she sprang.

Coolidge, Dane and Mary Roberts. *The Navajo Indians*. Houghton Mifflin. \$4.

Full of legends and stories gathered from actual conversation with the Indians.

Craig, Gordon. *Henry Irving*. Longmans, Green (1). \$3.

Cresson, W. P. *Francis Dana*. Dial Press (8). \$5.

A Puritan diplomat at the court of Catherine the Great.

Croce, Benedetto (Charles H. Tutt, trans.). *Politics and Morals*. Oxford Univ. Press. \$2.50.

Cross, Wilbur L. *Four Contemporary Novelists*. Macmillan (14). \$2.

Four critical biographical essays, the subjects being Galsworthy, Wells, Bennett, and Shaw.

Der Ling, Princess. *Lotos Petals*. Dodd Mead. \$3.50.

A delightful combination of fact and fancy—of random memories from an eventful life, and of the folk-lore of old China.

Dodd, E. H., Jr. *Great Dipper to Southern Cross*. Dodd Mead. \$3.50.

From Bermuda to West Indies, the Canal Zone and the Galapagos.

Fisk, Ethel F. *The Letters of John Fiske*. Macmillan. \$5.

Fitzgerald, William, Jr. *Gentlemen All*. Longmans, Green (8). \$2.

The story of the landed Southern gentleman, hospitable, gallant, buoyant, and yet essentially ineffectual.

Foucault, Marquise de. *A Chateau at the Front, 1914-1918*. Houghton Mifflin. \$3.50.

Journal of Madame la Marquise de Foucault, who lived near the Belgian frontier during the war years.

Frothingham, Thomas Goddard. *Washington: Commander in Chief*. Houghton Mifflin. \$5.

Fuess, Claude M. *Daniel Webster*. Little, Brown (17). \$10.

Fülöp-Miller, René. *The Unknown Tolstoi*. Dial Press (28). \$5.

By the author of *Rasputin, the Holy Devil*.

Fyfe, Hamilton. *Northcliffe: An Intimate Biography*. Macmillan (7). \$4.

Gibson, Walter B. *Houdini's Escapes*. Harcourt, Brace (2). \$3.

The first and only authentic record of the actual methods devised and used by Houdini, the master showman of the twentieth century.

Goldring, Douglas. *The French Riviera*. Farrar & Rinehart (17). \$3.

Grant, Amy Gordon. *Letters from Armageddon*. Houghton Mifflin. \$3.50.

Letters sent to Mrs. Grant by friends who were interested in her readings for war relief.

Gray, Edward J. *Leif Eriksson: Discoverer of America*. Oxford Univ. Press. \$5.

Griffiss, Townsend. *When You Go to Hawaii*. Houghton Mifflin. \$3.50.

Grubb, Kenneth G. *Amazon and Andes*. Dial Press (8). \$5.

Hapgood, Norman. *The Changing Years: A Life in Three Eras*. Farrar & Rinehart (3). \$4.

Reminiscences.

Holland, Clive. *Czechoslovakia—The Land and Its People*. Dodd Mead. \$2.50.

- James, Henry. *The Life and Letters of Charles W. Eliot*. Houghton Mifflin. 2v. \$10.
The life of the head of a great university, Harvard, for forty years.
- Jordan, Donaldson, and Pratt, Edwin J. *Europe and the American Civil War*. Houghton Mifflin. \$4.
- Kirkconnell, Watson. *The European Heritage*. Coward McCann (15). \$2.
Contributions made to civilization by all the different nationalities and peoples of Europe.
- Lord Balfour: *an Autobiography*. Houghton Mifflin. \$3.50.
The early years of a great statesman who was withal a philosopher and accomplished man of letters, a keen sportsman, a whimsical and charming human being.
- McCabe, Lida Rose. *Ardent Adrienne*. Appleton. \$3.
Life of Madame de La Fayette.
- Mackall, Lawton. *Portugal for Two*. Dodd Mead. \$3.50.
- Marjoribanks, Edward. *For the Defence*. Macmillan (14). \$2. (Cheaper edition.)
Life of Sir Edward Marshall Hall.
- Mason, Edward S. *The Paris Commune: An Episode in the History of the Socialist Movement*. Macmillan.
The Commune of Paris of 1871.
- Massingham, H. J. *A Friend of Shelley*. Appleton. \$3.50.
A memoir of Edward John Trelawny.
- Meier-Graefe, Julius. *Pyramid and Temple*. Macaulay (1). \$5.
Travel diary of a philosopher and artist combined.
- Miller, Francis P. and Helen H. *America the Pace Setter*. Morrow (2). \$3.
A study of the influence on Europe of America in all lines, social, political, economic, etc.
- Morley, F. V. (text by). *Everybody's Boswell*. Harcourt. \$3.50.
- Newmark, Harris. *Sixty Years in Southern California*. Houghton Mifflin. \$7.50.
- Odum, Howard W. *An American Epoch*. Holt. \$3.50.
Southern portraiture in the national picture.
- Page, Elizabeth. *Wagons West: A Story of the Oregon Trail*. Farrar & Rinehart (3). \$5.
The true story of a New Englander who went west in '49.
- Parrington, Vernon Louis. *Main Currents in American Thought*. Volume III, *The Rise of Critical Realism in America*. Harcourt, Brace (9). \$4.
The theme of Volume III is the industrialization of America under the leadership of the middle class and the rise of a critical attitude toward the ideals of that class.
- Pennypacker, Morton. *The Two Spies: Nathan Hale and Robert Townsend*. Houghton Mifflin. \$5.
- Pepper, George Wharton. *In the Senate*. Univ. Penn Press. \$2.
An appointed Senator evaluates the United States Senate.
- Potter, E. S. G., trans. *Boehmer's Life of Luther*. Dial Press (18). \$5.
- Powell, Lyman. *Mary Baker Eddy*. Macmillan (7). \$5.
- Riegel, Robert E. *America Moves West*. Holt (10). \$5.
- Robinson, William A. *Thomas B. Reed: Parliamentarian*. Dodd Mead. \$5.
- Rockwell, Paul Ayres. *American Fighters in the Foreign Legion*. Houghton Mifflin. \$5.
The World War story of the most romantic fighting unit the world has ever known.
- Scarborough, Katherine. *Homes of the Cavaliers*. Macmillan (14). \$5.
Storied houses of old Maryland.
- Schneider, Herbert W. *The Puritan Mind*. Holt (10). \$4.
How the New England Puritans laid the foundation of "the genteel tradition."
- Sheppard, E. W. *The Life of General Forrest*. Dial Press (28). \$5.
- Somerville, E. Æ. *The States Through Irish Eyes*. Houghton Mifflin. \$2.50.
- Sullivan, Mark. *Pre-War America*. Scribner (1). \$5.
The third volume of *Our Times*.
- Turner, Nancy Byrd. *The Mother of Washington*. Dodd Mead. \$3.50.
- Vagts, Miriam Beard. *Realism in Romantic Japan*. Macmillan. \$5.
- Van Doren, Carl. *Swift*. Viking (4). \$3.
Life of Jonathan Swift.
- Wade, John Donald. *John Wesley*. Coward McCann (8). \$3.50.
- Ward, Christopher. *The Dutch and Swedes on the Delaware, 1609-64*. Univ. Penn Press. \$5.
- White, Henry C. *The Life and Art of Dwight William Tryon*. Houghton Mifflin. \$7.50.
The life of a poetic painter of New England landscapes.
- Winckler, Joseph (Whittaker Chambers, trans.). *Bomberg: The Mad Count*. Farrar & Rinehart. (17). \$3.
- Wingfield-Stratford, Esmé. *Those Earnest Victorians*. Morrow (2). \$3.50.
In a book full of wisdom and humor the author presents a vivid picture of a fascinating and misunderstood society.

Winston, Robert W. *High Stakes and Hair Trigger*. Holt (10). \$3.50.

The life of Jefferson Davis.

Woods, William Seaver. *Colossal Blunders of the War*. Macmillan. \$2.50.

Our errors laid bare in order to prevent such disasters in the future.

Religion and Psychology

Bilkey, J. G. *Solving Life's Everyday Problems*. Macmillan (14). \$1.75.

Calkins, Clinch. *Some Folks Won't Work*. Harcourt (9). \$1.50.

Analysis of unemployment.

Clemen, Prof. Carl. *The Religions of the World*. Harcourt, Brace. \$5.

In collaboration with eleven other eminent authorities.

Eisler, Robert (A. H. Krappe, trans.). *The Messiah Jesus*. Dial Press (28). \$10.

Foerster, Norman. *Toward Standards*. Farrar & Rinehart (17). \$2.50.

Franc-Nohain. *Life's an Art*. Holt (10). \$2.50.

There are books in plenty that tell you how to think and how to play, but there are very few on how to live.

Lewis, Clarence Irving. *Inference and Investigation: The Elements of Logic*. Macmillan. \$2.50.

Lunn, Arnold. *The Flight from Reason*. Dial Press (18). \$3.50.

Conflict between religion and science.

Martin, Alfred W. *Seven Great Bibles*. Stokes (23). \$2.50.

An attempt to introduce other religions besides Christianity.

Ransom, John Crowe. *God Without Thunder*. Harcourt, Brace. \$3.50.

An unorthodox defense of orthodoxy.

Robertson, Edith A. S. *He Is Become My Song*. Macmillan (21). \$2.25.

The story of Christ in poetic form.

Ross, W. D. *The Right and the Good*. Oxford Univ. Press. \$4.50.

Author examines nature relations, and implications of three conceptions which appear to be fundamental in ethics—those of "right," "good in general," and "morally good."

Saurat, Denis. *Literature and the Occult: from Milton to Whitman*. Dial Press (18). \$4.

Slosson, E. E. *A Number of Things*. Harcourt, Brace (9). \$2.

The author discussed in a personal, light vein a great variety of scientific, literary, sociological, and religious subjects.

Snowden, James H. *What Do Present-Day Christians Believe?* Macmillan (14). \$2.50.

Belles-Lettres

Aiken, Conrad. *John Deth and Other Poems*. Scribner (1). \$2.50.

Bridges, Robert, ed. *Poems of Gerard Manley Hopkins*. Oxford Univ. Press. \$3.

Cazamian, Louis. *The Development of English Humor*. Macmillan (7). \$1.75.

Colum, Padraic. *Old Pastures*. Macmillan. \$1.50.

New poems.

Colum, Padraic. *Orpheus: Myths of the World*. Macmillan (7). \$5.

Drachman, J. M. *Studies in the Literature of Natural Science*. Macmillan (7). \$3.50.

A history of the books about science.

Drinkwater, John. *American Vignettes*. Houghton Mifflin. \$10.

Poetry.

Flexner, Hortense. *This Stubborn Root and Other Poems*. Macmillan. \$1.25.

Frost, Robert. *Collected Poems*. Holt. \$5.

Complete poetical works to date.

Grenfell, Sir Wilfred. *The Fisherman's Saint*. Scribner (1). \$1.

Essay on St. Andrew, the patron of all fishermen.

Harnandez, Jose. *Gaucha: Martin Fierro*. Farrar & Rinehart (3). \$3.50.

A narrative poem.

Kreymborg, Alfred, ed. *Lyric America*. Coward McCann (24). \$5.

An anthology (1630-1930).

McCutcheon, George Barr. *Books Once Were Men*. Dodd Mead. \$2.50.

Hazards and delights of book-collecting and the outstanding personalities, past and present, in the field.

Noyes, Alfred. *Forty Singing Seamen and Other Poems*. Stokes (9). \$3.

Robinson, Corinne Roosevelt. *Out of Nymph*. Scribner (1). \$2.

New poems collected for the first time.

Robinson, Edwin Arlington. *The Glory of the Nightingales*. Macmillan. \$2.

Sandburg, Carl. *Early Moon*. Harcourt, Brace (2). \$2.50.

Thompson, Edward. *In Araby Orion*. Farrar & Rinehart (10). \$1.50.

A prose elegy tribute to a young soldier killed in the Holy Land during the war.

Wister, Marina. *Night in the Valley*. Macmillan. \$1.25.

Poetry.

Miscellaneous Non-Fiction

Blatz, William E., and Bott, Helen. *The Management of Young Children*. Morrow (2). \$3.

Benjamin, Harold. *Man, the Problem Solver*. Houghton Mifflin. \$2.50.

A compact outline of civilization.

- Boyden, Elizabeth Clark, and Warren, Mrs. Prescott. *Contract Bridge of 1931*. Harcourt, Brace. \$2.
New and revised edition.
- Briffault, Robert. *Rational Evolution: The Making of Humanity*. Macmillan. \$3.50.
New, rewritten edition.
- Brooks, C. Harry. *Your Character from Your Handwriting*. Morrow (2). \$1.75.
- Carrick, Alice Van Leer. *Collector's Luck in Spain*. Little, Brown (17). \$3.
Spain is the happiest hunting ground that Mrs. Carrick, as a collector, has ever found.

There are two green doors in Hazel's life; one is in the back of her mind and leads into a make-believe land, the other is a green door in the house across the street.

Wiese, Kurt. *Wallie the Walrus*. Coward McCann (29). \$1.50.

Adventures of a baby walrus.

Williamson, Julia. *Stars Through Magic Casements*. Appleton. \$2.

Stories about stars.

In The Library World

Decidedly Hawaiian in Design

THE MAUI COUNTY FREE LIBRARY, Wailuku, Territory of Hawaii, was opened for service one year ago, Aug. 6, 1929. The structure was designed and built under the supervision of Architect W. C. Dickey, at a cost of \$75,000. This money was appropriated by the Territorial Legislature for building and equipment. The library faces the other county build-

ings and is decidedly Hawaiian in design. The steep, red-tiled roof resembles the roofs of the grass huts used by the Hawaiians in the early days. The exterior is white cement with green window trimmings. An attractive patio opening off the children's room is sheltered from the street by vines and trellis and from the sky by a Monkey-pod tree with an enormous spread.

The Patio in the Maui County Library, Hawaii

New Buildings

FARIBAULT, Minnesota, dedicated the Thomas Scott Buckham Memorial Library July 20, 1930.

WORD COMES from Bath, England, that funds are being raised for a new hospital which will carry out the last wish of the late Alderman Cedric Chivers, former Mayor of Bath, and pioneer in library bookbinding methods. As the friend of many American librarians, Mr. Chivers was noted for his hospitality to library visitors as well as for his counsel and service to the library profession. The present Mayor of Bath writes that any contributions toward the new hospital project will be gratefully received and may be sent to him at Guildhall, Bath, England.

MRS. CAROLINE WELLS of Brewster, New York, has donated \$20,000 to the Brewster Library Association which makes possible a new library building. The association obtained the site from the late William A. Ferris and also a legacy of about \$46,000, which he left the town of Southeast, of which Brewster is a part, and which the town board has voted to use for the library.

THE SHAKESPEARE LIBRARY building at Washington, D. C., across the way from the Library of Congress, and contributed by Henry Clay Folger, was completed September 15.

THE LIBRARY of Jurisprudence of the United States was dedicated on June 27 in the lecture rooms of the Jurisprudence Seminar of the Hamburg, Germany, University.

North Central Library Conference

AMONG THE SPEAKERS scheduled for the North Central Library Conference, to be held in St. Paul from October 14 to 17, are Dr. Everett Dean Martin, Director of The People's Institute, New York City, who will speak on "What Is An Educated Person?" Herbert Heaton, Professor of History, University of Minnesota on "Sorry, We Haven't Got It,"

versity Library. Sir Henry Miers, who recently retired from the vice-chancellorship of the University of Manchester, is chairman of the commission. The other members are Sir Frederic G. Kenyon, director of the British Museum; Sir Edmund Chambers, Shakespeare scholar, accompanied by Lady Chambers; George N. Clark, historian; Henry R. K. Harrod, economist; and Kenneth Sisam of the Oxford University Press. Also with the group are Wilhelm Munth, librarian of the University

The Charging Desk, Maui County Library, Hawaii

and Carroll Streetor of the staff of *The Farmer's Wife*. Four general sessions are scheduled, round tables on Small and Large Public Libraries, School Libraries, College and University Libraries, County Libraries, Hospital Work, Children's Work and Cataloging. An informal reception will be given by the St. Paul Public Library on Tuesday evening and a dinner for the entire group is planned for Thursday evening. Exhibits will be on the mezzanine floor of the Hotel Lowry.

Oxford Library Group Tour America

THE BODLEIAN LIBRARY COMMISSION of Oxford University, England, arrived in New York, September 16, on its tour of this country and Canada, to study libraries for assistance in planning the extension of the Oxford Uni-

of Oslo, Norway, and Mr. Sindinge-Larsen, architect, who also plan to study American library methods. Dr. William W. Bishop, librarian of the University of Michigan, is accompanying the commission on its tour.

Pasteur Memorial Library

WELL-KNOWN Americans, some of them residing in France, are taking active interest in the Pasteur Memorial Library at the University of Strasbourg. This undertaking is intended not only as a monument to the illustrious scientist, but also to strengthen the bonds of friendship between France and the United States. Several hundreds of valuable books, some of them in choice bindings, already have been contributed. The executive board is sending out an appeal for either books or money with which to buy more.

D. C. Numbers on L. C. Cards

THE PROJECT for printing Decimal Classification numbers on Library of Congress cards is now a reality. The work of assigning class numbers began on April 1, 1930, and cards with numbers on them began to appear by the end of the second week in April. By Aug. 1 a staff of three began carrying out a program even broader than anticipated, embracing practically all books in foreign languages as well as in English. The purpose of this communication is to acquaint the beneficiaries of this work and librarians in general with its scope and method, matters of policy in applying the Decimal Classification where the classifier's discretion is a factor, and the changes and developments in the Decimal Classification authorized by the editor, Miss Dorkas Fellows.

Scope. The following classes of books currently cataloged by the Library of Congress are being assigned Decimal Classification numbers:

- (a) All books in English, with the exception of city directories, telephone directories, and nearly all current fiction.
- (b) Some foreign books, as many as the time of the present staff will permit.
- (c) Nearly all serial publications.

Method. The Decimal Classification numbers appear in the lower right-hand corner of the Library of Congress cards. Often more than one number is found there: the one at the extreme right is then the main class number, those inclosed in square brackets are alternatives suggested either in the Decimal Classification or by this office, and those in parentheses are the numbers assigned to the set or series of which the given book is a part.

In applying the Decimal Classification numbers no account can be taken of deviations from the classification tables as used in individual libraries. The numbers on the cards conform strictly to the Decimal Classification tables as given in the twelfth edition and are carried out as far as the tables permit. In making use of the numbers, libraries should take into consideration their policy in deviating from the Decimal Classification. It should be noted that geographic and general form divisions have been used rather freely on the cards, the former on .09 as a base (or as otherwise indicated in the Decimal Classification).

Changes and Expansions of the D. C. Libraries will be glad to know that this office

Books catalogued by other government libraries and outside libraries for which the Card Division of the Library of Congress prints cards obviously cannot be supplied with Decimal Classification numbers under the present arrangement. On the other hand, practically all copyright books are catalogued by the Library of Congress and are assigned numbers.

is in close touch with the editorial office of the Decimal Classification (also located in the Library of Congress) and is permitted to make use of changes and expansions which have not yet appeared in print. In some instances the urgent need for a given expansion or change in the classification was made obvious by the work of this office, and the editor has gone out of her way to make it available.

The following changes in and additions to *Decimal Classification*, ed. 12, have been authorized by the D. C. editorial office and are to be incorporated in the 13th edition:

- | | |
|----------|---|
| 007 | Action and organization in general. Human labor. |
| 312 | Change last note to read: "Class general local statistics of population on 312.09, divided geographically, like 930-999; e. g., Population of Maine 312.09741." An expansion by topics—births, deaths, etc.—is under consideration for 312.1-9. |
| 343.3-.9 | Transfer general local material to 343.093-.099, leaving 343.1-9 for topical expansion now under consideration. |
| 371.333 | Broadcasting. |
| .335 | Visual instruction. Include here Television, considered as a method of instruction. |
| 529.2 | Eras, various kinds of years, months, weeks, decades, etc. |
| .3 | Calendars in general, including ancient and non-Christian. |
| .4 | Christian calendars. |
| .41 | Coptic and other primitive Christian calendars. |
| .42 | Calendar of Julius Caesar. |
| .43 | Calendar of Gregory, 1582-. Almanacs. |
| .44 | Ecclesiastical calendar: determination. |
| .5 | Modern projects for reform of the calendar. |
| 581.92 | Broaden present meaning from "Marine flora" to "Aquatic flora." |
| .928 | Include with Arctic Ocean on this number Antarctic Ocean (now 581.929). |
| .929 | Use for "Fresh-water flora," dividing 581.9293-.9299, like 930-999. |
| 591.92 | Follow same plan as for 581.92. |

Pending Changes:

- | | |
|------------|---|
| 133-134 | Class marks are not being given for Clairvoyance, Clairaudience, Lucidity, Telepathy, Materialization, Dematerialization, Telekinesis, and Levitation, pending possible transfer from 134 to 133. |
| 629.13-.19 | Scheme for Aeronautics is to be revised, probably consolidated on 629.13. Consequently works on Aeronautics are now being classed on 629.13, without subdivision except for form. |
| 653 | Scheme for Shorthand is being revised, and consequently subdivisions of 653 are not at present being used. |
| 772 | Class mark for Color photography is being omitted, pending possible change. |
| 773 | Class mark for Woodbury type is being admitted, pending possible change. |

Extension of the Service. This office welcomes inquiries and suggestions in regard to its work. With the staff now complete, it is pos-

sible that it will be able to undertake to supply D. C. numbers for books it has already classified or even for others in the Library of Congress on the same basis as the Library of Congress supplies L. C. classification numbers.

Caution. Since not all matters of policy in applying the Decimal Classification could be settled at once when the work was begun, some changes have been made since the first half of April. Libraries are asked to note the following inconsistencies:

- 923.1 - .9 Country subdivisions sometimes omitted.
 808.81 - .87 Used at first also for collections containing only English and American poetry, drama, etc.; now 821.08 - 827.08 are used.
 924-928 Often carried out beyond the point recommended in the Decimal Classification.

The work of this office is in a broader sense the cooperative effort of American libraries than any project heretofore undertaken. More libraries support it and a larger percentage of them receive (or may receive) the benefit of it. Because it is in its beginnings and has immense possibilities for usefulness (particularly in reducing the cost of cataloging), it bespeaks the support and encouragement of all libraries using the Decimal Classification.

Chicago in 1933

THE INTERNATIONAL Library Committee has accepted an invitation from the American Library Association to hold a meeting in Chicago in 1933, according to an announcement from A. L. A. Headquarters. Members of this committee form the executive body of the International Federation of Library Associations, organized last year in Rome largely through American aid and initiative.

Free

THE EXPLORERS' CLUB offers to any library, needing it to fill out their set, Volume 1 of *Hakluytus Posthumus; or Purchas His Pilgrimes*. Glasgow, MacLehose, 1905. Address Dr. Frederick A. Blossom, Librarian, 544 Cathedral Parkway, New York City.

The Library of Congress

Here from a billion pages breathes the Past,
 Here dwell, immortal, poets of Earth's morn.
 Speaking from out the depths of ages vast
 To us and myriad races yet unborn,
 Millenniums distant in the times to be.
 This is the house of Cadmus, first to find
 For inarticulate man eternity
 In everlasting kingdoms of the mind.
 Here if thy thought, though hid, can but abide,
 E'en in a footnote on a dusty leaf
 In some dim alcove by the living spied
 Once in a lustrum, for a moment brief,
 Thou, too, shalt live when all thy mortal state
 Has been for centuries obliterate.

F. W. A.

Book News Book Club Selections

(for October)

Book League of America

The Conquest of Happiness, by Bertrand Russell. Liveright.

An analysis of the underlying causes of individual unhappiness.

Book-Of-The-Month

Quiet Street, by Michael Ossorgin. Dial Press.

A veracious and fascinating picture of the Russian Revolution.

Business Book League

They Told Barron, edited by Arthur Pond and Samuel T. Moore. Harper.

A racy and diverting diary of Clarence W. Barron, former owner of the *Wall Street Journal*.

The Resurrection of Rome, by G. K. Chesterton. Dodd, Mead.

Deals with Rome, not as a dead city, but as a city risen from the dead.

English Book Society

A Note in Music, by Rosamond Lehmann. Holt.

Junior Literary Guild

Kees (6, 7, and 8 years), by Marian King Harper.

The Five Children (9, 10, and 11 years), by E. Nesbit. Coward McCann.

Early Moon (older girls, 12 to 16 years), by Carl Sandburg. Harcourt, Brace.

Full Fathom Five (older boys, 12 to 16 years), by Frank H. Shaw. Macmillan.

Literary Guild

R. V. R., by Hendrik Willem Van Loon. Liveright.

A biography of Rembrandt.

Religious Book Club

The Problem of God, by E. S. Drightman. Abingdon Press.

Scientific Book Club

The Conquest of Life, by Theodore Koppanyi. Appleton.

The groundwork of the science is in this entertaining review of biology.

Among Librarians

JANET ADLER has joined the cataloging service of the John Crerar Library.

FRANCES IDA AMBUHL has joined the staff of the Newberry Library, Chicago, as first assistant in the Catalog Department.

FLORENCE BERRY, Pittsburgh '29, was married to Eugene F. McGrath on June 17.

LEONARD A. BUSBY, for twenty-nine years a member of the Board of Directors of the John Crerar Library and president of the board since 1929, died on Sept. 9.

CLARA CAMPBELL, Pittsburgh '16, has been appointed children's librarian in the Charlotte, N. C., Public Library.

WILHEMINA E. CAROTHERS has resigned from the faculty of the Carnegie Library School, Pittsburgh, to accept an appointment as instructor in the Library Science Department, George Peabody College for Teachers, Nashville, Tenn.

AMELIA COLLIER, N. Y. P. L. '20, has accepted the position of librarian in the Lincoln Memorial University, Harrogate, Tenn.

ELIZABETH H. DEXTER, Pittsburgh '13, has been appointed chief psychiatrist in the Department of Child Guidance, Board of Education, Newark, N. J.

LOIS DODGE, St. Louis '26, formerly first assistant of the Cabanne Branch, St. Louis Public Library, has resigned to become librarian of the Ben Blewett Junior High School Library, St. Louis, Mo.

RUTH DRYDEN, Los Angeles '30, has recently married Carl Bauer.

MARTHA JANE FORESMAN, Pittsburgh '25, was married to Donald Wright Kling on Sept. 10, 1930.

WILLIAM E. FOSTER, librarian emeritus of the Providence (R. I.) Public Library, and librarian from the establishment of the library in 1878 to February, 1930, died Wednesday, Sept. 10.

GLADYS JEAN HAMLEY, N. Y. P. L. '29, who has been substituting for the past eight months in the Reference Department of the Library Association of Portland, has been appointed an assistant in the Circulation Department, beginning September 22.

AGNES F. HASSELL, St. Louis '29, children's librarian in the Rose City Park branch of the Library Association of Portland, resigned August 1 to be married to Arthur S. Bray.

MARGARET HINCKS, Pratt '28, has been transferred from the Arleta branch of the Portland Library Association, Oregon, to the Rose City Park branch.

ELIZA KAVANA, Columbia '27, has joined the staff of the Newberry Library, Chicago, as assistant in the Reference Department.

ALICE KENTON, Wisconsin '25, has become second assistant to David J. Haykin in the Office for Decimal Classification Numbers on Library of Congress Cards, Washington, D. C.

JULIA F. KOHL, St. Louis '24, has accepted the position of librarian of the Central High School Library, St. Louis, Mo.

MARION LAWRENCE, Los Angeles '27, will begin her duties as an assistant in the Circulation Department of the Library Association of Portland, the first of September.

ANNA LENSCHOW, Albany '23, formerly in the Reference Department of the New York Public Library, has become first assistant to David J. Haykin in the Office for Decimal Classification Numbers on Library of Congress Cards, Washington, D. C.

MINNIE A. LEWIS, who comes from the Riverside, Cal., Public Library, is replacing Miss Trepp as catalog reviser in the John Crerar Library.

OLIVE LEWIS, Western Reserve '29, has resigned her position in the Indiana State Teachers' College Library to become assistant classifier in the Newberry Library, Chicago.

LORNA LINNEMAN, Los Angeles '30, has recently married Horace L. Tilton.

GERTRUDE MAY, St. Louis '16, librarian of the Benton Branch, St. Louis Public Library, has resigned to take charge of the Soldan High School Library, St. Louis, Mo.

MARIE MOLNAR, Los Angeles '29, resigned from Tulane University Medical Library to accept a position at the DuPont Laboratories, Wilmington, Del.

ORA NEELEY, Los Angeles '28, has been transferred from the Vermont Square Branch to the Branches Department of the Los Angeles Public Library.

KATHERINE E. SCHULTZ, Albany '21, has been appointed instructor in cataloging and classification in the Carnegie Library School, Pittsburgh, to succeed Miss Carothers.

PYRRHA B. SHEFFIELD, Western Reserve '13, has been appointed librarian of the Dowagiac (Mich.) Public Library.

LELAND R. SMITH, Western Reserve '29, has resigned as assistant in the Reference Division of the Cleveland Public Library to become librarian of Butler University, Indianapolis, Ind.

CHRISTINE TREPP has resigned as catalog reviser in the John Crerar Library after a long period of service.

Opportunities

(This column is open to librarians.)

Wanted—Eastern library is developing its Italian collection. Cataloger wanted who speaks and writes Italian with grace and accuracy. J13.

College and library school graduate, with school library experience, seeks position preferably in school library, but would consider other types of library. Reference work preferred. J-14.

Young woman, library school graduate, desires position in children's department. J-15.

Library position wanted by woman with university education and summer library school training, twelve years' experience in public library work, and one as high school librarian. West or Middle West preferred. J-16.

Children's librarian with training and experience wishes position. Z-15.

Trained school librarian, four years' experience, desires position in the East. Salary \$2,500. J11.

College and library school graduate with a year's experience in special library work desires position in a college or public library. Work on Pacific Coast preferred. J12

Free

THROUGH the generosity of the author, the Adelphi Company, 160 Fifth Avenue, New York City, offers a limited number of copies of *The Money Illusion*, by Prof. Irving Fisher, to libraries free of charge. The donor feels that this is a book which should be available to the reading public, but does not wish to send copies except to those libraries in which they will really be of service. Kindly indicate how many copies can effectively be used and apply direct.

THE ROMANCE OF OLD GLORY

By Ethel Clere Chamberlin
Author of "Heroes of Peace"
 (12 to 15 years)

With a Foreword by Hon. Cornelius A. Pugsley, LL.D., President of the American Flag Association

The history of the romantic evolution of the American Flag told in story form. A true chronicle of the flags from the time the first European set foot on our shores to the beginning of the present flag.

Twenty-four inspiring pictures in color by Harold M. Brett. 12mo, cloth, full colored wrapper, net \$2.50.

SCHERMERHORN'S SPEECHES, FOR ALL OCCASIONS

By James Schermerhorn
Author of "Schermerhorn Stories"

One hundred of the After-Dinner deliverances that for forty years have made James Schermerhorn an unofficial American influence, earning for him the name of Chauncey Depew the Second. Selected with reference to recurring events, the range of topics takes care of the needs of officer, member or guest who is expected to make his contribution to the social hour. 8vo, cloth, net \$2.

OLD MOTHER EARTH AND HER FAMILY

A book of geography for young people
 By Milton Goldsmith

Author of "I Wonder Why," "Practical Things with Simple Tools," etc.

This fascinating book for boys and girls of from 10 to 16 years describes our Earth, its physical features, its countries, its people, in a humorous narrative manner. It takes the reader on a trip around the world. Profusely illustrated. 12mo, cloth, net \$1.50.

POPULAR QUESTIONS ANSWERED

By George W. Stimpson
Author of "Nuggets of Knowledge"
 Associate Editor of *The Pathfinder*

Here is a practical and interesting book having the additional virtue of authenticity. Why are criminals executed on Friday? What English Queen had seventeen children? What language did Jesus speak? Do tall office buildings sway with the wind? How do the Protestant and Catholic Bibles differ? Does the

top of a wheel move faster than the bottom? What birds are able to fly as soon as hatched? These are only a few of the vast multitude of popular questions discussed in the more than 400 pages of this remarkable compilation. A thorough index makes everything in the book accessible for ready reference. 8vo, cloth, net \$2.

VERNON LAW BOOK COMPANY
Kansas City, Missouri

COMMERCIAL ARBITRATION AND AWARDS

By Wesley A. Sturges, Yale University

Commercial Arbitration has assumed importance not only as a method of trial and settlement of a business or commercial controversy, but as a general business policy. This book will be a useful guide to Lawyers, Trade Associations, Chambers of Commerce, etc., both in the law of agreement and provisions for the arbitration of future disputes and as a manual for parties and their attorneys and arbitrators in conducting an arbitration.

Books Good to Grow On

Of Special Interest to the Children's Librarian

In the Mouse's House

by Mathilde Ritter

This is the most beautiful picture book we could find in Germany. It is printed for us there in six colors. Gorgeous colors first attract, then *Mouselings* with individuality. Each picture tells a story that establishes the Mouselings as beloved members of the child's community. A delightful story slips in between pictures. \$1.25

Timothy Crunchit

The Calico Bunny

by Martha Jane Ball

This is a naive story of brown bunnies who live in Calico Village. They help real little girls and boys in most surprising ways. Indeed, little folk will fairly long for milk and fresh vegetables before Timothy makes half of his tactfully entertaining suggestions. Cloth binding, four color illustrations. \$1.50

The Deming Indian Books

Therese O. Deming is writing a series of books about the North American Indian for little folks. Edwin O. Deming, the internationally known artist and sculptor of American Indian life, is illustrating them. The illustrations will lose none of the charm of his original water colors. "*Little Eagle*" is the first book of the series. Others in preparation.

The Story of Man

William L. Nida is writing a series of books about the dawn and growth of civilization. Children play an important part in each story. "*The Tree Boys*" (\$1.00) is the first book; "*Fleetfoot, the Cave Boy*" (\$1.25) and "*Taming the Animals*" (\$1.50) the second and third books, are now ready. Here are books that grip the imagination and urge the child to read and read.

The Treasure of Belden Place

Frances Cavanah is the author of this mystery story of lost heirlooms—lost since the Civil War—in a rambling old home. Patty and Patsy search through one glorious vacation through Belden Place, the old family home, and find . . . a secret room . . . an old trunk . . . an old, old diary . . . an exquisite cameo. Only on the last page do they discover the greatest treasure of all. \$1.25

Me and Andy

Raymond Kelly wrote this story about a boy and a dog for his own youngest son. It is proving most popular. "Me" is Jack Bradford; "Andy" is an Airedale dog who weighs eighty-eight pounds. The story is of their hike across country. \$1.25

"Sally" Alden

Ada Claire Darby has written this story of a self-reliant little girl of ten who earns money enough for a summer vacation. Book reviews have compared it favorably with *Little Women*. \$1.50

The Cat in Grandfather's House

Carl Grabo of the University of Chicago has written this whimsical tale about antique furniture that comes to life in the dead of night. It is the sort of a story that develops the imagination of the child—or at least gives it room for exercise!

The Magic Canoe

Frances Margaret Fox has written this thrilling story of frontier life during the American Revolution. Much of the action of the story centers in Old Fort Mackinaw. This second volume of the *Young America Series* is illustrated with a wood block type of illustration. \$1.50

The Topaz Seal

Edith Heal is the author of this splendid mystery tale for boys and girls in a setting of pre-revolutionary war days in the Lost Colony of the Roanoke. It is the type of story that is thrilling in its interest, yet so historically accurate that it may be read for information. \$1.50

THE PRAIRIE PRESIDENT

Living Through the Years with Lincoln

By Raymond Warren

A new and strikingly original biographical narrative of Abraham Lincoln, projected mainly through episodes, closely knit, which are illumined by the use of remarkable dialogue. Illustrated. (Oct. 15) Reg. ed. Net \$3.00. Lit. ed. Net \$10.00.

THAT MAN DAWES

By Paul R. Leach

The intimate, brilliantly written life-story of America's most colorful statesman, uniting a vivid study, sparkling with anecdote, of Dawes himself, with a clearly outlined sweeping background of modern governmental affairs. Illustrated. (Oct. 15) Net \$4.00.

WHAT'LL WE DO NEXT?

By Edward Longstreth and Leonard T. Holton

The authors of this book of brilliant entertainment are the foremost authorities on modern party throwing. They have included 68 tested, sure-fire games (with variations) guaranteed to introduce hilarity into any gathering, whether planned or unforeseen, frolicsome or apathetic, large or small. Illustrated. Net \$1.25.

VIGNETTES OF LIFE

By J. Norman Lynd

Mr. Lynd's bright, satiric gift for caricature, made famous by newspaper syndication of his work, directs a hearty gust of laughter at the modern methods by which people achieve the ridiculous. His cartoons evoke immediate response. Net \$2.50.

YESTERDAYS

By Frank Wing

Another hilariously funny book by the creator of the famous "Fotygraft Album." William Lyon Phelps says: "Your book is full of wit, wisdom and all good things. I hope 100,000 copies will be sold. The pictures and the text are gorgeous." Net \$1.25.

PUZZLE TALES

By Edna Levine

Something entirely new for boys and girls of all ages, combining the popular cross word puzzle idea with a collection of famous fairy tales and stories. Beautifully illustrated in color and silhouette. Net \$2.50.

THE GOOD FAIRY

By Grace Bliss Stewart

A delicate, enchanting fairy tale for children, with a foreword by Jessie McCutcheon Raleigh, creator of the famous statuette, "The Good Fairy," by which the story was suggested. Charminglly illustrated in color and black and white. Net \$1.50.

Announcing the publication of

VOLUME FIVE

of the

Dictionary of American Biography

AMERICAN POLITICAL SCIENCE ASSOCIATION
BIBLIOGRAPHICAL SOCIETY OF AMERICA
AMERICAN SOCIOLOGICAL SOCIETY
HISTORY OF SCIENCE SOCIETY
LINGUISTIC SOCIETY OF AMERICA
MEDIÆVAL ACADEMY OF AMERICA

Volume Five of this monumental biographical work, which is recording the making of America through the achievements of those who helped to make it great, carries the record from Cushman to Eberle.

The subjects within this span include some of the most notable names in the annals of American history: Jefferson Davis, President of the Confederacy; Stephen Decatur, of 1812 fame; George Dewey, hero of the battle of Manila; Eugene V. Debs, Socialist advocate; Stephen A. Douglas, leader of the pre-Civil War period, and many others equally significant in the political life of our country.

Varied interests of many-sided American life are represented by the inclusion of biographical sketches of persons of such varying fame and fortune as: Richard Henry Dana, author of the classic "Two Years Before the Mast"; Richard Harding Davis, journalist and author; Chauncey M. Depew, lawyer, wit, railway president, and United States senator; Emily Dickinson, the poetess of "polar privacy." And, of course, as in the preceding volumes, there are those hundreds of little-known but delightful and informative "human interest" stories which make the Dictionary of American Biography so readable and help to paint in the background of many-phased American life and activity.

Volumes I-V are, in thousands of instances, already demonstrating their usefulness and value to libraries, schools, scholars, and the educated public as:

1. an indispensable reference work for libraries;
2. a supplementary text and source book for both teachers and students in junior and senior high schools;
3. a valuable reference book for those engaged in historical research;
4. an unique source for data bearing on all phases of American history.

Full information about the Dictionary of American Biography may be had from the publishers:

Bringing the Spirit of Internationalism to Your Community

The most vigorous and determined reading today is in the field of human relations. That is why *Dr. Augustus O. Thomas*, President, World Federation of Education Associations, declares:

"World Unity Magazine fills an important place in this new age. It should find a place in every public Library; from an educational standpoint it is invaluable."

The Library which carries World Unity on its reading table has gone far toward bringing the spirit of internationalism to its community. No magazine has concentrated all its resources upon the sole aim of publishing the considered views of scholars in all countries upon the vital problems of civilization. That is why *John Dewey* writes:

"There was room for a magazine which should devote itself to a non-partisan discussion of the intellectual and moral aspects of world cooperation and international movements, and World Unity has met this need in a most satisfactory way."

**NON - PARTISAN DISCUSSION OF
WORLD TRENDS IN SCIENCE,
PHILOSOPHY, ECONOMICS, POLI-
TICS, ART, AND RELIGION.**

**Library subscription rate, \$2.50
per year.**

GRANDMOTHER'S COOKY JAR

By Helen Fuller Orton

A delightful tale about three everlastingly cooky-hungry children, their lovable old-fashioned grandmother and a cooky jar with a thrilling mystery all its own. Author of the Cloverfield Farm Stories. Illustrated. \$1.50

JIMMIE FLIES

By Dorothy Heiderstadt

The story of a little boy's first ride in a real airplane—written by a Children's Librarian in response to the children's demand. 28 illustrations in two colors. \$1.00

FRAWG

By Annie Vaughan Weaver

The amusing adventures of a little Alabama colored boy, his dog and his little sister. Illustrated by the author. Afterword by Hugh Lofting. \$1.50

**TIMOTHY AND THE
BLUE CART**

By Elinor Whitney

The story of three children who spend their summer in the real country. Illustrated. \$1.50

HICKORY-GOODY

By Ada Claire Darby

The lively story of a little girl who grew up in the days of Kit Carson. By the author of Skip-Come-A-Lou. Illustrated. \$1.75

**THE TALE OF
TOM TIDDLER**

By Eleanor Farjeon

The story of a little Fairy boy in Old London Town, by the author of "Martin Pippin in the Apple Orchard." Illustrated. \$2.00

For Older Boys and Girls

THE TWILIGHT OF MAGIC

By Hugh Lofting

A glamorous story of two children in the middle ages in England, the first book for older boys and girls by the creator of the beloved *Doctor Dolittle*. Illustrated by Lois Lenski. \$2.50

IN LAWRENCE'S BODYGUARD

By Gurney Slade

Sent to Arabia on a secret errand young Irwin Baxter meets the great Lawrence in the desert, and through a strange chain of exciting happenings wins a chance to ride in his bodyguard. Illustrated. \$1.75

THE MARCH OF IRON MEN

By Vernon Quinn

A stirring and vital story of the Crusades for young people—a tale of glorious deeds and high adventure. Richard the Lion-hearted, gallant Prince Edward, Prester John are a few of its heroes. Illustrated. \$2.00

443 4th Ave. FREDERICK A. STOKES COMPANY New York

A Book Publication to Give Patrons

Interesting, Attractive News About Books

To stimulate more interest in books among people not customarily book buyers, THE BOOK REVIEW has been planned, edited, and printed in consultation with the Executive Office of *The American Booksellers' Association*, to provide booksellers with an attractive, timely, stimulating magazine about books. It is bright and newsy. Librarians also will find it a splendid promotional medium and it may be purchased in imprinted quantity lots for distribution to patrons. 50 lots cost \$2.00 per month, 100 cost \$4.00 per month, 250 cost \$9.50 monthly, 500 cost \$15.00 monthly and 1000 cost \$25.00 monthly.

Forthcoming Issues of THE LIBRARY JOURNAL

✱ Two articles scheduled for this number have been delayed and will be included in later issues; the article on juvenile reading by Lillian H. Smith will be run in the November fifteenth issue and the list of thirty or more useful and popular health books which ought to be in the average public library, prepared by Dr. R. S. Patterson and Dr. James A. Tobey, will be in the next issue.

✱ THE LIBRARY JOURNAL has been unfortunate in obtaining information regarding the Bibliophile Tour. The day that the October first number went to press the North German Lloyd Steamship Company reported over the telephone that the tour had been definitely cancelled and two days later information came telling us that after all twelve librarians were making the tour. With this issue we are including the names of the ten members of the party as given by the American Express Company which has charge of land tour arrangements, and since the party sailed from Bremen October 3rd, we trust this latest information is correct.

THE UNIVERSITY
OF CHICAGO PRESS
ANNOUNCES

THE LIBRARY QUARTERLY

*A Journal of Investigation and Discussion
in the Field of Library Science*

The Library Quarterly has been established by the Graduate Library School of the University of Chicago with the assistance of the Carnegie Corporation and the co-operation of the American Library Association, the Bibliographical Society of America, and the American Library Institute in response to the growing feeling of professionalism in the library world.

The editorial policy of *The Library Quarterly* will be that of a scholarly journal rather than a periodical; its chief interest will lie in defining valid criteria for every phase of library activity. The board of editors includes outstanding scholars in the field in Europe and America.

The scope of *The Library Quarterly* will be the entire field of librarianship—including all the aspects of public, academic, and special library service: administration, reference work, cataloguing, and classifying—and the fields of general bibliography, the history of printing, education for librarians, and adult reading.

The University of Chicago Press invites your co-operation in the founding of *The Library Quarterly* as a charter subscriber. The subscription price is \$5.00.

Children's Book Week: An Appraisal of Activities

By Clara Whitehill Hunt

Superintendent of Children's Department, Brooklyn Public Library, New York

I QUITE REALIZE that to question at all a movement so universally accepted as is Book Week lays one open to the dreadful suspicion of being a back number. "Not believe in advertising!" the shocked up-to-the-minute person exclaims. But wait a bit. Most decidedly I believe in the importance of publicity. Knowing that thousands of precious lives have been saved by health propaganda, one is not so stupid as to condemn all "drives" because some of them are silly. There is, however, a vast difference between efforts to make the Schick test known to every parent and a drive to remind a son one day in the year to write a letter or send flowers to his mother, with the implication that he, of course, forgets such attentions during the other three hundred and sixty-four. To resent some of the subjects of the "drives" which propagandists whip unthinking people into carrying on is not to disbelieve in advertising. One cannot be a real librarian and not feel impelled to spread the good news of one's faith. But a librarian's very devotion to her profession may sweep her into the current of enthusiasm for a popular custom before she stops to question its manifestations or estimate its possible results.

This may be a good time to ask what results we are aiming at in celebrating Children's Book Week. The bookseller, who is chiefly responsible for keeping the movement alive, is working for results in sales. The librarian works for results in readers. The librarian's hope is that the publicity features, attracting the attention of parents and children who have

not before noticed the public library, will draw many into the building and establish in them the reading habit—the habit of reading such good books as will lead to a genuine and abiding love for the best. The librarian can measure such results as are expressed in figures—number of people brought into the building, number of new borrowers registered, increase in circulation. She can find out, perhaps, how many truly beautiful books were bought for Christmas, what people became staunch friends of the library as a result of the "Week." She can never know—until she gets to Heaven!—the best results, the spiritual changes wrought in boys and girls through the books introduced to them at this time. More than five thousand communities celebrated Book Week in 1929. I do not need to read their reports to be convinced that untold good was accomplished by the cooperation of booksellers, libraries, schools, women's clubs, newspapers, churches, in emphasizing the importance of books. I have been slowly but thoroughly converted by the work of our Brooklyn librarians to a belief in the possibilities of this annual celebration. But to believe warmly in the general purpose of a project is not necessarily to subscribe to all the methods employed by its supporters. A thing that impressed me in reading the glowing reports was that so many librarians let themselves be used by other agencies to carry out schemes many of which were, to my mind, out of harmony with the librarian's own job. I cannot imagine any librarian who takes the time to *know her books thoroughly* having so much time left to assist in these projects. And that she should lend her aid to devices very superficially connected

with the book—to such as relate to the bones rather than the soul of the book—this made me feel once more that being obliging has a wrong side.

It is probably a legitimate means to the end of inveigling children to look inside of books for a teacher to have her pupils design book-marks, dress paper dolls or make soap models of book characters, or guess riddles whose solutions are to be found in books. A book-seller shows a canny knowledge of human nature when he offers prizes for the best posters, booklets, book-plates, models, peepshows, etc., made by the school children of the city. A friendly newspaper tries to aid the cause by offering prizes for the best answers in a contest of jumbled book titles. But how a public librarian can give the time and strength or feel it her duty to take an active personal part in working out these projects, puzzles me greatly. To count the school children who use public library cards and start a drive for 100 per cent library membership may seem a commendable library activity; but some of us are skeptical about the value of writing up hundreds—thousands?—of cards for children to show their teachers, knowing that a large proportion of the cards will not be used after an issue or two. I seem to hear a burst of protest. "The librarian is to blame if she does not hold those children!" Once upon a time I believed that. Long experience has taught me that some are born to be booklovers and many are not. There is no magic in the possession of a bit of printed pasteboard to change one's nature or one's habits; and the loveliest, most tactful children's librarian in the world cannot make readers out of some children. Also, if the librarian is glued to the desk routine involved in membership drives and bloated circulations, she must sacrifice a certain quality of daily service which alone counts in leading such children as are open to influence to linger in the flowery meadows of Bookland. There is easily such a thing as having too large a circulation for the staff, the book supply, and the library building. As for the librarian's cooperating with the "movies" in the serious hope of cultivating thereby a reading taste in her townspeople—well, to be sure, "Hope springs eternal . . . !" We librarians must think out more clearly exactly what our contribution should be in any scheme for advertising books. There seems much vagueness on this point, due to the best of motives—a desire to make friends for our cause. If we librarians attempt to cooperate with everybody, and on lines laid down by the other fellow, do we really help *our* cause? When I need a physician I choose one who keeps up in his own profession. I should be

gravely suspicious of the medical knowledge of a doctor who engaged in all sorts of enterprises outside his particular line. Even if I saw him obligingly selling articles at a fair held to raise much-needed hospital funds, I should not feel drawn to consult him about my maladies. I sometimes wonder if that facetious half-truth, "The librarian who reads is lost," has not been, actually, a pernicious influence in our ranks. Last year 931 juvenile books were published in the United States, nearly twice the number we had to choose from a few years ago.¹ Our problem of selection is not only greater because of the increased quantity; it is also more difficult because there are so many "near good" books before us. To differentiate between good and bad is not so hard. To avoid loading our shelves and our children's minds with the merely "fair" books, to reject the poor, the flimsy, the trifling, to make sure of giving due emphasis to the finest, is a large, all-the-year-round occupation for an experienced children's librarian. Yet at the peak of the year's juvenile-book production, librarians plunge into activities to advertise books which they cannot have had time to read, nor to evaluate in comparison with other books.

We children's librarians have won a position of leadership in the field of children's books. This hard-won place we must not lose. That we exercise an immense influence on the production and sale of children's books we are told by publishers and authors. Our approval is constantly quoted in advertisements of the book trade. Proof of our influence has been impressed upon some by threats of lawsuit, upon many by more or less subtle forms of bribery. It is almost staggering to contemplate our power. To meet the responsibility we have taken upon ourselves in presuming to decide what books our children shall be permitted to find on the public library shelves, we should place first on our program Know Our Books, never first any advertising scheme—not even our beloved Story Hour, not even responding to the enthusiasm of teachers who would send classes to us every hour. We must not lure eager children by promises of a feast and then spread before them stuff not worth consuming. I am not painting imaginary pictures. I know libraries whose shelves are still not free from trash who yet engage in advertising schemes.

The possible value to the library of Book Week, celebrated in a fitting manner, is beyond calculation. Not the least important is the happy effect which celebrating a pleasant annual festivity has upon everybody who keeps the spirit of youth. Through most of their days librarians are handling dingy books. The

¹*Publishers' Weekly*, Jan. 25, 1930.

more popular the library, the more quickly do the once gay covers become uniformly dun-colored. Very few public libraries are so generously supported as to be able to circulate freely their beautiful picture-books and expensive editions. Most of our "public" do not realize the treasures we possess, because most of the year we are too busy to display them. Once a year, no matter if everybody *does* "work nights and Sundays," we make our libraries look so beautiful that borrowers—and staff members, too—gaze in astonishment at the transformation. We are happy to spend a week with such beauty. Like all proud hostesses we delight in our guests' pleasure and in their compliments. During this week at least we treat ourselves to letting classes come every hour, indeed every half-hour of the school day; and the thought that we give to thousands of children, who live in bookless homes, a vision of beauty, is compensation for all the trouble the exhibit costs.

Not only the rank and file of our "public" are influenced by our celebration. Each year the attention of some outstanding person is caught. An executive secretary of an organization active in promoting world-friendship spends a whole day with the exhibit illustrating international friendship through books. A camp director, a rural library trustee, a social worker, each about to buy books for his organization, eagerly seizes the library's lists as guides. A scholar, whose visits to the library usually mean a swift raid on his particular section, politely accepts the children's librarian's invitation to inspect her exhibit. (This children's librarian "majored" in his subject, but he doesn't know that.) The result is astonishment and interest—which means friendly influence later—as this borrower is shown children's books, of adequate dignity and beauty, devoted to his subject. Naturally artists and others who love pictures and fine craftsmanship are interested. We regret that so often they exclaim, "Why, I had no idea the public library owned such books!" But we know that the more influential people interested the better our prospects of funds to make possible a more liberal use of the beautiful books.

To my mind the special contribution of Book Week is the "togetherness" of the publicity. A librarian working by herself prepares a fine exhibit and invites the schools to visit it. Very many teachers consider these outside-of-school visits a nuisance, and few respond. One day the principals learn that Book Week is sponsored by their powers-that-be. Now how

eagerly the librarian's invitation is accepted!

The librarian offers her help to the book department of a local store. Her advances are met with indifference. Before another autumn the department head discovers that other stores are making much of Book Week. Now she begs the library to send children's librarians to take charge of a library table and assist mothers in their selections. The children's librarians come back from their novel experience reporting with chuckles that their table was within earshot of authors darkly frowned upon by their library chief, and that the books of those authors sold like hot cakes while the library table had few "customers." Next year that book department invites authors recommended by the librarian; also, the store gives a whole window to "Books Recommended by the Public Library."

A live librarian of a small town borrows a speaker from a large library's children's department. The mothers eagerly take the recommended lists to a local shop which pretends to have a book department. The owner will not bother to order the books wanted—"The women can take the books he carries or none." The women do neither. They appeal to the librarian, who takes their orders. Result, many lovely Christmas books in that town, and a shopkeeper who has learned a lesson.

I hope I have done full justice to the fine possibilities of Book Week. As I sit pondering I find my thoughts going back many years to a morning when I sat in church, mechanically following the service, but with my mind roaming in one of the day-dreams of the "teens." Suddenly the reader's clear voice called me back and riveted my attention to that vivid chapter of the Epistle of James which describes the power and the perversity of the tongue. Many a time have I been reminded of that clear reading . . . "Out of the same mouth cometh cursing and blessing." A miraculous invention makes it possible for me to hear the voice of one of the heroes of the ages speaking ten thousand miles away; it brings heavenly music to lonely and isolated regions. This same invention makes possible that inexhaustible stream of drivel which is poured into millions of ears almost every hour of the twenty-four. Again and again men let loose forces fraught with possibilities of blessing and of bane. Children's Book Week may multiply the mediocre books or the finest. Its observance offers the librarian a great opportunity. Will she fit herself to use this opportunity wisely and effectively for her community?

Children's Books by Southern Writers

By Emma Lee

Children's Librarian, Rosenberg Library, Galveston, Texas

IT IS INEVITABLE that so brief an article as this must be can do little more than list the contributions of the South to children's literature. It has been necessary for the writer to cull; she must exclude from consideration those authors who know the happy adoption of Thomas Bailey Aldrich, who liked to say of himself that he was "not genuine Boston, but Boston-plated," and those books not written for children, though seized upon by them. It is interesting to discover in such early numbers of *St. Nicholas* as those of August, 1876, and May, 1878, sketches of negro child life on a plantation by that young Mississippian, Irwin Russell, whom both Thomas Nelson Page and Joel Chandler Harris regarded as the pioneer in the field of negro dialect and to whom they both declared they owed much. How swiftly and surely Mary Mapes Dodge seized upon the best for *St. Nicholas*! It was also through this magazine that the children first received Page's *Two Little Confederates*, Harris's *Daddy Jake, the Runaway*, and the sympathetic stories of plantation pickaninnies and the *Daddy-Do-Funny* jingles of Ruth McEnery Stuart. All of the above mentioned writers portrayed in their stories Southern plantation life, especially negro folklore, and plantation child life, white and black. It was a maxim of their day that one wrote most successfully about the life one knew best. Page's *Two Little Confederates* and Mrs. Pyrnelle's *Diddie, Dumps and Tot* are as autobiographical as *Little Women* and *The Story of a Bad Boy*. Equally with the latter books they preserve long life as attractive and accurate descriptions of a type of American life and as excellent stories.

It is, of course, generally recognized that the preeminent contribution of the South to children's literature was made by Joel Chandler Harris in his *Uncle Remus* stories. Scholars, folklorists, children and "jes' folks" the world over are heavily indebted to that fortunate accident of a column sans columnist on the *Atlanta Constitution* that led Joel Chandler Harris into his "career of an accidental writer." The folk-tales and philosophies of Uncle Remus first appeared in this newspaper during 1878 and 1879; they were gathered into a book for the Christmas counters in 1880, under the title: *Uncle Remus, His Songs and His Sayings*. Fifty years later, when these immortal stories are loved and laughed over as heartily as ever, it interests one to read that

charming letter which Harris wrote to Arthur Burdette Frost as preface and dedication to the fifteenth anniversary edition of the book. He wrote then, with characteristic modesty, "Measured by the material developments that have compressed years of experience into a day . . . fifteen years constitute the old age of a book. Such a survival might almost be said to be due to a tiny sluice of green sap under the grey bark. Where it lies in the matter of this book, or what its source—if indeed it really be there—is more of a mystery to my middle age than it was to my prime." It is no mystery to his readers. They know that when he bethought him of that store of animal tales which he had heard in his youth from negroes on Georgia plantations, he transplanted into the sunlight of public attention a sturdy, native shrub, which, like the boxwood hedges of the old plantation gardens, will endure through the ages. As a matter of fact, the stories were a conspicuous success from the day they appeared in the market. In the very month of their publication Charles A. Dana proved himself a true prophet when he said, "*Uncle Remus* is a great book. It will not only have a large but a permanent sale." The success of the first volume of *Uncle Remus* stories was followed by two additional volumes, *Nights with Uncle Remus* and *Uncle Remus and His Friends*. In the last-named book the old negro made his farewell bow to the children, and although the persistent demand of publisher and public drew forth later volumes, yet we feel that "de pick ob de crap" (as Uncle Remus would say) lies in the first three volumes. The shy and lovable Georgian wrote many other stories for children. His stories of *Aaron*, his stories of *Little Mr. Thimblefinger* have still their lovers, but where these claim their tens of readers the *Uncle Remus* books have their thousands. The master of negro dialect after whom subsequent writers have modelled, the careful sifter and seeker after the truest version of a folk-tale, Joel Chandler Harris resembles the eminent folklorist, Joseph Jacobs, in that he never let the antiquarian's interest take precedence over the story-teller's. He loved the tales for the tales' sake, as did the negroes from whom he gathered them and the children to whom he gave them.

The twenty years between 1880 and the end of the century saw other Southern writers of

juveniles who did not confine their theme to plantation life. Page had followed the success of *Two Little Confederates* with *Among the Camps* and *Captured Santa Claus*, both stories of the South during the Civil War. (And be it noted that these three books were, for twenty years, the only stories for children about the South during the Civil War.) But Page also wrote two Christmas stories, *Tommy Trot's Visit to Santa Claus*, and the charming *Santa Claus's Partner*, and he added to these a little story in minor key, now out of print, *Two Prisoners*. Ruth McEnery Stuart, besides her natural and sympathetic stories of Louisiana negro life, such as *Solomon Crow's Christmas Pockets*, gave us that story of a little Creole girl, *Babette*, a story filled with the glamour and fascination of old French New Orleans. Molly Elliott Seawell, born in Gloucester County, Virginia, owes to a naval uncle that love of the navy which inspired, in 1890, her prize-winning story of a midshipman, *Little Jarvis*. This she followed with other stories of the navy, and biographies of several naval heroes, among them Paul Jones, Decatur and Somers. Nor should we omit her story of George Washington, *A Virginia Cavalier*. The Georgian, Louis B. Pendleton, added to his story of plantation life (*King Tom and the Runaways*), a Biblical story *The Lost Prince Almon* and a tale of Indian uprising in Florida, *In the Camp of the Creeks*. Frances Courtenay Baylor gave us, besides her study of a *Georgia Bungalow*, the book for which she is more widely known, the adventure of two Mexican children escaping from the Indians, *Juan and Juanita*. Nor can we forget the four books for boys, edited by Sidney Lanier, at such great price to himself and perhaps to posterity. He wrote to Paul Hamilton Hayne in 1880, "For six months past a ghastly fever has taken possession of me each day . . . I have myself been disposed to think it arose purely from the bitterness of having to spend my time in making academic lectures and boys' books—pot-boilers all—when a thousand songs are singing in my heart that will certainly kill me if I do not utter them soon." The *Boy's King Arthur*, the *Mabinogion* and the *Boy's Percy* were edited in the last years of Lanier's bitter struggle against tuberculosis. What high testimony to the character of the man and the artist, that these books, produced under such circumstances, should be held as classics today! Hayne says that Lanier "had steeped his imagination from boyhood in the writings of the earlier English annalists and poets . . . Especially he loved tales of chivalry and thus, when the opportunity came, was fully equipped as an interpreter of Froissart and King Arthur

for the younger generation." It is true.

Turning now to the writers of the present century, we find, especially in recent years, a recurrence of interest in the themes of the old South and of plantation life. Maud Lindsay, who, out of her nearly thirty years' experience as kindergarten teacher in Atlanta, has given us many pleasant stories for little children, has, in late years, written two stories of plantation life and Civil War days. *Little Missy* and *Silverfoot* appeal to the younger children for whom Miss Lindsay has always written, and are the first books to portray the life of the old South for them. Two Missourians, Ada Claire Darby and Jasmine Stone Van Dresser, have written of plantation life. In *Pinafores and Pantalettes* Miss Darby has written of her mother's girlhood home, Oakwood, in her mother's day. Mrs. Van Dresser's little book, *Jimsey*, is a most sympathetic and appealing portrayal of a little colored girl on a Southern plantation today. Both writers have other books to their credit. Miss Darby's other story of Missouri, *Skip-Come-a-Lou*, is equally successful in presenting life in pioneer days at an old tavern. Gladys Blake places her very popular mystery stories on Southern plantations of today, and gives them more characterization, more humor and more atmosphere than is possessed by most mystery stories for girls.

Although Archibald Rutledge draws his stories for boys out of his own experiences at his ancestral plantation on the Santee River in South Carolina, he writes as a nature lover and as a sportsman, and should be grouped with that other South Carolinian, Herbert Sass, whose books, *Gray Eagle* and *The Way of the Wild* depict so delightfully the wild life of Carolina swamp and delta. No doubt much of the success of Mr. Rutledge's three books, *Old Plantation Days*, *Tom and I on the Old Plantation* and *Plantation Game Trails*, is due, not only to his enthusiasm for his subject, but to his long experience as a teacher of boys at Mercersburg Academy, Pennsylvania. The best life of Robert E. Lee for boys and girls is that written by Prof. J. G. de R. Hamilton and his wife, who are both North Carolinians. Professor Hamilton has been for some years associated with the University of North Carolina, as professor of history and government. The list is so long that it is impossible to do more than mention in passing the poetry of Maria Thompson Daviess and of Nancy Byrd Turner; the kindergarten stories of Madge Bigham; *The Battle of the Nations* and the three volume series on *The Earth's Story*, by Frederic Kummer; the stories of Edna Turpin and those of Rachel Varble; the tales of chivalry and the patriotic readers of Frances

Nimmo Greene; the fairy tales of William Bowen and the ever popular historical stories of Joseph Altscheler.

The past five years have given us books of great charm and distinction for children by Southern writers. Who that has read *Mrs. Chatterbox and Her Family* has not delighted in Miss Louise Connolly's story of that "right smaht chile," her little self, in Washington some fifty years ago? One of the most distinguished books of the fall of 1929, *Prince Bantam*, is the work of May McNeer, a Southerner from Florida, and of her husband, Lynd Ward. The "Three Owls" said of this hero story of Japan, "There is adventure in it, and excitement, humor and a pure, unstrained poetry that blossoms as engagingly in these pages as the plum trees in the Son of Heaven's garden." Evelyn Scott, the distinguished novelist, who is Louisiana born, has twice written for children, once jointly with Mr. Scott. From Baltimore comes a writer who has been recently described as "a slender, alert and gay-spirited grandmother, whose heart reached

out with a great mother love to foreign children and whose mind was eager to introduce them to American boys and girls." This introduction Mrs. Helen Coale Crew first accomplished in her *Saturday's Children* of many nationalities; she has since brought Irish Alanna to Baltimore in a book; in *Under Two Eagles* her Polish boy, Vasily Milneff, finds a rich heritage, under both the Polish and the American national symbols. That Mrs. Crew can write of ancient days as well as present ones is shown in her two books, *The Trojan Boy* and *The Lost King*; these present the Iliad and the Odyssey from a new angle, that of a child of the period. It is told that Mrs. Dodge, when editor of *St. Nicholas*, was introduced to Rudyard Kipling. He, from the heights of his popularity as an adult writer, remarked kindly, and perhaps a bit condescendingly, that he would have to write something for the children. "Can you do it?" challenged Mrs. Dodge. In the case of these Southern writers for children, the answer to that question is before us. They can.

Books and the Discipline Problem Boy

By Mrs. Nell Steinmetz

Children's Librarian, Hollywood Branch Los Angeles Public Library, California

THE SPECIAL SCHOOL for discipline problem boys provides a fascinating experimental ground for the children's librarian. Here are gathered children of all ages, from many and divergent backgrounds. They have one thing in common—their inability to fit themselves into the social pattern. Perhaps it is because they do not take existing conditions for granted, do not accept without question, do not conform without reason, that they present such an interesting problem to the children's librarian. Here are strongly individualistic children, with no regard for their relationship to society. What can books do for them, to help them make their needed social adjustment? For one thing, books have at once a deeply personal and a finely impersonal quality. The book that parallels in any degree the child's own experience becomes a very real part of him; and does it without the knowledge of anyone but the child himself. Any self-consciousness that might be felt in contact with a person (and these children are self-conscious because they have been singled out for the special school) is lost in contact with a book.

Needless to say, the two most essential things in working with a school of this type are knowledge of the individual children and knowledge of the books one uses. Since the

average attendance at these schools does not exceed eighty, the faculty members know each child's history and particular difficulties. The children's librarian knows her books; and so begins the game of fitting the book to the child. In one school there was a boy who could not learn the lesson of cooperation. He disobeyed whenever obedience involved subordination of himself. The book that proved the keystone to solving this boy's problem was Clarke's *For Valor*. In reviewing this he said, "And he realized that one man couldn't win the war, and that sometimes the greatest courage was the kind that made you willing to take orders, and to be a part of the team." Once the boy's imagination had been fired, once he could dramatize his problem and its solution, the battle was half won. Then there was a border line boy; plenty of good qualities, no home environment, rather easily influenced by the companions he happened to drift with. It was a struggle to keep this boy in school. He was an amateur boxer of sorts and not particularly interested in studying. *The Boy's Life of Colonel Lawrence* was the book that decided Tony. "Why, gee," he said, "Colonel Lawrence wouldn't have had a chance if he hadn't gone to school and studied a lot. Why, he used everything he knew, there in Arabia. You'd think you could

have adventure without any education, now wouldn't you? But he sure wouldn't have got far without his schooling. I guess the more you know about everything, the better anything you are!" A little negro boy who had become a discipline problem because of a slightly retarded mental condition was so taken with the story of *Peter Rabbit* that he put all his efforts into mastering the reading of that book. Once accomplished, his sense of victory spurred him on to new efforts. But the imagination had to be awakened first, as incentive to hard work.

The book collection can function in another way in the special school. In one such, a boy who had never accepted any responsibility was made student librarian. Never were books so well cared for! In reporting at a student body meeting he announced, "Now I want your fellows to see that these books are kept clean. If you think you can't take good care of 'em, I'll make paper covers for 'em (and he did!). And I want the books back on time. If you don't bring 'em to me, I'll come after 'em. But these books are going to be ready to go back to the library when they are due (and they were!)." What was more, he paid up his own fines at his branch library, little by little (they were large fines!) and spent many of the evenings formerly used in running the streets, reading at the branch. A little special attention on the part of the children's librarian; a word of commendation from the school principal on the care he had given the books, kept him hard at it; and at the end of the term he went on to a "regular" school and is doing good work there. One Mexican boy in the school is, at twelve, an inveterate smoker, incorrigible at home, and out on his last probation for petty thievery. It has been pretty hard to get a grip on him. Just as some headway seems to be made—he's off again. He has a certain roguish charm that endears him to one even in his worst moments. He has read a lot and reviews a book very well, always with a rather superficial brightness as though to deny any real feeling for the book. One day the children's librarian asked the boys if they would like to write about the book they had read that they liked best. Ben turned in a very fanciful review of *The Water Babies*. He had forgotten himself when he wrote this; like Tom, he had thrown off a part of his outer shell, and a new approach to him, and to his adjustment problem, was made possible.

Books played an important part in welding the school together as a unit through a discussion group at which the boys reviewed books and a free discussion followed, shared in by faculty and the children's librarian on equal

terms with the boys. Many a point was made, and accepted, in the heat of discussion that would have failed of its mark otherwise. Also, the constantly coming new boys were brought closely into the group through a shared knowledge of the books discussed. In work with the elementary schools, we supplement the course of study. But in the special school the children themselves are the essential study—their interests and how these interests can be used to bring the boys into social alignment. Whether it be books on model airplanes for the manual training department, care of animals for the school menagerie, motor mechanics for the machine shop, the children's librarian must be alert to see the potentialities in all their activities, and supply the books that will lead into broader paths.

Work with the discipline problem school takes time, thought, ingenuity, patience, perseverance—in fact, every quality that a children's librarian may possess, or cultivate, but the feeling of elation that comes from seeing books nudging the child, gently, gradually, ever so little at a time, toward a social adjustment—well, try it and see! And the heartening things that happen! They more than make up for the discouragements. There was the time the boys picked a huge bunch of golden rod for the children's librarian to take back to the library. To be sure, it gave part of the staff hay fever, but think how it warmed her heart! There was the hanging bookcase the boys in the manual training department made for her; there was the time the president of the student body introduced her "This is *our* librarian. She likes to come here, and we sure like to have her." There was the time a new boy came to the school, a fat, pasty, sullen looking boy, who settled back in his chair with an air that said trouble. Disgust simply oozed out of him during the entire student body meeting, and everything that could be covertly done to disturb, was done. When the student president made ready to announce the children's librarian, he fixed this boy with a piercing eye, and after saying, "This is Mrs. S., our librarian. Most of you fellows know her and the books she brings," he went on, "Jim, you're going to like this." The president being almost six feet tall and correspondingly husky, Jim did! It will be long before one can forget, or cease to chuckle over that perfect example of moral suasion!

Yes, as in most things when we give of ourselves, we get far more in return. With which platitudinous remark (unfortunately so many platitudes are true!) we advise every children's librarian who likes boys and books to find herself a special school for discipline problem boys. Dividends assured!

Book Week Celebrations

THE TWELFTH ANNUAL BOOK WEEK will be observed this year from Nov. 17 to 22. The emphasis in all constructive celebrations of the Week is on making reading so vital a part of every child's daily life throughout the year that every week will be Book Week. The following paragraph quoted from a recent article by Marion Humble, Executive Secretary of the National Association of Book Publishers, tells something of the production and distribution of children's books in 1929: "Many of the interesting new features which developed in the making and distribution of children's books in 1929 should be extremely gratifying to librarians. Chief among these are probably the concerted effort of booksellers, librarians, and publishers to display and advertise children's books during the spring of the year. This was not a new feature in the public library, where February and March circulation has always crowded the children's rooms more than in other months of the year. But for the first time many booksellers realized that the contacts made during Book Week in November and in the holiday season could be followed up in the spring with improved service and better results in sales. A number of publishers cooperated by bringing out new children's books in the spring as an experiment—evidently with success, as nearly twice as many new titles were announced for the spring of 1930."

The original Jessie Willcox Smith poster, not available during the past several years, is being reprinted for Book Week this year. As the appeal of this poster is chiefly to younger children, five striking woodcuts, symbolic of Travel, History, Biography, Science and Business, designed by Bertrand Zadig have been printed for high school use with a companion sign "Book for Knowledge, Power and Companionship."

*The Original Jessie Willcox Smith
Poster Reprinted This Year*

Berkeley, California

THE MASTERPIECE of the Book Week celebration in one of the branches of the Berkeley Public Library, Cal., last year was a tall, rectangular box covered with book jackets placed near the circulation desk. In the slit at the top were dropped votes for "my favorite book." A record clear of fines and missing books was

the single qualification for voting, and the prize offered by the branch was the purchase for the library collection of the five titles receiving the greatest number of votes. The gum and ice cream cone market suffered a slump in business before and during that week, for every child wanted to vote. It was interesting to see how seriously they entered into the affair. The ballot was folded very carefully to hide the name from inquisitive eyes, and those who had no ready choice often sat on the floor and turned the box around and around until the great decision was made. After dropping the vote, many a child returned again and again to peer through the slit. The ballots were counted each night and the highest title posted. *Chi-wee* and *Huckleberry*

Finn ran neck and neck until the last day, when the former forged ahead. Two hundred and eighty-seven votes were cast, and the five books selected were *Chi-wee*, *Huckleberry Finn*, *Tom Sawyer*, *Little Women* and *Heidi*.

Alhambra, California

FOR THE THIRD TIME last fall the Alhambra Free Public Library, Cal., followed Children's Book Week with an exhibit for grown-ups, featuring the best books of the year, both fiction and non-fiction, as well as the newest in travel, biography and general literature. The books were loaned, as in former years, through the courtesy of A. C. Vroman in Pasadena.

They were, of course, displayed chiefly as incentive to Christmas book buying, but reserves were taken on non-fiction, giving the library an indication of public interest. Volumes on which reserves were placed were purchased, if not already in the library. Two comfortable chairs, placed near the tables on which the books were displayed, invited those who possess the browsing instinct, and for nearly three weeks they were constantly occupied by interested readers.

small book forms made of colored poster paper. In setting up the exhibit, a small old-fashioned lamp was placed on the table, also books, made as above, supported by book ends and a tiny ivory monkey. The floor was covered with two oriental looking rugs with intricate paper fringes. The chair was littered with books and a book sprawled face down on the floor with its pages open—enough to horrify any book lover! One could almost hear the ticking of the small, very realistic clock which graced the top of the book case; it had originally been part of a clock manufacturer's colorful advertisement. To complete the picture, the boy sat on a real cushion, deeply absorbed in a thrilling story, while the girl carefully replaced a book on the shelf. Children crowded around the case every afternoon, calling each other's attention to one thing or another. The idea, "More books in the home," probably went way over their heads, but the finger-marked glass of the doors was evidence of their keen interest.

Miniature Book Week Exhibit at East Orange, N. J.

East Orange, New Jersey

DURING Book Week, 1929, in the Boys' and Girls' Department of the Elmwood Branch, East Orange, N. J., Public Library, a miniature book exhibit was displayed. It was arranged in the upper half of a book case which is generally used for small museum exhibits. The space available was twenty-seven inches long, nine inches deep and twenty inches high, and was lighted from above by a show case light. The entire setting was constructed of material on hand or contributed by members of the staff. The idea was an adaptation of the original Book Week poster of Jessie Willcox Smith. A small book case and table were made of thin pieces of wood, glued and shellacked. Lack of time and craftsmanship necessitated the borrowing of a doll's chair. A copy of the above-mentioned poster was cut up, props were glued to the figures of the boy and girl, the rows of books were cut from the poster and given depth by false sides and tops. In addition, pictures of well-known books were cut from a publisher's catalog and pasted to

Suggestions for Book Week Activities at Cape Girardeau, Mo.

Cape Girardeau, Missouri

LAST YEAR the Southeast Missouri State Teachers College at Cape Girardeau, Mo., prepared a large educational exhibit for visiting teachers who attended the meetings of the Southeast Missouri Teachers Association held annually on the college campus. Combining the idea of travel with that of reading, the central

part of the library unit was constructed and was supported on either side by displays suggestive of Book Week. The travel section contained posters of both travel and books; colorful literary maps; models of a ship, a dirigible and an airplane; pictures of trains and ships; a globe, and flags of many nations. Books and pamphlets played considerable part in the display. Two special exhibits on Book Week included such suggestions as the library thought might be useful to the visiting teacher, enabling her to gain something that she might carry back with her to the school room and use in her efforts to encourage the proper observance of Book Week.

A Book Week Parade to Stimulate County Library Interest

Galveston, Texas

LAST YEAR one of the city banks offered the Rosenberg Library at Galveston, Tex., the use of two of its display windows for exhibits. Since the Adult Department has previously availed itself of a similar offer and since November meant Book Week, it was decided to use one window for a display relating to the Children's Department and the other to emphasize Book Week. In the first window the idea that "Books are Treasure" was developed. On one side of the window a fine Elizabethan ship model represented the treasure ship about which were grouped such titles as *Book of Pirates*, *The Mysterious Island*, *Treasure Island*, etc. On the opposite side stood the treasure chest, its lid partly raised to reveal a dazzling display of jewels. Around this stood such books of poetry as *Silver Pennies*, and *Golden Numbers*. In the middle space were books on fairy tales, and each group of books had a sign. Near the ship was the sign, "A

Good Book Is a Treasure Ship for You"; with the poetry grouped about the chest was "Rare Jewels—Poetry." The other window displayed a variety of titles, some new, some old favorites. They were in three groupings: For the Boy, For the Girl, For the Baby. With each group a poster like an open book stood upright. The left hand page of the book had an illustration and the opposite page bore text composed to fit the need. When the displays were removed from the bank window the chief features of the Treasure Window were set up in a local bookshop with a display of their stock chosen by the children's librarian.

Hunt County, Texas

ON THE LAST DAY of Book Week last year the American Association of University Women of Commerce, Texas, which is sponsoring a county library movement in Hunt County, staged a parade. The purpose of the parade was to stimulate interest in the county library. The support of literary and civic clubs and all schools was asked. Many responded by sending decorated cars bearing special slogans, such as, "Why can't we have a county library?" "How may a county library be established?" "Lions International for a county library," etc. A group of Training School children added color by carrying posters representing children's books; some were dressed as popular book characters. The parade was led by the E. T. S. T. College band.

"Books Are Treasure" Window Display at Galveston, Tex.

Loup City, Nebraska

EACH YEAR for nine years the Loup City Township Library, Loup City, Neb., has observed Book Week by arranging a program each afternoon after school for the benefit of the pupils of the grade schools. During each day's program the librarian has given a short talk on books and the general object of Book Week. Each program was sponsored by a local club.

New Orleans

THE NEW ORLEANS, La., Public Library is working very closely with the public and parochial schools of New Orleans. They believe that more interest is taken in Book Week through their efforts than would be taken if left entirely to the school teachers. Each year the schools are invited to visit the library and a great many of them accept this invitation; it is a very common thing to find during Book Week classes from several schools visiting the library in a single afternoon. They are making special efforts this year to make Book Week more attractive than ever before.

Louisville, Kentucky

OVER ONE thousand children took part in a "Pageant of America," presented for the observance of Book West last year in Louisville, Ky. The project was sponsored by the Public Schools Board of Education, the Catholic Board of Education and the Louisville Public Library and was given to raise additional funds for the Children's Monument to the soldiers and sailors in the World War. Nearly one thousand dollars were cleared. A Book Week Tea was also arranged at the public library for one afternoon. After a five minute talk by several speakers on children's reading, questions from the floor were answered. All were invited to visit the Children's Room and the Parent-Teacher Room to see the Book Week display of children's books. In 1928 this library used a hidden title story entitled "The Magic Tooth," which concealed

one hundred and twenty-five titles of children's books. The Louisville *Courier-Journal* offered twenty-five dollars in prizes for those who could find the hidden titles.

Sacramento

FOR THIS SEASON the City Free Library, Sacramento, Cal., is going to make a concerted effort to secure a merchant cooperation during the twelfth annual Children's Book Week. A deputy has already interviewed the leading dealers with prominent windows on the main streets and is already assured of hearty approval: Weinstock, Lubin & Co. leading department store, book department, circulating library and magazine stand have promised a window for a week; Hale Bros. department store, circulating library and children's book department have promised a window; John Breuner Co., furniture and house furnishings, circulating library have promised a window; Albert Elkus, clothing and children's school wear have promised a window. And so down

the line. The library will have more than twenty stores with Children's Book Week windows and is reserving many new books, both adult and children's, for display in these windows. It is unnecessary to note that the two book stores, Levinson's and the Purnell Stationery Co., will cooperate.

Book Week Window Display at Garrett, Ind.

Prison Libraries Exhibit at Louisville

FROM October 10-16 the American Prison Congress is meeting at the Brown Hotel in Louisville, Ky. At that time the Institutions Committee of the American Library Association will have charge of a library exhibit. The St. Louis Public Library is furnishing the books; the prisons and library commissions the printing, posters and samples; and the committee members have planned and are conducting the booth. The influence of libraries in prisons will also have its place on the program of noted speakers from all parts of the country.

THE LIBRARY JOURNAL

October 15, 1930

Editorial Forum

BOOK WEEK, ten years old, reaches its eleventh celebration this year. It is the oldest of the "Weeks" and has outlived many similar annual observances because it is so closely allied with fundamental movements of American education. In the American public library the recognition of specialized service for children had become almost universal in the first twenty years of the new century, and in the public school system the emphasis on "free" or recreational reading was becoming more and more felt. It was the booksellers, at the instigation of Franklyn Mathiews, the Chief Scout Librarian, who came forward with the suggestion that in every community those who cared most for children's reading interest should get together in the common cause, and, because this program fitted so happily into the general needs of libraries and schools, hundreds and even thousands of communities have taken up this program, and, with the national publicity which has been developed by the headquarters of the movement, a vast amount of good has been accomplished. The children have found many more friends who are interested to see that they get more adequate supplies of good books in public, school and home libraries. This movement has also given support to a far more varied output of good writing for children and competent worthy publishing. As Clara Whitehill Hunt says in her article on "Children's Book Week: An Appraisal of Activities": "We children's librarians have won a position of leadership in the field of children's books. This hard-won place we must not lose. That we exercise a tremendous influence on the production and sale of children's books, we are told by publishers and authors. To meet the responsibility, we have taken upon ourselves that we should place first on our program *know our books*."

MISS HUNT's calm analysis of the possibilities of Children's Book Week acts both as a needful brake to any ill-considered enthusiasms and a guide to intelligent action. Cooperation with every legitimate agency and participation in all allied movements is properly the goal of every progressive library. Yet there is always the temptation to fritter away our energies in spectacular publicity at the expense of so basic a requirement as knowing our books. Miss Hunt does not exaggerate the eminence which children's librarians have gained in many quarters, but this position has been won only by reason of their demonstrated knowledge. Let us not endanger this position by neglecting the foundations; let us make sure that we know our stock before we adopt costly methods of advertising it. Mr. Jennings advised librarians in 1923 to "stick to their last." His advice is equally pertinent in 1930.

R. M.

IT IS HARD to read books with more than one audience in mind. The librarian reads with an eye to general circulation or may read with an eye to the interest of older children just approaching adult reading, but it is difficult to keep both points of view in mind at one sitting. For that reason, lists of adult books suitable for young people are particularly helpful to other librarians. In the second issue of the *Children's Library Yearbook*, Jean C. Roos, of the Stevenson Room of the Cleveland Public Library, has gathered together a well-selected list of some hundred or more titles that would fit in with the taste of growing children, and now we have supplementing that a list from the New York Public Library classified in the same general way. Such lists make buying much easier for boys and girls of the high school age, a group to which every library is paying very close attention today.

MANY LOVERS of Latin and Latin classics have been traveling this summer in the land of Vergil, the two thousandth anniversary of whose birth is celebrated October 15, and many Latin courses will be enriched by this experience and many more will be turned back to a rereading of the works of the Roman poet. The occasion gives opportunity for libraries to display their various editions of Vergil, rare and of current use. In the Newark Library, for example, there will be an extensive display

for the next two months portraying Roman and medieval culture. A feature of this exhibit is a huge map hung over the main staircase showing the travels of Æneas. There will be shown, also, the Baskerville edition, 1757, the Dauphin edition, Paris, 1726, and editions from the presses of Bodoni, Elzevir, Didot, etc.

WITH THE ANNOUNCEMENT of plans for the opening of a training course for hospital librarians offered by the Presbyterian Hospital of the city of Chicago, the value of books as a definite therapeutic help is again proclaimed. Though this is the first such training class to be organized in this country, library schools have devoted considerable time to the study of this subject, but the fact that the idea originated in the mind of the superintendent of the Presbyterian Hospital, and that the course has the sanction of doctors and officials, shows an appreciation of the value of the well-stocked library and the trained librarian in the hospital. Even though Diodorus Siculus, a Greek historian in the first century, who had inscribed over the entrance to the library of Thebes "Medicine for the Soul" did not have the same type of library in mind, it does show that psychic and physical health have been known for many years as closely interrelated. A librarian in a hospital must have rare skill in helping patients to read the right sort of books, and it is a wise move on the part of this training class to decide to take only one or two librarians at a time. Perhaps this course may pave the way to more hospitals demanding, through books and librarians, medicine for the mind as well as the body of patients.

AT LAST the new professional journal is ready for launching, and the Chicago University Press is ready to receive subscriptions from charter subscribers. The simple title of *The Library Quarterly* has been decided upon for the new venture, which, as previously announced, has the financial backing of the Carnegie Corporation and the professional support of the national societies in the library and bibliographical field. Its prospectus announces that it will cover the entire field of librarianship and command contributions from leading librarians, abroad as well as at home. As previously stated, it will not seek to enter the field of the general library periodicals,

which have struggled to more or less success without outside help and which could not be sure of permanence if such support should lead to rivalry with them in a field pecuniarily so narrow, though in scope so wide.

AN ADMIRABLE EXAMPLE to American diplomats and those of other countries was set by Ambassador Hugh Campbell Wallace during his occupation of the American Embassy in Paris. Finding the library resources in Paris sadly deficient in reference to the diplomatic and other relations of France and America throughout their friendship of a century and a half, he started to collect material in this field, with the result that the Paris Embassy when it enters its new building—for America has at last an adequate home for its representatives—nearly ready for occupancy will have a remarkable library. This is situated where the Avenue Gabriel leaves the Place de la Concorde, one of the most notable sites in Paris, which is only a few minutes' walk from the American Library in Paris, which has an excellent general collection of books without covering any specialty to the extent which the embassy library will do in its special field.

ALTHOUGH the North German Lloyd Steamship Company was forced to abandon its plan of bringing a large party of library pilgrims to America, it proves that we are given the satisfaction of being hosts for a surviving remnant, as a small party of seven men and three ladies are to make the bibliographical tour in charge of a representative of the excellent travel service of the American Express Company. Some of the veterans will be reminded of the pilgrimage of the American librarians in 1897, when approximately fifty were afloat on the steamer "Cephalonia" in mid-ocean before wireless days and the Earl of Crawford was host for the little party of seven library folk who happened to be in England. The seven gentlemen of the German party and their ladies will have hearty welcome, and we shall hope to greet a party of a hundred or more from Germany and as many from other countries in 1933, since the International Federation of Library Associations has accepted the invitation of the American Library Association to participate in a world meeting in Chicago in connection with the World's Fair.

Librarian Authors

OCCASIONALLY a young thing, cherishing the delusion that a person who gets a book published must be a Personage, asks me how I came to write. Flattered by the implications of the question, I become garrulous and tell tales about the making of the little books and the friendships that have grown out of them. The story I like best to tell is about the music box. In writing *Peggy's Playhouses* I "pretended" Peggy's visit to a charming old home which possessed a Swiss music box adored of my childhood. I wished to describe the carved chalet faithfully but I found I had forgotten details. The old home had long since been broken up and efforts to trace surviving members of the family were fruitless. Just as I decided to give up the search a letter came, after years of silence, from a daughter of the house, giving me her address and begging me to write. Now thanks to "Peggy" the precious music box is in my house, and little visitors listen as raptly to its sweet tunes as little girls have always listened, from the time the pretty chalet came from Switzerland to its first small owner seventy-five years ago.

Grateful as I am to Houghton Mifflin for thinking my modest productions worth publishing, I confess to envy of the authorship of three lovely books which I discovered and "introduced." *Memoirs of a London Doll*, *Lady Green-Satin* and *Her Maid Rosette*, *Children of the Moor*—how I wish I might have written them! There are stories to tell about them, too. They have given me a lot of fun, the *London Doll* particularly, which brought charming letters from dear old ladies; and chuckles of joy at Amy Lowell's picture of Richard Henry Horne, school boy, when he shied a snowball at young John Keats' tall hat and then swiftly hid himself from the avenging hand of the outraged young apothecary.

Library workers in adult departments sometimes criticize children's librarianship as a calling "narrowing" to the worker. If I were to try to answer that charge I should need a huge volume in which to set forth the interests, the contacts, the windows opened, above all the friendships which thirty years of being a children's librarian have brought me. Once, having been insistently told that everyone ought to have a hobby outside his regular daily work, I seriously tried to decide upon one for myself; but after long pondering I exclaimed, "How can I possibly concentrate on any *one* interest when 'The world is so full of a number of things' to enjoy?"

Even though I determined to be a children's librarian before a Training Course for Chil-

CLARA WHITEHILL HUNT

*In a favorite seat overlooking the hills
at Grafton, Vermont*

dren's librarians existed, no aspirant for the profession could have been more fortunate than I was in my teachers. In Utica where for a few years I taught school I received a liberal education under Superintendent George Griffith, whose untimely death cut off a great educator. In love with my work under this inspiring chief, nevertheless the fascinations of librarianship as demonstrated by gifted Louise Cutler, who came to reorganize our public library, drew me to the New York State Library School; and this in the days when Melvil Dewey and Mrs. Salome Cutler Fairchild were giving their best to the school. In those impressionable first years I met and listened to and talked with Mrs. Sanders, Miss Hewins, Miss Plummer, leaders whom children's librarians must never forget. I went to Newark when the new building was being planned, and for the training Doctor Hill gave me I can never be grateful enough. When Doctor Hill came to Brooklyn, for a while I had the stimulating experience of working under Mr. Dana. And from 1903 to the present my co-workers in the Brooklyn Public Library have been a "faculty" invaluable in my education.

Current Library Literature

ALUMNI READING

Lenart, Elta. Alumni reading. *A. L. A. Bull.* 24:290-293. 1930.

Interest is centered in the five colleges given special grants by the Carnegie Corporation: Lafayette, Lawrence, Michigan, Ohio State and Vassar. Lafayette issues the *Lafayette Bookshelf*, a bulletin with lists of books on various subjects annotated by the faculty experts.

AMERICAN LIBRARY ASSOCIATION CONFERENCES. LOS ANGELES CONFERENCE

Ferguson, M. J. A. L. A. goes west. *News Notes of Calif. Libs.* 25:233-235. 1930.

"The A. L. A. is a greater force than most of us realize. When 2100 of its members can gather from all parts of the nation, their presence is a challenge to consider seriously the service they are capable of giving, and is a promise of better things to come. California hopes that fifteen years may not go by before it is again honored by being the host to this group of optimistic workers."

BIBLIOGRAPHY

Kirsch, M. M. Bibliography: an indispensable aid to sociological research. *LIB. JOUR.* 55:773-774. 1930.

The Wisconsin Legislative Reference Library enlists the services of the students in the University of Wisconsin Library School in compiling bibliographies on special topics. A list of such bibliographies compiled in the past two years is appended.

Krabbe, Wilhelm. *Bibliographie; ein Hilfsbuch für Bibliothekspraktikanten.* Stettin: Verlag "Bücherei und Bildungspflege," 1930. pap. 55p. (Veröffentlichungen der Bibliothekskurse in der Berliner Stadtbibliothek, heft 8.)

An annotated list of trade, national and subject bibliographies and other reference works.

BOLTON (ENGLAND) PUBLIC LIBRARY. TONGE MOOR BRANCH LIBRARY

County Borough of Bolton. Tonge Moor Branch Library. illus. plan. *Lib. World.* 23:58-62. 1930.

Dealing with outlying districts. VIII—Bolton. plan. *Ln. and Book World.* 20:28, 30. 1930.

The library has six branches. Ground floor plan of the Tonge-Moor Branch is reproduced.

BOOK BUYING

Drury, F. K. W. *Order Work for Libraries.* A. L. A., 1930. cl. 260p. \$2.25. (Library Curriculum Studies.)

Takes up in detail the selection of agents; agreements with them; use of national book trade bibliographies of current books, out of print titles, periodicals; and the use of second-hand, remainder and auction catalogs. Outlines routine procedure in acquiring books, pamphlets, gifts, exchanges, replacements, rental books, and miscellaneous material. The chapter on mechanical preparation develops the routine for inserting book plates, cards, pockets, labeling, shellacking, and the marking and storing of material other than books. Bookkeeping receives separate treatment. Reading references, projects and questions are included.

BOOK SELECTION

Drury, F. K. W. *Book Selection.* A. L. A., 1930. cl. 369p. \$2.75. (Library Curriculum Studies.)

Partial contents: Functions of Book Selection; Selection Based on Demand; Selection Adapted to Anticipated Use; Selection Governed by Resources; Evaluation of Contents; Books of Information, Books of Literary Value; The Physical Book; Principles of Book Selection; Aids in

Intended to index with brief annotation, or excerpts when desirable, articles in library periodicals, books on libraries and library economy and other material of interest to the profession. The subject headings follow those in *Cannons' Bibliography of Library Economy*, to which this department makes a continuing supplement. Readers are requested to note and supply omissions and make suggestions as to the development of this department.

Selection (with appendices on book-reviewing periodicals and aids for selecting current and older books); Organization for Selection. With reading references, projects and questions. Names of publishers are not included.

BOOK WEEK

Library carnival. Book Week, Nov. 16-22, 1930. *N. H. Pub. Libs.* 26:82-93. 1930.

"The plays and pageants, the speech-making, and the newspaper articles, the luncheons, teas, story hours, poster parades, window displays, moving pictures, and radio broadcasting are very pretty, not to say entertaining. Unmask these merry-makers and what are the library principles involved?" The question is answered in detail.

BOOKS AND READING

Lehman, B. H. The good reader and the good book. *LIB. JOUR.* 55:633-638. 1930.

"The good reader then turns to the good book partly by instinct, partly under your guidance, partly under mine, and every time that he turns he becomes more profoundly instinctive; he discovers always more quickly which book is not for him, perhaps not for anyone a good book, and he puts it down. When he finds the good book he will be accessible to the experience it holds. The good reader is a reader who lays himself open then, I say, in this sense to the experience of reading. The experience of reading is a matter of perception by the whole organism. Can we not illustrate with some of the good books of our own day?" The books considered include *All Our Yesterdays*, *A Farewell to Arms*, *All Quiet on the Western Front*, Gorky's *My Childhood*, and *Elizabeth and Essex*.

CATALOGING

Bradford, S. C. The cataloging of publications of societies and corporate bodies. *Lib. Assn. Record.* n.s. 8:177-186. 1930.

Discusses some of the difficulties of finding entries in the *World List of Scientific Periodicals*, which ostensibly lists a periodical published by a society under the first word, not an article, of its title, but actually is obliged to make seven exceptions to the fundamental rule. The writer recommends that publications of a society be entered under the name of the place from which its acts are issued, and that publications of a corporate body be cataloged under the name of the place from whence it derives its denomination.

Smith, E. S. *A Great Adventure; Twelve Letters to a Library School Student.* Ann Arbor, Mich.: George Wahr, 1930. pap. 30p. 35c.

By the head of the catalog department, University of Michigan Library. Brief, informal letters on the mental alertness and imagination which a cataloger may employ to enliven the routine of her work.

Steward, A. V. On cataloging. *Lib. World.* 33: 35-38. 1930. To be continued.

"Why should not the cataloger create something which delights his heart? We plaster our libraries with guides and posters. We sloganize and popularize in our endeavor to give the public what it wants. Let us make scholarly catalogs for our own pleasure and rest assured that they will inevitably be of the very best service to the public . . . The making of consistently good catalog cards for the thousands of books with which he has to deal gives the cataloger a definite joy of creation. It gives him a love of order, of system and of neatness, and a habit of logical thinking which is useful in any kind of work."

Wilks, John. The cataloging of periodicals. *Lib. Assn. Record.* n.s. 8:187-193. 1930.

Advocates the cataloging of all periodical publications, no matter by whom they may be issued, under their titles, with the stipulation that later titles should be referred to earlier titles of the same journal.

CERTIFICATION OF LIBRARIANS

In the *A. L. A. Bulletin* for August, 1930, the president of the board of trustees of the Syracuse (N. Y.) Public Library comments unfavorably on the New York State rules for the certification of librarians in the State. On the contrary, the trustees of the Rochester Public Library believe in the plan (24:300-302. 1930.)

CHILDREN. See LIBRARY WORK WITH CHILDREN.

CHILDREN'S LITERATURE

Beust, Nora, comp. *Graded List of Books for Children*. A. L. A., 1930. cl. 149p. \$2.

Compiled under the direction of a committee of the A. L. A., Anne T. Eaton, chairman. Based on a list published in 1922 by a committee of the National Education Association. "The original plan of providing an annotated list of approximately one thousand standard children's books, including classics, which would be useful in buying for the first nine grades, has been followed. . . . No text-books as such are included. For the convenience of teachers and librarians, a list of reference books useful for the first nine grades has been added. . . . There are three lists: Section A, picture books and easy reading books for children in grades one, two and three; Section B, titles for fourth, fifth and sixth grade pupils; Section C, for seventh, eighth and ninth grade children. In order to place each book more accurately, all grades in which it may be used are designated after the individual entry."

INSTRUCTION IN USE OF LIBRARIES

Lewis, E. F. A college librarian talks to students. *Wilson Bull.* 5:119-124. 1930.

By the reference librarian of Northwestern University. Freshmen are shown the use of periodical indexes and reference books, and invited at a later date to state frankly their experiences with the university library.

Pritchard, M. C. Instruction problems in libraries of teacher-training institutions. *Wilson Bull.* 5:125-127. 1930.

Reprinted from *Educational Method*. "Fifteen years of work with school organization and administration through school libraries lead the writer to the conclusion that efforts to teach teachers library use and resources have been for the most part fruitless compared to the energy and zeal expended."

LEGISLATION, LIBRARY

Hewitt, A. R. *The Law Relating to Public Libraries in England and Wales*. London: Eyre and Spottiswoode. buck. 142p. 10s. 6d.

"Mr. Hewitt's volume is a reprint of the text of all the acts and subsidiary legislation concerning libraries in England and Wales. As it is furnished with a very good index, it therefore forms an invaluable work of reference on the exact state of the law to date. It should prove also of great use to legal draughtsmen when the time comes for the unwieldy legislation governing libraries to be consolidated and improved. In this way it does a great deal toward remedying the state of affairs indicated in the Departmental Reports."—*Lib. Assistant*. 24:176-177. 1930.

LEGLER, HENRY EDUARD, 1861-1917

Roden, C. B. Henry Eduard Legler. por. *Bull. of Bibl.* 14:21-22. 1930.

Mr. Legler was the city editor of the *Milwaukee Sentinel* before his interest in library work was awakened by Theresa West, then librarian of the Public Library (now Mrs. H. L. Elmendorf of Buffalo). In 1904 he became the second secretary of the Wisconsin Free Library Commission, and from 1909 until his death earned a national reputation as librarian of the Chicago Public Library. "The place of Henry E. Legler in the annals of American librarianship is secure and exalted. His chief contribution was doubtless in the direction of library extension, the rapid distribution of books to the reader. He was never much concerned with details, technique, formulas. It was results that he sought. . . ."

LENDING DEPARTMENT

McVey, M. R. The loan desk attendant. *N. C. Lib. Bull.* 7:285-287. 1930.

"We should insist that our loan desk attendants are blessed with some, if not all, of the qualifications listed—good health—which means better poise, more patience, and quiet determination, and intuition that flowers into courtesy and sympathy."

LIBRARIES

Paulmier, Hilah. The library's part in the revival of learning. *Wilson Bull.* 5:130-131;135. 1930.

"Thus, by the tireless efforts of the few who appreciated learning in the Dark Ages: Clergy, monks, scholars, here and there a progressive ruler, and an increasing number of librarians, who collected books and manuscripts and gave many hours of labor to preserving, copying, and classifying them; the library managed to survive."

ENGLAND

Fenton, W. A. Cambridge: its libraries and some famous men. *Ln. and Book World*. 19:423-426; 20:4-8. 1930.

University Library, Trinity Library, Corpus Christi College Library, Peterhouse Library, Christ's College Library, Bibliotheca Pepsiana, King's College Library, Cambridge Public Library, etc.

See also PUBLIC LIBRARIES.

LIBRARY WORK WITH CHILDREN

A. L. A. Committee on Library Work with Children. *Children's Library Yearbook, Number Two*. A. L. A., 1930. pap. 88p. \$1.35.

General articles, bibliographies (new stories for storytelling, adult books for young people, children's books and reading in 1929), list of library schools specializing in work with children, salary statistics, and directory of children's librarians.

Munn, Ralph. The social significance of library work with children. *LIB. JOUR.* 55:638-640. 1930.

The elementary and junior high school library, when fully developed and in charge of competent children's librarians, may be able to give more individual guidance in children's reading than is possible in overcrowded public libraries. However, the school's service is necessarily restricted to special groups and special periods. It must change radically if it is to offer the wide choice of voluntary reading now obtainable at the public library. The child who knows only the school library is more likely to leave his library habits behind when he leaves school.

Prout, V. J. A merit badge for reading. *LIB. JOUR.* 55:772-773. 1930.

Cooperation of the children's department of the Kansas City (Mo.) Public Library with the local Boy Scout Council in promoting reading of good literature by the Scouts.

Roos, J. C. Training for library service with young people. *LIB. JOUR.* 55:721-723. 1930.

"There are many articles on the training of school librarians, going into some detail on the subjects needed in a school library course and the qualities desired for this type of service. . . . Training for workers with young people should follow similar standards. Not less preparation but even more is desirable to enable librarians to create and foster in young people permanent reading habits, to encourage recreational reading interests and to develop from school reference work, which is a somewhat compulsory use of books, voluntary book usage."

MCGILL UNIVERSITY LIBRARY, MONTREAL

Lomer, G. R. The [McGill] University Library, 1920-1930. illus. *McGill News*. 2:7-11, 27. 1930.

See also OSLER LIBRARY.

OKAYAMA PREFECTURAL LIBRARY, JAPAN

Muto, Masaharu. The Okayama Prefectural Library in Japan. illus. *LIB. JOUR.* 55:768-769. 1930.

Begun in 1908 with a donation of 20,000 books by Marquis Ikeda, the library opened its own building in 1923. The prefecture also has 250 very small libraries.

OSLER LIBRARY, MCGILL UNIVERSITY

Nobbs, P. E. Bibliotheca Osleriana—McGill University, Montreal. illus. Royal Architectural Institute of Canada. *Journal*. 7:204-205. 1930.

PERIODICALS

Smith, C. W. Pacific Northwest regional cooperation—periodical holdings. *LIB. JOUR.* 55:770-771. 1930.

Libraries in the Pacific Northwest are cooperating in contributing entries to the supplement to the *Union List of Serials*, and some are assuming the responsibility of completing incomplete sets reported in the *Union List*.

PICTURE COLLECTION

Brainard, J. F. The use of pictures in the school library. *LIB. JOUR.* 55:728-729. 1930.

By the librarian of the Horace Mann School for Boys, Teachers' College, Columbia University. Besides the usual picture collection, the library arranges every two weeks an exhibition of pictures and posters on an unusually high bulletin board placed against the wall of the second floor corridor.

PRISON LIBRARIES

Leigh, D. M. The prison library. What should it mean? *LIB. JOUR.* 55:641. 1930.

Under ideal conditions a library would be placed in every penal institution, and the prisoners permitted to visit the library not only for selection and exchange of books but also for reference purposes and study.

PUBLIC LIBRARIES

Wooster, H. A. This job of being a public librarian. *LIB. JOUR.* 55:766-767. 1930.

By the librarian of the Scranton (Pa.) Public Library. Discusses especially the matter of special religious qualifications in regard to a public librarian.

UNITED STATES

Brown, Karl, comp. *The American Library Directory.* 1930. Bowker, 1930. cl. 538p. \$12.

A classified list of 12,480 libraries, with names of librarians and statistical data (subtitle). Includes public, Federal and State, educational and professional, high school, business and other special, and Canadian libraries, as well as libraries in the U. S. territories and dependencies. Library organizations and library schools are also listed.

SCHOOL LIBRARIANS

Stone, C. H. Training the school librarian. *por. Wilson Bull.* 5:133-135. 1930.

By the director of Department of Library Science, North Carolina College for Women. Reprinted from *School Executives Magazine*.

SCHOOL LIBRARIES

Houston, C. S. A day in a school library. *illus. LIB. JOUR.* 55:723-726. 1930.

A typical Thursday from 9 a. m. to 4.30 p. m. in the library of the high school of Montreal.

Lancefield, H. M. Student Council and the library. *LIB. JOUR.* 55:729-730. 1930.

The Student Council, which is a court for library offenders, established in Washington High School, Portland, Ore., has in the four years of its existence reduced the loss of books from the school library slightly more than 90 per cent.

Minster, Maud. The story of a school library. *illus. LIB. JOUR.* 55:726-728. 1930.

"What one woman can do if she sets her mind to it with heart and soul, and how much can come from incidental sowing of good seed are interestingly illustrated in the case of Miss Minster and the Altoona (Pa.) High School Library. When its principal expressed the hope that some day there would be a room for books and a librarian, Miss Minster decided that this should come to pass and that she should be the librarian—and so it proved."—Editorial.

The September, 1930, issue of the *Wilson Bulletin* has articles by Florence A. Henry on "Fugitive Material in the School Library"; on "The Library Club and the Reserve Book Problem," by Elizabeth Cameron Whiteman; on "The Librarian and the School Faculty," by Pearl G. Carlson (reprinted from the *Peabody Journal of Education*); on "The Public Library and the School," by Walter L. Brown and N. H. Price (reprinted respectively from *Child Welfare and Platoon School*); on "The High School Library Budget," by Jackson E. Towne (reprinted from the *Peabody Journal of Education*); and other reprinted material. (5:35-59; 66-67. 1930.)

SITKA LIBRARY

Yarmolinsky, Avrahm. A Russian library in Alaska. *illus. Bull. of the N. Y. P. L.* 34:643-646. 1930.

The Sitka Library was founded by Nikolay Petrovich Rezanov in 1803, using as a nucleus a collection of books, maps, pictures, and similar material brought with him from Russia. Sitka became in 1804 the administrative center of Russian America. At the beginning of the second quarter of the century there were some 1200 volumes, valued at 7500 rubles. More than half of the titles were in Russian, the rest in the Western languages. After the United States Government acquired the territory the

book were first stored in the loft of the Cathedral of St. Michael the Archangel, later in the Bishop's House for the use of the school and orphanage.

SPECIAL LIBRARIES

Special Libraries for September, 1930, the San Francisco Convention number, publishes a series of talks by librarians of special libraries in California on the part the special library is playing in the development of the industrial West.

UNIVERSITY LIBRARIES

Bushnell, G. H. *University Librarianship.* London: Grafton, 1930. cl. 214p. 7s. 6d.

By the University Librarian, St. Andrews, London. Discusses the government, arrangement and buildings of a university library; classification; relative values of card and bound-book catalogs; arranging and classifying a collection of book bindings; local history collections; treatment of parliamentary and official papers, and dissertations; inter-library loans; teaching of bibliography in a university library; and reorganization and cataloging. Reviewed by Edwin Elliott Willoughby of the Newberry Library, Chicago, in *Lib. World.* 33:56, 58. 1930.

Hand, Elinor. A cost survey in a university library. *LIB. JOUR.* 55:763-766. 1930.

Findings of a six months' survey at the University of California Library, during which every member of the staff was required to keep a daily record of the actual disposition of his time for every hour of the day, under one or more of several headings worked out for his department. The cost per volume for cataloging was found to be 72 6/10c., lower than Mr. Windsor's five-year-old figure of 77c. for the University of Illinois, but higher than the 67 7/10c. given by C. H. Brown for Iowa State College for 1929.

Bibliophile Tour

THE BIBLIOPHILE TOUR has been definitely organized and sailed via the SS "Bremen" from Bremen on October 3. There are ten members in the party, namely Dr. Oehler, Dr. and Mrs. Hensler, Mr. Walter Barth, Dr. Gerd Rosen, Mrs. Ida Halle, Dr. Annamaria Voigt-Meiner, Mr. Robert Mueller, Mr. Wolfgang Meiner, Mr. Leopold J. Cohn. Arrangements for the land tour are in the hands of the American Express Company, New York City, who report the following schedule: Oct. 10-14 New York City; Oct. 15 Yale University; Oct. 16-18 Boston; Oct. 19 Buffalo; Oct. 20-21 Washington, D. C.; Oct. 22 Philadelphia; Oct. 23 New York City, and Oct. 24 embark on SS "Europa."

Women's Pan-Pacific Conference

THE SECOND Women's Pan-Pacific Conference held at Honolulu Aug. 9-22, was attended by two library delegates from the United States, Julia Wright Merrill, Executive Assistant of A. L. A. and Mary Eileen Ahern, Editor of *Libraries*. The A. L. A. representative spoke at a general session on "Library Service is Educational and Social Service," led the round table of the Education Section devoted to adult education, and gave a radio talk over KGU. Miss Ahern gave a seven-minute talk on "The Library's Part in Adult Education" at the adult education round table. The next conference of this group will be held in Honolulu in the summer of 1933.

The Children's Librarians' Notebook

GRANDMOTHER'S COOKY JAR. By Helen Fuller Orton. *Stokes*. \$1.50.

Peggy, Billy, and Jean have a lovable old grandmother who delights in making cookies for them. More interesting than the cookies is the jar which holds them, for this has a history of its own. It has a nick from an Indian arrow from pioneer days, and also has a mysterious adventure in their own day. The book has two colored illustrations and fourteen black and white ones by M. L. Frantz. Style is good and ranks with Mrs. Orton's other books. For children 8-10 years.—A. W.

THE WHITE HERON FEATHER. By Gertrude Robinson. *Harper*. \$2.

Laid in the Maine woods at the time of the French and Indian wars, this Indian story is unique in that it has two white women for its heroines. Nausaka was born shortly after her mother, Nusingee, had been taken captive by the Pjebscob Indians. For sixteen years mother and daughter lived as Indians, seeing no other white person except one another. The story concerns itself with their thrilling and unusual adventures in escaping from their captors and reaching Fort Andros, where a husband and wife are re-united and where a father sees his daughter for the first time. The plot, which is not over-sentimental, is well sustained and exceptionally well developed. If the young girl had started on the dangerous journey alone, it would have been far more plausible than it is with the mother to act as counsellor and companion. In spite of the fact that the chief characters are female, there are enough Indians and enough male characters as well as enough evidences of red-blooded courage to make the book interesting to the boy as well as the girl reader. Though not written with a true literary flourish, the style is very creditable and above the average to be found in books of this type. Librarians who are looking for a wholesome well-written adventure story to add to their juvenile book collections should welcome *The White Heron Feather*.—C. N.

These books are actually reviewed by different children's librarians in the field. If you do not agree with the review of a book send in your own review and we will print it. The name of the reviewer of any book will be given upon request.

SILVER WINGS. By Raoul Whitfield. *Knopf*. \$2.

Boys everywhere will delight in this collection of aviation stories which includes tales of war flying, air mail service, and the more recently developed commercial aviation. Raoul Whitfield was himself a lieutenant in the air service during the War and he knows flying thoroughly. The stories are full of action and are told in a clear, direct manner which sustains the interest. For boys from 11 to 15 years.—M. P.

JUDITH LANKESTER. By Marjorie Hill Allee. *Houghton Mifflin*. \$2.

While perhaps not quite as convincing a story as *Susanna and Tristram*, this is yet an excellent book for older girls. Judith is brought up by her grandmother in an old slave-owned home in Virginia and at sixteen finds herself earning her living in a pioneer home in Indiana. How she develops in the new environment and wins the affection of her new friends, the excellent characterization, and the picture of pioneer life ninety or more years ago, make this a worth-while story to add to the list of girls' books.—T. C. B.

FREEDOM'S DAUGHTER. By Gertrude Crownfield. *Dutton*. \$2.

Pennsylvania background in the Revolutionary War. Reba Stanhope, a young Quaker girl, does what she can in those times. When she helps Gilbert Westwood escape by providing a British uniform for him, she merely starts her career as "freedom's daughter," for her daily life from then on consists of helping wounded soldiers, aiding prisoners, getting medical herbs to camp doctors, and even being taken as a spy. In fact, there is all the excitement a girl of today would like. There is historical flavor and a nicety of detail running through the book.—A. W.

BRISTLES. By Theodocia Walton Bird. *Little, Brown.* \$2.

Bristles is a wire-haired fox terrier. First he is a much loved pet and then a very successful trick dog in a circus. As a dog and a circus are two things that are dear to the hearts of most children the book will find many readers. Younger children will enjoy it. The print is large and the general appearance of the book is attractive.—M. R.

WANDA AND GRETA AT BRODY FARM. By Amy Palm. *Longmans, Green.* \$2.

I read Wanda and Greta from cover to cover twice. It is one of the most charming and natural and delightful books for children that it has been my privilege to have come to my attention over a long period of years. It seems to me that it sums up in this one volume the charm of Swedish home life that has been building in my mind with the accumulation of *Little Picture Books* by Elsa Beskow and Carl Larssen, and in the atmosphere provided in Selma Lagerlöf's *Marbacka*. An opportunity for contact with this combination of authors will do more toward international understanding and appreciation than any amount of propaganda on international peace could accomplish in a thousand years and the mental images that any or all of these books supply to the mind of a growing child will build up a standard of conduct and ethics for right thinking and family relationships that it would be difficult to eradicate or supplant. Frank MacKintosh has quite perfectly to my mind got the spirit of the text and what an achievement that is for any publishing house because so often the author and illustrator seem to be working at cross-purposes.—D. M.

Navarre of the North in Alaska.

NAVARRE OF THE NORTH. By Esther Birdsall Darling. *Doubleday, Doran.* \$2.

This story of an Alaskan husky makes very thrilling reading. His early training and achievements take place in Alaska while the last part of the book takes place in France and tells of his part in the World War. The book

will be enjoyed by older boys and girls who like adventure stories.—M. R.

BARREL OF CLAMS. By Shirley Berton Leshner. *Harcourt, Brace.* \$2.00.

This tells of the adventures and hardships experienced by a girl who left a comfortable home to spend the winter at a summer cabin on an island off the Maine coast. She felt that this would take her away from the distractions of society and give her a chance to write a successful story. So many things happened to her that her first successful book was an account of the winter at the cabin.

The finances of the book are somewhat involved. Judy is supposed to be supporting herself, but she seems to get along very well on a few well-chosen debts. The character drawing of the people who live in the little coast village is good. The book holds the interest and will be enjoyed by older girls.—M. R.

HOOFBEATS IN THE WILDERNESS. By A. M. Baker. *McBride.* \$2.

This is the account of the experiences of a fourteen year old boy and his white pony in pioneer Indiana. Just a bit sketchy but will satisfy any boy who is looking for thrills and who has a love for animals. Ages 10-15.
—M. W.

THE BOYS AND SALLY. By Rose B. Knox. *Doubleday, Doran.* \$2.

A lively story of life on a Southern plantation which boys and girls of the "in-between" ages 10-15 will thoroughly enjoy. The boys and Sally pick cotton, make sugar cane, and find that life in the country can be filled with truly exciting adventures. The atmosphere is characteristic of the wholesome childhood of pre-war Southern children, an atmosphere which holds true for the present day with the exception that the slaves are "freed," and is quite as entertaining.—W. W.

WHEN THE ROOT CHILDREN WAKE UP. By Sibylle v. Olfers (with text by Helen Dean Fish). *Stokes.* \$1.50.

A delightful German picture book with English text that the children will love. The pictures, alone, will intrigue the child who cannot read and he will be sure to find some one to tell him what the children are doing. Must have this book for the little children's table. For children from 5 to 7 years.—M. W.

Some Recent Books for Young People

THE FOLLOWING TITLES have been added to the 1930 edition of the list, "Books for Young People," prepared by The Book Committee for Young People of the New York Public Library. The list itself, containing about a thousand titles, is printed in the October number of the *Branch Library Book News*, published by the New York Public Library:

FICTION

- Bailey, Henry Christopher. *The Merchant Prince*. Dutton.
 Broster, Dorothy K. *The Flight of the Heron*. Coward-McCann.
 Buck, Pearl S. *East Wind: West Wind*. John Day.

Title and Contents Pages for League of Nations Publications, 1929

THE LEAGUE OF NATIONS has published title page and contents for the publications, other than periodicals, issued for public sale during the year 1929. It was announced in the *Brief Guide to League of Nations Publications* from the League of Nations Library, Geneva, 1930, that "from 1930 onward the Secretariat will publish a covering page and an index¹ for each category of documents on sale, which will greatly facilitate the classification of documents." This service has been made available a year earlier for subscribers to the complete documentation issued during 1929, distributed by the sole American agent, World Peace Foundation, 40 Mt. Vernon Street, Boston, Mass. Title page-content signatures may also be secured by those subscribing to the documents issued by a particular Section of the League. For instance, the Economic and Financial Organization publications for 1929 have title page-contents for binding in five volumes.

The classification scheme by Roman numeral divisions has been explained in detail in the introduction to *Key to League of Nations Documents Placed on Public Sale, 1920-1929*, by Marie J. Carroll (World Peace Founda-

tion, 1930). The issuance of title page-content fascicules for 1929 enables collation and binding of the publications in 24 volumes, as follows:

League of Nations Publications—II: Economic and Financial. 1929. 1-15.

League of Nations Publications—II: Economic and Financial. 1929. 16. *International Statistical Year-Book*, 1928.

League of Nations Publications—II: Economic and Financial. 1929. 17-21.

League of Nations Publications—II: Economic and Financial. 1929. 22-42.

League of Nations Publications—II: Economic and Financial. 1929. 43-53.

League of Nations Publications—III: Health. 1929. 1-5.

League of Nations Publications—III: Health. 1929. 6. *International Health Year-Book*, 1928.

League of Nations Publications—III: Health. 1929. 7-10.

League of Nations Publications—IV: Social. 1929. 1-10.

League of Nations Publications—V: Legal. 1929. 1. "Conference for the Codification of International Law. Bases of Discussion Drawn Up for the Conference by the Preparatory Committee. Vol. I: Nationality."

League of Nations Publications—V: Legal. 1929. 2. *Ibid.*

Vol. II: *Territorial Waters*.

League of Nations Publications—V: Legal. 1929. 3. *Ibid.*

Vol. III: "Responsibility of States for Damage Caused in Their Territory to the Person or Property of Foreigners."

League of Nations Publications—V: Legal. 1929. 4-18.

League of Nations Publications—VI: A—Mandates. 1929. 1-4.

League of Nations Publications—VI: B—Slavery. 1929. 1-3.

League of Nations Publications—VII: Political. 1929. 1-4.

League of Nations Publications—VIII: Transit. 1929. 1-18.

League of Nations Publications—IX: Disarmament. 1929. 1. *Armaments Year-Book*, 1928-29.

League of Nations Publications—IX: Disarmament. 1929. 2-10.

League of Nations Publications—X: Financial Administration of the League. 1929. 1-3.

League of Nations Publications—XI: Opium and Other Dangerous Drugs. 1929. 1-4.

League of Nations Publications—XII: A—Intellectual Cooperation. 1929. 1-3.

League of Nations Publications—XII: B—International Bureaus. 1929. 1. *Hand-Book of International Organizations*.

League of Nations Publications—General. 1929. 1-4.

In The Library World

Antique Puppets Displayed

THE LOS ANGELES PUBLIC LIBRARY, well known for its plans of short time exhibits arranged to guide and stimulate reading interest, had during July, an unusually fine display made possible by the presence in the city of a valuable collection of antique marionettes. They were the property of Harry Barnett, producer and manager of the Yale Puppeteers, who brought them back from Europe when he returned from several months' travel and research. There are twelve of the little figures forming a stock set which was used for the performances of the plays of Goldoni in the Eighteenth Century, where they were very popular with the nobility and the populace in France and Italy. The display was arranged very effectively against a background of dashing Italian Theater posters along with several books on puppetry and a typewritten list of books on the subject available in the library for circulation. The show case had a crowded audience about it most of the time, and interest was shown by older folks quite as much as by children.

American Library at Hamburg

AT THE dedication of the Hamburg Library of American Law and Political Science on June 27, Frederic M. Sackett (American Am-

bassador in Berlin) extended greetings and congratulations to both the Hamburg Society of Friends of the United States and the Hamburg University. He said in closing, "May the new Library prove an inspiration and may it contribute, as its sponsors are so ably doing, to a further strengthening of the ties that so

happily exist between the peoples of Hamburg and the United States."

The address given by John E. Kehl (Consul-General) as reported in the *Hamburg Amerika - Post* Heft 7, 1930, p. 220, follows:

"The acquisition of a Library of American Law and Political Science, as has been accomplished by the Society of Friends of the United States in Hamburg, and the dedication of that library today, marks a most commendable achievement by this young and progressive organization. I perceive in the opening of this library, aside from your successful efforts in connection therewith, a

tribute to American jurisprudence and political economy, which today is the accepted standard of the republican form of government.

"There is a growing sense among the thinking people of the world for closer international relationship in all that pertains to the welfare of mankind. The force of new situations, institutions, and political ideas—developments of the past ten years—demands of every nation a

vast extension of such international relations and efforts toward a better exchange of humanitarian gains and values.

"Your Society has pledged itself to apply its energies to the further development of mutual understanding with the United States in the fullest sense of the term. You may be assured of our entire cooperation in this laudable work of social and educational exchanges.

"The Free City of Hamburg with its ancient traditions, and your Society with an enrollment of the outstanding Hanseatic intelligentsia, form an advantageous base for the development of international welfare exchanges with the New World.

"Grant that the time be not distant when the Society of Friends of the United States in Hamburg will possess their own German-American Home of Good-Will to serve as a meeting-house for the furthering and the propagation of social, cultural, and economic questions!"

Library Troubles in Wyoming

SOME CITIZENS of Wyoming are so anxious for books, that failing other methods of obtaining them, they take them from open shelves in the State Library and—forget to return them. The Legislature, like many another body, has been so busy attending to political knitting that the provision of proper library facilities has been postponed and forgotten until the book-and-shelf situation has passed the critical point.

The Wyoming library law states:

The State Librarian shall provide space for the newspaper files and vault room for other historical collections belonging to the State Historical Board, in the basement of the State library in the Capital building, until such time as a permanent historical building is provided for same, at which time said possessions shall be turned over to the State Historian.

Mrs. Clare Ausherman, State Librarian, and Mrs. Cyrus Beard, State Historian, state that the need for more Library and Historical Department space has become a serious problem. If the Legislature does not make some appropriation to insure the safety of the valuable property the two departments now possess and to care properly for new acquisitions, the institution will become useless. Despite efforts to keep available space abreast with incoming books in the library by discarding less valuable and recent volumes, every bit of wall shelving and vault space to which the department has access is now completely filled. A reshelving of every book in the law library supplied space for a few additional shelves, but these are now filled. Space must be supplied for valuable governmental papers, which have accumulated and

which come in in numbers regularly. The present available space for documentary filings is not sufficient even for State papers, let alone Federal Government documents. Wyoming has a fine State Library the nucleus of what will some day be a great department. Many attorneys from other States make special trips to Cheyenne to consult authorities contained in the excellent law library in the state house. The library's invaluable volumes present irresistible temptations to those suffering from mental hunger. Numerous costly books, particularly law volumes, have been taken from the open bookcases. The historian desires construction by the State of a new building, separate and apart from the statehouse, but on adjacent property, in which the State Historical Department and museum, the State Library and the State Supreme Court may be housed. Not only are the obvious parts of the State Historical Department's property, such as the museum exhibits in need of additional space but the much more valuable historical records and archives of the office must be housed more adequately and safely if the inspiring record of the past is properly to be preserved for future generations.

Library for Paris Embassy

IN THE NEW American Embassy that is to be built in Paris there will be a remarkable library, collected by a former Ambassador and placed there for the use of all who would trace the history of the relations of France and the United States. This library, numbering several thousand books, pamphlets and reports, has been collected by Hugh Campbell Wallace, former Ambassador to France. A French acquaintance of Ambassador Wallace inquired for a book on France which had been written by an American and he promised to get it for him. It was many months before he was able to find a copy of the work and then only in a town in Michigan. Shortly afterward he tried to locate a French book on America for an American scholar and by the two experiences discovered that in neither country was a collection of books in the remotest degree complete dealing with the history of relations of the two countries. He then resolved that he would try to gather together a comprehensive library on the subject. His object was to get a copy of every important work or report by a Frenchman on America and every interesting book or paper by an American on France and put them together to form a record that would be valued by both nations. The library has been gathered with painstaking care and forms a fascinating record of friendship between France and the United States.

From The Library Schools

A Training Class for Hospital Librarians

A YEAR AGO the Presbyterian Hospital of the City of Chicago established a library. It has circulated 22,000 books and has acquired a full-time librarian and now it announces plans for opening a training school for hospital librarians similar to the training school for nurses. The plan is to accept librarians who have a college or university degree, and one year of library training in an accredited library school, for a six months' practical training course. They expect to give maintenance but no salary. To begin with only one or two librarians will be taken at a time, for until the hospitals begin to demand more trained librarians it hardly seems advisable to prepare as many as if they were to accept all who have applied for entrance. The librarians accepted will receive experience in every detail in the organization and operation of a hospital library from shelving and mending books to the purchasing of books and the prescribing of books from the therapeutic standpoint. In addition to the practical work, students will be expected to attend lectures which will help them understand the nature of individual patients. This is the first hospital to offer training to librarians.

Library Institute for Negro Librarians

THE EXPANSION of public library service to Negroes in Southern communities, which has brought with it a need for some measure of library training, was expressed in a resolution passed by the Southeastern Library Association at its meeting in Chapel Hill in October, 1929, stating that facilities for library training of Negro public librarians should be provided. The Rosenwald Fund agreed to finance a six-weeks' Institute and to pay the railroad fare of students attending. A six-weeks' course was held at Spelman College, Atlanta, Ga., from June 14 to July 25 this year with Charlotte Templeton, President of the Southeastern Library Association, acting as director. The first qualification for entrance was that the applicant be either already in a library position or under definite appointment. Thirty-five students attended, eleven of whom were graduates of full college course, nineteen graduates of normal schools or had had one or two years in college, and five were high school graduates. Instruction was confined to the special problems of the branch librarian.

New Jersey

TEN SENIORS registered for the curriculum in library service presented by the New Jersey College for Women this Fall. Eight of the class are from New Jersey and two from New York. The class made its first official visit to the New Brunswick Public Library on Sept. 25 where Mr. Fogg, the librarian, discussed points in the administration of the library. A visit to the Rutgers Library was made the following week.

Miss Higgins conducted the course in Book Selection in the Summer Library School at Ocean City under the New Jersey Library Commission and Miss Fenton completed a quarter's work during the summer in the Graduate Library School, Chicago University. Miss Fair assumed the duties of Director of the Library School in September following Miss Howard who resigned to accept the position of Dean in the Emory University Library School, Georgia.

Pittsburgh

THE SUMMER SESSION this year had an enrollment of forty-eight students, five of whom specialized in library work with children in public libraries, and forty-three in library work in elementary or junior high schools. These students came from the following States: Michigan, Missouri, North Carolina, Ohio, Pennsylvania, and West Virginia.

Miss Martha Caroline Pritchard was Instructor in Charge of the Summer Session, and the teaching staff included Miss Pritchard, Miss Elva S. Smith, Miss Helen E. McCracken, and Miss Elizabeth Nesbitt. Miss Laura C. Bailey conducted the Demonstration Library at Henry C. Frick Training School for Teachers, where the University of Pittsburgh held its classes during the Summer Session.

McGill

FOR THE FIRST TIME in the history of library training, a library school has given an extension course outside its own State or province. McGill University Library School has taken a pioneer position on this account with a six weeks' course held at the University of British Columbia (July 2-Aug. 9) simultaneously with the one given annually at McGill. The decision to hold this school came about as the result of a questionnaire sent to Canadian librarians inquiring if some type of library extension course might be useful and asking for sugges-

tions as to the length of the course, any local librarians who might assist, and the number of the staff who might attend. As the interest seemed to be focused in British Columbia and the Prairie Provinces, the cooperation of the University of British Columbia made it possible to hold the Summer School there. Mrs. Mary Duncan Carter, the assistant director, was the acting director of the British Columbia Summer Session. She was accompanied by Miss Grace Reynolds, the secretary of the Library School. Mrs. Carter lectured on Book Selection and Allied Subjects; Mrs. Marie Alfonso, assistant professor at the University of Washington Library School, gave Cataloging and Classification; Mr. E. S. Robinson, librarian of the Vancouver Public Library, lectured on Library Administration; and Miss Nora Bateson, reference librarian at the University of British Columbia, taught Reference. Special lecturers included Dr. W. W. Bishop, librarian of the University of Michigan, and Miss Helen G. Stewart, director-librarian of the British Columbia Library Demonstration. The class consisted of twelve full-time students and one partial, who more than met the entrance requirements, as they all had teaching or library experience as well as some normal school or university education. There were seven students from Vancouver; two from Winnipeg, Manitoba; one from Edmonton, Alberta; one from Saskatoon, Saskatchewan; and one from Duluth, Minn. The majority returned to library positions or a combination of teaching and school library work. Concurrently with the British Columbia Course, the usual Summer Session was held at McGill University under the direction of Dr. G. R. Lomer, university librarian and director of the Library School, assisted by Miss M. M. Herdman, assistant professor of library science; Mr. Louis Shores, librarian of Fisk University; and special lecturers, among whom were Mr. John Ridington of the University of British Columbia Library; Mrs. Virginia H. Meredith; Miss Laura A. Young and Miss Helen L. Haultain of the McGill University Library; and the librarians of selected special libraries in Montreal. The class, which was of more than the average ability, consisted of twelve full-time students and three partials, and represented a geographical distribution from Virginia in the South and Missouri in the West to New Brunswick in the East. Beginning on Oct. 1 the Library School offers for the first time a graduate program of studies in accordance with the regulation approved by the corporation of the university, requiring a Bachelor's degree for entrance to the Library School.

Simmons

THE SIMMONS COLLEGE Library School began its winter session on Sept. 22 with a total enrollment of seventy-seven, twenty-three of whom are graduates of other academic colleges and fifty-four of whom are seniors in the regular four-year program. Of this number forty-seven are from the New England States, one from Canada, and thirteen other States are represented by the remaining thirty, as follows: Arkansas, Colorado, Idaho, Illinois, Indiana, Iowa, Michigan, Minnesota, New Jersey, New York, North Dakota, Ohio, and Pennsylvania. We are sorry this year to lose from the staff the services of Miss Ruth Leonard, Simmons '28, who so ably assisted the school for two years, and in her place we are fortunate to have Miss Elizabeth Parker, Simmons '30. An extra assistant has been appointed, especially to assist in the Book Selection and Children's Work courses. Miss Ruth Altman of the 1930 class has accepted this appointment. On Oct. 15 the school expects to have the pleasure of having as its guest and lecturer Dr. Karl Oehler from Germany, who will talk to the students on foreign libraries. In the death of Idelle Tapley, Simmons '17, the school has suffered an unusual loss.

St. Catherine

THE COLLEGE OF ST. CATHERINE Library School opened Sept. 23 with a class of eighteen students; thirteen of these are taking full-time work, five part time. Geographically considered, the class comes from five States: Minnesota, North Dakota, South Dakota, Montana, and Iowa. The faculty of the school includes Frank K. Walter, librarian of the University of Minnesota; Lillian Busian, librarian, University of Minnesota High School Library; Ruth Rosholt, head of the Cataloging Department, Minneapolis Public Library; Sister Marie Jose, librarian of the college; and Sister Marie Cecilia, director of the college and library school.

A Tardy Report

A MEETING of the Association of American Library Schools was held in Los Angeles, June 24, 1930. Thirteen schools were represented. The general theme of the program was "The Teaching of Reference in Library Schools." The following officers were elected for 1930-31: President, Dr. Charles C. Williamson, Director of the School of Library Service of Columbia University; Vice-President, Miss Frances H. Kelly, Principal of the Carnegie Library School of Pittsburgh.

Library Organizations

International Federation at Stockholm

A CONFERENCE of representatives of the International Federation of Associations of Librarians was held in Stockholm, Aug. 20-21, 1930. In addition to reports from the represented countries, the program was devoted to the progress made in further developing the organization which was formed at Rome in 1929, and finances, budgets, modifications of plans and rules, future membership, etc., were discussed. The report of Mr. Bishop on the proposed exchange of librarians was offered by Miss Bogle, the United States representative, and a report on the work of the public libraries was offered by Mr. Milam and presented also by Miss Bogle. A proposition relating to professional schools was offered by M. Henriot and presented by the general secretary. A report containing statistics on the national production of printed material was offered by M. Muszkowski. Communications were received from M. Oprescu, from the Commission of Intellectual Cooperation, Geneva; M. de Vos van Steenwijk, on the work with the Institute of Intellectual Cooperation, Paris; M. Godet, on lists of rare books and exchange of duplicates between the large libraries for new works not obtained elsewhere, and discussion of international postal rates. Various communications were received from representatives of Germany, England, United States, France, Italy, Sweden, and Czechoslovakia. Miss Bogle was the only woman on the program, though it was reported that two others were present, one being the international friend of librarians, Theresa Hitchler, and the other, Dr. Flora Kleinochnitz, from Prague. The language spoken was mainly French, but speeches were made in German and English.

Following are Miss Bogle's address and the report prepared by Mr. Milam, but presented by Miss Bogle:

THE LIBRARY YEAR IN THE UNITED STATES AND CANADA

The elimination of time and space through means of communication and transportation has had its full effect on library work as seen by the American Library Association. Every activity in civilization has made its demand upon library service, be the activity educational, social, industrial, informational or recreational. The year past has been one of participation by libraries in the whole scheme of modern life.

Nor has the participation been limited even to a continent. For instance, at the very moment that I am privileged to be meeting with you on this side of the world and learning from your discussions, in far-off Hawaii, my associate, Miss Merrill, is meeting with the Pan-Pacific Women's Congress, where library extension and county libraries are topics on several programs. A universal library consciousness has made itself felt as never before.

THE DOMINION OF CANADA

The four outstanding items here are (1) a library extension demonstration in British Columbia under subsidy and state grant, (2) a study of library conditions throughout the Dominion by a committee of three, (3) a dedication of the new half of the Toronto Public Library, and (4) the growth of education for librarianship through the graduate school at McGill University and increasing interest in the school at the University of Toronto.

THE SOUTHERN LIBRARY SITUATION

The close of a five-demonstration State program in Louisiana proved the success of the experiment when the State authorities took over the future support of the State work. The reawakening of the South to her library opportunities and responsibilities is far reaching in its effects. The region under consideration includes thirteen States with a total population of almost 29,000,000. Four years ago 70 per cent of the population was without library service. In 1930, in every State but one, the State legislatures have set up extension agencies, and in this one State the professional association has done so under grant from a foundation. The librarians of this part of our country, through their professional associations, have presented a program which includes (1) a survey of library training agencies by the A. L. A. Board of Education for Librarianship, (2) improved State library legislation, (3) increased county library service, (4) trained State library supervisors, (5) State school library supervisors, (6) increased facilities for education for librarianship, (7) fellowships, (8) aid to university libraries in institutions doing advanced research, (9) improved service to Negroes, and (10) a field agent for the South who should be attached to A. L. A. Headquarters. The program was brought to the consideration of the funds and foundations interested in the South, and already many of the proposals have been undertaken. The A. L. A. field agent has been appointed and takes office next month, the survey is completed, and the report ready for distribution.

EDUCATION FOR LIBRARIANSHIP

Recognized as a profession, the school of librarianship in 1930 takes its place on the campus of the university with other professional schools. At this time but three of the A. L. A. accredited library schools are not integral parts of degree conferring institutions. Plans are under way or completed for three new library schools, one at the University of North Carolina, another at the University of Denver, and the third for the preparation of school librarians at the George Peabody College for Teachers at Nashville, Tenn. There is an increasing tendency toward specialization, e.g., in library work with children, school library work, etc. More fellowships are becoming available.

SCHOOL LIBRARIES

States and educational associations, through their accrediting bodies, have forced the issue so that practically all secondary schools, and many elementary ones, must give library service. In order to be recognized, our high schools, except the smallest, must have a librarian who has had at least one year of professional training. According to statistics prepared by the N. E. A., the public schools one year ago required over 45,000 librarians and annually will require 9000.

COLLEGE LIBRARIES

One of the significant developments attracting present attention is that of small and medium college libraries—organization and reorganization are the order of the day. Increased library activity is evident in all institutions of college grade. This is explained by (a) the trend in methods of instruction requiring many books and much related printed material, (b) the adoption of college library standards by States and accrediting associations, (c) the influence of the College Advisory Committee of the Carnegie Corporation, Mr. Bishop, chairman. This committee, through the list of books for a college library, now in press, its visits for purposes of subsidy, its investigations has created a far-reaching intellectual ferment.

YALE UNIVERSITY LIBRARY

Probably the greatest event in the American Library World during the past year was the completion of the Sterling Memorial Library of Yale University. In this great modern Gothic building, erected at a cost of \$8,000,000, are realized the "sound principles and tried traditions" of all that is best in a university library. Into its creation have gone years of work and thought, as day by day the needs of a foremost institution of higher learning for book service were growing and being met. "Probably no library has ever given to its plans

so long a consideration by so large a number of interested and competent advisers. The site itself is the outcome of long deliberation, and the unusual provision for the care of books and for the comfort of readers are the result of constant cooperation between the architect, the librarian, the faculty, and the administrative officers." Today this colossal building, the largest of university libraries, stands as the culmination of enduring hopes, the visible sign of a people's faith, the evidence of the great accomplishment of many men and many minds, brought to completion through the ability of the present librarian of Yale, Mr. Andrew Keogh.

SARAH C. N. BOGLE.

REPORT OF COMMITTEE ON PUBLIC LIBRARIES,
1930*To the International Library Committee:*

The chairman considers that the Committee on Public Libraries is concerned with libraries which give free reference and circulation privileges to the general public, and whose main objectives are popular education and wholesome recreation.

At the library section meetings of the conference of the World Federation of Education Associations, held in Geneva last summer, there were discussions of many questions which are of interest to librarians. Special attention was given to library work with children in and out of school. At the Cambridge Conference of the World Association for Adult Education, two library meetings were held. The general theme was the adult education service of public libraries, but the interpretation of that theme was broad enough to comprehend a wide range of topics, including the extension of public libraries. There were present at those meetings librarians, a supervisor of libraries from a ministry of education, a director of a library school, and other library workers who had not gone to the World Library and Bibliographical Congress at Rome because they thought that the Rome congress was organized wholly for the librarians of great reference libraries. It may be said with some justification that such people either were uninformed about what the congress proposed to do, and did, or that they failed to realize that all librarians have some interests in common, such as international classification and cataloging schemes, international interchange of librarians, education for librarianship, library buildings and equipment, etc. Nevertheless there was probably some basis for this feeling, so far as the program for the Rome congress was concerned. Out of eighty-five papers announced, only eight or ten could be said to be of special interest to

public librarians. There was no section which offered an opportunity for the discussion of such problems as public library organization, extension of service, library work with children, adult education through the library, and other matters which are of daily interest to them. Such opportunities were offered at Geneva and Cambridge.

At one of the library sessions in Cambridge a motion was passed asking the chairman to request the president of the International Federation of Library Associations to appoint a committee on public libraries. This motion was the expression of a desire to assure to librarians present and their colleagues further opportunity for discussion of public library questions at international meetings. The interest is in such topics as the following:

The need for a basis of comparative library statistics.

- Library extension.
- Easy books for adult readers.
- Library methods in the different countries.
- Library service in adult education.
- Library work with children.
- Public library branches in hospitals.
- Education for public library work.
- International interchange of librarians.

On behalf of my associates on the Public Library Committee (but without their approval, for I have not had an opportunity to consult them), I offer the following recommendations:

1. That committees of the International Federation of Library Associations be encouraged to give adequate consideration to the public library aspects of the subjects with which they deal.
2. That in planning future library congresses the International Library Committee (a) provide opportunity for the discussion of public library problems, and (b) state in its announcements that the congress is for library workers from all kinds of libraries and library agencies.

A statement has recently come into my hands which was intended for consideration by the international group at Edinburgh in 1927. It is from Miss Margaret Demchevsky, library organizer of the Ministry of Education in Bulgaria, and proposes the creation of an International Lending Library and Information Bureau for Librarians. It would, according to Miss Demchevsky's plans, assemble publications about libraries from all countries, issue catalogs of all such publications, give advisory assistance on library problems and, under the International Library Committee, work toward uniform statistics, terminology, bibliographical abbreviations and methods of presenting biblio-

graphical data. It might also aid in effecting the international interchange of librarians.

As chairman of one of the committees, I take this opportunity to express the hope that the gradual development of the office of the Secretary of our Federation will be in the direction indicated by the above paragraph.

CARL H. MILAM,

Chairman, Committee on Public Libraries.

Notes on the Meeting of the World Association for Adult Education at Sorvik

ALL THE OFFICERS of this year were reelected for the ensuing year, including all members of the Executive Committee. (Complete list available at New York Adult Association headquarters.)

Mr. Twentyman, the chairman, will be on leave this year and will come to the United States. He will be at the University of Ohio first and then at the University of Missouri.

The association secretary will be unable to be in London all the time. John Brown was appointed deputy secretary.

The American delegation consisted of Morse A. Cartwright, Mrs. Canfield Fisher, Charles E. Rush, Levering Tyson and Sarah C. N. Bogle.

Vienna is to be the meeting place for 1931.

The financial problem of the association will be studied and a plan submitted by the Executive Committee to the Council in 1931.

Czechoslovakia is making a survey of rural conditions, including adult education. (State survey.)

In England, the Seamen's Association is making a survey of activities similar to theirs, including the mercantile marine.

A Workers' Educational International Summer School was urged.

To be studied and discussed at the next conference: Use of leisure problem of adult education as affected by unemployment.

Complete with 4
shelves. Olive Green
Finish. Additional shelves \$1.25
extra.

F.O.B. Factory in Illinois
Shipped K.D. wgt. 110 lbs.

In a Library Installation, bookcases are put to their hardest test; not only as to their durability, but also as to their flexibility of arrangement to suit varied needs. The constant changing of arrangement so as to accommodate classified types of books in their proper arrangement favors greatly the portable type of bookcase.

Where the installation requires a bookcase for books of an active class, which are not of sufficient value to keep in cases with doors, the "Lundstrom" Steel Open Bookcase is most appropriate.

For books of the better type, which are well worth preserving from the ravaging dust, the "Lundstrom" Sectional Bookcases with their non-binding, disappearing, felt-cushioned glass doors are ideally suited.

We welcome an opportunity to quote on large installations, on which we are in position to give very attractive quantity prices. Write for Catalog No. 4.

A Classified List of Magazines of Interest to Libraries

EDUCATION

JOURNAL OF HOME ECONOMICS

The professional Journal of the American Home Economics Association. Deals with the application of modern natural and social science to healthful nutrition, suitable clothing, proper housing, wise use of income, efficient home management, child care and parental education, and desirable family life. Contains authoritative articles, abstracts, book reviews, new notes.

Edited by Helen W. Atwater, published at 101 East 20th Street, Baltimore, Md., the 1st of month, 12 issues a year, subscription \$3.00, 2 years, \$5.00; title page and index in December issue, indexed in Readers' Guide.

FICTION

THE GOLDEN BOOK MAGAZINE

Fiction lovers who want the best that the world has produced, turn to the Golden Book. The moderns most discussed, the classics most valued. A distinguished board of literary experts selects from the world's treasures the real stories which deserve to live. Such a magazine can never be dull with this vast reserve to draw upon. Monthly prizes for letters about the story you remember as the best you ever read. A subscriber says, "I know just where to place the culture of a home if the Golden Book is in evidence."

Edited by Frederica Field. Published in New York City, on the 20th of the month preceding date of issue, 12 issues a year, subscription \$3, two volumes a year beginning January and July. Volume XI began January, 1930. Indexes issued upon request.

HEALTH

THE AMERICAN JOURNAL OF PUBLIC HEALTH AND THE NATION'S HEALTH

This magazine, published monthly by the American Public Health Association, is the only magazine devoted exclusively to public health. It presents a résumé of public health development in the United States. It keeps the reader up-to-date on everything pertaining to public and personal hygiene—milk and water sanitation, communicable disease control, child welfare, public health, nursing, nutrition, health education, health department methods and procedures.

Edited by M. P. Ravenel, M.D. Published by the American Journal of Public Health, 370 Seventh Avenue, New York, N. Y. Subscription \$5.00 per year; publication date, the first of the month; indexed in Readers' Guide and Current Magazine Topics.

HUMOR

LIFE

Wit, humor, sentiment and satire in pictures, verse, paragraphs and short articles. Theater, movie and book reviews; free theater ticket service; cross-word picture puzzles and other humorous contests.

Edited by F. B. Mallory, published at 60 East 42nd Street, New York City, each Friday, 52 issues a year, subscription \$5.00, 2 volumes a year beginning January and July. Vol. 96 began July 1, 1930; no title pages or indexes.

LITERARY

THE VIRGINIA QUARTERLY REVIEW

A general magazine of literature and discussion covering the fields of politics, international relations, social and economic affairs, the arts and sciences, including poetry and book reviews, and occasionally fiction of high merit.

Edited by Stringfellow Barr, published at the University of Virginia on the 15th of the month preceding date of issue, issues dated January, April, July and October, subscription \$3, one volume a year beginning January, Volume VI began January, 1930, title pages and indexes mailed on request, indexed in Magazine, Subject Index, International Index, and Current Magazine Contents.

MAGAZINES FOR BOYS

BOYS' LIFE

A magazine for all boys, published monthly by the Boy Scouts of America. Inspiring and interesting adventure in all parts of the world in short story and serial form, stories and instructive articles on all sports by leading authorities, coaches and well-known athletes; stories and articles and departments on aviation, radio, stamp collecting, handicraft, Scouting and all boy hobbies.

Twelve issues a year, subscription \$2.00.

MAGAZINES FOR WOMEN

WOMAN'S JOURNAL

Essential as the only authentic record of what women are doing and thinking today. Covers women in politics, public life, civic improvement, club work, new careers, business and professions, educational and industrial fields, modern homemaking. Articles by leading women.

Edited by Virginia Roderick, 171 Madison Avenue, New York, published the 25th of each month, 12 issues a year, subscription \$2.50, one volume per year beginning January. Volume XV began January, 1930, indexes issued loose in January of next year, indexed in Readers' Guide and Current Magazine Contents.

OUT OF DOORS

NATURE MAGAZINE

The most beautiful magazine of its kind, featuring articles on birds, animals, flowers, fish, insects, the skies, the weather and all the facts of Nature and the outdoors. A wealth of material brought from many places by special expeditions and photographers. Scientifically accurate as to fact.

Edited by Percival S. Ridsdale, published at 1214 16th Street, N. W., Washington, D. C., on the 20th of the month preceding date of issue, 12 times a year, subscription price \$3.00, two volumes a year beginning January and July. Volume XVI began with the July issue of 1930, title pages and indexes bound in the June and December issues each year, indexed in Readers' Guide and Current Magazine Contents.

ROD AND GUN AND CANADIAN SILVER FOX NEWS

The leading Canadian outdoor life magazine, established 1899. A recognized authority on wild life, hunting and fishing, camping, and silver fox farming in

A Classified List of Magazines of Interest to Libraries

the Dominion of Canada. It is a high class publication of wide national interest and well illustrated. It is of keen interest and very informative from the point of view of North American natural history as well as the recreational aspects of hunting and fishing. Published by Rod and Gun Limited, P. O. Box 125, Station A, Montreal, Que., on the 15th of each month, subscription \$2.

SOCIAL WELFARE

THE SURVEY

Covers the entire field of social welfare—family welfare, child welfare, community organization, housing, delinquency, health, industry, etc.

Edited by Paul U. Kellogg, 112 East 19th Street, New York City, published the 1st and 15th of each month, 24 issues a year. The issue on the first of each month is Survey Graphic. Subscription \$5.00, two volumes a year beginning Oct. 1 and April 1, Volume LXIV begins Oct. 1, 1930, title pages and indexes issued loose in April and October, indexed in Readers' Guide.

TRAVEL

NOMAD, THE MAGAZINE OF INTERNATIONAL TRAVEL

Nomad is a monthly magazine published for those who are interested in travel in this country and abroad. The articles in *Nomad* are contributed by authors well versed in travel, and while authoritative are always written in an interesting manner. It is beautifully illustrated with the finest and clearest pictures from all parts of the world. *Nomad* deals with the world today in a smart, lively and truthful fashion that will appeal favorably to the most discriminating reader.

Edited by Thomas Brodix, published by Nomad Publishing Company, Inc., 150 Lafayette St., New

York, N. Y., on the 20th of the month preceding date of issue, issued monthly, subscription \$3.00, one volume a year beginning December. Volume VI began December, 1929.

TRAVEL, OUTDOOR, AND EXPLORATION

TRAVEL

A magazine devoted to travel and exploration and to the life and customs of people in all parts of the world. Articles by many writers of distinction. Profusely illustrated with superb photographs.

Edited by Coburn Gilman, published at 7 West 16th Street, New York City, the 25th of month preceding date of issue, 12 issues a year, subscription \$4.00, two volumes a year beginning May and November. Volume LV began May, 1930, title pages and indexes issued loose in May and November, indexed in Readers' Guide and Current Magazine Contents.

WORLD AFFAIRS

THE REVIEW OF REVIEWS

You get the essential news quickly and accurately, intimately and in satisfying doses in the *Review of Reviews*—the monthly news magazine. Not only do you miss nothing but you are told what it all means by men who speak with authority. The gossip is omitted and the facts are made interesting so that regular readers are a little better informed than their neighbors and competitors. This magazine has not found it necessary to print a correction of facts in ten years. The *Review of Reviews* knows what it is talking about. People who must think right, rely upon it.

Edited by Albert Shaw. Published in New York City, on the 25th of the month preceding date of issue, 12 issues a year, subscription \$3, two volumes a year beginning January and July. Volume LXXXI began January, 1930. Indexes issued upon request.

STATEMENT OF THE OWNERSHIP, MANAGEMENT, CIRCULATION, ETC., REQUIRED BY THE ACT OF CONGRESS OF AUGUST 24, 1912, OF THE LIBRARY JOURNAL, published twice-a-month, at New York, N. Y., for October 1, 1930.

STATE OF NEW YORK, }
COUNTY OF NEW YORK, } ss.

Before me, a Notary Public in and for the State and County aforesaid, personally appeared John A. Holden, who, having been duly sworn according to law, deposes and says that he is Secretary of the R. R. Bowker Co., publishers of THE LIBRARY JOURNAL, and that the following is, to the best of his knowledge and belief, a true statement of the ownership, management, etc., of the aforesaid publication for the date shown in the above caption required by the Act of August 24, 1912, embodied in section 443, Postal Laws and Regulations, printed on the reverse of this form, to wit:

1. That the names and addresses of the publisher, editor, managing editor, and business manager are:

Publisher R. R. BOWKER Co.
62 West 45th St., New York
Editor R. R. BOWKER
62 West 45th St., New York
Managing Editor BERTINE E. WESTON
62 West 45th St., New York
Business Manager JOHN A. HOLDEN
62 West 45th St., New York

2. That the owners are:

R. R. BOWKER Co., 62 West 45th St., New York.
R. R. BOWKER, 62 West 45th St., New York.
MARIAN A. OSBORNE, Buffalo, N. Y.
J. A. HOLDEN, 62 West 45th St., New York.
F. G. MELCHER, 62 West 45th St., New York.
A. R. CRONE, 62 West 45th St., New York.
A. C. FRASCA, 62 West 45th St., New York.

3. That the known bondholders, mortgagees, and other security holders owning or holding 1 per cent or more of total amount of bonds, mortgages or other securities are:

NONE.

4. That the two paragraphs next above, giving the names of the owners, stockholders, and security holders, if any, contain not only the list of stockholders and security holders as they appear upon the books of the company, but also, in cases where the stockholder or security holder appears upon the books of the company as trustees or in any other fiduciary relation, the name of the persons or corporation for whom such trustee is acting is given; also that the said two paragraphs contain statements embracing affiant's full knowledge and belief as to the circumstances and conditions under which stockholders and security holders who do not appear upon the books of the company as trustees, hold stock and securities in a capacity other than that of a bona-fide owner; and this affiant has no reason to believe that any other person, association, or corporation has any interest direct or indirect in the said stock, bonds or other securities than as so stated by him.

JOHN A. HOLDEN, *Secretary*.

Sworn to and subscribed before me this
22nd day of September, 1930.

ARMOND FRASCA,
Notary Public, New York Co., N. Y., No. 165,
Reg. No. IF105.

In this age of color, the wise librarian adds to the attractiveness of her magazines with the use of colorful bindings.

Demco's Paramount Binders, in three bright colors, scarlet, emerald green and marine blue, add a new touch of attractiveness to the magazine corner.

And these binders are as practical as they are colorful. The fabrikoid surfaces are easily washed. The covering is waterproof, contains no filling to fall out. It will not chip, peel or crack. Insects will not attack it.

Light in weight, durable and easy to use, the binder requires no cutting or punching for insertion of magazine. To insert or remove requires but a few seconds. Nothing is exposed to scratch or mar the magazine rack or furniture.

And best of all, look at the reasonable prices on these modern, colorful binders.

Save with Demco!

You can save real money by consulting the Demco catalog before ordering supplies or equipment. Not only are our prices low, quality considered, but Demco pays the freight or postage. The catalog price is the complete price—no extras.

REPLY TO NOTICE OF CLAIM OF INFRINGEMENT

Legal Notice to Libraries

The undersigned owners of United States Letters Patent No. 1,153,775 have brought suit for infringement against the manufacturers of Oversewing Machines used in sewing books, and will hold all unauthorized users to strict accountability for infringement of said patent. Terms of royalty can be obtained, if desired, upon application.

WM. H. RADEMAEKERS AND SON CO.
Newark, New Jersey
UNIVERSAL PUBLISHING SYNDICATE
23rd and Allegheny Aves.
Philadelphia, Pa.

Reprinted from *Library Journal*, Oct. 15, 1930

OUR ATTORNEY says: *"I have carefully examined the Gailer Patent No. 1,153,775 and the machines manufactured by the Oversewing Machine Company and have advised them that quite independent of the question of validity of the Gailer patent or other defenses which may be available, I am of the opinion that there is no infringement of the Gailer claims by the machines which have been manufactured by my client."*

WE THEREFORE ADVISE every owner of an Oversewing Machine and every owner of books sewed on an Oversewing Machine to **PAY NO ATTENTION TO THE NOTICE IN QUESTION.** You may rely on us to vigorously defend our patent rights in our invention.

THE AUTHORS of the above Notice are both engaged in the business of library book binding. The Rademaekers Company purchased one Oversewing Machine in the year 1921 and have purchased five more since that date. The Universal Publishing Syndicate purchased one Oversewing Machine in 1922 and have since acquired three more. Neither ever gave notice of a claim of infringement prior to October 2, 1930.

THE EXECUTIVE officers of the Oversewing Machine Co. (W. Elmo Reavis, **president**; T. R. Coles, **secretary**; and Frank M. Barnard, **vice-president and sales manager**) own and operate the following library book binderies: F. J. Barnard & Co., 368 Congress St., Boston, Mass.; Chivers Bookbinding Co., 33-47 Nassau Ave., Brooklyn, N. Y.; and Pacific Library Binding Co., 770 E. Washington St., Los Angeles, Cal.

Under date of October 4, 1930, C. W. Carroll, president of Universal Publishing Syndicate, with a branch bindery in Pasadena, Cal., addressed the following letter to a California Librarian, which letter was by this librarian given to us.

"In the next issue of the Library Journal, you will find legal notice to all Librarians, regarding the use of books which have been oversewed by the Oversewing Machine, as this patent has been infringed and all Libraries using rebound books sewed on this machine, are to be held accountable for the infringement and to go back for a number of years and pay back royalties on every re-inforced and rebound book sewed on this patent."

"These patents are owned by the W. H. Rademaekers Son Company, who threatened suit against us. We held a consultation with our attorney and made settlement and also purchased a half interest in the patents. In other words, we are now co-plaintiffs with Rademaekers, and by your being our customer, we herewith wish to assure you that we will protect you on every book which we have bound for you. We cannot commit ourselves however, on the re-inforced or rebound books which you have received from other concerns. I wish to assure you that we will stand back of our own work."

In reply to the above quoted notice and the foregoing letter, **ALL LIBRARIANS** and users of oversewing will please take notice that we will vigorously defend our patent rights through the proper channels and thus afford full *Protection to All Work Done on Oversewing Machines.*

In a Library Installation, bookcases are put to their hardest test; not only as to their durability, but also as to their flexibility of arrangement to suit varied needs. The constant changing of arrangement so as to accommodate classified types of books in their proper arrangement favors greatly the portable type of bookcase.

Where the installation requires a bookcase for books of an active class, which are not of sufficient value to keep in cases with doors, the "Lundstrom" Steel Open Bookcase is most appropriate.

For books of the better type, which are well worth preserving from the ravaging dust, the "Lundstrom" Sectional Bookcases with their non-binding, disappearing, felt-cushioned glass doors are ideally suited.

We welcome an opportunity to quote on large installations, on which we are in position to give very attractive quantity prices. Write for Catalog No. 4.

THE LIBRARY JOURNAL

✽ Among the articles of interest scheduled for the next issue will be a paper presented before the Ohio Valley Regional Group of Catalogers by Ruth Wallace, Head of the Indianapolis, Ind., Catalog Department, on "The Cost of Cataloging and Recataloging and How It May Be Reduced." She divides her paper into three sections: the first dealing with a review of the report of the A.L.A. Catalog Section Committee on "The Cost of Cataloging"; the second part taking up the investigations relative to cataloging costs which have been carried on since the report of this Committee in 1925; and the third division giving practical suggestions for reducing the cost of cataloging and recataloging. This is an excellent paper and is worth looking forward to. "How to Advertise Library Service to the Business Man" is a problem very much to the fore in public library work today and it is good news that we are able to promise a paper on this subject, written by Charles H. Compton of the St. Louis Public Library, in the next number.

✽ There will be other articles besides these two and a continuation of "The Children's Librarians' Notebook," which we are delighted to hear is being heartily welcomed by children's librarians. We will review any new juvenile upon request.

Questions and Answers in the Youngstown Reference Department

By Gentiliska Winterrowd

Reference Librarian, Youngstown Public Library, Ohio

THE PERSISTENT advertising of the well-known library slogan, "Use Your Public Library," brought during this past year 47,600 readers to the reference department of the Youngstown Public Library. These readers used 91,568 books and pamphlets, and 38,100 pictures in their search for information. The 19,000 queries covered such a wide diversity of subjects that it now seems no problem is too simple or too sacred, too large or too small, too old or too new to turn over to the reference department. However, before this infinite variety of questions that daily come to the reference desk can be satisfactorily answered, there must be wise selection and collection of materials with organized arrangement of details to avoid needless repetition of effort in the giving of effective service. Patrons do not realize the endless amount of housekeeping required to keep the various collections in order, but the success of the department depends largely upon this important feature of the work. The vast amount of detail required in the collection and preparation of pamphlets, maps, college catalogs, Youngstown clippings, and general clippings is seldom appreciated by users of this up-to-the-minute material, yet these sources of information are exceedingly useful in satisfying the increasing demand for the latest definite results of theories put into practice. Although the vertical file material is primarily for quick and ready reference, it has been found again and again that this well-selected material often supplies just the needed information when books have failed.

The demand for illustrative material by teachers, artists, designers, illustrators and students of art has led to the organization of the

popular picture collection. This consists of some 100,000 pictures classified under about 1500 subjects. These pictures are in many cases clipped from gift or duplicate magazines, thereby involving little expense to the Library. One of the most useful of the many quick-reference aids developed is the "Public Speaking" file containing witty remarks, jokes, poems and bits of philosophy, clipped from various sources, mounted on cards and filed by subject. Many of Youngstown's public speakers, particularly those wishing an apt phrase, poem or illustration for an after-dinner speech have found here just the material wanted. Other popular aids for ready reference are various scrap-books developed in the manner of Schaffler's "special day" books. Among the subjects to be found in this collection are Christmas, Thanksgiving, Mothers' Day, Lincoln, Washington, War Poetry, and Monologues. We maintain a "Ready Reference" card file. This is arranged alphabetically by subject and covers almost anything of unusual or current interest, such as a brief sketch of the life of a recent author, bibliographical references on many subjects, or the location of popular poems not included in Granger's *Index to Poetry*.

The Youngstown Public Library is a depository library for government documents and these are a helpful adjunct to our resources. Very few of our documents series are cataloged, but as received they are checked "in" on a card check list which serves also as a shelf list. By the use of our shelf list and of document indexes the government publications are quickly accessible and much used. The *Weekly List of United States Government Publications*

is the basis of a card file of statistical information; statistics being much in demand and often elusive. This file gives condensed information and sources for statistics of all sorts. The annotations in the *Weekly List* also contain much useful information, other than statistical, which we file by subject in our "Ready Reference" file. Many lists and bibliographies on various subjects are prepared each year. These greatly facilitate reference service and routine, and when distributed form an effective and helpful medium of reference advertising. Some are in the nature of club study outlines from fourteen to sixty-four pages in length, with detailed bibliographical references. Frequently used outlines include Italy, England, Holland, Spain, and South America. An annotated list of thirty-seven titles of "Inexpensive Reference Books for the Home," sponsored by the reference department and the American Homes Committee of the Youngstown Federation of Women's Clubs, was distributed at a Federation club meeting and resulted in additions of worth while reference books to Youngstown private libraries.

We keep in close touch always with all the varied forms of art education in the city and foster the growth of interest in the arts by supplying indispensable helps to study. Each year during the past five years there has been prepared an art study outline which has been used, in whole or in part, by many of the study clubs in the Youngstown Federation. The first outline was on Italian painting, the next on French, followed by Dutch and German painting, and last year, English painting. A list of books covering each subject mentioned in the outline is given, and each book title is followed by a short descriptive note. Lists and study outlines are helpful guides in Youngstown's systematic club study, not only of painting, but also of music, literature, travel, biography and other general club study topics.

The city directory collection brings perhaps the biggest returns for effort expended of any reference service. The time and care spent in keeping the collection in order, assisting inquirers and complying with the rules of the Association of North American Directory Publishers, which supplies the directories, are comparatively slight. The returns are enormous. Our valuable collection of 300 directories of leading cities brings increasing numbers of business and professional men to the Library, while telephone calls for such information are continually answered. Through the courtesy of the Youngstown office of the Ohio Bell Telephone Company, about 100 telephone directories were added to our directory library. This gift and its regular continuance has greatly increased the value of the directory library.

Group service has been extended and developed along many lines. Increasing numbers of women's club committees meet in conference with us and plan their club programs. College and public school students, business and professional men also are aided extensively with collections of material reserved for debates, school essays, toasts, orations, speeches, newspaper contests and pageants.

Much time and thought is given to making the appearance of the reference room attractive. Three large pieces of plate glass placed on reading tables are in constant use for displays. During the summer when the tables are not covered with books and surrounded by readers, special emphasis is placed upon frequent and varied exhibits, and flowers are generously supplied by staff members and by the Garden Clubs of the city. Throughout the year interesting displays are shown of art books, new reference books, holiday materials, special season attractions such as Winter Sports, June Weddings, Bridal Showers, current events and vacation and travel guides. Many readers use our reference and periodical rooms for recreational reading, and frequently express their appreciation of our various exhibits. We also maintain a permanent display of Books about Books. Here are kept the latest book reviews and booklists, with many standard tools of book selection. The A. L. A. reading courses placed here lead to considerable work in adult education. Club women and readers of new books, having learned to help themselves, spend many hours at this book table, while many patrons prepare book reviews here and select home reading courses.

One of our most interesting achievements is the collection and organization of an Historical Collection which includes books about Ohio, historical and genealogical works. These are housed in an historical room under the supervision of the reference department. Genealogical records appearing weekly in *The Boston Transcript* are clipped, mounted and filed alphabetically by names of families. The interest of the local chapters of the D. A. R. and S. A. R. and others in genealogical research has resulted in generous gifts of money, society publications, books and magazines. Recently we secured the loan of an important collection of 200 books belonging to the estate of a genealogist. This gift includes many county histories, Revolutionary records, and a very valuable manuscript collection of cemetery inscriptions of Revolutionary soldiers from many cemeteries in Ohio, Pennsylvania, West Virginia and Kentucky. The appreciation expressed by the increasing number of people using this collection has proved that this phase of reference service is most worth while.

After all, the real test of the value of a large and well-selected collection of reference books to the community it serves is the use made of it. The keeping of statistical data to show accurately the volume of research and personal book selection for reference patrons is most essential to show the real use of the Library. This statistical information is a great aid in measuring the efficiency and growth of reference work and forms a basis of measurement of service much to be preferred over the old practice of general statements of growth. However, much preparatory and routine labor is disguised under apparently simple statistics as much of the routine cannot be shown. Samples of these unadvertised tasks are the daily checking, filing and shelving of documents, the securing of free pamphlet material, book selection, the collection of local publications, keeping up to date lists of reference tools, such as lists of city directories, college catalogs, periodicals, maps, etc., and the securing of pictures and vertical file material. The simple statement that so many pictures or so many clippings and pamphlets were added this month, covers an elaborate process. It means that dozens, perhaps hundreds, of gift magazines have been examined for suitable pictures and articles. Furthermore, the count of pictures circulated is no just measure of the labor involved in their selection for circulation from the file by a reference attendant. Often a dozen or more pictures are examined before one is taken from

the Library. Reference statistics of books used do not tell the full story. Much reference work is done right in the circulation stacks, and these books are never counted in reference statistics; neither are many reference books hastily used and restored to the shelves by the reference staff or patrons.

With us, advertising is stressed. Our service is not sold by a one-time publicity effort, but by continued repetition. Newspaper stories about the various phases of our service average over two a month, some of them being Sunday features. We have become advertising-minded and think it is of paramount importance to tell the public frequently of our "wares" and service. This year we published a feature story of our annual report, following this with a display of reference books and posters in a large bank window on our main street. Our news stories bring many readers, but we feel that satisfied patrons are our best mediums of publicity. Accuracy of information and a genuine interest on the part of the library assistants in the problem of each patron more effectively promotes the use of our reference department than any other publicity effort. The building of a usable reference collection, making it known to the public, rendering satisfactory service to each patron, and keeping statistics for the measurement of this service are deciding factors in the steadily growing use of the Youngstown Public Library reference department.

Determining Proper Air Conditions for Libraries

By R. F. Morrison

TO PROPERLY condition air for libraries it is necessary to study the characteristics of papers, leather and textiles. One source of information is the regain of moisture by these materials which is shown by the curves in the chart. Here sheepskin, silk, cotton, rag paper, newspaper and commercial ledger paper regain curves are compared.

The three papers, in the order noted, consist of 100 per cent rag stock, 100 per cent chemical wood stock and a combination of 75 per cent rag stock mixed with 25 per cent chemical wood stock. Other papers furnish regain curves somewhat similar to those shown so that they

can be considered as characteristic or typical. All of these regain curves are based on room temperature slightly above 70 deg. Fahr.

Examination of these regain curves shows very clearly that the lowest rate of moisture regain for textiles and paper lies between 30 and 60 per cent relative humidity while that for sheepskin appears to lie between 50 and 70 per cent. It is in this region that these materials are least subject to change in characteristics of a physical nature. It is also evident that silk and sheepskin hold more moisture than paper or cotton throughout the range of relative humidities. This indicates that they are more seriously affected by low humidities. As far as leather is concerned, this is borne

out by an examination of leather-bound books which have reposed for long periods in libraries which have no air conditioning. Most of these leathers have dried out to such an extent that their condition is serious while the paper leaves are in much better condition.

Investigations by the Forest Products Laboratory have demonstrated that changes in the dimensions of papers are practically zero at 60 per cent relative humidity and also that the

which human comfort can be secured with such humidity and temperature conditions.

From data submitted by Yaglou and Drinker to the A. S. H. V. E.¹ in January, 1929, the effective temperatures which give the greatest human comfort for human beings normally clad are 66 deg. Fahr. in winter and 71 deg. Fahr. in summer. The following table is based on the above data and shows the most suitable dry bulb temperatures for various rates of air mo-

Moisture Regain Curves for Sheepskin, Silk, Commercial Ledger Paper, Rag Paper, Cotton, and Newsprint Paper

folding endurance of paper is at a maximum at 65 per cent relative humidity. Wilson and Fuwa have also proved rather conclusively that the equilibrium water content of materials such as papers and textiles is constant at room temperatures between 72 and 77 deg. Fahr.

From this information, it is evident that the desirable conditioning for libraries would be a relative humidity of about 60 per cent with a temperature which did not vary much from the range of 72 to 77 deg. Fahr. In the March issue of *Heating, Piping and Air Conditioning* will be found information which will enable the librarian to establish the proper air motion at

tion which are normally used and for a relative humidity of 60 per cent:

WEATHER CONDITIONS SUITABLE FOR LIBRARIES AT 60 PER CENT RELATIVE HUMIDITY

F. P. M.	100	200	300
	Dry Bulb Temp. F.		
Winter	71	73	75
Summer	77	79	80

The explanation of human comfort and the term effective temperature will be found in the article referred to in connection with the charts.

It must not be forgotten that, in addition to the preservation of manuscripts and books, air conditioning for libraries means comfort for the reader and the elimination of dust from books, shelves and the atmosphere.

A Classification of Library Records and Correspondence

By Charles F. Woods

Librarian, Riverside Public Library, and Director, Riverside Library Service School, Cal.

IT IS WELL ACCEPTED that no modern business can be conducted without an adequate filing system, especially adapted to the particular business. After several years' experience with an inadequate scheme, the system here offered was worked out five years ago, has been in constant use since, and has given us great satisfaction and no disappointments. The interest expressed by librarians and students leads us to offer it to our co-workers. It is submitted without extensive notes, believing that it will be clear to the initiated and useless to others.

It is a truism to every student of classification that the notation is one thing and the classification itself another. The test of the classification is in its orderly sequence of subjects, while the notation offers a convenient means for maintaining that sequence. The notation here offered is of the decimal sort, affords opportunity of indeterminate subdivision and so far as possible has been so applied as to admit of further refinement of classification by addition of figures instead of by erasure and substitution.

Binet, in his little monograph on the "Psychology of Lightning Calculators and Blind-fold Chess Players," in part explains the ability of the latter by saying that a game of chess is a logical process and hence readily memorized. Every user of a classified catalog will appreciate this statement. As a logical arrangement such a classified filing system is easily memorized and requires no index except the classification itself, and to this we have been obliged to refer only occasionally for items rarely used.

Duplicate copies of letters and memoranda are sometimes made for double filing and cross-references are occasionally made on the folders themselves. The numbers and names on the tabs of the folders are written with a bulletin typewriter.

Ours is a unique organization, combining three functions, a municipal public library, a county free library and a library school, two at least of which commonly exist separately. It is not to be supposed that any institution will find it feasible to adopt this scheme as it stands, but it is hoped that it may prove suggestive. A county free library, for instance, would find very inadequate the divisions which we have assigned to the county library in our scheme

and would need to adapt a large part to its own needs. There may be some inconsistencies in principle and in detail. Time and place proceed from the lesser subdivisions to the greater, while general topics are divided into special. The classification may be indefinitely extended, perhaps improved. So far as that is concerned, we hardly expect and scarcely desire to arrive at definitiveness.

CLASSIFICATION OF OFFICE RECORDS AND CORRESPONDENCE

ESTIMATES, REPORTS, VOUCHERS, FINANCE

- 10 STATEMENTS AND ESTIMATES of the librarian, by years
- 10.5 Auditor's monthly report of balances
- 11 DAILY CASH, by months, and includes month's sheet
 - 11.1 Monthly cash report to auditor
 - 11.2 Pay rolls
 - 11.5 Bank statements
- 12 MONTHLY REPORT of librarian
 - 12.7 Circulation
- 13 ANNUAL REPORT, by years
 - 13.1 Notes for same
 - 13.2 Mailing list for same
 - 13.8 Postage account, including shipments of all kinds
- 14 SUMMARY REPORTS
 - 14.2 Records of mailing lists of same
- 15 REQUIRED REPORTS to outside organizations
 - A. L. A., State Library (California), Carnegie Corporation, etc., in alphabetical order
- 16 VOUCHERS (by years, months and numbers)
- 17 FUNDS AND ENDOWMENTS (see also 33.1—Gifts)
 - Chase, Correja, Dorothy Daniels, etc. (alphabetically)
 - 17.5 Bank statements; Chase, Correja, Dorothy Daniels, Pay Book Fund (alphabetically)
- 18 REVENUES (see also 10); Budget and arguments therefor.
 - 18.7 Sales

The Vancouver Public Library: a Six Years' Record of Growth

By Julia C. Stockett

Reference Librarian

IN NINETEEN HUNDRED AND THREE, when Vancouver numbered 27,000 people, a Carnegie building was erected in the central part of the business district. Since then growth has reached out in all directions and, with the amalgamation of outlying suburbs in 1929, "Greater Vancouver" ranks as Canada's third city, only Montreal and Toronto being larger. In the course of expansion the main retail district has moved from a half to three-quarters of a mile away and the library remains on an East End corner—perhaps the noisiest in Van-

couver. Most of the city and interurban lines pass in four directions on two sides of the building, heavy trucks thunder by, street signals sound, crowds gather at the nearby market, the fire department dashes through, and organizations parade with bands. It is often a real achievement to answer a telephone question, especially when a building is being erected across the street or a general election is in progress.

The Japanese section lies on one side of the library, the Chinese on the other, and pictur-

esque groups of Indians and East Indians mingle with crews from ports far and near, for the wharves are not many blocks distant. In these days of world wide unemployment, Vancouver also has its crowds of men out of work and the library's location makes it a casual refuge, increasing the constant surge in and out.

The building has long been outgrown and its arrangement is inconvenient in the extreme for modern organization, especially departmentalization. Expenses run very high for heating, light, service and overhead generally, such as frequent repairs and rearrangements planned to accommodate ever larger crowds. In spite of these disadvantages, statistics of the past six years show an amazing growth. The library has passed one goal after another and faces a well-planned future expansion which will be as rapid as funds are available. No institution can ever "arrive," but many libraries have reached the stage where growth will be much more gradual than in the past. Vancouver's public library, however, has only rapidly overcome preliminaries and now faces dramatic possibilities of approaching the city's progress, keeping abreast with it and going farther ahead.

In 1921 the first trained librarian was added to the staff and the making of a modern catalog commenced. The year 1924 marked the appointment of the present librarian and the heads of the Boys' and Girls', Loan, Order, and Reference Departments. The selections were made from trained and experienced people, setting definite standards and equalizing salaries. The same year also saw a bindery installed. Today there are two binders and three full-time assistants, and the library has all the advantages of having its work done on the premises. Visitors are often surprised to find a bindery so comparatively large, but, besides the current work, it has been necessary to care for a long standing collection of unbound periodicals and to rebind entire sections of the book stock.

Up to this time the library had been operated under an obsolete by-law, but 1925 saw it starting to function under the Public Libraries Act. This placed the Vancouver Public Library under the same working conditions as other libraries in British Columbia; the

Board is appointed for two years, its duties and powers are defined and the library may receive certain benefits from the Commission, including money grants. Two outstanding events occurred in 1926. First an apprentice class was organized lasting from May to August. The advantages to the library are marked and a number of excellent students from the University of British Columbia are being recruited into librarianship each year. In the second place the preliminary work was done for Kitsilano Branch, which was opened in

1927. The building itself represented the first outlay of city money in library construction. Its use is phenomenal; that its service is appreciated is evident to the most casual onlooker watching the length of the line working toward the desk.

In 1929 our neighbors, the City Hall employees, moved and the two buildings were connected. The Boys' and Girls', Catalog and Order Departments, and the Bindery took possession of

adequate quarters. The Periodical and Newspaper Room was expanded over the entire second floor of the former City Hall; the attendance in a single day has run to 862 readers. Space was freed in the main building for the beginning of a flourishing Science and Industry Division and a Fine Arts and Music Division will be opened in the fall. A Reference stack room was built and has been filling rapidly the past year; there are still 13,000 uncataloged volumes which will be added. Crowding in the public departments grows more deplorable but reflects the need the library is filling. Even greater crowding would be preferable to any falling off in use.

After five years' gradual advance it was possible to grade salaries further and to put them on a par with those of other cities in accordance with the standards recommended by the A. L. A. Fully qualified local assistants need not be penalized now for their natural desire to work in their home city. While esprit de corps and staff morale have always been high, such a system necessarily results in even better service to the public. Recently librarians have been included as civic employees under the provincial superannuation system. It is not possible to enter into details here, but the provisions made are fair and adequate.

A survey of the city for branches shows

The Vancouver Public Library, a Carnegie Building, Erected in 1903

present need of twelve. In 1927 and 1928 by-laws, providing for three and five respectively, failed by extremely narrow margins. A new main building is needed; it may come as part of the projected Civic Center or it may be in a more centrally located down town district. A ten year plan includes both branches and a main building; extends juvenile work beyond its present scope in two buildings, four schools and the playgrounds; provides for further departmentalization, extension service to foreigners, stations, hospitals, penal and other institutions, etc., and to a business and municipal branch—to mention the most obvious developments. The territory covered should include not only Greater Vancouver proper but adjacent areas logically connected with the city.

Other libraries in the West have contributed freely to Vancouver's growth. Opportunity for studying in more advanced systems has been readily granted, aggregating several months. Both smaller and larger libraries have opened their resources of personal help and experience; in fact, wherever libraries were ap-

proached they have been most generous in their responses. This city's development coming later in the day is building on the experiments of others. Vancouver's special progress is significant as one part of a recent library awakening in British Columbia. An hour from the center of the city is the University of British Columbia's artistically constructed and well

equipped building, opened in 1925. The Fraser Valley demonstration in rural extension, backed by the Carnegie Corporation, the government of British Columbia and its Library Commission, is rapidly getting into swing with the most promising results. Already the influence of Canada's two library schools is being felt in the province most

remote from them. McGill University Library School opened a long course in 1927 and the University of Toronto in 1928; in both institutions special attention is given to Canadian problems. Further impetus to library progress in British Columbia will spring from the recently appointed Library Commission that is touring Canada in behalf of the Carnegie Corporation.

Kilsilano Branch of the Vancouver Public Library, Opened in 1927

Our Obligation to Libraries in State Institutions

By Mary E. Frankhouser

Librarian, State Library, Lansing, Mich.

MODERN LIFE and modern problems are contributing alarmingly to the population of our state institutions, both penal and charitable, with the result that the searchlight of publicity is focusing with revealing clearness upon these institutions as never before. Superior or inferior administration, housing, equipment and facilities for educational and library purposes are receiving attention from welfare workers, the press, and the public, according to the situation revealed. It is well, then, that, as leaders of state library development, we give thought to the subject, "Our Obligation to Li-

braries in State Institutions," and ask ourselves if the growth of library service to the wards of our respective states has kept pace with the development of public library service. Even a superficial comparison of these two branches of library progress will point to a negative answer. What has brought about this situation? Is this condition the result of lack of interest, initiative and organization on the part of state library leaders? Is it the result of indifferent attitudes on the part of administrators of state institutions? Or is it the result of a selfish tendency to turn from the work which is sometimes uncongenial to the task that does not bring one in contact with "the sick in mind, body and estate" and morals?

Paper presented before the second session of the National Association of State Libraries, A. L. A. Conference, Los Angeles, Cal.

Of all the contributing factors advanced for this condition in the several states, the one most commonly cited is lack of funds, that much overworked refuge to which we, as state people, are wont to flee when uncomfortably pressed concerning "the things which we have left undone." Whatever the cause, it remains for directors of state library agencies to recognize greater obligations on their part, and to take steps to include definite and constructive institutional library programs in their extension activities.

What are some of the facts about state library service to state institutions? Information secured through a recent questionnaire sent out to all state libraries and library commissions showed that of the thirty-seven states responding, eleven reported no library service extended, while the twenty-six remaining states reported some form of library assistance. For example, New York State Library inspects all lists of books bought by the penal and reformatory institutions of the state, and the approval or disapproval of the library is final. This state, in 1916, made a decided contribution to prison library service when it published a List of Prison Books, which remains today the only standard bibliography available for the guidance of interested workers in prison libraries. The other states in this group recorded one or more forms of library assistance; such as, book selection, direct book loans, and loans of traveling libraries. In this group, in addition to the helps mentioned, the States of California, Georgia, Illinois, Indiana, Iowa, Maine, Massachusetts, Michigan, Minnesota, Nebraska, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, South Dakota, Vermont and Wisconsin assist in organization projects, or by visits in an advisory capacity to the state institutions. The questionnaire further revealed that Nebraska, by appropriating \$5,000 biennially for the work, is the only state in which an institutional library supervisor is provided by legislative enactment. The Board of Control in Minnesota created the position of a full time trained library supervisor under whom all library activities in the institutions function. This was also true of Iowa, the first state to employ an institutional library visitor, but the work under the Board of Control was allowed to lapse because of the lack of sympathetic support by a former official. Aside from the states of Minnesota and Nebraska, the work attempted is carried on by library commissions and state library agencies, and, in the majority of instances, the task undertaken is voluntary.

Because of limited time I have chosen to make specific mention of outstanding activities

in only two of the various branches of state institutional work—namely, prisons and tuberculosis sanatoriums. However, the illustrations given will demonstrate that, although different methods have been employed, the resultant service is practical, and receives the cordial support of the institutional administrators. Wisconsin, for its plan of reading courses and book loans, deserves the high recognition accorded that state in the 1929 *Handbook of American Prisons and Reformatories*, where, on page 1005, in reference to the State Prison at Waupun, the following statement appears:

... "the prison has the advantages of the most completely developed system of service from the State Free Library Commission found in any American penal institution."

Commendation of the service is made by Austin A. MacCormick, now Assistant Superintendent of Federal Prisons, in the April, 1929, issue of *The Journal of Adult Education* from which the following paragraph is quoted:

"Another factor of great importance in the Wisconsin prison is the extent to which prisoners are given the benefit of the service of the State Free Library Commission. There is no other state which has gone so far in this direction. A prisoner may request reading courses in any subject and the Library Commission will supply him with individually prepared reading outlines and the necessary books, with no charge other than for the return postage. The possibilities which this opens up for cultural education are tremendous. It is interesting that the first requests for books from the prison were for books on mythology, and that they came from the women prisoners. The University representative acts as the unofficial agent of the Library Commission to the extent of transmitting prisoners' requests and supplying the Commission with information on the education background of an applicant. He stimulates prisoners to read and gives them advice on what to read. The close co-ordination between the Extension Division and the Library Commission is characteristic of Wisconsin practice; it is a concrete example of the way in which various agencies of a state can be effectively used in prison education."

At the present time there are sixty men at the State Prison at Waupun actually using reading courses, and about twenty-five at the Green Bay Reformatory. In a period of ten months, twenty-eight men at Waupun completed the courses; at Green Bay, where the work has more recently been offered, five men have carried their courses to completion. To make the work more effective, book report blanks are to be furnished each man on which he will tell what he has learned from reading the book, and what he wants to learn from other books. The development of these reading courses is credited to Harriet C. Long, formerly of the Traveling Library Department of the Wisconsin Library Commission, and the

work made possible through the cooperation of Mr. Chester Allen, the representative of the University Extension Division work at these institutions. Minnesota has the distinction of maintaining the most efficient local prison libraries of any state in the Union. This rating can be attributed to the wisdom of the Board of Control in employing a full time institutional library visitor, and arranging for definite amounts in the budgets of the several prisons for books and magazines. From her base of operations at the State Capitol, the supervising librarian makes all purchases of books, in the selection of which she gives consideration to the suggestions of the local library attendant, the inmates and the superintendent. The State Prison at Stillwater has a collection of 10,000 well selected books in its library with an average monthly circulation of over 6000 volumes. At the present time a system of loan service from the State Library is being formulated.

In the following statement prefacing a list of classified books, the inmates of the penitentiary are made aware that books may be borrowed from the Oregon State Library: "The Oregon State Library is your library. Any library is 'a school out of school' for anyone who cares to learn something. Make your wants known, and they will receive attention." A well organized loan system has been established whereby any inmate may file with the State Library a service request for one book a week or one book a month on any particular subject. Besides the books listed, books on other subjects are furnished upon demand. An educational survey made in 1927 by the State School Superintendent furnished the information used as a basis in fitting the lists to the needs of the men, and is another example of the effective correlation of state departments. Nebraska prison libraries show the effect of the supervision of a state library visitor. The books are well chosen, and the collections substituted by generous loans from the library commission. The California State Library has worked out a system of book loans to San Quentin Prison, which contributes materially to the celebrated and effective educational work of that institution. This state, famous for its county libraries, has demonstrated the opportunity for expansion such a system presents to states wherein county libraries are sustained, by locating a branch of the Los Angeles County Library in the Whittier School for Boys—a penal institution.

When, after July 1 next, the Michigan Administrative Board releases \$5,000 for the purchase of books for the new branch of the Michigan State Prison at Jackson, the State Library will have reason to rejoice. It was

through the untiring zeal and enthusiasm of the chaplain, R. W. McLain, and Miss Isabel Horne, the School Library Supervisor of the State Library, that the library sentiment was created which prompted the request for special funds for books on the part of the prison officials. As the recent splendid work of reorganization of the old branch of the Prison Library developed, the officials came to a realization of the potential possibilities of a well organized library for the new institution, and, accordingly, delegated to the State Library the supervision of all book selection for the two branches of the Prison. A shabby collection of some books in a poorly lighted room comprised the library in the Old Prison. After a period of reorganization a visit to the library revealed an average monthly circulation of 4600 volumes, and a room completely rejuvenated by the following changes and additions: 1500 worthless and out-of-date books discarded; the complete rearrangement of shelving and lighting facilities; new windows built and room entirely redecorated; library recataloged; \$800 expended in the purchase of new books; and 500 books secured by donation from two public libraries. During the progress of the work the need of a reading survey was realized, so blanks were circulated to determine the type of books for which there is the greatest demand, and to gain an estimate of the general reading tastes of the men. The survey was voluntary. Of the 519 answers already received, 278 prisoners indicated definite requests for particular books or reading courses on special subjects. When the survey is completed, the information will be valuable in the formulation of reading courses or outlines, and as a guide in future book selection. Other penal institution libraries have received assistance in various forms from the Michigan State Library, but the development of the Jackson State Prison Library is the major accomplishment, and its success proves that a sincerely interested state library worker plus sincerely interested institutional officials can, within a reasonable time, produce results which will reflect credit upon the state, and contribute materially to the recreational and educational facilities of the respective institutions. Obstacles will be overcome, and funds somehow produced when these two forces unite to improve library conditions.

These examples of state service already in operation serve to show that prison library development has an appeal for some state library agencies. However, the interest displayed has failed, thus far, to carry sentiment to the point of employing a trained librarian in any state prison of the United States. May we hope

that the action of the Federal Prison Board, in appointing a Supervising Librarian and announcing the future appointments of trained librarians in each of the Federal Prisons, will have a far reaching effect on individual states, and lead to the gradual adoption of a similar policy. At least enough impetus may be given the subject that state institutional library supervisors will be the rule and not the exception.

Massachusetts has long occupied a conspicuous place in the front ranks of states concerned in the betterment of prison libraries. For this reason the library world rejoiced when announcement was made that a demonstration, financed by the Bureau of Social Hygiene, was to be undertaken in the prisons of that state under the direction of E. Kathleen Jones, General Secretary of the A. L. A. Committee on Institutional Libraries. Myron Fuller, a trained librarian, was engaged for the intramural activities of the project. Regret was felt, when, after a period of nine months, the work was necessarily discontinued because of local conditions. However, the incomplete demonstration served to quicken interest in prison libraries generally, and the report of the findings, published in the *Annual Reports* of the A. L. A., May, 1930, contains much valuable information gathered by the Committee. The objective of the Committee can best be presented by quoting from the *Report*:

"Convinced that in a well selected, well organized library the prison has one of its greatest aids to morale, as well as an important educational factor, this Committee set out to prove certain points: 1. That a budget or appropriation for the purchase of books is essential. 2. That the library, to be efficient, must be organized. 3. That there must be trained library service. In addition, it hoped to try out by actual experience the possibility or advisability of getting books to the attention of the prisoners in other ways than by the printed catalog."

Through the work at the Charlestown State Prison, which contains a large collection of books, well selected and cataloged, the Committee hoped to devise methods of getting the books to the attention of prisoners which would prove helpful in all prisons. Plans for trying out shop collections, bulletin board publicity, annotated lists on special subjects, and possibly direct contact with the men, were matured, ready to put into operation when the work ended. Chief among the needs for state prisons the Committee stresses lists of books and trained supervision, and as an alternative, suggests that a handbook be compiled by the A. L. A. Institutional Committee, which would contain very simple rules for the guidance of the untrained prison librarian in the operation of the library, as well as suggestions for book purchases and the use of publicity material.

Perhaps I have dwelt overlong on the prison phase of institutional library expansion, but the replies to the questionnaire disclosed that this feature was the one receiving more thought and interest on the part of library workers, due in part, to the impetus furnished by the Massachusetts demonstration, and by the action of the Federal Prison Board.

The same need exists for books in charitable institutions as exists in those classed as penal and correctional. In one, emphasis is laid on their value in educational programs; in the other, their worth is manifested along therapeutic lines. But in all institutions, whether a hospital for the insane, a prison, a school for the feeble-minded, a tuberculosis sanatorium, or a hospital for crippled children, the reading of books is looked upon as a very necessary part of the institutional activities. Their value is well expressed by Miss Nellie Williams, of the Nebraska Library Commission:

"Books are a wholesome diversion to those within all the institutions. To some they are more than a diversion. They are a means of directing by sane ways to normal avenues of life. For those who will continue to be shut-ins and for those who will become citizens at large we believe in books for our institutional wards."

The relatively high circulation records shown for institutional libraries sustain this statement: reports show that the average amount of reading during the year is twice the amount per patient or inmate as it usually is per individual in a community reached by the public library.

The tuberculosis sanatoriums, state and county, present another form of needed service demanding our attention. The tubercular patient, deprived of normal exercise and recreation because of his affliction, finds in books the only escape from the restrictions which the nature of his malady imposes. In such cases, books become of high therapeutic value, but, unfortunately, the average sanatorium library is limited in size and quality. Even in states maintaining traveling library systems, the service obviously cannot be extended to include sanatoriums of this class. Minnesota early recognized this need, and, in its comprehensive program of institutional library service, formulated a system of traveling libraries whereby twelve county sanatoriums receive reading facilities. Each collection contains twenty books and is moved every other month. The system functions under the Board of Control, where a definite budget is provided for its maintenance. Wisconsin has evolved a somewhat similar plan which operates under the Library Commission. The book supply, however, although furnished by the Commission, is concentrated at the State Hospital at Statesan.

Requests for books are supplied from there to the Northern Hospital at Tomahawk Lake and to the various county sanatoriums. This method of circulation eliminates the hazard of returned books coming in contact with books in the general State Traveling Library Department.

There is every assurance that Michigan will soon inaugurate a similar system of traveling libraries, for the State Library and county sanatorium heads have plans under way to place a collection of books in the State Sanatorium at Howell, and from this base operate a system of traveling libraries for the benefit of the various county sanatoriums. The cost of the service will be covered by the state and county sanatoriums contributing yearly one dollar per patient. The collection will be augmented by yearly, permanent loans of books from the State Library; and the selection of books, the organization and supervision of the project, will be under that department. In sympathy with the movement, the State Federation of Clubs has signified a desire to appropriate funds to be expended in the purchase of traveling libraries.

To summarize: Although progress is evident, the facts reveal that there is lack of continuity of service in many states, and lack of organized supervision in all states, save two: that with the exception of the Preston School for Boys

in California, not a penal or correctional institution employs a trained librarian; that but one state, Minnesota, provides a definite budget for all its libraries; that only a few charitable institution libraries maintain trained librarians. These facts, together with the knowledge that eleven states report no extension of state library service, force us to the conclusion that no great development will take place in institutional libraries until there is organization in each state of the forces interested. Naturally and logically, institutional heads and state officials will look to state library agencies for leadership in the movement; and, in assuming this responsibility, we must be ready with constructive programs which will win their respect and approval. Such programs should include appeals for adequate appropriations, organized libraries, and trained supervision. In the furtherance of our proposed programs, we must be ready to face discouragement and delays just as we do in other branches of our work. But, if we are sincere in our purpose and persistent in our efforts, tangible results will follow. The same social will which overrides obstacles in public and school library development must be depended upon to create sentiment for improved library conditions in state institutions. Finally, consideration for our appeals will not be granted unless we, ourselves, respect the appeals.

Some Opportunities for Library Service in Adult Education

By F. K. W. Drury

A. L. A. Executive Assistant in Adult Education

THE PROGRAM of adult education is concerning itself today with a number of projects, among which the more prominent are: parent education, education by radio and screen, alumni education, rural education, and education through religious organizations. What are some of the library implications in connection with these movements?

Over a million fathers and mothers are enrolled in parent-teacher associations, presenting a united front through the National Congress of Parents and Teachers. Thousands are likewise represented in child welfare movements. What is it these parents wish to know? In addition to bettering the schools, they wish to become better parents, to rear healthy children, to raise a generation strong in mind and body, ready to use profitably the leisure which the

new machine age is providing. In connection with this program of parent education, the libraries of the country are ready and willing to cooperate. They provide books for individual parents to read and for groups of parents to study. A parents' bookshelf is a feature in many libraries. Selected books are sent to groups which meet in schools and homes. Reading lists are made up for those who wish to read and study along special lines. Two Reading with a Purpose courses feature *Our Children* and *The Young Child*, and for the latter a study program on *The Preschool Child* is provided. Interest in this project varies from State to State and from community to community, but the library implication is obvious.

Education by radio is being studied by the

great broadcasting companies and other agencies. Four nation-wide projects with library implications have been tried: the Voters' Service of the National League of Women Voters, the talks on international relations by J. G. McDonald under the auspices of the Foreign Policy Association, the lectures and broadcasts on music appreciation by Walter Damrosch, and the American School of the Air. In each case the radio talk has been followed up with a list of books on that subject, for no lecture attains its full educational value without a continuing program of reading, discussion, and study. Some measures which a library can take in cooperation with these projects are:

- To secure lists sent out by these four agencies.
- To compile special lists on the subjects of the broadcast.
- To post a list of the titles in the library.
- To put the books out upon the open shelves.
- To arrange listening groups for educational features or important events.
- To provide for discussion circles.
- To announce selected programs.

Further developments along these lines are being studied.

Visual instruction through motion pictures has long been recognized, not only to teach but to follow up the lesson with books and reading. This has been done successfully by libraries when important pictures have been shown locally, such as "Disraeli." Now, with the advent of the talkies, educational possibilities are even more evident. Portable machines are on the market and these can be used in classrooms and libraries to show a process, to illustrate a method, or to tell a story with acted events.

Alumni are showing an interest in cultural and vocational subjects which they could not study in college, or in which they have not kept up to date. They are returning to an "alumni college" for a week of lectures and discussions, as sixty men did at Lafayette in June, 1929. Over 120 returned this June. Similar alumni weeks were held in June, 1930, at the University of Michigan, Iowa State College, Columbia (at St. Stephens), Beloit, and Wellesley. Reading lists are also being sent out from college campuses to alumni, and special lists of reading are being offered along the lines of interest which the alumni indicate. Here is an impulse provided by the Alma Mater. But who will provide the books? Many alumni will buy; others will turn to the local public library in city or county. Where no library exists, the State lending agency may be turned to. Others may ask the library of

their Alma Mater to furnish the books for her children. Is she prepared to do this? Another implication presents itself here—a need which must be studied and considered, perhaps by the charging by the library of a nominal fee for which the desired books may be sent to the isolated alumnus.

Much rural education is dependent on books and library service. The solution in most States seems to be a service as wide as the county supplemented by loans from the central State lending agency and other cooperating sources, such as the State university and its extension division. Individuals, schools, granges, clubs, classes, and churches are seeking this service, and the need is great. Some of it is met by correspondence schools and university extension, but forty-two million people within the United States are without access to library service. Eleven hundred and thirty-five counties are without any book service. Only 263 counties out of 3065 have county libraries. A start only has been made. Campaigns of education and experimental demonstrations are needed. Funds are forthcoming when the interest has been aroused. For a start, traveling libraries may reach out, school libraries may assist, reading courses may suggest, and books may be loaned as needed, but without the necessary continuing service which can be given when a county library has been established.

Education through religious organizations is not new. The churches have always realized the value of study, and they are organized to promote it. A public library not only may supply the books for the pupils, replacing the old Sunday-school libraries, but it can cooperate in any program of religious education, furnishing outlines for study, references for discussions in groups and forums, and books to supplement class use. The churches are awake to the opportunity and are studying both the philosophy and the methods of the new religious education movement. The Y. M. C. A. and similar associations are building up sound programs of religious study.

Individuals and groups are being helped in their reading and study by the libraries of America. Reading lists are prepared. The Reading with a Purpose courses are used. Readers are advised as to their reading, and purposeful, sustained study is directed and encouraged.

Thus in these major projects of adult education—parent education, education by radio and screen, alumni education, rural education, and education through religious organizations—the library enters into the picture with definite implications.

Librarian Authors

MRS. LUCIA MERECKA BORSKI was born in Warsaw, Poland, in August, 1903. She received her early education in a Russian private school where she was forbidden to use the Polish language. During the war, after the Russians had evacuated Warsaw, she went to a Polish school and remained there until her departure from Warsaw. She says that the four years in the Polish school were her happiest schooldays. "The freedom to speak Polish without fear of being punished, to study freely the literature and history of Poland was in itself happiness. My parents owned a book store and a foreign newspaper station and so we were always surrounded by books, papers, and magazines. I had a large collection of fairy tales in Russian, and many other books in Polish and Russian, which I read over and over again. Whatever I read in Russian I translated immediately into Polish, and also the other way around, so that now I do not remember which books I read in Polish and which in Russian." These books included Alcott's *Little Women*, Dickens' *Oliver Twist*, DeFoe's *Robinson Crusoe*, Clemens' *Tom Sawyer*, and Stowe's *Uncle Tom's Cabin*.

In 1919 she came to the United States with the intention of studying, as she had always been told that education in the United States was absolutely free. Her disappointment and regret were limitless at finding this was not true. As she had to earn her own living she studied English and other subjects in the evenings at Columbia University. Also, at the Rand School for Social Research, she studied Child Psychology and took advanced courses in English Literature and History, all of which were to be of use in her future work. A short time later she began work as an assistant in the New York Public Library and was delighted with it, as

"*The Jolly Tailor*," Which Has Been Placed on Several State School Library Lists, Is a Book of Polish Fairy Tales

she had always wished to do social educational work. She says that story-telling was a spur to acquaint the American children with Polish juvenile literature. She was married to Mr. Stephen Borski, a Polish artist, in 1924.

MRS. LUCIA MERECKA BORSKI

For a number of years Mrs. Borski has been interested in translating Polish folklore into English, thus widening our knowledge of this field of literature. Her two published works are *The Jolly Tailor and Other Fairy Tales* (Longmans, Green, 1928) and *The Queen of Heaven* (Dial Press, 1929), in both of which Kate B. Miller is the collaborator. Other translations of works of children's literature are in preparation. Her interest in children has manifested itself in her chosen field of work, which is library work with children, and in the type of stories she has used for translation. A deep love of Poland and all things Polish has given her the desire to spread Polish literature in so far as it is possible for her to do so. It is good news to find *The Jolly Tailor*, of which Eric P. Kelly, winner of the Newbery medal in 1929, said, "I've never come across anything which puts in English so perfectly and so charmingly the peculiar esprit that is Poland," recommended by the *Graded List of Books for Children*, published by the American Library Association in 1930, and already on State school library lists in Michigan, Wisconsin, and West Virginia.

THE LIBRARY JOURNAL

November 1, 1930

Editorial Forum

AGAIN the range of the library profession has been strikingly shown in the remarkable attendance at three simultaneous conferences in different parts of the country. The second great regional conference of the year, which was held at St. Paul, Oct. 14-17, brought together over seven hundred attendants, mostly from the six States included in the North Central regional group, but also from seven other States, including many from Illinois and a representative from California. A splendid, non-conflicting program was arranged; papers were short and to the point; meetings began on time and each day was broken up into several short periods, which made it possible to hear outstanding speakers and important discussions on various phases of library work. As the happy result of this success, it was decided to organize a North Central Association, to meet every two or three years, according to the decision of a committee composed of the newly elected presidents of the six States participating. A graceful act was the appropriation of the \$100 surplus above the conference expenses for the A. L. A. Endowment Fund. During the same week a bi-State meeting of the Ohio and Indiana associations brought together approximately eight hundred librarians to Dayton for a three-day conference. Here the method of using luncheon as the opportunity for round-table groups had the less fortunate result that many interested in several phases of public library work could cover only one of the many subjects. The fortieth anniversary program of the New York State association, combining with the adult education program of the sixty-sixth convocation of the University of the State of New York, at Albany, brought together as speakers five ex-presidents of the A. L. A., including Dr. Locke from Canada, as well as a gratifying and gratified attendance of hearers, and also achieved excellent success.

THE SCHEME for a library colony as an annex to the Lake Placid Club deserves very careful consideration by A. L. A. authorities before its possible adoption as a professional feature. The many librarians who have been guests at the remarkable resort, which the inventive and administrative genius of Melvil Dewey has developed in the Adirondacks, do not need to be reminded of the varied facilities and charms there to be found. But whether there should be a library vacation colony at all, and if so whether it should be located in connection with the Lake Placid Club, are both questions as to which much may be said on both sides. In view of the many meetings nowadays at which librarians come together for professional discussion and increase of acquaintanceship, it would doubtless be suggested that when a librarian takes a vacation he should seek other company than that of his fellow professionals, whose conversation will lead his mind into the ruts of the routine of daily work. On the other hand, there is a natural tendency for people of one mind to flock together, and the mountain air, superb scenery and opportunities for walking and driving could not be better anywhere else, though from some parts of the country the location involves considerable expenditure in railway fares, so that Lake Placid would be naturally a center for Northeastern librarians rather than for librarians in general. The Lake Placid Club with its manifold attractions is a not inexpensive luxury, and the actual limits of cost at the library vacation house would have to be carefully safeguarded. A rest cure of this sort, to which librarians could go in advance of threatened exhaustion from the routine of their work, would certainly be a great boon.

THERE IS PATHOS in the fact that the life of Henry C. Folger was cut short when, not many months later, he might have seen the great collection of Shakespeareana which he brought together housed in the new building which he had provided adjacent to the Library of Congress, properly arranged for exhibition and use and placed in charge of the man whom he would have selected as its custodian with the \$10,000,000 fund for maintenance and extension for which he had already provided in his will. It will be recalled that the trustees of Amherst College, headed by George A. Plimpton, were made by Mr. Folger, in loyalty to his Alma Mater, the trustees also of this fund and of the great collection. Mr. and Mrs. Folger had made close acquaintance with and greatly appreciated William A. Slade, the head of the Department of Bibliography of the Library of Congress, and had expressed the wish

that he might become its custodian. This wish has been gratified by the Amherst trustees, and it is double satisfaction that the wishes of the founder have been thus respected and that the Folger library, though not technically in relation with the Library of Congress, is to be headed by one who has made his reputation therein and will keep the Shakespeare collection in the best possible relation with the nation's library. The post called for an administrator as well as a scholar, and, happily, Mr. Slade's selection insures that the Folger library will have both in his person and that the collection, already unsurpassed by any in the mother country or elsewhere, will be kept worthy of the fitting and beautiful edifice in which it is enshrined, will be hospitable to every legitimate inquiry, and will, as Mr. Folger intended, be active in the promotion and diffusion of an understanding and appreciation of Shakespeare and his era.

THE GUTENBERG BIBLE is now safely housed in the nation's library, where, in a case specially designed for it, it will shortly be on exhibit in the main hallway on the level opposite the shrine which contains the Declaration of Independence and the Constitution. As the three thousand items constituting Dr. Vollbehr's main collection had been delivered to the library within a fortnight after the adjournment of Congress in July, the receipt of the *Bible* completes the acquisition. That it has been effected so promptly and securely was largely due to the fortunate presence of the Librarian, Dr. Putnam, in Europe last summer and his decision to visit the Monastery, and attend the final negotiation between Dr. Vollbehr and the authorities there, and also to facilitate them by an advance of funds through the American Legation at Vienna; over \$300,000 being involved in the final payments, which included not merely the purchase price (\$250,000) and an export duty of \$25,000, but accumulated interest and other charges. The transaction involved numerous conferences at the Monastery itself at St. Paul and at the near-by city of Klagenfurt, and finally at Vienna, which were attended by him, by his colleague, Mr. Engel, by Dr. Vollbehr and his legal representative, by the Abbot and Deacon of the Monastery and their attorney, and in the latter stages by the American Minister at Vienna, who lent the entire resources of the Legation to the solution of technical details. The conclusion of all was that the three folio volumes delivered to the Minister were duly encased in a safe receptacle, sealed with the seal of the Legation and thus under the American flag, transmitted by special courier to the Embassy

in Paris, thence by another special courier to the deck of the "Leviathan" at Cherbourg, brought to New York in the personal custody of the Librarian, and thence to Washington by two officials of the library who had met him at the pier. Contrary to the rumor that momentarily subsisted, there was no objection to their export on the part of the Austrian government. Another rumor (in the European press), equally baseless, asserted that the Librarian had paid a million and a half for them! The basic price, as stated above, was \$250,000. It was not, however, paid by the library, but by Dr. Vollbehr; and as between the library and Dr. Vollbehr, the *Bible* was but one item of a collection for which, as a whole, the sum paid was a million and a half. Thus the best of the complete vellum copies of the famous *Bible*, as well as a great proportion of the other incunabula in the Vollbehr collection, makes the Library of Congress more nearly proximate in this field to the two other great national libraries, worthy of the Congress whose name it bears and of the nation which it represents. Special credit for the achievement should be given to Congressman Collins, to whose initiative and enthusiasm is due the practically unanimous vote in Congress.

IT IS CERTAINLY GRATIFYING to the professional pride of American librarians and architects that the two British commissions which have been visiting American libraries should be composed of foremost representatives of English scholarship. Sir Henry A. Miers, head of the Bodleian Library Commission, is well known in this country, to which he had already made five visits, for his eminence as Vice-Chancellor of the University of Manchester and chairman of the recent Royal Commission on Libraries and Museums in Great Britain. The head of the Cambridge commission, Sir Giles Scott, is the grandson of the great architect whose work made an epoch in English architecture and is himself perhaps the foremost of British architects of today. Their colleagues are all men of eminence in learning and administration, not least among them Sir Frederic Kenyon, Principal Librarian of the British Museum, who has in so many ways commended himself to American librarians and of recent years taken prominent part in international library development. Both commissions were highly appreciative of what they saw and learned in their journeyings as far west as the Mississippi, as well as the hospitality with which they were received, and William Warner Bishop has added greatly to his already international service by his arrangements for these distinguished visitors.

The Most Suitable Health Books for the Public Library

By James A. Tobey, Dr. P.H., *Formerly Associate Editor,*

and Raymond S. Patterson, Ph.D., *Associate Editor, American Journal of Public Health*

"GIVE ME HEALTH AND A DAY," wrote Ralph Waldo Emerson, "and I will make the pomp of emperors ridiculous." The quest for health is of vital significance to all persons, and, fortunately, there is a growing popular interest in it. For the achievement of their health ideals, individuals need authentic information, which they can secure from no more legitimate source than books written by competent authorities who know how to present practical facts in an interesting manner. Out of the profusion of modern literature on the various phases of human health, there is offered herewith a selected list of only twenty-nine books, which may well form the nucleus of an effective health library for the intelligent adult lay reader. These are not, of course, all of the good books on health, but for many excellent reasons they seem to be the most suitable to adorn the shelves of the average public library.

The first test of a book on such an important topic as human health is its scientific accuracy. There is no room here for fads and follies, nor for individualistic medical notions and opinions. The second essential characteristic is readability, together with a practical and reasonable presentation of important facts in an attractive style. A book for serious reading need not be a dull book. It should, moreover, avoid technical language and be clear, concise, and cogent, but thorough, logical, and diverting. There is plenty of romance in this adventure called health, in this drama which is the game of life. The books listed and described comply with these specifications, and others. They are arranged under six divisions, with, of course, an overlapping between them. As an introduction to the general subject, five books have been included under the caption, "The Background of Health." Perusal of these particularly entertaining books will result not only in an absorbing fund of useful information, but also in an adequate conception of the science called public health.

Under "Personal Hygiene," a subject of immediate individual significance, are listed books which deal with various specific aspects of human health, rather than with the whole gamut of the alleged health habits. Nutrition, as the most important single phase of hygiene, is accorded a separate division. Books designed as

"Health Primers" are omitted entirely, because they are, in general, as unsatisfactory for the true seeker after authentic health information, as they are abundant.

Similarly, selections from the copious quantity of books on baby care are conspicuously absent from the list on "Maternal and Child Hygiene." As in the case of the health habits, such material may be readily obtained in numerous reliable pamphlets and booklets issued by official and voluntary health agencies and by reputable commercial organizations interested in public health.

Mental and social hygiene are subjects concerning which there is a plethora of misinformation. Since mental hygiene is a comparatively new science, a branch of human affairs in which lay guidance is eminently needed and desired, the best books on the subject should be available for consultation by all intelligent people. Finally, general public health, than which there is no more potent element in our social structure, is represented by several interesting books.

A more comprehensive list of reliable health books, one containing nearly a thousand titles, may be obtained from the Book Service of the American Public Health Association, New York, while assistance in the preparation of bibliographies of books on all aspects of public health may be secured from the National Health Library, 370 Seventh Avenue, New York. Reading lists on mental hygiene, on the human body and its care, and on certain aspects of childhood, are likewise obtainable from the American Library Association.

The following list is not, of course, infallible.

THE BACKGROUND OF HEALTH

MODERN SCIENCE AND PEOPLE'S HEALTH. Edited by B. C. Gruenberg, Ph.D. *Norton.* 1926. \$2.50.

Always a fascinating and captivating subject, the story of health gains glamour from the skill of its narration. In this book, seven exceptional essays on various phases of health are contributed by as many well-qualified writers.

In each list the books are given alphabetically by authors.

DEVILS, DRUGS AND DOCTORS. H. W. Haggard, M.D. *Harper*. 1927. \$5.00.

A glorious story of the development of modern medical science from the magic, superstition, and alchemy of old; and what it means to you and me, and the rest of us in our present civilization.

THE BIOLOGICAL BASIS OF HUMAN NATURE. H. S. Jennings, Ph.D. *Norton*. 1930. \$4.00.

An authoritative treatment of the vital subject of genetics. An extremely valuable and highly interesting volume.

RIDERS OF THE PLAGUES. James A. Tobey, Dr. P.H. *Scribner*. 1930. \$3.50.

"A revelation of the little known activities of the scientists to whom we owe the most commonplace rules of community health and disease prevention. . . . a work historical, scientific, almost original in scope, that illumines a subject most of us take for granted, and treats it as drama of absorbing interest."—Raleigh (N. C.) *News and Observer*.

MEDICINE. ITS CONTRIBUTION TO CIVILIZATION. E. B. Vedder, M.D. *Williams & Wilkins*. 1929. \$5.00.

Ranges through the gamut of health and disease, telling in an adequate manner about the problems of modern medical science and how they are being met to the advantage of the general populace.

PERSONAL HYGIENE

LAYMAN'S HANDBOOK OF MEDICINE. R. C. Cabot, M.D. *Houghton Mifflin*. 1927. \$1.50.

An excellent compendium of all that the intelligent lay person needs to know about the important diseases and their treatment. Compiled originally, and in part from lectures delivered by the author to social workers.

YOURSELF, INC. THE STORY OF THE HUMAN BODY. Adolph Elwyn, M.D. *Brentano*. 1930. \$3.50.

Human physiology described in popular terms. Everyone should be familiar with the workings of the human machine, and this is the type of book which tells about a complicated subject in a simple and readable manner. It is imaginative but scientific.

AN HOUR ON HEALTH. Morris Fishbein, M.D. *Lippincott*. 1929. \$1.00.

Health fads and fakirs are exposed in this brief volume, which also includes a discussion of longevity and other timely subjects relating to health.

THE HUMAN BODY. Logan Clendening, M.D. *Knopf*. 1927. \$5.00.

Told in a vigorous style, with plenty of human interest protruding, personal hygiene is presented in an attractive manner. Some of it is the unsupported opinion of the author, but most of it is authentic and all of it is interesting.

SLEEP. D. A. Laird, Ph.D., and C. G. Muller. *John Day*. 1930. \$2.50.

There is more than sleep in this book, for it narrates much of value about personal hygiene as it is affected by noise, rest, fatigue and nervous stress. Easy to read, its precepts are sound and not difficult to follow.

THE MATERIALS OF LIFE. T. R. Parsons. *Norton*. 1930. \$3.00.

Bio-chemistry's contribution to the knowledge of health. A readily understandable account of the materials of which living things are made, and the complex changes these materials undergo during life.

NUTRITION

THE MOST NEARLY PERFECT FOOD. S. J. Crumbine, M.D., and James A. Tobey, Dr. P.H. *Williams & Wilkins*. 1929. \$2.50.

Tells in a popular way the whole story of milk, its history and place in human nutrition, its sanitation and distribution, its culinary uses, and its valuable products.

NUTRITION. W. H. Eddy, Ph.D. *Williams & Wilkins*. 1928. \$2.50.

A concise statement of the modern principles of the science of nutrition, written by an authority on dietetics who knows how to write and who has himself made many notable contributions to the art of sensible eating.

YOUR WEIGHT AND HOW TO CONTROL IT. Edited by Morris Fishbein, M.D. *Double-day, Doran*. 1927. \$5.00.

A problem of significance to a vast multitude, ably presented by a group of leading authorities under competent editorial direction. Perusal of this interesting book will save time, trouble, and expense to those in quest of normal weight.

FEEDING THE FAMILY. Mary S. Rose, Ph.D. *Macmillan*. 1930. \$3.75.

Of the many books written on nutrition, this is unquestionably the best. It is thorough and absolutely reliable, it is practical and helpful to the whole family, it is entertaining and easy to read, it is up to date.

MATERNAL AND CHILD HYGIENE

THE INFANT AND YOUNG CHILD. J. L. Morse, M.D., E. T. Wyman, M.D., and L. W. Hill, M.D. *Saunders*. 1929. \$2.00.

Care and feeding of children from birth until school age, put into a manual for mothers by three pediatricians.

THE CHILD'S HEREDITY. Paul Popenoe, D.Sc. *Williams & Wilkins*. 1929. \$2.00.

The influence of heredity in human development is reliably set forth in a very readable style.

EVERYDAY PROBLEMS OF THE EVERYDAY CHILD. D. Thom, M.D. *Appleton*. 1928. \$2.50.

This is still about the best book on child management, enabling the parent to understand and develop the mental life of the child in relation to his physical and social welfare.

GETTING READY TO BE A MOTHER. Carolyn C. Van Blarcom, R.N. *Macmillan*. 1929. \$1.75.

The best manual of prenatal hygiene, written for educated women. Anatomy of the reproductive system and embryology are included.

ADOLESCENCE. F. E. Williams, M.D. *Farrar & Rinehart*. 1930. \$2.50.

The difficulties of this extremely important period in human life and how they are surmounted, told by a leading psychiatrist with a flair for cogent expression.

MENTAL AND SOCIAL HYGIENE

A MIND THAT FOUND ITSELF. C. W. Beers. *Doubleday, Doran*. 1929. \$2.00.

The autobiography of the man who founded the mental hygiene movement. "It reads like fiction, but it is not fiction," William James said of it.

WHY MEN FAIL. Edited by Morris Fishbein, M.D., and W. A. White, M.D. *Century*. 1928. \$2.00.

A compilation of the teaching of the leading psychiatrists and psychologists of the country on such diverse subjects as parental responsibility, vocational problems, sex relationships, mental habits, emotional status as they affect success or failure in life. The outgrowth of an important conference.

THE HUMAN MIND. Karl Menninger, M.D. *Knopf*. 1930. \$5.00.

The most readable book about the human personality. It deals with modern conceptions of mental health, types of personalities, pathologic states, motives, and mental treatment, all in an objective and readily comprehensible manner.

ABOUT OURSELVES. H. A. Overstreet, Ph.D. *Norton*. 1927. \$3.00.

This absorbing introduction to the science of human behavior prepares the way for a consideration of many mental hygiene problems and stimulates the reader to go deeper into the study of psychology.

CONSERVATION OF THE FAMILY. Paul Popenoe, D.Sc. *Williams & Wilkins*. 1926. \$3.00.

A wealth of useful information about subjects which constantly enter into family life. Solutions are indicated for the problems which, unsolved, may cause unfavorable complications, and even destruction, of the family.

GENERAL PUBLIC HEALTH

AMERICAN MEDICINE AND PEOPLE'S HEALTH. H. H. Moore, Ph.D. *Appleton*. 1927. \$5.00.

The structure which society has reared to cope with the ever-present problems of poor health and disease. Information which every intelligent person needs in order to secure the proper perspective of the modern movement concerned with our public health.

WHO'S WHO AMONG THE MICROBES. W. H. Park, M.D., and A. W. Williams, M.D. *Century*. 1929. \$3.00.

The fundamental laws of hygiene are considered in non-technical language by the authors of one of the standard texts on public health. This volume is the outgrowth of a series of radio talks.

THE CONQUEST OF DISEASE. T. B. Rice, M.D. *Macmillan*. 1927. \$3.25.

Sanitary science in its many modes and ramifications, with much information of personal and individual significance. Written directly, but pungently.

THE ROAD TO HEALTH. C.-E. A. Winslow, Dr. P.H. *Macmillan*. 1929. \$2.00.

How man may vanquish the microbe and by his accomplishments in this respect may learn the game of life. Three inspiring lectures by a leading practitioner of public health.

Book Reviews

Dr. Cole's Survey of the Bibliography of English Literature

NOT OFTEN does a member of a bibliographical society contribute to its papers an essay suitable for use in educational work as a text book or material for supplemental reading. Yet such is the character of a paper contributed by George Watson Cole, L.H.D., to the Bibliographical Society of America and lately reprinted for the author in an edition of 150 copies from its *Papers* (vol. xxiii, part 2). The title of Doctor Cole's essay is, "A Survey of the Bibliography of English Literature, 1475-1640, With Especial Reference to the Work of the Bibliographical Society of London." The work consists of five parts: introduction dealing with bibliographic movements to cover the field named; a chapter on "What Should Be Found in Bibliographies"; the Survey, consisting of a chronological account of the writers in the period mentioned from John Boston of Bury, an Augustinian monk of Bury St. Edmunds, who flourished in 1410, down to William Augustus White, who died in 1927. These are followed by titles of the books covered and sample entries.

The student of bibliography at library school gets to know the standard books of reference in his subject. For English literature he learns what works cover the successive periods and where to look for descriptions of rare books and choice editions. But Watt, Lowndes, Allibone and Hazlitt are doubtless for the student, what they remain for most of us, books that stand on certain shelves of the catalog department. Who were these men? what kind of men were they? why did they go to all the labor that must have preceded the preparation of their voluminous works? Doctor Cole, in his narrative tells us something about these points, and as he writes in choice and graceful English, the student who will be "assigned" Cole's Survey will discover that he has found a very interesting book as well as a tool that will be useful to him many times in his later experience. He will want a copy bound and standing on his desk. Under each author—and they deserve the name of "worthies" with a few exceptions—the pertinent facts of his life are briefly mentioned, his special qualifications for his chosen work are sketched, the character of his book in its scope and in its distinctive features is pointed out. These were men who devoted their lives to certain ideals; they set out to do something worth while, that they

hoped would endure; and their works have endured in a way that ours of the present day will probably not do.

Teachers in our library schools will do well to consider Doctor Cole's book when preparing lists of prescribed reading, especially for students who expect to enter reference or university libraries.

WILLIAM STETSON MERRILL.

SOCIAL SCIENCE ABSTRACTS. Published thirteen times a year by Social Science Abstracts, Inc., 611 Fayerweather Hall, Columbia University, N. Y. \$6 per vol.

SOCIAL SCIENCE ABSTRACTS is now in its second year. It grew out of the need of social scientists and librarians to have a more adequate survey of the world's periodical literature in the social sciences. Years of preparation preceded the launching of the journal by the Social Science Research Council. With the active cooperation of about 1500 scholars throughout the world, a survey is made of the vast literature in the various field of social science from about fifty countries in thirty-five languages. Abstracts are in English, averaging about 150 words per abstract. More than bibliography is attempted, for the materials handled are summarized. For 1929 about 3000 journals were regularly examined and 11,093 abstracts were published. For the second year the journal list has been extended to well over 4000 and the abstracts printed will amount to some 17,000. The Index goes beyond every other. The fields covered (History, Economics, Political Science, Sociology, Statistics, Anthropology, and Geography) have never before been brought together into one index. The journal list and the number of languages far exceeds that of other journals. It does not attempt to supplant the existing bibliographical journals; it supplements them. Aside from the much larger number of journals and languages covered, its chief difference lies in the fact (1) that it summarizes the articles dealt with, and (2) that it operates selectively. Not all articles, even in the best journals, are included. The article must belong to social science and it must be a contribution to knowledge or a significant restatement to receive attention. The problem faced by the editors in indexing was of the pioneering kind. Indexes have been made of all the special branches of social science individually, but a combined index of the seven outstanding disciplines has never been

(Continued on page 882)

List of New Books

As An Aid To Book Selection In Hospital Libraries

Compiled by The Library Section, Medical Service, U. S. Veterans' Bureau
August, 1930

Akeley, D. J. *Jungle Portraits*. Macmillan. \$3.50.

Mrs. Akeley accompanied Carl Akeley on his elephant collecting trip in Africa, and records her experiences and observations in a book more fascinating than fiction. She later made an expedition of her own into the Congo and lived for some time among the Pygmies.

Boyd, James. *Long Hunt*. Scribner. \$2.50.

The adventurous life of a trapper in the early 1800's, when the Mississippi marked the western frontier. The hero of the story preferred the half-savage life of the wilderness to the love of a girl and the loss of his freedom.

Bullard, Arthur. *Volcano*. Macmillan. \$2.

An American without funds accepting a job as manager of an orange plantation in the West Indies, finds the business is suspected of being a blind for aiding desperadoes in search of treasure buried by the former dictator. Exciting jungle adventures.

Buranelli, Prosper, and Borden, R. D. *Maggie of the Suicide Fleet*. Doubleday, Doran. \$2.50.

A war story that will bring smiles to the faces of all who served in the navy or went across. The mishaps, miraculous escapes and innumerable breakdowns that befell the "Margaret," erstwhile pleasure yacht assigned to duty with the submarine patrol fleet, are humorously retold from Lieutenant Borden's diary and illustrated by Herb Roth, the cartoonist, who was one of the crew.

Chambers, R. W. *Painted Minx*. Appleton. \$2.50.

Centering around the old John Street Theatre in New York City, this romance of Revolutionary days revivifies Major André, Sir William Howe, General Washington, Mad Anthony Wayne, and other celebrities of the period.

Child, R. W. *Pitcher of Romance*. Sears. \$2.

Short stories excellently told, with a love interest in the background but subordinate to the plot. A well-balanced collection.

Dahlberg, Mary. *Dagger*. Duffield. \$2.

Ranch life was too tame for Dagger, so she took up flying and married an aviator. After his death she toured the world, but failed to find happiness until she returned to the ranch. Light fiction of the sentimental variety.

De La Rue, Sidney. *Land of the Pepper Bird: Liberia*. Putnam. \$3.50.

An informal description of the black republic, with emphasis on climate, products, trade, history, progress, local customs, and native characteristics. The author was formerly financial advisor to Liberia.

Deeping, Warwick. *Exile*. Knopf. \$2.50.

In spite of the pathetic side of this picture of the English residents in a small Italian town, more

or less permanently exiled because of ill-health or dubious pasts, the book should prove inspirational to those who feel they have fallen behind in the race.

Dilnot, Frank. *Lady Jean*. Holt. \$2.50.

An exciting romance of seventeenth century England, in which an attempt is made to abduct the ward of the Duke of Buckingham, with whom the Prince is infatuated, in order to make an alliance for reasons of state between the Prince and a French princess.

Emery, S. M. *Romance by Request*. Macrae Smith. \$2.

By the terms of a will, a young man inherits a large summer hotel on condition that three matches are made there during the season. Complications, harmless fun and foolishness follow. Will appeal to those who enjoy light, humorous fiction.

Field, Rachel. *Points East*. Brewer & Warren. \$2.

Unusual poems narrating curious legends of the Maine coast.

Finger, C. J. *Seven Horizons*. Doubleday, Doran. \$5.

An amazing number of experiences have been crowded into this one man's life. The author writes forcefully, entertainingly and withal simply, showing how chance led him into strange corners of the globe. An unusual personality is revealed, a man of rare spirit and keen discernment.

Franck, H. A. *Scandinavian Summer*. Century. \$4.

Casual impressions of a tour embracing Denmark, Finland, Sweden, Norway, and Iceland. The contrast in their respective national traits is clearly shown. The text also gives considerable information as to choice of routes and modes of travel. Average size and weight. Numerous illustrations.

Gibbs, A. H. *Chances*. Little. \$2.50.

A dramatic story of two brothers, unlike in disposition but inseparable from boyhood and throughout the war. Their love for the same girl strained the bond of brotherhood, but could not break it.

Gillis, W. R. *Gold Rush Days with Mark Twain*. Boni. \$4.

According to the author, Mark Twain failed to see the fun in a joke on himself. Although very little space is devoted to the humorist, the book will be enjoyed for its presentation of the rough-and-ready life that prevailed on the coast following the discovery of gold in California.

Glassman, Don. *Jump!* Simon & Schuster. \$3.

History of the Caterpillar Club with accounts from interviews, newspapers or official reports, of the circumstances compelling famous jumps. The development of the parachute and the lives it has saved are thrilling chapters in the story of aviation.

Green, Anne. *Selbys*. Dutton. \$2.50.

An excellent idea of French customs is afforded by this story of an American couple, long resident in Paris, who introduce their niece to the society composed of exclusive old French families.

Grey, Zane. *Shepherd of Guadeloupe*. Harper. \$2.

Clifton Forrest, disabled veteran, returned to his home in New Mexico expecting to die, but, spurred by adversity and injustice, he puts up a good fight and eventually regains his health and wins the girl he loves. Will be popular.

Haworth, P. L. *Caverns of Sunset*. Bobbs. \$2.

Hazardous adventures and encounters with hostile Indians were the lot of the daughter of an earl who, disguised as a boy, secretly embarked on a search for her brother in western Canada.

Hayward, W. B. *Last Continent of Adventure*. Bobbs. \$3.

Subtitle: "A narrative of gallant men and bold exploits in Antarctica." With the interest aroused by the recent Byrd expedition, this volume, containing accounts of former expeditions, will find many readers. Convenient size, good print, and many illustrations recommend the book for summer reading.

Herold, Don. *Strange Bedfellows; My Crazy-Quilt Memoirs, Life-Maxims and What-Not*. Farrar. \$3.

Clever nonsense, illustrated with humorous cartoons in black-and-white, recommended for an idle moment and most enjoyable if read in snatches.

Hull, H. R. *Asking Price*. Coward-McCann. \$2.50.

Portrays the conflict between a college professor's natural poetic tendencies, curbed by his wife's hard, materialistic nature and his duty to provide for his children in a manner considered suitable by his wife.

Hurrell, F. G. *Lantern Show of Paris*. Cape. \$3.

Ex-service men will recall "leaves" spent in Paris as they thumb the pages of this charming book of sketches, many but a paragraph in length and enhanced by illustrations of typical Parisian scenes. Small size, light weight.

Irvine, A. F. *Fighting Parson*. Little. \$3.

Irish to the core, this autobiography breathes the personality of the boy and man whose unflinching sense of humor and love of God and man has made his life a glorious adventure. The story of his work as a "morale-raiser" at the front during the war will add to the interest of the book for veterans.

Irwin, W. A. *Days of Her Life*. Houghton. \$2.50.

A romantic novel of San Francisco in the nineties. The heroine marries to escape poverty, only to discover that her husband is a bigamist. Finding employment in an antique shop she later marries the invalid owner and finds happiness resulting from adherence to honor and duty.

Kelly, E. M. *Spanish Holiday*. Harper. \$2.50.

Short stories with a Basque background, told with delicate humor and showing the author's familiarity with the foibles and racial characteristics of these sturdy people.

Lea, F. H. *Happy Landings*. Dodd, Mead. \$2.

An actress who makes a hit in Hollywood, an ace who had lost his nerve after a crash, a director who uses hearts as pawns to produce a super-film, and the familiar jargon of the studios, are combined into a readable love story of the film world.

Lighty, Kent and Margaret. *Shanty-Boat*. Century. \$3.50.

Once again the Mississippi figures as the river of romance and adventure. In the "Ark" the authors start from Minneapolis and loaf down the river, reaching New Orleans at carnival time. The main interest lies in the human contacts afloat and ashore.

Lincoln, Natalie. *Marked Cancelled*. Appleton. \$2.

When a wealthy and unprincipled resident of Washington, D. C., was found murdered, clues led in many directions—the marriage license marked "Cancelled" clutched in his hand the most tangible one. Not an outstanding mystery story, but it has no objectionable features.

Locke, W. J. *Town of Tombarel*. Dodd, Mead. \$2.50.

Nine short stories, all concerning the quaint little French town of Creille. The episodes are related by the lovable old mayor and give us Locke at his best.

MacGrath, Harold. *Green Complex*. Doubleday, Doran. \$2.

A. E. F., A. W. O. L., M. P., Paris, a pretty girl, an emerald necklace, and last but by no means least the police on the track, merely hint the thrills in store for the reader while following the dilemmas into which two soldiers are plunged. The plot revolves around efforts to obtain a green necklace and then to dispose of the stolen emeralds.

Maugham, W. S. *Gentleman in the Parlour*. Doubleday, Doran. \$3.

Subtitle: "A record of a journey from Rangoon to Haiphong." In phrases that gladden the ear and linger in the memory, an intimate picture is presented of the villages, towns, rivers, and the natives. Will appeal especially to travelers and those with cultural background.

Merriam, J. C. *Living Past*. Scribner. \$2.

By means of a buried leaf, footprints imbedded in rock, bones in an asphalt pool, and other evidence brought to light, the dim past becomes part of the living present. The tremendous geological changes are explained in simple language. Considerable space devoted to the Grand Canyon. In subject, style, and format, an excellent book for hospital libraries.

Oppenheim, E. P. *What Happened to Forester*. Little. \$2.

Pleasant tales of the Riviera and other resorts of the idle rich, told in the first person by the genial Major Forester. Sophisticated and diverting short stories.

Risley, Eleanor. *Road to Wildcat*. Little. \$2.50.

Up hill and down dale, through the Alabama mountains, walked Peter and Eleanor Risley, pushing a covered wheelbarrow and accompanied by their dog. The hill-folk, with their independent spirit, religious zeal, and love of music and singing, are revealed in the delightful dialogue and dialect in which the book abounds.

The November Forecast

A check list of books of general interest whose publication dates fall during the coming month

(Exact date of issue, when known, is given directly after publisher's name)

Biography, History and Travel

Baker, G. P. *Constantine the Great*. Dodd Mead. \$3.50.

Bartholdt, Hon. Richard. *From Steerage to Congress*. Dorrance. \$4.

Autobiography of a poor immigrant lad, a printer, editor, and member of Congress.

Barton, R. F. *The Half-Way Sun*. Brewer and Warren (17). \$5.

Life among the Headhunters of the Philippines.

Bowen, Frank C. *A Century of Atlantic Travel, 1830-1930*. Little, Brown (7). \$4.

A chapter is devoted to each decade of the last one hundred years.

Britton, James. *John Singleton Copley: A Modern Old Master*. Dodd Mead. \$3.

Brilliant sketch of the greatest American painter.

Crawford, Mary Caroline. *Famous Families of Massachusetts*. Little, Brown (7). \$10.

The beginnings, development and achievements of some three score outstanding Bay State families.

Gretton, R. H. *A Modern History of the English People (1880-1922)*. Dial Press (10). \$5.

Herriot, Édouard. *The United States of Europe*. Viking (2). \$3.50.

A keen study of the greatest issue facing the international world today.

Kootz, Samuel M. *Modern American Painters*. Brewer and Warren (3). \$5.

A study of eighteen American painters, all of whom are alive today, with a short biographical sketch of each.

Mann, Klaus. *Alexander*. Brewer and Warren (10). \$2.

A novelized biography of the great Macedonian general.

Morand, Paul. *New York* (Tr. by Hamish Miles). Holt (7). \$2.50.

Fourteen full-page drawings of New York scenes have been especially done for the book by Joaquin Vaquero, the Spanish artist and architect.

Spivak, John L. *The Devil's Brigade*. Brewer and Warren (3). \$3.50.

The story of the Hatfield-McCoy feud.

Vaughan, Samuel M. and May, Earl C. *Steaming Up!* Brewer and Warren (10). \$5.

The years following the Civil War.

Vulliamy, C. E. *Voltaire*. Dodd Mead. \$3.50.

Ward, Christopher. *The Dutch and Swedes on the Delaware*. Univ. of Penn. (21). \$5.

Belles-Lettres

A Guide to Historical Literature. Macmillan. \$8.

Compiled by the committee on bibliography of the American Historical Association.

Besier, Rudolf. *The Barretts of Wimpole Street*. Little, Brown (21). \$2.

Now being played in London.

Chambers, Sir Edmund. *Shakespeare: Fact and Problems*. 2v. Oxford Univ. Press. \$15.

Chapman, John Jay. *The Antigone of Sophocles*. Houghton Mifflin. \$10.

Poetry.

Dickinson, Emily. *Poems*. Little, Brown (21). \$4.

Hugo, Victor. *Ruy Blas*. (Tr. by Brian Hooker). Holt (7). \$2.

Play.

Mantle, Burns, ed. *The Best Plays of 1929-1930*. Dodd Mead. \$3.

Includes the ten most representative plays of the year.

Noyes, Alfred. *The Last Voyage*. Stokes. \$2.50.

Poetry.

Schauffler, Robert Haven. *A Manthology*. Dodd Mead. \$2.50.

An anthology of man's poetry.

Snyder, Edward. *Hypnotic Poetry*. Univ. Penn. Press. \$2.

"Spell-weaving poems" as opposed to the intellectualist variety of verse.

Weygandt, Cornelius. *The Wissahickon Hills*. Univ. Penn. Press. \$4.

Thirteen informal out-of-door essays interspersed with shorter sketches of incidental interest.

Miscellaneous Non-Fiction

Candee, Helen Churchill. *Ornamentation and Textile Design*. Stokes. \$5.

Chappell, George S. *Through the Alimentary Canal with Gun and Camera*. Stokes. \$2.

Cunningham, F. F. *Geography Laboratory Manual*. Wiley.

Hamlin, Scoville. *Menace of Overproduction*. Wiley.

Heiler, Friedruch (Samuel McComb, trans.). *Prayer (Das Gebet)*. Oxford Univ. Press. \$6.

Hopkins, Ernest Martin. *Education and Life*. Houghton Mifflin. \$1.50.

The functions of education.

Hutchinson, A. S. M. *The Book of Simon*. Little, Brown (21). \$2.

Impressions of the author's small son from infancy to three years old.

Jeans, Sir James. *The Mysterious Universe*. Macmillan. \$2.

Krows, Arthur Edwin. *The Talkies*. Holt (7). \$2.

The latest development in the motion picture industry.

Lloyd, T. C. *Electrical Equipment*. Wiley.

Malti, M. G. *Electric Circuit Analysis*. Wiley.

Milton, George Fort. *The Age of Hate*. Coward McCann. \$5.

Mitchell, Edwin Valentine. *Concerning Beards*. Dodd Mead. \$1.50.

For the first time, perhaps, the beard has been accorded its true place in the history of nations.

Page, Victor W. *Aviation Engine Examiner*. Henley (5). \$3.

Phillips, John C. and Hill, Lewis Webb, eds. *Classics of the American Shooting Field*. Houghton Mifflin. \$7.50.

Pollard, Hugh B. C. *The Gun Room Guide*. Houghton Mifflin. \$25.

Poppe, Thomas W. *House Wiring*. Henley (3). \$1.

Ramsey, L. W., and Lawrence, Charles H. *Garden Pools*. Macmillan. \$2.

How to use water attractively in the home grounds.

Richter, G. M. A. *Animals in Greek Sculpture*. Oxford Univ. Press. \$12.

Rockwell, F. F. *Roses*. Macmillan. \$1.

Written by an amateur for amateurs.

Woodworth, J. V. *Punches, Dies, and Tools for Manufacturing in Presses*. Henley (5). \$5.

Youth, H. A. *Affirmations of Christian Belief*. Macmillan (7).

Fiction

Dekobra, Maurice. *The Sphinx Has Spoken*. Brewer and Warren (24). \$2.

Afghanistan and two officers in the Anglo-Indian Army.

Farnol, Jeffery. *Over the Hills*. Little, Brown (7). \$2.50.

Set in the stirring period of the Jacobite uprising.

Glenn, Isa. *A Short History of Julia*. Knopf (7). \$2.50.

The problems of a Southern girl.

Huna, Ludwig. *The Star of the Orsini*. Brewer and Warren (3). \$2.

The second novel in the Borgia trilogy, but like the first novel, *The Bulls of Rome*, is complete in itself.

O'Brien, Edward J., ed. *The Best British Short Stories of 1930*. Dodd Mead. \$2.50.

O'Brien, Edward J., ed. *The Best Short Stories of 1930*. Dodd Mead. \$2.50.

Onions, Oliver. *The Open Secret*. Houghton Mifflin. \$2.50.

Oppenheim, E. Phillips. *Slane's Long Shots*. Little, Brown (21). \$2.

Wade, Henry. *Dying Alderman*. Brewer and Warren (17). \$2.

Murder story.

Zweig, Arnold. *Claudia*. Viking (2). \$2.50.

Juvenile

Daniel, Hawthorne. *The Shadow of the Sword*. Ill. by Emile Verpilleux. Macmillan. \$2.50.

How a young fisher boy saved the island of Mont-Saint-Michel from the English.

Drinkwater, John. Illus. by H. M. Brock. *More About Me*. Houghton Mifflin. \$2.

Verse for small children. A continuation of *All About Me*.

Harrington, Mildred P. *Ring-A-Round*. Ill. by Corydon Bell. Macmillan. \$3.

A collection of verse for boys and girls.

Seiler, Gwendolen. *The Princess and the Swineherd*. Macmillan. \$2.

A fairy theme adapted for stage presentation.

Warren, Dale. *A Modern Galaxy*. Houghton Mifflin. \$3.

Collection of short stories.

In The Library World

New Rural Service Truck

THE RURAL SERVICE TRUCK which is now being operated by the Library Association of Portland is the second automobile which the library has put into service for its rural patrons. It is run for nine months of the year, from September to June, and serves residents of Multnomah County outside of Portland.

The first truck, purchased in April, 1924, and put into operation the following month, was so successful that it soon became an established part of the library's service. When it wore out in its line of duty, a new truck was purchased this fall, and has been serving rural residents for the past month. The new machine is a G. M. C. truck, with a body especially built along the lines of the first truck, which had proved satisfactory. The big change was putting the door at the back instead of on the side. The truck covers eight routes every two weeks and travels 364 miles.

It serves over 500 families, making house-to-house stops. The average circulation is about 200 books a day, the largest day being 368, which was so heavy that it necessitated a change in the schedule. The truck is driven by Miss Norma Lee Peck, who is assisted by a boy page.

A List of S. L. A. Members

THE SPECIAL LIBRARIES ASSOCIATION has recently issued a List of Members. This has been corrected to May 1, 1930, and includes not only the Institutional, Active and Associate members, but the names of subscribers to the magazine *Special Libraries*. It also contains the new members of the Executive Board for 1930-31 and the officers of the local Groups and the local Associations and Chapters. A list of past officers since the formation of the Association is also appended to the publication. The price of the publication is one dollar.

The Library Colony

AT THE ATLANTIC CITY MEETING of the American Library Institute there was discussion of a letter from Melvil Dewey, founder of the Lake Placid Club and one of the founders of the American Library Association, during which was brought out the need for a plan such as he suggested in a "Library Colony" at Lake Placid for librarians who wish to vacation there. The advantages as contained in the latter were: Possibility of a vacation at Lake Placid Club at any season of the year; All privileges of the Club; A club house given over entirely to librarians; Reduced rates under the Lake Placid Foundation; Opportunity to build individual or group bungalows; and Free camping space on the property.

The Committee on the Library Colony, with Messrs. Brigham, Hill and Rush present, convened at Lake Placid on October 11 to inspect the various locations offered

in the Lake Placid Club area. During several conferences a tentative agreement was reached. The committee feels that the wisest plan is to move cautiously in the matter and to adopt the terms of the agreement with the understanding that if a sufficient response is received from the librarians of the country, a more extensive scheme will be inaugurated. It is the intention of the Lake Placid Club, as stated in the agreement, to extend the privileges as there is demand and the space is available. In other words, if there is sufficient response, plans will be made for the use of the club premises during the height of the season in the coming year 1931.

The Visit of the British Commissions

TWO BRITISH LIBRARY COMMISSIONS, the Cambridge University Commission and the

Library Association of Portland, Ore., Rural Service Truck Operating in Multnomah County

Bodleian Library Commission, were recently brought to the United States by the Rockefeller Foundation to study libraries. Both universities are planning new libraries, the money for which has been in a large part given by the Rockefeller Foundation, and the tour was planned by Dr. Bishop, librarian of the University of Michigan. Landing in Montreal on Sept. 12, the party, after visiting McGill University, spent a few days in New York before going on to Philadelphia, Baltimore, and Washington. From Washington they went to Pittsburgh and from there to Cleveland. They then went to Chicago for three days and to the Universities of Illinois, Wisconsin, and Michigan. From Ann Arbor they were driven to Detroit and then on to the University of Rochester, Toronto, Harvard, Yale, and again to New York with a side trip to Princeton. They sailed on Oct. 24. The Bodleian Commission was headed by Sir Henry A. Miers, who recently headed a Royal Commission on Libraries and Museums in Great Britain, and Sir Giles Scott, who headed the Cambridge University Commission, is the most distinguished British architect of the present day. They sailed for England, Oct. 24, on the "Caronia." Coincident with the visit from the two British commissions came the visit of the librarian of the University of Oslo and the architect of its new library building.

Reduced Fare for Mid-Winter Meeting

A REDUCTION of one and one-half fare on the "Certificate Plan" will apply for members and dependent members of their families attending the meeting of the American Library Association, to be held at the Drake Hotel, Chicago, Ill., Dec. 29-31, if not less than 150 persons obtain regularly issued certificates from ticket agents at starting points, each showing payment of regular one-way adult tariff fare of 67c. or more on going journey, and if these certificates are properly validated in Chicago. Arrangements will apply on the majority of railroads in the United States, though not on all. Members who expect to obtain certificates are requested to note the following directions:

1. Tickets at the regular one-way tariff fare for the going journey may be obtained Dec. 25-31, inclusive, on most railroads. Dates of sale are a few days earlier in some far western territories. Be sure that, when purchasing your going ticket, you request a certificate. You will not be able to secure one in Chicago. Do NOT MAKE THE MISTAKE OF ASKING FOR A "RECEIPT."

2. Present yourself at the railroad station for ticket and certificate at least thirty minutes before departure of train on which you will begin your journey.

3. CERTIFICATES ARE NOT KEPT AT ALL STATIONS. If you inquire at your home station, you can ascertain

whether certificates and through tickets can be obtained to place of meeting. If not obtainable at your home station, the agent will inform you at which station they can be obtained. You can in such case, purchase a local ticket to the station which has certificates in stock, and from there you can buy a through ticket to place of meeting and at the same time ask for and obtain a "Certificate Plan" certificate.

4. Immediately on your arrival at the meeting, present your certificate to the indorsing officer, Cora M. Beatty, A. L. A. Membership Department, as the reduced fare for the return journey will not apply unless the certificate is properly indorsed by her and validated by a railroad Special Agent as provided for by the certificate.

5. Arrangements have been made for validation of certificates by a Special Agent of the carriers on Dec. 29-31, inclusive, provided the required minimum of 150 certificates is presented.

6. NO REFUND OF FARE WILL BE MADE BECAUSE OF FAILURE TO OBTAIN A PROPER CERTIFICATE WHEN PURCHASING GOING TICKET.

7. If the necessary minimum of 150 certificates is presented at the meeting and your certificate is duly validated by the Special Agent, you will be entitled, up to and including Jan. 3, 1931, to purchase a return ticket via the same route over which you made the going journey, at one-half of the regular one-way tariff fare from the place of meeting to the point at which your certificate was issued.

8. Return tickets issued at the reduced fare will not be good on the New York, New Haven & Hartford Railroad trains 15, 16, 17, 18, 23 and 24.

Bronx Asks \$20,000,000 for Library

PLANS FOR the incorporation of the Bronx County Free Library Association and for a library program involving a request for a \$20,000,000 appropriation by the City of New York were announced October 13. The Board of Estimate will also be requested to appropriate \$25,000 for the establishment of a library training school. It is stated that officials of the New York Public Library have estimated the Bronx as requiring fourteen additional branch libraries and one central library. The nine Carnegie libraries in the Bronx at this time are administered by the New York Public Library, but no funds are available for extension work.

New Buildings

THE JACOB H. SCHIFF Memorial Library, one of the group of three new buildings erected by the Jewish Theological Seminary of America at 122nd Street and Broadway, New York City, was dedicated October 26.

THE CORNER-STONE of the Stewart Memorial Library, Coe College, Cedar Rapids, Iowa, was laid October 15.

THE NEWARK PUBLIC LIBRARY, N. J., opened the North End Branch at 722 Summer Avenue on October 15. This is Newark's eighth branch library building.

Medical Books Loaned in New England

THE BOSTON MEDICAL LIBRARY, one of the largest and best medical libraries in the country and containing over 150,000 volumes, has adopted the policy of lending its books to any doctor in New England. The physicians of this State may avail themselves of this service in two ways—first, without expense except for postage by interlibrary loan, borrowing through the Vermont State Library or any local public library; second, by joining the library and borrowing books from the library direct. The membership fee for this latter service is \$5 per year.

Bibliophile Tour

TEN GERMAN librarians and bookmen arrived on the North German Lloyd steamer "Bremen" on October 9 for a seventeen-day tour of Eastern book centers. The itinerary as given in the

September 1 issue of THE LIBRARY JOURNAL was followed closely with Mr. Stechel of the American Express Company conducting the group. The party sailed from New York, on the same steamer which brought them over, on October 25.

Music Department in American Library in Paris

ON SEPTEMBER 24th a program of experimental American music inaugurated the new Music Department of the American Library in Paris. Miss Dorothy Lawton, who organized the department, states that it is the first to be established outside the United States and was born of the inspiration Americans have received from France for the last century. All students and others will be permitted access to the musical works, and the library will otherwise help anyone interested in music. It is planned to give other musical programs at regular intervals.

List of New Books for Hospital Libraries

(Continued from page 877)

Rosman, A. G. *Young and Secret*. Minton. \$2.

A novel of family life wherein the father feels left out of the companionly relationship between the mother and daughter. The family is kept intact by the girl's comprehension of the situation. Women patients will appreciate.

Sibour, V. S. *Flying Gypsies*. Putnam. \$2.50.

To break the monotony of life, an American-born countess and her French husband make a trip around the world in a little open cockpit plane, crossing the two oceans via boat. Good adventure.

Sparkes, Boyden, and Moore, S. T. *Hetty Green, a Woman Who Loved Money*. Doubleday, Doran. \$5.

The biography of a unique and eccentric figure in the American financial world of yesterday whose methods of saving made her prominent. Considered stingy, she nevertheless is described as a "gay, jolly old lady."

Sparling, Earl. *Mystery Men of Wall Street*. Greenberg. \$3.50.

After reading the account of how one millionaire after another increases his wealth by playing the market, it is rather evident that the small gambler is leaning heavily on luck, for his money becomes the plaything of change in the battles between financial wizards.

Sutley, Z. T. *Last Frontier*. Macmillan. \$3.

The author roamed all over the west in the exciting pioneer days and had the knack of being in the vanguard when things began to happen. Will be liked by western fans.

Terhune, A. P. *To the Best of My Memory*. Harper. \$4.

Not the story of his life with his dogs, but an exceedingly human picture of the author's boyhood

and later experiences as reporter and author. An encouraging book, "the story of a happy life," to quote the subtitle.

Train, Arthur. *Paper Profits*. Liveright. \$2.50.

The hysterical frenzy of speculation that swept the country prior to the crash in the fall of 1929 is the keynote of the story of a man who lost everything when within an ace of his objective. In starting from the bottom again he found the happy home life he had lost in his pursuit of wealth.

Tyson, J. A. *Rhododendron Man*. Dutton. \$2.

The finger of suspicion pointed to several friends when a man was found murdered, but with the aid of a capable reporter the guilty person was located. Less tense than most mysteries. Large print.

Willoughby, Barrett. *Sitka, Portal of Romance*. Houghton. \$3.

An informal description of Sitka introducing bits of history, tradition, folklore, and emphasizing the Russian influence.

Waugh, Alec. *Hot Countries*. Farrar. \$3.50.

An unusual travel book which ignores historic backgrounds for the most part, omits dates and similar boresome details, but which manages to convey the intangible spirit of a foreign place.

Social Science Abstracts

(Continued from page 875)

attempted. Into this index went the labor of many months of specialists in the several fields and the advice of librarians, indexers and other consultants. The Index for 1929 is divided into three parts: I. The Cumulated Table of Contents; II. The Subject Index; III. The Authors' Index. The alphabetic Subject Index contains more than 25,000 items; the Authors' Index lists almost 10,000 names. The Index covers 142 pages, most of it in three column, six point.

MARGARET BLANDER.

School Library News

The School Library Dinner at Los Angeles

SCHOOL LIBRARIANS who were at the Los Angeles Conference will not soon forget the dinner at the Beverly Hills Hotel. This was the annual meeting of the California School Library Association, and was made the occasion of welcoming the out-of-the-State school librarians and many leaders in the library world as honored guests. It was more than a friendly gathering of three hundred people, librarians of high and low degree, educators, and authors, enjoying a good dinner in good company; Annie Spencer Cutter called it a milestone in the history of the whole school librarian group.

A charming epitome of the program is contained in a letter from Mr. Adam Strohm to the chairman of the dinner committee:

"Now that I am back here to take account of the past weeks and enjoy over again some of the most memorable incidents, I certainly must first record my happy and grateful experience at the Beverly Hills Hotel, thanks to your courtesy and thoughtfulness.

"While I may not be able to voice my impressions, they were, nevertheless, very vivid and happy. The room itself and the arrangements were unique and perfect. . . . The program was a delightful California rendering of Shakespeare's Seven Ages: Mr. Curtis and his three-score and ten reminiscences; Halliburton, the spiritual gold seeker; Bromfield, the amusing mixture of revolting youth and ingratiating youngster; your flier author who could soar even mentally; the pioneer librarian of silver gray hair and sunny smiles; and, last of all, the interpreter of the Castilian California atmosphere—all of these were led forward gently and merrily by the toastmaster in a way that would brook no refusal.

"If it is a compliment to say that the most interesting professional man is the one who does not talk shop out of his office, then this gathering of school librarians was the most attractive because one was never conscious of the pedagogical atmosphere. Rather, it was sunshine and sunset, presumably California at her best. . . ."

The dinner was held in a spacious suburban hotel, to which the guests were brought in automobiles provided by the school librarians of the city. Rosa B. Cage, the president of the southern section of the California School Library Association, presided, while Laura

Grover Smith was toastmistress. The northern California school librarians joined in the welcome to those from other States through their president, Polly Hatch.

Mr. Milam, Mr. Keogh, Mr. Strohm, and Miss Cutter spoke briefly and graciously. The pioneer librarian, to whom Mr. Strohm refers, was Mary Foy, first librarian of Los Angeles. The other speakers whom he so delightfully characterizes, were John Jay Curtis, president of the Bobbs-Merrill Company; Richard Halliburton; Lieutenant John V. Deuel, author of *Speed Wings*; Louis Bromfield, and, finally, Lucretia del Valle Grady.

MARJORIE VAN DEUSEN.

A Browsing Hour

IT HAS LONG BEEN a dream of the librarian at Wiley High School Library, Terre Haute, Ind., to have a regular browsing hour. When the ninth period was given to extra-curricular activities, the opportunity came to introduce this idea. It has been an interesting experiment, the only handicap being the lack of room. For this reason each student is limited to one period every week, the day being his own choice. Even with this arrangement there is a lively race to the library to secure a seat. The students have free access to the books and magazines, and there is an obvious development of individual taste. When the building program permits more space, it promises to be an effective method of cultivating the library habit.

Club Programs

PROGRAMS, study outlines, and reading courses, grouped under one hundred and fifty subjects, are listed in "Helps for Club Program Makers," compiled by Elizabeth Gillette Henry and recently published by the A. L. A. Subjects, ranging from home economics, child study, and gardening to literature, psychology, and politics, include practically all of those topics to which women's clubs and other adult groups may wish to devote either a single meeting or an entire winter's program. Useful information on the organization of clubs and study groups is listed separately. Other special features of the booklet are a list of books from which original programs may be constructed, a directory of periodicals and organizations to which reference is made, and a directory of State agencies which will give advice and assistance to women's clubs.

The Open Round Table

A Warning to Librarians

To the Editor of THE LIBRARY JOURNAL:

Irving I. Ignatin was for a time a student at the University of Pennsylvania. He is a very tall, slender, dark, quiet, and well-dressed young man, who gained the privilege of frequenting the bookstack in the library by representing himself to be a graduate student. He has a fine taste for the best in literature, and has been unable to resist the temptation of helping himself to good books and smuggling them out of libraries for his personal use.

Thanks to the alert cooperation of Mr. James F. Meegan, proprietor of the Rare Book Shop, Washington, D. C., the University of Pennsylvania Library has been able to recover from Mr. Ignatin's quarters in Washington and in Philadelphia 119 of its books. The Free Library of Philadelphia also regained possession of some dozens of volumes by the same means. Ignatin has been indicted for the larceny of books from these libraries, and at his trial in Philadelphia, Sept. 30, he pleaded *nolo contendere*, and was given a three years' suspended sentence.

It is to be hoped that Ignatin has learned his lesson, but as he appears to lead a wandering life it seems worth while to warn librarians of his recent activities.

ASA DON DICKINSON,
Librarian, University of Pennsylvania.

Additional Lists

To the Editor of THE LIBRARY JOURNAL:

The following statement concerning "Official Publications of European Governments," on page 587 of THE LIBRARY JOURNAL for July, 1930, needs some modification:

"Compilation of a complete list is made difficult by the fact that, with the exception of the United Kingdom, the Irish Free State, Italy and Portugal, no attempt has been made by the individual governments to list their respective publications."

In January, 1928, the German Federal Ministry of the Interior at Berlin published the first issue of a *Monatliches Verzeichnis der Reichsdeutschen Amtlichen Druckschriften* containing the federal publications of the German government, the state governments, and the larger municipalities. This monthly catalog of German official publications which has

been regularly issued since 1928, is prepared at the Deutsche Bücherei, Leipzig.

Late in 1928 the Prussian State Library at Berlin issued the first volume of an accessions catalog for German official publications, federal, state and municipal, covering the first half of the calendar year 1927.

Within the past few months the Royal Library of The Netherlands at The Hague has issued the first volume of an annual List of Dutch official publications covering the central government, provinces and colonies for 1929.

Both the German and the Dutch lists are very carefully prepared, exact titles, statement of printing or publishing, contents, etc., and are a substantial evidence of the growing interest in the issue of official publications in European countries.

JAMES B. CHILDS,
*Chief, Division of Documents,
Library of Congress.*

An Oversight

To the Editor of THE LIBRARY JOURNAL:

Through an oversight the name of the individual responsible for its preparation was omitted from Bulletin Number 1, Volume II of the Bureau of School Service, entitled, "The Type of High School Curriculum Which Gives the Best Preparation for College." This error was not detected until after some of the bulletins had been placed in the mail. The study was made by Dr. James Anderson Yates, Head of the Department of Chemical and Physical Sciences, Kansas State Teachers College, Pittsburg, Kan.

LEO M. CHAMBERLAIN,
*Bureau of School Service,
University of Kentucky, Lexington.*

Increased Appropriation

To the Editor of THE LIBRARY JOURNAL:

In a season of hard times it is pleasant to be able to report that our appropriation for the coming year has been increased from 19¢ to 20.8¢. This has permitted us to employ one additional person on full time, and another on half time. We have also increased salaries for staff members above the junior grade.

S. M. JACOBUS,
Librarian, Pomona Public Library, Cal.

Suggestions, Please

To the Editor of THE LIBRARY JOURNAL:

A well known publisher is planning to enter the scientific and technical field, and has asked me to suggest scientific or technical subjects of interest to modern readers which are not covered by modern adequate treatments in book form. I have been able to offer him one or two suggestions, but it occurs to me that some of my colleagues may have had their attention called to other needs which it would be to everyone's advantage to have filled. I shall be personally grateful for and happy to pass on to the publisher—whom I am not at liberty to name—any suggestions which are sent me.

ASA DON DICKINSON,
*Librarian, University
of Pennsylvania, Pa.*

Poster Suggests Old Manuscript

To the Editor of THE LIBRARY JOURNAL:

As vice-chairman of the Committee on Exhibitions and Activities in Libraries of the Bimillennium Vergilianum, I am requested by Miss MacVay, the general chairman of committees, to request a notice of the official poster which has been asked for by many schools and libraries.

This poster is printed in black on dark yellow Della Robbia paper, which suggests the page of an old manuscript. It is 22 in. x 34 in. and can be ordered direct from the headquarters of the American Classical League, New York University, University Heights, New York City. The price is 50 cents for a single poster, or three for \$1.

You may also care to note in your columns three Vergiliana catalogs, one published by the New York Public Library, one by the Pittsfield, Mass., Athenæum, and one by the Newberry Library of Chicago.

HENRY B. VAN HOESSEN,
Librarian, Brown University.

Sloping Shelves

To the Editor of THE LIBRARY JOURNAL:

Since writing the article on sloping shelves, printed in the August number of *THE LIBRARY JOURNAL*, I have learned about the sloping shelves devised by W. E. Henry of the University of Washington which were used by him with great success and are in use in the Seattle Public Library. I mentioned only slopes produced by using the usual shelf pins, but resting the front of the shelf on higher pins than the back of the shelf. Mr. Henry's device uses

shelves projecting in front of the case, the lowest shelf more than the one above. Mr. Jennings of the Seattle Public Library writes that "both borrowers and assistants seem to like these sloping shelves." Not having seen these shelves, I have tested the idea for myself and find that, with a shelf projecting from two to four inches and with a slope of one inch in three or four inches, to me the titles on the bottom shelf are as legible standing the usual distance in front of a bookcase as those on the middle shelves. Of course, the greater the slant and projection, the greater the legibility. But even a small projection produces remarkable results. It is a simple matter to arrange for the sloping and projection of the bottom and next shelf. The projection of even five inches is not inconvenient for the person consulting the shelves, as he usually stands a foot or so from the face of the bookcase. If, therefore, adjustment on shelf pins is not sufficiently effective, projecting the shelves will be entirely effective and this solves the problem of making the lowest shelf or shelves usable with entire convenience. Any carpenter can arrange shelves for wooden bookcases. The makers of steel cases can attend to their cases. An easy way of treating the projecting shelf is to use a support of the projecting part of the shelf by using a 3/8 strip fastened to the exposed ends, using one nail or screw, the strip lying against the upright. Even a lath will answer to make tests to see what is the best position for the shelf. The back of the shelf will rest on any blocking (or the present shelf if immovable). Using one nail or screw at first which acts as a pivot, adjustments are easily made.

WILLIS K. STETSON,
New Haven Public Library, Conn.

"Thanks To Books" Reprinted

To the Editor of THE LIBRARY JOURNAL:

In response to repeated requests for our folder containing Stefan Zweig's "Thanks to Books," Northwestern University Library has reprinted it (with the addition of a brief note of appreciation by Dr. Charles Macaulay Stuart). The typography is by Mr. William A. Kittredge, of R. R. Donnelley & Sons Co. (The Lakeside Press) Chicago. We shall be glad to send a complimentary copy to any library requesting it—or additional copies at five cents each (which will just cover the cost of printing and mailing).

THEODORE W. KOCH,
*Northwestern University Library,
Evanston, Ill.*

Library Organizations

Diplomat Addresses Maine Groups

SELDOM has the Maine Library Association had a better attended or a more successful series of sessions than those held at Bar Harbor September 10 to 11. The usual pleasant social features were provided by the hospitable people of Bar Harbor, but the serious emphasis of the gathering was placed upon the raising of the standards of librarianship in the state of Maine. The requirements for library positions in other States, notably New York, were cited, and resolutions were passed tending to place Maine librarians higher in their profession.

The first event of the convention was a banquet at the Newport House at which Elmar T. Boyd, librarian of the Bangor Public Library, served as toastmaster. The address of welcome was delivered by Frederick C. Lyman, President, Board of Managers of the Jessup Memorial Library, in which he outlined the history of Bar Harbor. Mrs. Ada M. Britton, librarian of the Caribou Public Library and president of the Association made a graceful response. Mr. Henry E. Dunnack, Librarian of the Maine State Library, who had attended the conference in Los Angeles of the American Library Association gave an address "Maine to California with the Librarians," in which he eloquently described the wonders seen in crossing the continent, and the valuable accomplishments of the conference. It is no reflection on the other speakers to say that the outstanding personage present was Honorable Henry Morgenthau. His diplomatic career and very successful work as chairman of the Near East Relief in making provision for, and establishing in the already crowded country of Greece, one and a quarter millions of people driven out of Turkey are too well known to need comment here. Many have read of it in his book, *I Was Sent to Athens*, but to hear the story first hand was a great privilege and thoroughly appreciated. The Thursday morning session opened with a "Forecast of New Books," by Charles C. Campbell of Portland. Forthcoming publications are, of course, of great interest to librarians, and the speaker made his talk of practical help by giving brief prophecies concerning each of 109 books soon to be published, which would indicate their probable relative importance and value for a library. A lecture greatly enjoyed was "Man's Funnybone," by Dr. Edwin M. Wright, Profes-

sor of English Literature in Bates College. His review of humorous literature of all ages and all classes, and the psychology of its appeal was very scholarly, and his audience was also highly entertained by his own "comic relief." Routine business occupied parts of two morning sessions, but was of considerable interest from the fact that the treasury was revealed to be in such a prosperous condition. This very satisfactory state of affairs is owing to the drive for membership conducted for two years by the retiring president, Mrs. Britton. At the evening session Dr. Franklin W. Johnson, president of Colby College, delivered an address on school libraries. He made reference to the very successful efforts of different school librarians in cooperating with the teachers in furnishing the best available material for classes, and inculcating good study habits. By means of an illustrated lecture by Dr. Calvin M. Clark, Professor of Ecclesiastical History in Bangor Theological Seminary, the librarians witnessed the Passion Play, and viewed the interesting scenery and people of Oberammergau and its environs. On Friday morning the inspiring features of the Northeastern Library Convention at Swampscott were recalled to the minds of her audience in a pleasing talk by Mrs. Robert G. Stubbs of Hallowell, formerly of the Maine State Library. One delightful number on the program at Swampscott was the story telling by Mr. Cronan of Boston. Fortunately Mr. and Mrs. Cronan have a summer home at Deer Isle, Me., and they delighted the staid adults with their stories for children. Louis T. Ibbotson of the University of Maine Library was made president of the Association for the coming year.

An Institute of Inter-American Affairs

THE COMMENCEMENT season of June, 1930, was a very important as well as a very interesting one at the University of Florida. It was the twenty-fifth anniversary of the establishment of the school. The climax of Commencement was reached when the honorary degree of Doctor of Laws was conferred upon His Excellency Señor Don Orestes Ferrara, the Ambassador from Cuba to the United States. At this time the announcement was also made of the inauguration of an inter-American program. The University is establishing an Institute of Inter-American Affairs. The graph-

ical situation of the two continents adds much interest to the organization and the mutual benefits that may be derived by both North and South America. Present-day facilities of transportation break down the barrier of distance and make it all the more necessary that we understand our South American neighbors and know more of their interests and what they are thinking and doing. According to a statement of the Acting Director the Institute of Inter-American Affairs was founded with the following aims: (1) To foster international good will between the two Americas, (2) To hold conferences and institutes on inter-American affairs, (3) To stimulate interchange of ideas, (4) To encourage the exchange of students and professors between colleges and universities of the two continents, (5) To promote an interchange of cultural ideals, to stimulate specific studies common to the two Americas, (6) To promote inter-American interests in Agriculture, in trade and commerce, in education, in health, and in other fields of human endeavor. It is the purpose of the University to offer courses of special interest to the peoples of these countries. It is hoped that it will be possible in the near future to inaugurate the system of exchange of professors and students between the University of Florida and the institutions of higher learning in these countries.

Plans are under way for holding regular conferences in which agriculture, commerce, education and other subjects of mutual interest will be discussed. The first of the conferences will be held at the University in February, 1931, and will be given over almost entirely to the discussion of subjects in the field of education.

With the above in mind it is easy to realize how vitally the University of Florida Library is concerned with the development of the Institute in its various phases. The University Library will be the laboratory for much of the work done, particularly that concerned with the work of exchange professors and students from the various countries as they study and teach in our University. As yet the collection of these allied subjects is not large, but a bibliography of all material now in the Library has been compiled. Books are being purchased and periodical subscriptions are being placed as rapidly as funds are available. Letters have been written to the Ministers of Education and to the Presidents of the Institutions of Higher Learning in the various countries in hopes of establishing an exchange list and in this way secure much valuable material. The field is very fertile and it is hoped that much will be accomplished to the mutual benefit and pleasure of all concerned.

Among Librarians

SUSAN G. AKERS', Wisconsin '13, *Simple Library Cataloging* has been translated into Chinese by Samuel Tsu Yung Seng, director, Boone Library School, Central China College, Wuchang.

F. P. ALLEN, Columbia, has been appointed librarian of the Museums Library in the University of Michigan to succeed Mr. Kuster.

HALLIE DAY BACH, Pratt '29, formerly cataloger in the Eastern Kentucky State Teachers College Library, has been appointed librarian of the Henry Clay High School, Lexington, Ky.

NORA BATESON, Pratt '29, formerly reference librarian on the staff of the University of British Columbia Library, has been put in charge of work with rural schools in the Demonstration Library for the Fraser Library, British Columbia.

NORMA B. BENNETT, Pratt 1900, for many years librarian of the Madison, N. J., Public Library, has retired from library work and is living at Madison.

ELVERA L. BIANCHI, Simmons '25, is now librarian of the Norwood, Mass., Junior High School Library.

WILLIAM H. BREWER, JR., Pratt '29, has been appointed librarian of the Museum for the Arts of Decoration at Cooper Union.

MALVINA C. CLAUSEN, Wisconsin '12, was granted a master's degree by Columbia University after a year of study in the School of Library Service. She returned as librarian to the Oshkosh, Wis., State Teachers College Library in June for the summer session, having been granted leave of absence for study.

PEARL M. DAY, Pratt '28, formerly in the Economics Division of the New York Public Library, is now librarian of the public library at Larchmont, N. Y.

MADELINE DILWORTH, Simmons '26, has been appointed librarian of Limestone College, Gaffney, S. C.

MILDRED M. HAWKSWORTH, Wisconsin '28, was appointed librarian of Eastern Oregon Normal School Library, La Grande, Ore., in the spring. She has been the assistant librarian, Bradley Polytechnic Institute, since her graduation.

MRS. ELINOR HUSSELMAN will this fall resume her full-time position as Curator of Manuscripts and Papyri, University of Michigan Library, to which she has devoted only part time during the past year.

ESTHER C. JOHNSON, Simmons '16, has been appointed librarian of the Watertown High School Library, Watertown, Mass.

JOANNA KLINGHOLZ, Wisconsin '19, resigned as librarian of the Central High School Library, Flint, Mich., in July to become librarian of the Clifford B. Connolly Trade School, Pittsburgh.

MARGARET M. MCINTOSH, Wisconsin '27, has been selected as librarian of the Public Library, Fergus Falls, Minn. She has been on the staff of Connecticut College, New London, since her graduation.

STELLA BEAL MERWIN, Simmons '08, has become librarian of Jackson & Moreland Company, 31 St. James Avenue, Boston, a position she held a number of years ago, before she became Mrs. Merwin.

CHARLOTTE MICHAELSEN, Simmons '26, is now librarian of Thornton Township High School Library, Harvey, Ill. Miss Michaelson has been in Denmark for the last year.

MRS. ALICE PALMER MORRIS, Wisconsin '27, has accepted the position as librarian of the State Teachers' College, Morehead, Ky.

PAUL M. PAINE, who has been librarian of the Syracuse Public Library, New York, for fifteen years, was given a dinner by former staff members and trustees on Oct. 7 in honor of the occasion.

MARGARET REYNOLDS, Wisconsin '07, librarian of the First Wisconsin National Bank, Milwaukee, was elected president of the Special Libraries Association at its annual meeting in San Francisco, June 18-21.

JENNIE T. SCHRAGE, Wisconsin '18, has been appointed chief of the Traveling Library Department, Wisconsin Library Commission, to succeed Miss Long.

ANNA GRACE WOOD, Pratt '27, of the Brooklyn Museum Library staff, was married to Mr. Howard L. Turner on Aug. 2.

JANETTE WOOLSEY, Pratt '26, children's librarian in the Ohio State University Library, is working for a master's degree at the Columbia School of Library Service.

LUCILLE ESTHER WRIGHT, Simmons '28, for a few years on the staff of the Radcliffe College Library, was married Sept. 10 to Mr. Joseph Allen, Jr.

KWAN-TSING WU, of the University of Nanking Library, is the holder of a Carnegie fellowship for study in library work. He will attend Columbia University Library School during the present academic year.

Opportunities

(This column is open to librarians.)

Library school graduate with experience in both adult and juvenile departments of public library, desires position. K10.

Position in children's or branch department of some library wanted by year's library course graduate with teacher's college certificate and four years of library experience. References. K11.

College and library school graduate desires position. Experienced in reference, cataloging, college and school work. Prefers cataloging or combination including cataloging. K12.

College and library school graduate with a year's experience in cataloging desires position in a college or public library. K13.

Young woman, college and library school graduate, desires position as library assistant. K-14.

Children's librarian, experienced, with highest references, desires position. K-15.

College graduate, with certificates from Riverside and Columbia and three years' experience in public library, desires position in public or high school library. Reference work preferred. K-16.

Experienced cataloger, college graduate with library training and teaching experience, will be available Nov. 15. Would consider temporary position of six to nine months. Salary \$200. College library preferred. K-17.

College and library school graduate with teaching experience and some public, college, and university library experience, desires position in library at once. South preferred, but will consider other localities. K-18.

Books to Read

BOOKS TO READ, a classified and annotated catalog, published by The Library Association, was compiled by a joint committee representing The Library Association, The National Association of Boys' Clubs, and The National Council of Girls' Clubs in cooperation with the Carnegie United Kingdom Trust, London. This is an attempt on the part of these several organizations to offer to schools, clubs, and public libraries a careful selection of books for readers between the ages of twelve and twenty-one—the period of adolescence. The catalog covers all subjects likely to interest these readers and each book is extensively described and annotated. Publication of this catalog has only been made possible by the generous cooperation of the Carnegie Trust. Libraries, schools, and clubs may obtain twelve or more copies for 7/6 net per copy, twenty-five copies for 6/-, or fifty copies for 5/-.

The Calendar

Oct. 29-Nov. 1—Southwestern Library Association meeting at Dallas, Tex.

Nov. 6-7—New Mexico Library Association, annual meeting at Albuquerque, N. M.

Nov. 10—Arizona State Library Association, annual meeting at Phoenix, Ariz.

Nov. 20-23—Negro Library Conference, Fisk University, Nashville, Tenn.

Nov. 21—Illinois High School Library Association meets as Section of High School conference at Urbana, Ill.

Nov. 27-29—Southeastern Library Association, annual meeting at Tampa, Fla.

Dec. 29-31—Midwinter meeting of the American Library Association will be held at the Drake Hotel, Chicago, Ill.

Wanted

THE LAURENS County Library, Laurens, S. C., wishes to secure copies of *Booklist Books* for the year 1927, 1928. Apply direct.

THE GENERAL LIBRARY of the University of Michigan, Ann Arbor, wishes to obtain Vol. 8, Senate Executive Documents, 50th Congress, 1st Session, i.e., Serial No. 2511, in the Congressional Series. Apply direct.

Works on Measurement

ONE OF THE most unusual libraries, a collection of 1100 volumes devoted to "measurement," has been the gift to Columbia University Library by Samuel S. Dale of Boston. This unique collection dates from 1520 to the present time and contains as well some 700 pamphlets—a collection resulting from thirty years' research in this country and abroad. The Metric Association plans to add to this collection with special gifts from time to time.

A Library Makes Copy for Advertising

SOME OF THE AUGUST issues of *Printers' Ink* and *Advertising and Selling* carried full-page ads of Batten, Barton, Durstine, and Osborn with a picture of Mary Louise Alexander, librarian, and an interesting statement on what the Library Research Department is asked to do. The heading of the ad is, "Questions That Aren't Foolish." This is, we believe, the first time that a library has been made the main theme for an advertisement. The October issue of *The Ladies' Home Journal* also had an interesting article on "Women in Advertising," in which Miss Alexander was included, written by Catherine Oglesby.

=WHY ♦ VOLLAND ♦ BOOKS=

CHILDREN are not born knowing that green apples will give them stomach-ache; that vicious literature will clog their brains. Taste must be cultivated. And so we teach them. We give them ripe fruit for their stomachs and high thoughts for their minds.

But their eyes are hungry, too. The appreciation of color and line, the understanding of form and balance and beauty of design must be learned.

Open a Volland book: compare its typography, its color work, its every detail of paper and binding and finishing with any other book. No expense is spared, and yet how reasonably priced they are! A new edition of *Mother Goose* costs ten thousand dollars, and yet you can have this whole gallery, one hundred and eight beautiful and artistic pictures, for \$2.50, less the regular library discount.

✓ CHECK LIST

All these books should be on your shelves. Each one is a contribution to art education for the child mind. Full-page, full-color illustration throughout.

Mother Goose \$2.50
Illustrator: Frederick Richardson.

Old, Old Tales Retold \$1.50
Illustrator: John Rae.

Happy All Day Through \$1.50
Illustrator: Janet Laura Scott.

Adventures in Geography \$2.50
Illustrator: Gertrude Alice Kay.

White Elephant \$1.25

Little Peachling \$1.25

Announcing Ninth Edition 1930

WHO'S WHO IN RAILROADING

United States—Canada—Mexico
Cuba

(Formerly the Biographical Directory
of Railway Officials of America)

This standard authority on railroad officials of North America first appeared in 1885 and is now brought out under an improved name. The Ninth Edition has been completely revised and practically all the data presented was directly obtained from the persons concerned by means of questionnaires.

The biographical sketches have been expanded to include leading manufacturers of railway equipment and supplies, railway economists, members of regulatory commissions and others whose work is directly connected with the railroad industry. The information presented includes not only the significant facts regarding the business career of those included, but more personal information such as their family connections and social affiliations.

This edition was completely reset in easier read type and printed on high quality paper. The binding is extra strong and for reference libraries there is a buckram binding. The regular binding is in first grade royal blue cloth stamped in gold. Please specify the binding you want when ordering.

6 x 9 x 1 1/4 inches; 585 pages; 4000 biographical sketches; cloth or buckram binding; \$8.50 postpaid less library discount.

Employing Bookbinders of America

28 West 44th Street

NEW YORK CITY

November 5, 1930

To the Librarians:

I am writing this letter with regard to a controversy that has arisen as to the patent rights of the Oversewing Machine Company, and the claims by Messrs. Carroll and Rademaekers that its machines infringe upon a patent held by them. This has resulted in a good deal of correspondence, and the insertion of statements in trade papers, and particularly a letter, a copy of which has come to the attention of the Employing Bookbinders of America, signed by Mr. C. W. Carroll stating:

"In the next issue of the Library Journal, you will find legal notice to all Librarians, regarding the use of books which have been oversewed by the Oversewing Machine, as this patent has been infringed and all Libraries using rebound books sewed on this machine, are to be held accountable for the infringement, and to go back for a number of years and pay back royalties on every re-inforced and rebound book sewed on this patent.

"These patents are owned by the W. H. Rademaekers Son Company, who threatened suit against us. We held a consultation with our attorney and made settlement and also purchased a half interest in the patents. In other words, we are now co-plaintiffs with Rademaekers, and by your being our customer, we herewith wish to assure you that we will protect you on every book which we have bound for you. We cannot commit ourselves, however, on the re-inforced or rebound books which you have received from other concerns. I wish to assure you that we will stand back of our own work."

At the request of the Library Binders Group of the Employing Bookbinders of America, a meeting of the Executive Committee and the Advisory Committee was held at the Bar Association in New York on Friday, October 31, for the purpose of giving the Library Binders Group an opportunity to present their grievances to the E. B. A.

As a result of this meeting, and by resolution adopted by the Executive Committee and the Advisory Committee, I was directed as General Counsel of the Employing Bookbinders of America, to address this letter to the librarians, and state to them that the law is well settled that, as to libraries and librarians who purchased books sewed on the Oversewing Machine, they are free from liability. The patent in controversy is a patent for a machine for sewing a book, and not a patent on a book. The sale or use of the product of a patented machine is not an infringement of the patent. The sale or use of the product of the machine is not a violation of the exclusive right to make, use or sell the machine itself. Take, for example, a patent on a mill for the manufacture of flour. To construct a patented mill, or to use one, would be an infringement of the patent, but to sell or use a barrel of flour manufactured at such mill is no infringement of the patent. It therefore follows that no library or librarian or other purchaser of books sewed on the Oversewing Machine has the slightest liability. Regarding the statement of Mr. Carroll that he is a co-plaintiff with Mr. Rademaekers, my information is that no suit has yet been brought either against the makers or any user of the machine.

Librarians can pursue their normal course, can deal with any library binderies they choose, and send their books to be sewed or resewed as they please, without any interest in the controversy regarding patent rights, and I should consider it a great favor if any librarian who receives or has received a letter similar to the one above quoted would forward it promptly to me.

Very truly yours,

ALFRED E. OMMEN,

General Counsel, Employing Bookbinders of America

New...!

ANNUAL CUMULATIVE VOLUME

The New York Times Index

THE convenience of a full year's news completely indexed in one volume is now offered in THE NEW YORK TIMES INDEX ANNUAL for 1930.

Printed on imperishable rag paper, attractively bound in maroon art buckram with gold lettering. Approximately 3,000 pages.

This standard, indispensable work of reference, providing a service available nowhere else, will be an index to the world's news for the year 1930. It is alphabetically and chronologically arranged by names and subjects, followed by brief digests of news items, with the date, page and column notations as published in The New York Times. Full cross-references to persons and related events.

The date is a guide to important news published not only in The New York Times, but also in other newspapers and reference sources.

Cost of Cataloging and Recataloging and How It May Be Reduced

By Ruth Wallace

Chief, Catalog Department, Indianapolis Public Library, Indiana

WHEN THIS TOPIC was suggested, I thought immediately of the very comprehensive and interesting report of the A. L. A. catalog section committee on the "Cost of Cataloging," which was read at the Seattle Conference five years ago—i.e., 1925. This was the second committee appointed by the Section on this subject, and hope was held out that funds for an investigation might be available, if a well considered plan was presented.

REVIEW OF THE REPORT

The report was divided into three main divisions, i.e., Historical introduction; Analysis of the problem; Recommendations.

HISTORICAL INTRODUCTION

As early as 1905 Mr. William Warner Bishop summed up the question and concluded that the cost of cataloging could be computed in time and results but not in money. In 1912 Mr. Aksel G. S. Josephson raised the question, "What is cataloging?"

As a result the Executive Board of the A. L. A. appointed a committee to investigate the cost and method of cataloging. A questionnaire was sent out covering the questions: (1) What processes are included in cataloging? (2) Standard of workers; and (3) Cost per volume. Cost returns varied from 9½ to 90 cents a volume.

The Survey Questionnaire sent out in 1924 provided information regarding administration and the processes of cataloging. The chief criticisms of the Survey questions were: (1) That they did not call for a discussion of ad-

vantages or disadvantages of methods followed; (2) Absence of questions dealing with materials of a special nature, e. g. serials, periodicals, incunabula, music, etc.; (3) Terms were not defined; (4) It gave no information as to grade and proportion of work that can be done by clerical and technical workers.

The questionnaire of the A. L. A. committee on Library Personnel immediately preceded the Survey. One week's work was reported. Each worker reported the time spent on 125 kinds of work under fifteen main heads. Faulty conclusions were drawn in some cases because: (1) Clerical workers were reported as doing cataloging when they were only typing classification numbers and subject headings on L. C. cards; (2) There were groups which need defining, e. g., Research work is not restricted to cataloging but belongs to revision and classification as well; (3) No distinction was made between revision and revision of cards; (4) Recataloging, reclassification, work on serials, continuations and periodicals were neglected in recording time spent on cataloging.

The University of Illinois and several other University libraries in 1922/23 and 1923/24 divided total catalogers' salary budget by the total number of volumes cataloged. Results varied from twenty-eight to eighty-nine cents and show great variation of procedure and organization of catalogs.

Mr. Paul North Rice, formerly of the New York Public Library, now librarian of Dayton, Ohio, was asked by the A. L. A. catalog section and A. L. A. committee on cataloging to present additional suggestions for a study of cataloging costs. His report was given in 1924.

Paper read before the Ohio Valley Regional Group of Catalogers, April 12, 1930.

It included the following items: (1) That a uniform system of cataloging statistics be established; (2) That the cost of cataloging 100 average books be ascertained; (3) That record be kept in the testing libraries of items cataloged and proportion of time devoted to new work; (4) That proportion in salary roll for the work be estimated; (5) That result of cost of entire output be divided by number of pieces, to get average cost. Divide this result by that for 100 books; (6) That results from libraries of equal size and type be compared.

ANALYSIS OF THE PROBLEM

Factors involved in the cost of cataloging. This was discussed under five main headings, i. e., administration, physical conditions, hours of work, procedure, and statistics. By procedure was meant all operations from the time a book leaves the Order Department until it is set up on the shelves. There are forty operations listed under nine main heads. These are operations in the Catalog Department. Then there is the procedure of other departments.

The mutual relation of all departments has its bearing on the cost question: (1) Information known in the Order Department not passed on may require research on the part of the Catalog Department which is wasted time; (2) Information known in the Catalog Department not passed on to the Binding Department makes additional waste; (3) The Reference Department may discover a lack of references and procedure should be effected to conserve this information. Study of cost in procedure is most important. Business efficiency methods should be applied here. Higher price labor should be used only for professional work; cheaper grade of labor for all processes possible. Each member of the staff should be doing the most advanced work for which she is equipped.

RECOMMENDATIONS

- A. Appointment of a committee or board of catalogers to study cost of cataloging.
- B. Procedure suggested:
 1. Select a number of departments for intensive comparative study (two or three types and sizes of libraries)
 2. Analysis and definition of statistics
 3. Analysis of processes; mechanical, clerical, technical
 4. Analysis of administrative problems
 5. Analysis of interlibrary cooperative cataloging
 6. Establish a basis for cost comparison. Cost per volume in each of six types and sizes of libraries for: a, mechanical; b, clerical; c, technical work

7. Define three different processes
8. Study and report on procedure in different types and sizes so one may choose the best
9. Study cooperative methods saving useless repetition of time consuming processes
10. Study selective methods of cataloging to reduce costs, etc.

WHAT, IF ANY, INVESTIGATIONS RELATIVE TO CATALOGING COSTS HAVE BEEN CARRIED ON SINCE REPORT OF THE COMMITTEE IN 1925?

The subject was dropped so far as the A. L. A. Committee on Cataloging and A. L. A. catalog section were concerned. Miss Healy, Chairman of the Committee of 1925, writes that nothing more has been attempted. Certain investigations of Miss Harriet E. Howe of the Graduate Library School, Chicago, and of Miss Akers under her direction though carried out with entirely different objectives in mind, do have an indirect bearing on the subject. Miss Howe's investigations have to do with administrative problems. Miss Akers is making a study of fundamentals for cataloging courses. She listed 118 processes and asked eighty-four catalogers to check these to determine whether they should be performed by clerical or professional workers. So far all agree on half of the processes and on the other half the eighty-four catalogers are about evenly divided. This has a direct bearing on the grade and proportion of work to be done by technical and non-technical workers.

PRACTICAL SUGGESTIONS FOR REDUCING THE COST OF CATALOGING AND RECATALOGING

STAFF

Staff members should be chosen with great care because experimentation here is costly. Catalogers are born, not made. They should have technical ability and as a rule should prefer cataloging to other library work. Work should be assigned so as to give variety and relieve monotony.

As many typists and pages should be employed as can be provided with work in a given department. It is surprising how many processes can be successfully performed by them. Our experience indicates that typists should be high school graduates who have completed the course in typing at least and are recommended by their instructors. We sometimes secure girls attending college as part time pages.

When vacancies occur in the department it is fairer and more economical to advance members in the department (if possible) and fill in the lowest grade, i. e., those positions receiving the least pay.

EQUIPMENT

Much could be said on the broader topic of physical conditions but we will take time to speak only of two items of equipment.

a. The new Channel rolls for L. C. Smith machines make it possible to write below the center of the card more easily than with the regular platens provided for this machine. We have invested in seven of these. The new wide platens have advantages, though we have not yet purchased a machine so equipped.

b. Electric erasers: Electric erasers are needed, especially in the recataloging process. There are two good ones on the market: (1) The Weilco is probably the best but is very expensive, \$60. It may be purchased from the J. H. Weil Co., 1315 Cherry Street, Philadelphia; (2) Gaylord Bros. have an eraser for \$19.75. It is 4¼ inches high and weighs 3½ pounds, and is said to do excellent work. We are hoping to have one soon.

Cleveland Public Library has used an electric eraser for seven years and found it a great time saver. It also adds greatly to the neatness of work done. Their eraser was the invention of a dental student attending the University of Michigan and is not on the market.

HANDLING BOOKS IN THE DEPARTMENT

Cooperation of the Order Department is a great factor here. We have very fine cooperation on the part of our Order Department along this line. Books are sorted by them, and placed regularly on cases, shelves or trucks designated by us as being nearest the records to be drawn or for some other reason, the most desirable place from the standpoint of economy in handling.

SPECIAL CLASSES OF MATERIAL

There are three classes of material which we think are more economically handled outside of the Catalog Department: Government documents except a few cataloged as separates; Periodicals; Pamphlets except those which are worth cataloging fully.

THE UNIT CARD OTHER THAN L. C. CARDS

We shall mention this only as a possible topic for discussion.

RECLASSIFICATION (IN WHICH MANY OF US ARE INTERESTED)

In the "Cost of Catalog Committee" report the following statement was made: "Reclassification and recataloging vary greatly according to: (a) Size of the library; (b) Date of organization; (c) Changes on account of new conditions. A certain amount of reclassification is inevitable for any catalog as long as we

classify and catalog books representing topics which are going through their growing pains."

There are, of course, two types of reclassifying: (a) Reclassing from an entirely different system as the Poole. We have had experience in this for the last ten or more years and hope that another year will see us through; (b) Expansions within the same classification, i.e., Dewey expansion of European war books, also Sunday school books, etc. Sometimes it is necessary to anticipate Dewey and expand for ourselves, e.g., History of the theater in various countries. We have changed forty-one books by adding .09 and the additional points necessary. It is more economical to reclassify as well as to classify one class at a time. At least the same people should work at one class until it is finished. Familiarity with the class numbers, subject headings and cross references used from day to day saves time when done by one or two persons.

COMPARISON OF THE PROCEDURE FOR RECLASSIFIED AND NEW BOOKS

First with books in a different system. Before recataloging can be begun the heads of two departments at least must look over the books in the stack: the head of the Binding Department and the head of the department chiefly concerned whether Circulating, Reference, Technical, Art, etc. These decide whether the book can be mended or rebound and whether on account of date, subject matter or treatment the book should be discarded.

When L. C. cards are ordered we have found it advisable to pencil the Poole class number on each order. When cards come it is easy to withdraw the Poole shelf cards first, then put both in the books in the stacks before bringing to the Catalog Department.

Classifying and assigning headings require about the same as for new books. Revision is a little more complicated on account of the extra shelf card. The withdrawal of cards from the public catalog takes time. We have often left the cards for certain classes till the work is completed for them and then drawn wholesale from the old catalog for several letters at a time, e.g., M's, N's, O's, P's, were drawn in this way. The new catalog is consulted first now in every case, so this works very well.

For expansions in the Dewey classification the comparison of procedure and time spent is different. Here cards and books must be brought together (and as many copies at a time as possible) to save work of withdrawing records over and over again.

To secure twenty copies of a book, or half that number, from as many different branches

ALL INFORMATION
USING
LIB

with all the cards needed from each branch in anything like a reasonable time is the problem. We seldom wait until all are received before recataloging and returning books and cards to those branches which responded promptly. Many factors enter in, but six months or more is a long time to have records different in different parts of the system.

When handling such books we pencil at the top of the Union shelf card "changed from 940.91" for example, and make a temporary cross reference for the shelf list from the old number, author and brief title to the new number. Books and cards are changed at the same time whether for central or branches. As they are changed, O. K. is penciled after accession numbers. Res'd, meaning Reserved, and the date will appear after accession numbers for those not yet changed.

A slip with memorandum of the new classification number is clipped to the outside of each title before it is taken to the finishing room and placed on special shelves. This is a guide to the reviser of finished books as well. The verso of title page and book card are changed before being sent to the finishing room.

The securing of books at central either from the shelves or by reserving them, the withdrawal of shelf and all catalog cards, the erasing of class numbers and sometimes subject headings, all require considerably more time than for new books. Erasing electrically would be ideal. A typist can add the new class numbers.

Reclassifying and recataloging undoubtedly require one half as long again as new work and sometimes twice as long.

CLASSIFICATION OF THE SAME BOOK OFTEN DIFFERS IN DIFFERENT PARTS OF THE SYSTEM

1. Adult and juvenile (juvenile classification simpler)
2. Circulating and Reference (different symbol for reference books). If in Granger collection that notation should be added in a note.
3. Genealogy and Reference departments (County histories).
4. Government document collection (Add note but not the special notation of government document collection).

5. Different class numbers for other departments is not a great problem. The department heads concerned usually discuss a book in question and decide which will use it most. If for example the book is on Color and discusses the subject both from the standpoint of Physics and Painting the decision is made to put it in one place or the other. If in technical department a card is made for Color for the Art Department.

Certain books of history or travel are sometimes shelved in the Art Department because valuable for the illustrations. 391 is used for all books on Costume. Other cases such as the same book for Business Branch and the Art Department, or Business Branch and the Technical Department, are handled with little difficulty. Very rarely is a book put in different numbers in these cases. The branch librarians and department heads try to avoid one another's fields as much as possible. For the Art Department catalog we make cross references for some subjects as:

Furniture

For the technical phases of this subject (as manufacture, trade, etc.) see books in the Technical Department.

Consult union catalog on West balcony.

SUBJECT HEADINGS

Changes in subject headings are sometimes necessary. Radio is not an up to date example but shows what may be done in some cases. We wrote L. C. when it seemed necessary to begin using this heading. They recommended the following cross reference.

Radio

Under this heading are entered general works on radio transmission, published since 1925. Works published before 1925 and special technical works are entered under the heading TELEGRAPH, WIRELESS, or TELEPHONE, WIRELESS, as the case may be.

In conclusion we know of no way to avoid reclassifying, recataloging, and changes in subject headings, so long as libraries grow, the D. C. expands and nomenclature changes. To spend time in compiling the actual cost (at least so far as individual libraries are concerned) seems useless. Every worth while short cut whether in processes, equipment, or handling books in the department, should be carefully studied and used in order to reduce the total cost as much as possible.

Recent Tendencies in the Planning and Architecture of Central Library Buildings

By William F. Yust

Librarian, Rochester Public Library, N. Y.

ACCORDING to A. D. F. Hamlin, professor of the history of architecture in Columbia University, "The public library is one of the most highly developed types of buildings to be found in American architectural practice. . . . By careful study of the problems it presents, primarily by librarians and secondarily by architects, its requirements, and the best means and devices for meeting them have been more completely worked out and standardized than those of any other type of edifice except the modern office building. Taken as a whole, the libraries of the United States, large and small, represent American architecture well nigh at its best." That was said fifteen years ago. It is high praise, perhaps too high. It may appear later whether that judgment should be affirmed as it stands or modified.

The word "Recent" is so indefinite and the word "Tendency" is so difficult to define that a simpler title for this paper would be, "Some characteristics of central library buildings of the last ten years." Eleven of the larger central buildings erected during these years are in the order of completion those in Wilmington, 1923; Albany, 1924; Cleveland, 1925; Los Angeles, 1926; Houston, 1926; Pasadena, 1927; Birmingham, 1927; Philadelphia, 1927; Amherst, 1928; Queens Borough, 1929; Richmond, 1930. Buildings are under construction in Baltimore and Brooklyn; they are contemplated in Cincinnati, Milwaukee, and Rochester.

BIBLIOGRAPHY

One of the most telling evidences of the trend of thought in planning is what the makers and the users of plans have to say about them. A "Reference List on Library Buildings and Equipment," compiled by the writer and issued in April, 1930, by the A. L. A., is therefore appended to this article. Of its twenty-four entries, all but five bear the imprint of the last ten years, and over half of them were published during the last five years. Reference should also be made to a paper presented to this Association in 1916 at the Denver conference by Mr. Chalmers Hadley, entitled "Some Recent Features in Library Architecture." Several of the features pointed out by him have developed into real tendencies and are therefore emphasized anew.

¹Paper read before Library Building Round Table, A. L. Conference at Los Angeles, 1930.

²The American Library Association lends blue prints and pictures.

SUMMARY

They may be summarized under economy of construction, economy of operation, and, above all, enlargement and enrichment of service. Economy has always been a watchword. A new meaning lies in its application to the time and effort of the reader as well as to the cost of the service. Efficiency was a favorite word until it became trite. Rotarians and their like are now overworking the little word "service" so that it is in similar danger. And yet no one word has ever given better expression to the library ideal. The difference between yesterday and today lies mainly in the expanding conception of its meaning and a broadening attitude toward methods for its realization.

The librarian of today, like the first librarian, still has to deal with books and people. But neither the books nor the people are the same. Both have changed vastly in character and number. Where formerly there were a hundred books and a hundred readers, there are now a thousand books and a thousand readers. But the librarian's job is still to bring them together easily and effectively, not just a few of each but many books and many readers. The change, however, has not been merely quantitative. With the growth of the democratic spirit has come the conviction that "books are not for the few but for the many," and that each one of "the many" should receive larger consideration than was formerly shown to the few. And so the librarian is constantly endeavoring to increase the users and the use of books by making the books more accessible. Increased accessibility of books is the most significant characteristic of modern library planning.

CONTRIBUTING FACTORS

Among the influences which have been operative in producing change may be mentioned:

1. THE HIGH COST OF SITES, OF BUILDING MATERIALS AND OF LABOR, which increased so enormously during the World War that the building of libraries was decidedly checked. Due regard for these items still delays "enterprises of great pith and moment," and causes more thorough study of the economic factors involved.

2. THE RAPID ACCUMULATION OF LARGE BOOK COLLECTIONS. As libraries grow larger and available space smaller, the problem of shelf capacity becomes more acute.

3. THE INCREASING POPULARITY OF LIBRARIES due to increased population and a more general use of books by the rising generation.

4. THE DEMANDS OF THE AGE. Modern scientific developments and mechanical inventions have eliminated inconveniences that once were accepted as necessary evils. The automobile, the electric elevator, the airplane have revolutionized much of our thinking and developed impatience with the slow methods of the past.

5. TRAFFIC CONDITIONS, which affect location, approach and general layout of grounds.

6. ADVANCES IN ELECTRIC LIGHTING. Electric light is cheaper, under better control and more adaptable to building requirements and human needs than ever before.

7. LESSONS FROM OFFICE AND OTHER COMMERCIAL BUILDINGS, in which every square inch of rental area counts. Investments in these have been large, and a corresponding amount of attention has been given to their planning and operation.

8. LESSONS FROM BRANCH LIBRARIES. Branch libraries are the chief agencies for bringing books close to the people. When Boston started the first branch library there was so much fear about its effect on the central library that the poor little branch was placed on an island. The idea proved so harmless and wholesome that it was allowed to come on the mainland. Ever since then we have been learning from branches our most valuable lessons of how to make books accessible. Location in a community center, entrance on the sidewalk level, visibility from the street, open shelves, self help, friendly intercourse, these are all plants that have been largely fostered and developed in the popular atmosphere of the branches. Even in temporary quarters they have proved useful laboratories for experimenting and testing new theories.

9. CHANGE OF POLICY BY THE CARNEGIE CORPORATION WITH REGARD TO GIFTS. Andrew Carnegie and, later, the Carnegie Corporation was for many years the chief source of funds for new buildings. In the course of time certain suggestions on the part of the corporation developed into definite instructions, which were finally printed as "Notes on the Erection of Library Buildings." Although they were suggestive rather than mandatory, probably no four-page pamphlet on the subject has had a wider standardizing influence. In 1924 Mr. Hadley incorporated it entirely in his brief book on *Library Buildings*. These "Notes" aimed to secure "an effective and economical layout of the interior." They undoubtedly had a wholesome effect and prevented much waste of generous funds. They prescribed no specific architecture, and yet the deference with which they were naturally received ultimately

produced a more or less fixed type of building that is readily recognized. Now that these gifts for buildings have been discontinued, communities and architects are exercising greater freedom in the expression of their individuality. This freedom may not be producing better plans, but at least there is greater variety.

CIVIC CENTERS

An increasing number of large cities are developing civic centers. Several recent library buildings are located in such centers, where it was necessary for them to conform to the general architectural scheme of the group. The results are not all successful. In such an arrangement the library may profit by and contribute to the architectural effect which the community desires to accomplish. Unless there is sufficient detachment, however, the plan is almost certain to imply restrictions that will interfere with the best planning as well as future expansion. The dominant idea in a civic center is architectural effect. This is not in keeping with the principle of locating the library primarily for service. Unless the civic center happens to be in the best place for such service (which is not generally the case), the placing of the library in the civic center is a mistake.

The Classic Greek architecture long dominant in libraries large and small is still favored for monumental buildings, although modifications are frequent. A striking departure is the Los Angeles building with its spreading masses of concrete rising high in modern terraced formation.

ARCHITECTURAL STYLE IN LIBRARIES

It has required real courage as well as originality to break away from the traditional type of library architecture. Modifications came, however, and are still coming in response to the ever-present desire for variety and especially as a result of radical changes in our conception of proper library service and of the building features essential to its achievement. This movement is producing structures better adapted to their purpose and to local and climatic conditions.

REDUCTION OF WASTE SPACE

Conspicuous among these changes is a reduction in the large amount of space formerly allotted to permanent walls, halls, stairways, corridors and rotundas. It seems almost incredible, and yet we are told that in some monumental buildings fifty per cent of the ground area is used for these purposes, when it could be readily reduced to twenty per cent or less. Such reduction not only lowers the cost of construction but also the cost of operation

and makes the reader's approach to the books shorter and more satisfactory.

Economy of space through compact storage of books finds a most recent development in the rolling stack of the Toronto Public Library. This is a marked advance on the storage stack of England, and is the first of its kind in America.

Another wasteful arrangement that has been abandoned is the radial stack and its architectural accompaniment, the semi-circular wall at the rear, more costly to build than a straight wall and less easy to change in future expansion. The only method of enlargement is to tear it down and build anew. This feature was copied for years from the library exhibit at the Columbian Exposition.

GREATER FREEDOM IN PLACING BOOK STACKS

An immense gain for library planning has come through greater freedom in placing book stacks regardless of daylight. In former days, owing to the inadequacy of artificial light, one of the chief problems was to place the stack room where it could receive the largest amount of natural light. Many large buildings have the major part of one side or the rear marked with long narrow windows close together, extending from the ground to the roof, luring in the light between the long rows of book shelves. At best they worked only during the daytime. Furthermore, this arrangement forever shut off the light and air on that side of the building from readers, who needed it more than did the books. The books suffered from the light and the readers from the lack of it.

The great developments in electric lighting have completely changed this problem and made it possible to place the stacks wherever they are most accessible. The most thoroughgoing application of this principle is placing the stack in the center of the building, with reading, study and work rooms on all four sides. One of the earliest examples was in the Public Library of Portland, Ore.; another in Minneapolis; more recently in Pasadena, and the latest in Richmond, Va. More frequently this freedom is seen in placing the stack in the basement, which was early done in Springfield, later in Wilmington, and now in Baltimore. The Philadelphia stack begins twenty-five feet below ground.

LARGER OPEN SHELF SPACE

The open shelf idea is still growing. What is designated as the open shelf room constitutes one of the largest and most conspicuous units in every modern building. This is in addition to the fact that there are many books in reference and other departmental rooms to which readers have free access. Baltimore will have eight open shelf rooms instead of one, covering

the entire first floor and containing 150,000 volumes. In spite of the tremendous loss of books by theft, the plan is still regarded as economical on account of its saving in salaries of assistants and in time of borrowers. Of course the greatest gain is to readers, for whom this method changes the getting of a book from an embarrassing and at times exasperating experience to a simple, direct and fascinating adventure. The open shelf room is the best illustration of the spirit of the modern library, which has satisfying service as its goal.

STORAGE AT A DISTANCE

In 1902 President Eliot of Harvard appeared before this Association and outlined a method for relieving book congestion in central libraries by providing cheap storage for less used books at a distance from the main building, where the "overhead" would be less expensive. He had in mind a plan in which large libraries in a given region would co-operate. The idea has lain dormant for almost thirty years. Recently it was put into successful practice by the Providence Public Library, as described by its librarian, Mr. Clarence E. Sherman, in the July, 1929, number of *THE LIBRARY JOURNAL*. Since the plan was first suggested by President Eliot, automobile transportation has improved so much that book deliveries can now be made at a central library from a distant point within the city almost as quickly as they were formerly within the building. It is only a matter of time when other libraries without room for expansion will have to adopt this plan or some other method to accomplish the same result.

OPEN AIR READING ROOMS

The patio retains its position as an architectural feature in buildings of the South and southern California. In regions farther north the idea persists that an open air reading room on the roof or in a beautiful garden ought to be popular, but it is not. Either that type of reading is rare or people prefer to do it in the privacy of their own back yard. As those private yards grow smaller in size and number, there may come greater interest in public open air reading rooms.

PROVISION FOR STAFF

Good planning continues to recognize the importance of the human factor. In the commercial world more and more work is being done by machines, but the machines themselves require an increasingly higher type of operator. Exhaustive investigations by industrial plants into the effect of physical surroundings have resulted in the most modern provisions for the health, comfort and general well-being of employees with corresponding gain in qual-

ity and quantity of finished product. The regular workrooms of libraries are no exception in this respect. Likewise, commodious and well-equipped staff rooms for rest and recreation in a convenient and pleasant part of the building have become established features. It has been said: "The staff accommodations in the Philadelphia building should serve as a model for other libraries for a long time."

INSTITUTIONALISM

No trend of recent years is more pronounced than the attitude against the formalism and institutionalism of library buildings, a phrase which is broad enough to cover a multitude of sins of omission and of commission. Almost a quarter of a century ago, "Mr. Dooley" contributed this comic valentine:

"A Carnaygie libry is a large brown-stone, impenethrible buildin' with the name iv th' maker blown on th' dure. Libry fr'm two Greek wurruds, libus, a book, an' ary, sildom—sildom a book. A Carnaygie libry is archy-techoor, not lithrachoor."

Only two years ago a Springfield newspaper spoke of some libraries which have a "look of a prison where books are caged up and held incommunicado for life."

Some of the most loving tributes have come from librarians themselves. Mr. Charles R. Greene says we talk much about progress but "go on building structures not unlike armories, depots or post offices." Even Dr. Arthur E. Bostwick admits that sometimes the mere sight of the outside effectually keeps people out. "The old library forbade, or at least discouraged, use by the general public. It was a place for the scholar and for him alone."

Mr. Joseph L. Wheeler is more outspoken in his observations about "the old-fashioned idea that a library is a mausoleum or a fortress" with windows remote and aloft and a discouragingly broad stretch of stairs which the reader must traverse before reaching the building, or a long, laborious flight inside which he has to climb before he gets up to the service counters. Even some fairly recent monumental buildings do not make "the faintest attempt to induce the man of the street to come in. This doubtless is a lingering final relic from the libraries of a half century ago, which, in turn, copied the seclusion, remoteness and monastic spirit of the Middle Ages."

Another severe indictment comes from Mr. Samuel H. Ranck, who says: "The architecture of the average library building suggests a tomb—a place for dead ones. . . . The best advertising is that which comes from a well-served patron. But our libraries have thrown away one of the best means of publicity by locating their buildings where people must go out of their way to find them, and by so arranging

them that the passerby sees nothing but stone, brick and glass—things that suggest nothing of the joy and usefulness of books. . . . Every block that separates the library from the principal lines of movement of the people, every foot that people must walk from the sidewalk to the entrance of the building and then to the books, every step that must be climbed above the level of the sidewalk to reach the first floor, are all so many hurdles, barriers, which the people are obliged to overcome before they can get to the books. . . . The bad location and arrangement of library buildings in the United States are keeping hundreds of thousands of potential users and supporters away from them and out of them every day of the year." (*American Builder*, December, 1923.)

This dark picture may well be placed alongside the one drawn by Professor Hamlin. However, it emphasizes characteristics which, fortunately, are slowly vanishing. The very men who have been most severe in their strictures are contributing most to the trend in the direction of greater consideration for people and the means for more adequate service through the instrumentality of books. The major emphasis is shifting from buildings and even books to people to such an extent that we are now talking about humanizing the library building, a phrase also of sufficient breadth and potency to take away all the sins of "institutionalism." Three years ago, at Toronto, Dr. Bostwick presented a paper on this subject which voiced a widespread sentiment.

That sentiment proclaims a larger cordiality and hospitality through visibility of the interior from the exterior, so that every man as he passes by may "see with his own eyes"; "see crowds enjoying books and see attractive things in print through properly arranged show windows"; location of the building close to the sidewalk; the main entrance, "a beauty spot," on the sidewalk level without climbing long flights of steps on the outside or the inside; using the first floor as the main service floor, and so arranged that it forms an inviting book vista beginning near the entrance; admitting people directly to the largest possible number of books, and transporting them quickly to less used floors on higher or lower levels by means of public elevators. In the language of the statement outlining the principles to be embodied in the new Baltimore building, "Its very aspect must express friendliness, human understanding, closeness to the people, a large and impartial hospitality to all men."

DEPARTMENTALIZATION

Departments of various kinds have always been fundamental in library organization. There have been administrative departments; depart-

ments for groups of readers, as adults and children; departments for types of service, as reference and circulation; departments for special forms of content, as periodicals and newspapers; even departments for particular subjects, as art and technology. Subject departments have been created from time to time in growing libraries as they were warranted by the size of the collection or the public need or the size of the budget. Such departments in charge of specialists have existed for generations. What is recent about them is their increasing number and the breaking up of the otherwise compact stack arrangement and grouping the stacks according to departments. This arrangement was first introduced on a large scale in Cleveland and followed with some modifications in Los Angeles. Its essential features have been incorporated in the Baltimore plans.

Extensive departmentalization has passed the experimental stage in those libraries. By this method they have been able to develop a type of service which is the nearest approach yet reached to the librarian's ideal of personal service. The most important problem involved is that of expense. It is another case of "cost more, work more." However, by centralizing the charging and discharging of books, this cost can be reduced and the remainder centered on the more important aspects of library work. How far it will be adopted by other libraries will depend largely on the extent to which they can obtain larger appropriations.

The early meetings of the American Library Association were frequently enlivened by a discussion of antagonistic views on library buildings. The monastic, cathedral type with its lofty rooms surrounded by alcoves, galleries and balconies was championed by that great scholar, Justin Winsor. It was severely criticized by that other towering pioneer, Dr. William Frederick Poole. He advocated a type requiring a whole block of land, having the books stored not in one general repository but in a series of rooms thrown out as wings from the central part of the building, each of these rooms to contain the books on a special subject.

His ideas were finally incorporated, in part at least, in the Newberry Library. While that library has not served as a model for others, yet its ultimate plan marked a tendency in library planning, which has continued to this day in seminar and departmental rooms. Likewise, Justin Winsor's idea is still represented in the modern book tower twenty-two floors high. Thus we have a combination of these apparently antagonistic ideas resulting in ample storage for books as well as easy access and conveniences for their use.

How to Advertise Library Service to the Business Man

By Charles H. Compton

Assistant Librarian, St. Louis Public Library, Missouri

I WROTE AN ARTICLE at one time called "Adventures in Library Advertising." I like that title. There is a great deal in the attitude you take when you approach a problem. The definite problem now is "How shall the small or medium-sized library, with not much of an income, go about getting the interest of the men of the community in the service which the library can give them in their business?" If you will approach this as an adventure, you will get a great deal of fun out of it and you will get results. Library advertising still is an adventure, for in spite of all the talk about publicity in library circles, we have not as yet won the business man; we have made some progress to be sure. Methods of library publicity are pretty well known. I do not think I can tell you anything that you do not know and know better than I do, but perhaps I can say some things that will stimulate you and myself to put some of the methods into practice. That is what counts. I, at one time for about two years, sold life insurance. The home office was continually sending us schemes that would help sell more insurance. Our superintendent had a favorite saying: "Oh, any scheme will work if you will just work it." So in library advertising, it is not that we do not know the schemes, most of us do not work them.

I made, recently, to me a very interesting experiment with our library school class of about forty. I gave them the same question that you have put to me, just to see how they would answer it. I knew that they were a bright class and to be sure I had given them instruction in library publicity, but really their answers surprised me. Most of them have never had any library experience, but they knew exactly how to go about it to interest the business man and they did not advocate expensive ways, either. They even had some suggestions not included in Mr. Wheeler's mine of information. Most of them put something else into their answers and that is enthusiasm. I wish I could read some of the things they said about personal contact and knowing your community, and one even advocated reaching the business men through their wives. In all, they advocated some fifty different methods

and in large part they were perfectly good ones. The method which was advocated most frequently was talks before business organizations, Chambers of Commerce, Rotary, Lions clubs, etc. Some of the students did not propose to wait until asked—why should they? As one of them said, a woman speaking at one of these clubs might be unusual and be the better advertising on that account. She is right in that. Personal contact was repeatedly advocated, and one of them brought out one of the best methods. "Ask advice," she said, "of the business man. Ask him if he has any books to suggest. To be true, he may not suggest them, but often he actually can help you." When I was in Seattle and we were using placards, I got the very best advice from advertising men, which they gave gladly.

Perhaps I cannot do better than to run over rapidly methods advised by these students. Special shelf of business books in library; visits to plants and factories, take recent business books along and distribute lists; survey your community and know its industries; have an interest file for borrowers and send notices of appropriate new books to them; window displays in and outside library; advertise government documents, pamphlets and house organs; use the newspapers, especially the business sections, for library news, and include reviews of business books; library exhibits at general shows, like Better Homes; organize business men's club at library; telephone men about books in which you think they would be interested. This telephone advertising, as you know, is being used widely now. The reaction might not be good for the library, but you would soon find out by trying it. What could be more direct advertising? Advertise the telephone information service of the library—nothing makes more appeal to the business man or more impression. Other methods, such as handbills, street-car cards, paid advertising, moving picture houses, etc.

Now if a class in a library school knows of these methods, why should I be telling you about them? What I am afraid of about this class is that its members may not all in five or ten years know as much as they do now about library publicity. They'll get into the routine, they will lose their enthusiasm, they will acquire a few, perhaps more, prejudices, and

then someone will have to come along, as I do now, and talk to them about library publicity which may or may not do any good.

There is one method in library publicity that, of course, has been touched upon, but which has never attracted the attention that it seems to me it deserves. It has brought, in my experience, surprising results. It all lies in the fact that there is practically nothing of general interest which appears in the day's news to which library news cannot be connected. This applies just as truly to happenings in the business world as in any other. I tried this out as an experiment several years ago, when I gave half my time for one month to newspaper publicity. During that time fifty-five articles appeared in the four St. Louis newspapers, being equal in space to one and a quarter pages, and of the value of \$685 at current advertising rates. To illustrate this in general, when Lindbergh made his famous flight, we easily got good publicity on the call for books on aviation, naming some of the important titles. At the time of a Better Homes show, the library had a booth and *The Globe Democrat* gave a quarter page to the kind of books the library was exhibiting there. To be more specific on business books and how the news can be secured, let me give you some definite news items. You will notice that these are short and perhaps you may not think significant. However, I believe that short articles in the papers are really very effective. Always keep in mind what the space would cost if it were paid newspaper advertising:

LIBRARY REPORTS DEMAND FOR BUILDING PLAN BOOK: In connection with the announcement of the press that St. Louis led 106 Southern cities in building permits in October, librarian Arthur E. Bostwick calls attention to the increasing demand for books on building plans and details at the Public Library.

In addition to the many volumes on home plans, house decoration and planning of grounds which are constantly called for, he said that St. Louis architects are making great use of the large and growing collection of architectural works in the art department.

CALLS FOR FINANCIAL MAGAZINES: There has been a decided increase in the call for financial magazines in the reading room at the Public Library since the recent activity in the stock market, according to Arthur E. Bostwick, the librarian. *The Wall Street Magazine* and *The Commercial and Financial Chronicle*, published weekly, are in almost constant demand. The library subscribes for many other journals containing financial news, including one daily, *The Wall Street Journal*.

The library also has many excellent books on investments, both for the investment banker and for investors. Two of special merit are *The Stock Market*, by S. S. Heubner, professor in the Wharton School of Commerce, and *Investment Analysis*, by W. E. Lagerquist, considered by many the established authority on investments.

URGES READING OF REAL ESTATE BOOKS: The use of the Public Library's books on real estate by buyer

and seller is urged by Charles H. Compton, assistant librarian. This is the time of year when the real estate market is not so brisk and is a good time for the realtor to read up on his business, according to Compton.

Persons contemplating buying a little later can get many points on how to judge a house from some of the library books on real estate. Two of the more recent books are: *Real Estate Principles and Practice*, by P. A. Benson and N. L. North, both lecturers on real estate at New York University, and *Principles of Real Estate Appraising*, by J. A. Zangerle, formerly County Assessor of Cuyahoga County, which includes the city of Cleveland.

DEMAND FOR AUTOMOBILE BOOKS AT PUBLIC LIBRARY: INFORMATION OF ROADS IN ALL PARTS OF COUNTRY AVAILABLE IN REFERENCE ROOM. The demand at the Public Library for books on automobiles, their manufacture, repair and operation is increasing rapidly. There are now in the public catalog more than 400 titles on all phases of automobile manufacture and business, as well as practical books for the man who drives and repairs his own car. Duplicate copies of many titles may be found in the branch libraries.

The library subscribes for the best automobile road books for all parts of the United States. Anyone planning a cross-country or even a week-end trip will find useful *Motor Camping*, by J. C. and J. D. Long, which gives practical information on equipment, camps, food and health.

Now I want to give you an example of a piece of publicity which on the face of it may not seem to have much connection with business, yet it attracted the attention of one of the largest corporations in St. Louis, which made practical use of it. A statement was given out by a well-known American sociologist, which was given front page space in a newspaper, that eighty per cent of all married couples were mismatched. Far be it from me to enter into a controversy with a sociologist on such a subject, but I thought it incumbent upon me to show that the library was doing all it could to remedy this situation, if it were true, and, accordingly, I wrote a story for the newspapers.

COOK BOOKS IN GREAT DEMAND AT LIBRARY: PUBLIC SEEKS INFORMATION ON ALL PHASES OF HOME ECONOMICS. If people's reading may be used as an index to their thoughts, those who view the increasing number of divorces and women's activity in business and politics with alarm should be consoled with a report of the books most in demand in the public libraries of St. Louis. Many men are asking for cook books and records show that no class of books is in more constant demand the year around than those on all phases of home economics, according to assistant librarian C. H. Compton.

Whether this is to be taken as showing that men have decided to take woman's place in the home or whether both sexes have started a "back to the home movement," Compton does not say, but he does point out a statement by a professor of sociology to the effect that eighty per cent of all married couples in the United States are mismatched, and offers the supposition that the cause might lie in the lack of knowledge of the art of homemaking rather than inherent incompatibility, since so many people are evidently striving to perfect themselves in homemaking.

The titles of the popular books at the library suggest the interest extends beyond cooking and takes in finer points of home life. *Home Making Simplified* by Streeter; *Thousand Ways to Please a Family*, by Weaver and Lecron; *Successful Family Life on the Moderate Income*, by Abel; *Plain Sailing Cook Book*, by Browne; *Stag Cook Book*, by MacSheridan. and *Our Candy Recipes*, by Van Arsdale, are all favorites.

The library has about 400 titles on cookery in addition to many duplicate titles in the Central Library and the branches, covering cookery of all nations and special cookery for the sick.

This article immediately inspired the editorial writer of *The Globe* to write an editorial on the demand for cook books, in which he treated the subject in a light manner, but which nevertheless called attention to the very practical books which the library has on cookery.

A DEMAND FOR COOK BOOKS: The report of assistant librarian Compton that there is a heavy demand for cook books at the Public Library is an appetizing morsel of news. Both men and women, it seems, are eagerly seeking culinary enlightenment, devouring whole volumes and calling for more.

Here, truly, is food for thought. What is responsible for this craving for cook books? Has the public palate become satiated with the type of half-baked literature which the publishers have been serving, causing them to turn, as abruptly as if summoned by the old-fashioned dinner bell, to cook books. Perhaps, but there must be other reasons. The heavy demand for cook books may be the result of a general and insistent demand for lighter biscuits and other edibles, of an inner revolution that is more nearly a social revolution than that which the Communists talk about. Or it may be a welcome sign of increasing domesticity and a drawing away from the rush and rattle of modern life as centered in the cafeteria.

If so, the recipe for domestic tranquillity and the cure for the divorce evil may be found in the cook book. The applications for cook books by men is a disconcerting fact to be swallowed, but possibly this is an inevitable result of women's activities in business and politics. And the hunger for learning manifested by both sexes in their perusal of books on cooking serves as a reminder that literary taste is not the only taste which must have consideration by readers. Some such selection as Lamb's *Dissertation Upon Roast Pig* might have more literary merit than a cook book dissertation on roasting, but hardly the practical value. All of which proves the misconception of the poet in declaring that:

We may live without friends, we may live without books,

But civilized man cannot live without cooks.

He did not reckon with cook books, which are also indispensable, and in whose growing popularity there can be detected a delicious aroma commingled from juicy steaks, crisp pies, steaming puddings and other perfect dishes that would "tempt the starving anchorite to eat."

Now here comes the connection with business:

COOK BOOKS IN GREAT DEMAND AT LIBRARY

Many men are asking for cook books and records show that no class of books is in more constant demand the year around than those on all phases of home economics, according to assistant librarian C. H. Compton.—*Globe-Democrat* news story.

Men Invited.

The principal thing in publicity, like everything else, is constantly to be on the alert for opportunities of this kind. Personally, I do not think there is any library publicity which brings such returns for the effort expended as newspaper publicity. Nevertheless, I know from experience that it is much easier to get newspaper space in some cities than in others. It certainly is easier in St. Louis than it was in Seattle.

There is another discovery which I have made: Newspapers love statistics. You notice that I did not say newspapers like statistics; the affection is much stronger than liking. We have been feeding them stories from our monthly statistics for six years and there has never been a time when at least one of the papers has not printed a story on them. We try to vary them. These stories are often only two inches in a column and then again more space is given to them, but it is not our intention to send them in extended form, for we have better success in getting them published by sending them in about the length in which we think they will be used. To give you an idea of how they can be varied in character, I might give you the headings and contents for a number of them.

NEW REGISTRATION RECORD MADE AT PUBLIC LIBRARY. This points out that 3421 new registered borrowers were added to the public library and 1788 persons renewed their cards during the month of November. Cards in force December first totaled 133,753, of which 41,356 belong to men, 48,710 to women, and 43,642 to children. Another month the heading reads: 225,215 Books in October. The public library shows 11,628 increase over the month for last year. The month shows a circulation of 6,341 per day. Of this circulation 125,000 were issued to children under fifteen years of age.

Another heading is:

LIBRARY SETS NEW MARK FOR JANUARY CIRCULATION: Fifty-two per cent were registered in branch libraries and forty-eight per cent in Central. The largest circulation in any branch was at Barr Branch with 17,263 volumes.

Another heading:

FIFTEEN BOOKS A MINUTE LOANED AT PUBLIC LIBRARY: Every four seconds that the Library and its branches are open somebody takes out a book. That means fifteen a minute or more than 11,000 daily for the month of February.

I see no reason why statistics of the use of business books and other business material would not prove successful newspaper publicity. Please remember, newspapers love statistics.

I have left the most important question to the last—undoubtedly in my opinion the most important problem facing not only the small and medium-sized library but every library. I am going to change slightly the wording of the question that has been put to me as follows: "How shall the small or medium-sized library, with not much of an advertising budget, go about getting the interest of the men of the community in the service which the library *could* give them in their business if it had adequate funds?" No one has answered this question. Our publicity has not been directed to this end. I think it undoubtedly can be said that it must be a combination of nationwide and local publicity. It quite rightly might be publicity sent out from A. L. A. headquar-

ters and publicity sent out by hundreds of local libraries.

With one definite suggestion, I shall conclude. The A. L. A. needs a Statistical Department, the establishment of which the Council has approved. Publicity showing the needs of libraries must be based on facts. A Statistical Department would deal with facts. We have not as yet convinced the business man or the public generally as to actual value of library service. It will, in my opinion, take many years to do this. Librarians of the Business Section of the A. L. A. are in a better position to convince the business man than the rest of us, for you deal in tangible definite material. You talk the language which he understands. So instead of answering the question which you put to me, I have left one for you to solve. This much I shall say: You have come nearer solving it in the libraries of the Pacific Coast than in many of the older, more conservative parts of our country.

The Adolescent Challenge

By Sarah Allen Beard

Children's Librarian, Brooklyn Public Library, N. Y.

ADOLESCENTS are a people elusive to understand. All the same, they merit an effort on our part to see them as they are, not as we imagine them to be. Early childhood has claimed our attention of late years by the increased emphasis on theories of education, mental and physical. The present national investigation of children bids for a renewed vision of a truly golden age. An equally large group, which belongs neither with children nor with adults, we are prone to label mentally still "green behind the ears," dismissing them with a smile save on occasions when they arouse our righteous wrath. These observations are offered in the hope of arousing or deepening a regard for the age so often called awkward and difficult.

Two pictures come to my mind. First, the group of high-school boys and girls of an average well-to-do American suburban community who trooped into the library. They came in flocks just after school was let out for the afternoon, and again at night before the movies began, taking possession of the stacks and the lobby. Within reasonable limits they were well-bred, but gigglings and flirtations cropped up spontaneously, until the librarian often sighed with relief when the "gang"

moved out with its books. One evening the librarian noticed a tall lad making remarkable sheep's-eyes through a vacant space on the book-shelves. Unseen by the boy, the librarian manoeuvred to the section where stood the lady of his affections, causing her to move on. When next the boy glanced up from the book he had been using as an ostensible decoy, he found himself gazing soulfully into the disconcerting spectacled eyes of the librarian. The change in his expression was ludicrous. Indeed, the librarian had to strive to keep her face impassive and innocent of guile. However you regard the intermediate assault on the peace and quiet of the realm of books, how different in conduct is the type of elderly borrower who lifts eyebrows at this nonsense, but in the next breath begins to chat with an acquaintance about Mrs. Z's garden party or Mr. J's fishing trip?

The second picture is a fairly large group of people being harangued from a step-ladder by a stripling lad in knickers. He is followed by an immature girl who appears to be just out of grammar school. In a foreign neighborhood of an industrial city, a communist meeting of this type is a frequent sight these days. But the youthful members who form a

considerable part of these social demonstrations do not know what they want—have no real sense of values. Here are two types of adolescent with which the library meets: the one more or less sheltered through its maturing years by the school or college environment, the other a product of our modern industrial era.

We have been impressed with the importance of the first few years of early childhood as the time when future personal characteristics are molded. Perhaps you have been asked often for the latest books on child-psychology and training. By the time the adolescent age is reached imperceptibly, enthusiasm has died down on the part of the parents. Apparently they give up the chase in helpless resignation. A wide-awake, intelligent woman, who was active in the community, said to me in exasperation one day: "Perhaps my daughter will believe you, if you tell her such a book is trash. She won't take anything I say." The daughter flushed a becoming pink and of course stuck to her choice. The very thing the adolescent needs is denied, not intentionally, but because of the tradition that youth is in need of discipline and conformity. A member of the medical profession has suggested that there has been an apparent unwillingness to view this problem as one concerned primarily with the environment and the faults of our present structure in its effect upon growing young people.¹ If institutions and people were more aware of their own defects, exhibited in hidebound opinions, lack of sympathy with views other than their own, there would be more constructive encouragement of the positive tendencies of this impressionable age.

The public library has the opportunity of becoming an increasingly important part of the social environment of youth as the field of knowledge widens and the machine age gives us all a larger proportion of leisure. It is a definite challenge to be met. The young person of today is mentally older than we were at the identical period. If you doubt this, compare with that of your own day the content of the studies which concern the present high-school generation. They all must have wider horizons and a freer range of ideas as a result of this broad acquaintance with various types of books. The youngest member of a large family picks up all the big words his older brothers and sisters use. The human race as it progresses is much like that. The difficulty for us is to keep a step ahead, until youth settles down into the fixed patterns of life, as most of us do sooner or later.

In theory, at least, surely we all agree that everything the library possesses of value should be available to the young whenever they reach out for information or turn to us for their recreational reading. If we can hold their interest over the period of development or leave an impression of friendly cooperation in time of need, we shall be assured later, to our mutual benefit, a generation of library-users. Michelangelo at sixteen was working in the Medici Palace. Lafayette sailed to the help of the American colonies at nineteen. Peter Cooper at eighteen determined some day to build what is now the Cooper Union. Such examples should open our eyes to the latent possibilities of the youth we serve.

Adolescence has been defined as that part of a human being's life containing the dynamics of future development along lines of the utmost achievement of which he is capable, no matter how notable or insignificant that achievement may be. Because life is a continuous process in growth, childhood, adolescence and full maturity merge insensibly one into the other. Along with physical changes there is an increase in intellectual acquisitiveness, although often these do not correlate. The adolescent strives to accomplish before he is able to achieve. At the beginning of this increased power of mental absorption he seems to us more than usually stupid or dull. A sense of personal awareness, which marks the development of a primitive beginning of introspection, is asserting itself, with its effect on the formation of the inner life where are grouped the things that seem most precious and worth-while. The richness and variety of this inner world differ immensely, but some trace of it is always to be found, even in the dullest. The question mark is more important than the period to youth. And when the world is apparently misunderstood, the adolescent turns away from reality into a more glorious and fascinating place in his own mind. There he walks heroic, the center of things, a pastime called by elders day-dreaming. There is, too, a reawakening of childish fears in the presence of a world more definitely present but less understood. This reveals itself in the shyness, awkwardness, reserve, and other qualities familiar to us.

There comes a moment when the adolescent becomes partially or completely aware that he is living in a world made up of socially rigid structures. The world he sees through the local grouping of relatives, friends, and people with whom he has repeated contact. This group is relatively unchangeable, whereas the adolescent personality is growing and constantly developing. In place of blind obedience and acceptance, the spirit of inquiry is

¹ Schwab, S. I. and Veeder, B. S., *Adolescent*, 1929.

outstanding in youth, because he is attempting to establish the material of his beliefs on a basis essentially his own. There is a distinct difference to be grasped between mere disobedience and the apparent adolescent refusal to conform. Although he begins to question the source which supplies the materials of his beliefs, the undercurrent of criticism directed by it against other groups not like-minded is an important element in his personal reaction to the social organization of which he is a unit. This is where establishment of the spirit of tolerance, so very important for society and the individual, so often fails, because of a lack in the environment. At this period of life, with its sharpened realization of beauty and concepts of ideas larger than self, there should be the freest play of the spirit for its own sake. Those who continue their formal education have here a far better chance than the young people who enter industrial life early. We are apt to pass over this latter group in the library, thinking that little can be done for them.

Thomas Burke has written of his experience at seventeen in a lodging-house where he was so miserably lonely that he saw all things in a bitter light. The sight of wealth aroused in him a helpless rage. Oppressed by dull routine, he seemed a mere cog in the vastness of industrial machinery. This sort of thing explains the youthful rebel against society. Burke observes that youth is regarded in the abstract as a time of dreams, with new things waiting for discovery at every corner. Its only claim is that it is the starting point. No one ever really wants to repeat the spiritual unrest, the chafing of the soul, of that time.

The adolescent finds an escape from his environment in one of various ways: most often by conformity, frequently by running away mentally or actually. Rationalization is rare. The intellectual complaisance of this type of adolescent is difficult for us to understand, and we are apt to have less patience with him. The most interesting group is that which cultivates a special interest. With an intense enthusiasm the young person forms a liking for subjects which seem often trivial or queerly selected. At this point the library can lend a sympathetic and helping hand. What are the means of holding this quicksilver-like group? Whatever our understanding of the age in general, an understanding of the individual is necessary for the greatest success. Although it is a wise policy for all ages, we should treat particularly the adolescent borrower as an individual.

We begin our work with the idea of personal interest in human beings, but desk-routine and the multitudinous demands made upon us make

it very easy after a time to drop into the self-protecting shell of the mechanical library robot. Sometimes this is conscious. Often it is unconscious. In the person on the other side of the desk it produces several different reactions, all of them unfavorable. A friend was skeptical when I decided to go into library-work. She said she never dared in high-school days to ask the public librarian to help her find a book, because she always looked either forbidding or too busy. So it is well to keep a friendly eye out for the type we often see wandering about as though they were in the Minotaur's maze. If you have several people on the staff, it is a happy solution to have one assistant responsible for the adolescent group.

If a friendly outgoing spirit pervades your library, that is a good beginning. The next step is to create an attractive library environment. To the age that begins to take great pride in clothes and doing the right thing, an attractive room means more, just then, than at any other time in life. In the intermediate department of the Brownsville Children's Branch, Brooklyn Public Library, the simple curtains at casement windows, the growing plants, and an odd piece of pottery here and there, have no small part in ministering to the aesthetic needs of the young people of that crowded neighborhood. The modern business world no longer makes its stores and offices as bare as a laboratory. When we think of the sometimes really beautiful interiors and conveniences that make shopping a pleasurable task for the patrons of a particular establishment, we might well take a leaf from their notebook. It is not a matter of expensive equipment necessarily. Simplicity and order and fresh air that drives away the musty, bookish air which thrives in libraries, a flower, or a lovely picture, are really all one needs to create an atmosphere that actually entices people to take an extra book along.

This brings us to the basic material for which we exist as an institution. The modern young person demands facts. This is manifest in his choice of realistic fiction, biographies, and informative books of various types, particularly in the field of science. It is no longer enough to supply the traditional collections of standard novels. There should be no idea of compulsion about reading them to discourage a budding literary taste. But they should be present in the most attractive editions you can lay your hands on, with readable print and fine illustrations. There should be with these also unusual worth-while books not so well known. Recent books should be promptly tried out. Now and then there can be at-

ranged table exhibits of books on a subject of interest to adolescents.

The other day a slip of a girl came in and asked for a history of philosophy used in a university course. She explained she was writing a short story and needed the philosophy for the background. Not having the book at hand, I offered a volume of Maeterlinck's *Essays* which was on the shelf. The girl looked over the contents-page rapidly, and read the chapter-headings—the awakening of the soul, the inner beauty, and the like—and with eyes shining, exclaimed she could use that, and went off with it. You may think she was a bit exceptional. She didn't look it. To mention a different type, there was the seventh-grader who read everything she could find on animals and nature in the children's room. When that collection was exhausted, I started her on the adult collection. She was an instance of the pre-adolescent with a special interest; and in her case it would have been unwise to forbid excursions into the adult department, simply because she was of a certain age.

Someone has said that the ideal possession of any library would be to have a room where people from eight to eighty years would find

something to enjoy. There are books like that. You will remember, in *Journey's End*, where Lieutenant Osborne is asked by the unimaginative Trotter what he is reading. He hands the book over (it is *Alice in Wonderland*), saying: "Ever read it?" Trotter replies with a silly grin: "That? Naw. Why, that's a kid's book." And then Osborne quotes something from it that makes them both laugh and forget for the moment the ghastly war outside the dugout. If this sort of room is beyond your reach, for one reason or another, in any event do not make the adult department forbidden to youth, but only a more difficult land to be explored when they are worthy of it.

Antagonism, ridicule, or objection, which the adolescent meets with inevitably in his daily life, surely can be banished in the library whose wares represent the free play of ideas. I am not advocating that you make the adolescent feel he is the most important person who enters your portals—only that you treat him with tolerance and forbearance as an individual, from the brightest to the dullest. You will find it an experiment that rewards you with endless interest and makes the bookshelves shine in youth's eyes with reflected glory.

A Change for the Better

By Rebecca B. Rankin

Librarian, New York Municipal Reference Library

SOME YEARS AGO, seventeen to be exact, a Municipal Reference Library was established by the City of New York. At first, it was created as a bureau in the Department of Finance under Comptroller Prendergast and occupied two rooms with that Department at 280 Broadway. Within a year or so, the Municipal Reference Library was moved, as were all Departments of the city government, into the newly completed Municipal Building. The Library was assigned to quarters on the Fifth Floor near the Comptroller's office. By this time, the supervision of the Municipal Reference Library had been transferred to the New York Public Library which agreed to administer the library primarily for city officials and employees, and the city assumed responsibility for its financial support and for the housing of it.

The Municipal Reference Library began with a very modest collection of books—the nucleus being the books already in the Finance Department. It was augmented by the addition of the City Clerk's library, and by gifts

from all departments, acquisitions from the New York Public Library and the Bureau of Municipal Research. These books and documents collected and selected with care formed the basis of the Library's growing collection.

The Library's field of specialization has been carefully limited in order that the needs of the city officials and employees may be best served. During the years the acquisitions have been made with the uses to which material might be put always in view. It has been the purpose of the librarian to keep a working collection—and to keep the collection as small as possible and at the same time consistent with demands. The growth in number of books and pamphlets, even under such strict limitations, is from approximately five thousand volumes in 1913 to fifty thousand in 1930.

The selection of printed material for the Municipal Reference Library falls into these general divisions:

1. Publications of the City of New York.
2. Publications about the City of New York by civic organizations and others.

- 3. State of New York documents affecting city affairs.
- 4. Maps, atlases, charts of or about New York.
- 5. New York City history and biography.
- 6. Publications of and about all cities of the world above 100,000 in population.
- 7. Other States' publications affecting municipalities.
- 8. Periodicals touching any field of civic activity.
- 9. Books on all subjects pertaining to municipal government in its many aspects, as finance, accounting, law, police, fire, public welfare, etc., etc.
- 10. United States government publications relating to municipal affairs.

The Municipal Building, New York City, in Which Is Housed the Municipal Reference Library

It is not necessary to mention that ephemeral material as pamphlets and newspapers and serials of all kinds are included in these types of acquisitions.

As the Library aims to have on its own shelves the minimum amount of material consistent with efficient service to the city departments, and officials, material is borrowed freely from other libraries, both public and special. The cooperation extended by all the libraries in New York City is quite remarkable. In lieu of a large collection of books, the library aims to have an adequate collection of bibliographical aids from which the important publications on any subject can be located quickly. The library itself compiles many bibliographies on special subjects: many are printed and others mimeographed for distribution.

In the Library's quarters on the Fifth Floor in the Municipal Building, the collection had outgrown the capacity of its three large rooms. The total space of 6030 square feet housed on

open shelves the fifty-thousand volumes and provided as well, reading rooms for dozens of city employees. Every inch was used; and still the library was crowded in both shelving and table space. The problem of increasing the shelving was an imminent one and was under consideration by the librarian.

At this time, early in 1930, many of the city departments were likewise facing the problem of overcrowding. Therefore the Sinking Fund Commission, the official body which allots space in the Building, made a thorough survey of the situation, and the requests of departments for additional space were considered. The result was the relocation of many bureaus and departments. The Finance Department needed much additional space due to its increased staff and additional functions and as the Library was located on the Fifth Floor with that Department, it was found necessary to move the Library. Space on the Twenty-Second floor of the Municipal Building was

assigned to the Library by the Sinking Fund Commission. The choice of the librarian for the southern end of the building was graciously granted. An increase in floor area of twenty-five per cent was provided for by the Commission.

From February until May, the librarian was occupied in drawing plans for arrangement of the new quarters. She was given freedom to arrange the given area in any way desired, only not to change structural building sup-

Plan of space on 22nd Floor
assigned to MUNICIPAL REFERENCE LIBRARY.
Before moving.

ports. However, as few as possible structural changes were made because it would mean more expense and more time for mechanical work. A wide public corridor divided the space allotted but the authorities granted the privilege of incorporating this space into the library rooms. This increased by 600 square feet the original floor area allotted.

The mechanical work of preparing the new quarters for the Library in accordance with the plans of the librarian proceeded rapidly. Walls were torn down in some places, new ones erected in others, doors cut, electrical wiring was installed, telephone wires put in, walls repainted, woodwork cleaned and polished, radiators regilded, new lighting fixtures hung; and after the book collection was moved, new cork tile floors were laid, and new window shades hung. No details were overlooked and there were hundreds of them to be taken care of. This work under the supervision of the Borough President of Manhattan's Office and the Comptroller's Office was efficiently executed.

A comparison of the floor plan of the south end of the Twenty-Second Floor before the Municipal Reference Library moved in and after it was installed in accordance with its plan may interest librarians. The same steel shelving erected on the Fifth Floor by the Library Bureau in 1914 was taken down and reset on

the Twenty-Second Floor. Some new shelving was added in two rooms. The same library furniture is used. But the net result is a very different library. It is felt that many improvements have been made, as the rough drafts of plans accompanying this article illustrate.

Twenty-two stories above the street and above neighboring buildings provide excellent light and air and sunshine. With windows to the east, the south and the west and even to the north, the library is unusually fortunate. Every desk and every reading table is beside a window. The stacks have all been set in the center of building, leaving the space along the windows on all four sides available to the public and staff. No stack is longer than eighteen feet and the daylight penetrates to the center of the stacks. At this height the views over the city, overlooking City Hall Park, the East River and the North River, are excellent. The towers of lower New York

as well as mid-Manhattan's are fascinating sights to the readers in the Municipal Reference Library.

The moving of a library of fifty thousand volumes is considerable of a task. A careful planning is the important element. The plan

MUNICIPAL REFERENCE LIBRARY
Room 2230 MUNICIPAL BUILDING
NEW YORK CITY

After moving

Area - 7730 sq. ft.

of the old library was laid out showing on the diagram the actual footage of books on every shelf—and the same amount of footage was transferred to the shelving on the new plan. It was known in advance the exact placing of all classes of books. Expansion was allowed for. The order of moving was scheduled as carefully. The great difficulty was that the steel stacks from the Fifth Floor had to be taken down; therefore the books had to come off before the stacks themselves came down. Time also had to be allowed for the resetting of the stacks before books could be replaced on the shelves. This difficulty was partly overcome by the fact that we had some new stacks which were erected first. The books to fill those particular stacks were moved first, and the stacks then emptied were taken down and reset on the Twenty-Second Floor, and those in turn filled. It was soon discovered that the stacks could not be knocked down and reset with as great rapidity as the books could be moved. Therefore the method of moving the books had to be revamped to suit the conditions.

A truck specially designed by an engineer in the Borough President's office was ideal for moving the books. Each truck had a body, perfectly balanced on a heavy six-wheel base, made of four 3-foot shelves on each side—eight shelves in all. One truck would carry more than a section of seven shelves. The truck could be pulled by one man, met at its destination by another helper, and the two emptied the truck in a very few minutes. Three or four trucks were kept going in a steady stream by two fillers, three or four men to pull, and two to empty. About one-third of the book collection was moved in this expeditious way.

When the moving progressed faster than stack erection, boxes were resorted to. Each wooden box held one shelf of books and ONE ONLY. The packing and labelling of every box was supervised by a member of the staff. The boxes on arrival at the new library were stacked in order near the spot where the stack was to be erected and the books were to be placed, supervised by a member of staff fully

instructed in advance. The first third of the library which was moved on the trucks was done in parts of four days. The two-thirds packed in boxes were moved by a large corps of professional movers in less than three days. This included as well the moving of all library furniture and equipment. During the whole process of moving the books were always available, even though still packed in boxes because the boxes were placed on their sides (à la war day fashion) except for a few days while cork tile floors were being laid. The majority of stacks were taken down and moved upstairs in the same three days that the books were moved. The erection of the stacks, due to waiting for some minor parts, consumed the most part of a month. But library service was continued through it all. The laying of the flooring after the stacks were erected was the great hindrance to a settled condition, as it was necessary in some cases to handle furniture three or four times. The delay in the laying of the floor was the only mechanical part of the preparation which did not go according to schedule; it caused the only confusion in the moving, and was the only item which prevented the library from giving continuous service during the period of moving. None of the library's activities were discontinued; the *Notes* were published regularly each week, and the radio talks were uninterrupted. All of this was accomplished by careful planning, and through the almost superhuman efforts of every member of the staff who worked long and laboriously and harmoniously. The splendid cooperation accorded the Library by the city departments, particularly Comptroller Berry and his assistants in the Department of Finance, and Borough President Miller and his staff explains the smoothness with which a project of this kind could be accomplished.

The Municipal Reference Library in its more commodious and pleasant quarters aims to give even better service than previously. The appreciation for the Library by the city officials which is shown by their ample provision for it shall be doubled, we hope, by the Library's continuous good service.

THE LIBRARY JOURNAL

November 15, 1930

Editorial Forum

THE MID-WINTER MEETING at Chicago will be of unusual interest because of the expected report from the Committee on A. L. A. Activities, headed by Charles H. Compton, assistant librarian of the St. Louis Public Library, as chairman, in association with Miss Gratia A. Countryman, Minneapolis librarian, and H. H. B. Meyer, chief bibliographer of the Library of Congress. This committee gave concentrated attention through a two-day session to the current criticisms and suggestions in part elicited in response to inquiries sent out by the committee, and it has prepared a careful report which will be printed sufficiently in advance of the December meeting of the Council for full consideration and comment by all A. L. A. members. The committee has gone thoroughly into Headquarters methods, has attended meetings of the Executive Board and of several of the leading committees, and has in every way endeavored to obtain a full conspectus of A. L. A. operations. It is to be a full and frank statement of fact-finding and suggestion, and should be met as frankly throughout the Association, not with a spirit of carping criticism but of helpful cooperation in obtaining the best results possible from the remarkable organization which the A. L. A. has developed in the library field. Nothing better could be hoped for in the interest of the profession.

THE ANNOUNCEMENT of *The Library Quarterly* marks one more wave of the overwhelming flood of professional literature. Those who feel overwhelmed by the vast amount of important and inviting printed matter must realize that in every important field there is the same situation. Each individual has to select, and to confine his actual reading to that which will develop him not only in his work,

but in his mental all-roundness. The scientists are regretting the narrowing effect of specialization. Librarians must be even more concerned with the matter of reading widely outside as much as inside their subject. The despairing cry "Too much knowledge" is prompted by fear and self-defense—fear that we are "slipping," and that others are forging ahead in activities of which we cannot even be informed. The new quarterly is needed if for nothing more than to give space for extended bibliographies, statistical studies and other lengthy material which the existing library periodicals have not been able to include. All of this is distinctly to the good. As librarians, we expound daily to others the doctrine of the value of facts. Our profession needs nothing so much as elaborate studies as to how and what we are doing and should do.

J. L. W.

THERE IS an immediate and pressing need for a more dynamic view of librarianship. Both schools and libraries are called upon to help the masses of our people in their adjustment to the new conditions of our civilization. The changes are rapid and far-reaching in both city and country. They call for field workers attached to both libraries and schools who will be charged with doing new things and making new contacts. We cannot claim to be civilized so long as any of our people are handicapped in the race of life as a result of ignorance. During this period of unemployment, much of which is chronic, in almost every field the creative occupations, such as teaching and librarianship, should rapidly expand. Hundreds of thousands of workers will be added in these fields within a relatively few years.—J. E. M.

MISS HAND's studies of university library costs, in a recent issue of *THE LIBRARY JOURNAL*, are deserving of careful analysis by public as well as university librarians. In the present economic depression, when several libraries face possible cuts, few of them have had a "searching of hearts" to see how they could more effectively spend the money they have. Book funds are cut first; employees are dropped as a last resort. Unless libraries change cars from optimistic generalities about their own work to critical analysis of its de-

tails, and a justification of them in comparison with those followed elsewhere, the profession will continue to suffer from the opinion too frequently held by the public that, while worthwhile, the library is not especially effective or efficient. New and ideal standards of method and economy will eventually be set up by dispassionate specialists in method, prompted by the conviction that nothing is done, as yet, as well as it may be. There is a certain school of librarians which immediately rises to depreciate anything in the way of "efficiency." Like William Jennings Bryan, when faced with the facts of science, they immediately resort to a cry of heresy, in our case the phrase being "How about our precious scholarship?" Miss Hand's studies of costs and efficiency in a library which has the reputation of encouraging scholarship, should go a long way to prove that scholarship and effective methods are just as good comrades as are science and religion.

J. L. W.

GREAT CREDIT should be given to the indefatigable efforts of Prof. E. C. Richardson, now consultant in the Library of Congress, in endeavoring to place at the service of scholars the resources of the entire world, not only of printed books but of manuscripts as well, and his appeal for the cooperation of libraries should be met by all in the heartiest spirit. His ideal is that a research student should be able to find out where are to be had the unusual books often most important for purposes of research. These unusual books, it should be remembered, are often to be found in less known libraries and in unexpected quarters, and, therefore, even the smallest library should not fail to look over its local collections and send at least shortest title cards to the Library of Congress to learn if such titles are already on record. These pointers should be followed up by master cards giving full title and information in the case of books where it is found desirable to add them to the Union Catalog already exceeding three million titles. As this scheme is worked out in the United States it will doubtless be met by similar work in other countries, and cards exchanged on an international arrangement which will ultimately put any student in any country in possession of the means of finding all the material available on any specific subject. This is one of the consummations devoutly to be wished as library progress continues throughout the world.

TWO MEMORIAL VOLUMES, worthy of their subjects, emphasize the library service of two men who have contributed effectively to library progress. Charles Pratt, the elder, founder of the Pratt Institute of Brooklyn, provided in connection with it for a "free library for the citizens of Brooklyn" at a time when the old Brooklyn Library, a development of its Mercantile Library, was the chief lending library in Brooklyn, and previous to the proposals to make that library a free library and before the organization through President Boody of the Brooklyn Public Library. The centenary of his birth has afforded fitting occasion to issue the memorial volume, a contribution to library history which comes properly as a publication of the Pratt Institute. The memorial volume for John Cotton Dana, prepared by his successor, Beatrice Winsor, includes the numerous appreciations of his great career from library leaders as well as the editorials of the press which his death called forth and which form noteworthy evidence both of the mark which Mr. Dana had made upon his generation and of the growing importance of library development in the public eye as made manifest through the press. It is well that such great services should be thus worthily remembered, but it is not to be forgotten that many librarians pass from us who in their lesser ways have also made their mark and done good service, the latest of these to go being Miss Myra Poland of the Wilkes-Barre Public Library, who has been the worthy successor in that library of Hannah P. James of happy memory.

THE NAME OF GILLIS will always be associated with the development of the California State Library, and it is gratifying to note that Miss Mabel Gillis, daughter of James Louis Gillis, State librarian 1899-1917, has been appointed, as was expected, to succeed Milton J. Ferguson in the office which her father honored and made notable. Miss Gillis, after the death of her father and the appointment of Mr. Ferguson to succeed him, became assistant librarian, and during Mr. Ferguson's absence for library service in South Africa was the acting State librarian. The appointment is a yearly one in the hands of California's governor, and during Mr. Ferguson's year of absence the governor of that date proffered the post to Miss Gillis, who promptly declined to consider it in loyalty to her absent chief. Miss Gillis' elevation to full executive responsibility adds to the testimony of the ability of women as chief executives in the library field.

Librarian Authors

INA TEN EYCK FIRKINS was born in Minneapolis and attended the public schools in that city. She graduated from the University of Minnesota in 1888 and the following year was appointed to a position in her Alma Mater. Except for an occasional leave of absence for work or travel, she has remained in this library ever since, her position and her duties changing with the development of the library. Since 1900 she has been reference librarian and in this position has been a very great help to the faculty and to the students, especially the graduate students. She has a fine critical ability and appreciates the best in literature.

Miss Firkins does not call herself an author, but rather a compiler. Her indexes and bibliographies have been the direct growth of needs in her own library and she states, have been undertaken to save herself labor. "After having looked through the works of Kipling, O. Henry, or Maupassant about four hundred times to locate a particular story it naturally occurred to me that it would be the part of economy to make a list of the stories of popular authors and have it on my desk for quick reference. This list presently grew to such proportions that it seemed worth while to expand it and compile a systematic Index to Short Stories. Having compiled that work the Index to Plays was the logical sequel. But in carrying on this work I have found that I have been caught in an endless chain. To index stories and plays has now become an automatic process and perhaps for me it will solve the question which was a recent contribution to THE LIBRARY JOURNAL 'What Shall We Do With Our Old Librarians?'"

The published works of Miss Firkins are as follows: *Index to Short Stories*, 1915; *Index to Short Stories*, Second Edition, 1923; *Index to Short Stories*, Supplement, 1929; *Index to Plays*, 1800-1926, 1928; and *Hendrik Ibsen, A Bibliography of Criticism and Biography With An Index to Character*, 1921. During 1914-1916 she compiled a series of bibliographies on *Foreigners In The United States* which were published in the *Bulletin of Bibliography* and in 1916 she edited the *Poems* of her brother, Chester, who died young. She is the sister of Oscar Firkins, who is professor of literature in the University of Minnesota and a well known biographer and poet.

During the interim between Mr. Gerould's departure and Mr. Walter's coming as librarian to the University of Minnesota, Miss Firkins superintended the building of the new library building, its furnishing, general organization,

INA TEN EYCK FIRKINS

and the preparations for moving. Miss Firkins feels that her life has perhaps been unique in that nothing has ever happened to her. "I have had no thrilling adventures but have been carried along the stream of experience by the current of circumstance. My life could not have been less dramatic; it might be summed up thus—she was born, she lives, she will die. To be asked for my biography embarrasses me because it is humiliating to admit, publicly, that one has had no history. That may be the happiest condition for a nation but it is certainly a dull one for an individual."

This is the twenty-sixth biography of a librarian author, the series of which began in the Oct. 1, 1929, issue of THE LIBRARY JOURNAL. Future issues will contain biographies of such librarians as Arthur E. Bostwick, Henry O. Severance, Elizabeth Janet Gray, Lawrence J. Burpee, Francis Jenkins Olcott and many others.

A Book Week Bookmark Suggestion

Book Week, Nov. 16-22

Read Biography

1. For sheer delight. The drama of life has eternal fascinations. Biography eliminates the unpleasant in our living contacts and keeps the desirable and precious. Biography offers human contacts in the most amiable form.

2. Biography brings us into the presence of people worth meeting. We may see their mistakes, work out their philosophy of life, meet their sorrows and examine their problems.

3. Biography supplies a knowledge of history. We see history from the viewpoint of the actors, go through the thrills of their successes and the dull threads of dissolution. Other things change. Human nature changes little.

4. Biography gives us a wide perspective around our own problems, helps us to feel at home and to face life. Biography is challenging.

5. Biography gives the average reader an introduction to the world's great literature, art and music. A poem may be beautiful, but to appreciate it we need to know the problems of the author.

School Libraries in the Philippines

EACH YEAR sees a steady increase in the number of school libraries established in the Philippine Islands and in the efficiency with which they are administered. At present the public schools are maintaining 4,697 libraries with a total of 1,602,546 volumes. Due to the employment of properly qualified librarians, the conferences of librarians held in the General Office, Department of Public Instruction, in 1927 and 1928, and the close supervision given these librarians this year, the school librarians are now being placed on a standard basis. In secondary-academic and normal schools, teachers with library training and broad educational qualifications are assigned as full-time librarians. On the other hand, in rural schools, trade schools, and in large elementary schools teacher-librarians may still be found.

The open-shelf system was inaugurated last year in one high school. The students were given more freedom in choosing their books; magazines and newspapers were more freely read; and the usefulness of the library increased a hundredfold. But under present accounting regulations this system appears to be a risky undertaking for the librarians, inasmuch as release from personal responsibility for lost books is almost impossible to obtain. Classroom libraries have been extended to nearly all elementary schools, and in these schools they are gradually becoming as important as the general library.

Picture Collection

AS TEACHERS were always requesting pictures for classroom use, the Burlington, Iowa, High School and Junior College began to build up their picture collection until it now contains very lovely illustrations of the Oregon Trail, King Arthur, Myths, Shakespeare and many others, all mounted ready for use. The teachers know where the pictures are and how they are filed and can fill their own needs. They also keep a watchful eye out for references to pictures that would help them in their work and might be added to the collection.

The library also purchases editions of the classics taught in the school and many of the recreation reading books. Two or three times a year all these books are placed on a display table and the students enjoy looking them over. They are not circulated, but any teacher may take one or two into her classroom for discussion.

AUCKLAND (N. Z.) PUBLIC LIBRARIES. *See* LIBRARY PUBLICATIONS.

BIBLIOGRAPHY

Barwick, G. F. Bibliographical societies and bibliography. *The Library*. n.s. 11:151-159. 1930. (Transactions of the Bibliographical Society).

"This is a very brief and sketchy account of the activities of the bibliographical societies of the world, so far as I have been able to discover them, and my object in bringing them before you is to show the amount of good work that is being done and to suggest that the special articles might be indexed. The numerous papers on special books and special printers are completely buried; no Poole brings them to the surface. I am glad to note in this connection that an index to the ten volumes of our Transactions issued since their amalgamation with *The Library* will shortly be put in hand."

England, G. A. Special tools. *Special Libs.* 21:295-301. 1930.

"*Special Tools*, one might say, are those compilations of data and sources of information which are not, as a rule, issued by the usual publishing houses with customary attendant publicity, nor in the usual form, and which cover a special and particular field, sometimes only a minute portion of a field. They provide that 'quicker and easier access to facts' which Mr. Dana so aptly characterized in his paper on 'Facts' as 'the greatest need of today.' They are those indexes, compilations, handbooks, directories and summaries which unlock the doors to otherwise inaccessible information." Many of these are particularized and described.

BOOK WAGON DELIVERY

Queens Borough (N. Y.) Public Library. *The Queens Borough Public Library Presents to the People of Queens Borough The Pioneer*. illus. maps. pap. [16p.]

Christened by Mayor Walker on April 11, 1930, the "Pioneer," as the book bus is called, travels to twenty or more suburbs in Queens Borough each week. Books are selected from a reserve collection of 10,000 volumes at the central library building.

BOOK WEEK

Book Week celebrations. *LIB. JOUR.* illus. 55:816-819. 1930.

Reports from Alhambra, Berkeley and Sacramento, Cal.; East Orange, N. J.; Louisville, Ky., etc.

Hunt, C. W. Children's Book Week: an appraisal of activities. *LIB. JOUR.* 55:809-811. 1930.

Reprinted from *Children's Library Yearbook, Number Two*. "I have been slowly but thoroughly converted by the work of our Brooklyn librarians to a belief in the possibilities of this annual celebration. But to believe warmly in the general purpose of a project is not necessarily to subscribe to all the methods employed by its supporters. A thing that impressed me in reading the glowing reports was that so many librarians let themselves be used by other agencies to carry out schemes many of which were, to my mind, out of harmony with the librarian's own job. I cannot imagine any librarian who takes the time to *know her books thoroughly* having so much time left to assist in these projects."

BOYS. *See* LIBRARY WORK WITH SPECIAL CLASSES OF CHILDREN.

BRITISH LIBRARY OF INFORMATION

Fletcher, Angus. The British Library of Information. *Special Libs.* 21:287-289. 1930.

"The British Library [in New York City] exists chiefly as a source of reference through which this mass of

Intended to index with brief annotation, or excerpts when desirable, articles in library periodicals, books on libraries and library economy and other material of interest to the profession. The subject headings follow those in *Cannons' Bibliography of Library Economy*, to which this department makes a continuing supplement. Readers are requested to note and supply omissions and make suggestions as to the development of this department.

information may become known, and its proper function is to make it as easily accessible as possible. In a great many instances it can digest information to some extent, and it is always willing to do its best in that direction. But to many inquiries the only satisfactory solution is possession of the document or documents in question; the British Library is the official agent for the sale in the United States of British Government Documents. The price charged is the published price, plus a very small addition to cover the cost of importation. . . . It is often possible to arrange in urgent cases for one of the library copies to be lent until the purchased document arrives and, of course, documents are issued on inter-library loan in the usual way."

CATALOGING

Steward, A. V. On cataloguing. *Lib. World.* 33: 96, 98, 100-102. 1930. Conclusion.

"What would be an ideal state of affairs? In all large libraries, cataloguing departments should be installed, with an interchange of assistants from the public departments. In such libraries assistants in all departments should be permitted at definite times to study the books, new and old, that are flowing into the library system. . . . Turning to the small libraries, the only way of releasing them from the hurry and scurry of their present existence seems to be the formation of a central cataloguing bureau, an accomplished fact in America, but still far from realization in England."

CHILDREN'S BOOK WEEK. *See* BOOK WEEK.

CHILDREN'S LITERATURE

Books to Read; a Classified and Annotated Catalogue; Being a Guide for Young Readers. Compiled by a committee representing the Library Association, the National Association of Boys' Clubs, the National Council of Girls' Clubs, and the Carnegie United Kingdom Trust. 26-27 Bedford Square, London, W.C. 1: The Library Association, 1930. cl. 574p.

In three parts: Authors and titles of books; Books arranged by subjects (with an author list of fiction); Alphabetical index to subjects. Published with the assistance of the Carnegie United Kingdom Trust. A collection of the books in the Catalogue has been formed at 26, Bedford Square, London, the headquarters of the National Council of Social Service (in cooperation with the Library Association, whose offices are in the same building).

Engle, E. R. Children's books and the budget. *Wilson Bull.* 5:183-185. 1930.

"It is my personal conviction, based on experience, that the active Children's Room adding twenty-five titles from the new publications each year is keeping well up-to-date."

Lee, Emma. Children's books by Southern writers. *LIB. JOUR.* 55:812-814. 1930.

Joel Chandler Harris, Maud Lindsay, Archibald Rutledge, Sidney Lanier, Louise Connolly, Helen Coale Crew, etc.

CHILDREN'S READING

Nolen, Barbara. A balanced diet in children's books. Menasha, Wis. American Association of University Women. *Journal.* 24:20-23. 1930.

"With increased production of children's books, with the movies, with the quickened tempo of modern life, children have developed a greater consumption of books, until some mothers are at their wits' end to keep them supplied. Children of nine are demanding thicker and longer books, in contrast to the request of even two years ago for 'easy reading' for children of eight. My experience is that a new age limit has been set by the children themselves. Those over twelve are reading adult books, while the youngsters are devouring so-called 'juveniles' as fast as they are published. The interesting fact in regard to this state of affairs is that these young readers have strictly cosmopolitan tastes. Their choice falls often on the book of the hour." The writer cautions against too great emphasis on "international" books, to the exclusion of books dealing with scenes familiar to the child's own experience.

COLLEGE LIBRARIES. *See* JUNIOR COLLEGE LIBRARIES.

COUNTY LIBRARIES. See RURAL SCHOOL LIBRARIES.

DEWEY DECIMAL CLASSIFICATION

Gilmore, A. F. Our library; a Dewey Decimal play. illus. *Wilson Bull.* 5:186-191. 1930.

A play for children's presentation, allowing opportunity for as elaborate costuming as desired and a cast of sixty or less.

FOSTER, WILLIAM EATON, 1851-1930

William Eaton Foster. por. *Books for All.* 5:206-209. 1930.

Tributes to the late Librarian-Emeritus of the Providence (R. I.) Public Library from his colleagues and the community.

GAS COMPANY LIBRARIES

Greenwood, Josephine. Library of the Consolidated Gas Company of New York and affiliated gas and electric companies. *Special Libs.* 21:292-293. 1930.

The library has some 12,000 volumes and pamphlets dealing with chemistry, economics, gas engineering, management, physics and the social sciences.

JUNIOR COLLEGE LIBRARIES

Stone, Ermine. Book collections in junior college libraries. Stanford University. *Junior College Journal.* 1:28-33. 1930.

By the librarian of Sarah Lawrence College, Bronxville, N. Y. The junior college has until recently received little recognition from the library profession, and the scarcity of literature on the subject is still discouraging. This paper reports an attempt to select 800 books suitable for a junior college library in the field of the social sciences, as outlined in the Dewey Decimal Classification. Eleven private junior colleges cooperated by furnishing copies of their shelf-lists in the 300's.

LIBRARIANS

Carnell, E. J. Librarians supplied. *Lib. Assistant.* 23:198-200. 1930.

A reply to an article in the *London Times* by Sir Gregory Foster, Vice-Chancellor of the University of London, on "A School for Librarians," disputing his implications that the demand for library assistants at present exceeds the supply.

LIBRARY PLAYS. See DEWEY DECIMAL CLASSIFICATION.

LIBRARY PRINTING

Snaith, Stanley. Valuations. *Lib. Assistant.* 23:200-203. 1930.

"While commercial advertising has taken advantage of that 'tide in the affairs of men,' library advertising has preferred to stand still. Like the little girl in 'De La Mare's poem, it remains 'stuck fast in yesterday.' It cares neither for efficiency nor beauty. . . . The average typography, as demonstrated by library publicity and bargain-sale handbills, is depressingly mediocre. The majority of jobbing printers, one is forced to believe, achieve the astonishing feat of going through their lives without experiencing a single gleam of interest in their craft. They take a fiendish pleasure in grabbing a hotch-potch of mutually irreconcilable founts, and scattering them about the page with the large recklessness of a confetti-thrower. (The margins they leave to God.) Their types are wizen or lubberly. Their decorative flowers and borders are the very Billingsgate of ornament. A good printing house, however, possesses resources which render, or ought to render, slatternly publicity unnecessary and extravagant."

LIBRARY PUBLICATIONS

Auckland (N. Z.) Public Libraries. *The Library Tower.* Vol. 1, no. 1. September, 1930. illus. por. tables.

Although primarily intended to list books added to the stocks of the central and branch libraries, this bulletin devotes its first issue to an historical account of the foundation and development of Auckland's public library system, now fifty years old.

LIBRARY WORK WITH SPECIAL CLASSES OF CHILDREN

Steinmetz, Nell. Books and the discipline problem boy. *LIB. JOUR.* 55:814-815. 1930.

Books as diverse as *Peter Rabbit*, *The Boy's Life of Colonel Lawrence*, and *The Water Babies* have been the cause of awakening the interest and cooperation of unruly boys. Conferring some special responsibility, such as that of student librarian, also helps.

PRINTING. See LIBRARY PRINTING.

QUEENS BOROUGH (N. Y.) PUBLIC LIBRARY

[Hodgson, J. G.]. *The Business Library; Business and Municipal Library Service as Proposed by the Board of Trustees.* Parsons Boulevard, Jamaica, N. Y.: Queens Borough Public Library, 1930. 12 mim. p.

A propaganda pamphlet issued by the library in support of its campaign for a business library. Because the Borough of Queens does not have a single outstanding business center, the proposed library would have a widespread territory to cover. Because of its great number of separate communities, Queens still has many of the aspects of the small suburban communities which surround New York.

See also BOOK WAGON DELIVERY.

RURAL SCHOOL LIBRARIES

Lathrop, E. A. *County Library Service to Rural Schools.* Wash.: Govt. Prtg. Off., 1930. pap. 53p. illus. maps. tables. 15c. (U. S. Dept. of the Interior, Office of Education, Bull., 1930, no. 20).

Miss Lathrop's *State Direction of Rural School Library Service* (Bull. No. 6) was listed in "Current Library Literature" in *LIB. JOUR.* for August. Partial contents of this bulletin: County Library Branches in School Buildings; Rural School Problems of County Libraries; Visual Aids, Magazines, Music, and Other Material Loaned to Schools by County Libraries; Children's Use of County Libraries During Summer Vacations; Efforts of County Librarians in Stimulating Interest in Libraries. 5 p. bibliography.

SALARIES

Compton, C. H. How to determine what salaries shall be paid librarians. *A. L. A. Bull.* 24:596-598. 1930.

Paper delivered before the Trustees Section at the Los Angeles conference, June 26, 1930. Three definite sources of information are the salary statistics for eight groups of libraries published annually in the *Bulletin*; comparison of library salaries with salaries paid teachers in the community, based on equal academic and professional education and experience; and the Bureau of Public Personnel Administration report, *Proposed Classification and Compensation Plans for Library Positions*, published in 1927.

SCHOOL LIBRARIES

Henshall, M. D. California State Library a potent factor in developing school library service. illus. *School Life.* 16:38-39. 1930.

First of a series of school library articles on the activities of certain of the States in improving library facilities for schools. Into 46 central school libraries administered by trained certificated county librarians have been merged the former 2400 inefficient, inactive, unsupervised school-district libraries.

Lathrop, E. A. The library and the modern school. illus. *Normal Instructor and Primary Plans.* 11:64; 74. 1930.

By the Assistant Specialist in School Library Service, U. S. Office of Education (see also under RURAL SCHOOL LIBRARIES). Reports briefly on State reading-circle courses for children.

TOKYO IMPERIAL UNIVERSITY LIBRARY

Tokyo Imperial University Library. *Reconstruction Album; Containing the Final Report on the Reconstruction of the Tokyo Imperial University Library, 1923-1929.* Compiled at the Library, 1930. pap. 12; 26; [5]p. illus. plans.

Twelve pages of text, followed by 26 pages of plates illustrating the process of reconstruction of the library. Plans show front elevation, ground floor, main floor, block plan, transverse section, and longitudinal section. Destroyed by earthquake in 1923, the library was rebuilt through a gift of four million yen from John D. Rockefeller, Jr., and its new building dedicated Dec. 1, 1923. Books restocked amount approximately to 620,000 volumes, of which 523,000 volumes represent gifts from all parts of the world.

The Children's Librarians' Notebook

MADE IN MEXICO. By Susan Smith. *Knopf*. \$2.

An interesting and valuable little book on Mexican handicraft which gives much information about the life and customs of the people. The style is simple and direct, the black and white illustrations are in harmony with the subject, and there are many helpful photographic reproductions. The book fills a niche heretofore empty.

Large libraries should buy and small ones, too, if the latter can afford.—E. P. A. S.

GOOD LITTLE DOG. By Anne Stoddard (Pictures by Berta and Elmer Hader). *Century*. \$1.

From his first picture you know Bingo is a good little dog, but you aren't so sure when he tells how he runs behind the red wagon and pulls Matilda, the rag doll, out to "chew her a little." However, he saves Matilda from the fire and becomes a hero! Pictures by the Haders are half the book and the price permits duplication, but unfortunately the pictures come so close to the inner margin that rebinding will not be possible.—A. M. W.

THE AMBER BEAD. By Toni Rothmund. *Longmans, Green*. \$2.

This story of a foundling who is finally restored to her mother is well written and delightfully fanciful. Heidi, the little girl, understands the language of birds and animals. The animals seem quite natural in spite of the fact that they talk. The book is well illustrated and is one of the most charming books of the Fall. It will be enjoyed by the child who likes fairy tales and the child who enjoys animal stories.

—M. R.

These books are actually reviewed by different children's librarians in the field. If you do not agree with the review of a book send in your own review and we will print it. The name of the reviewer of any book will be given upon request.

NUTCRACKER OF NUREMBURG. By Alexandre Dumas. *McBride*. \$2.50.

A book that can better be used for storytelling than for reading. The general make-up and theme of the story will appeal strongly to the adult reader who likes unusual books, but only the fastidious child will be persuaded to enjoy it for himself. If one is given to superlatives, the very delightful silhouettes will arouse deep interest.—W. W.

CALL OF THE RIO BRAVE. By A. E. Bailey. *Little, Brown*. \$2.

A book full of thrills and excitement which are tempered by the clear-headed courage and bantering good humor of two young men in central Brazil. One leaving Harvard in his freshman year goes to Brazil to try and replenish his father's lost fortune, and there finds a good friend in the young owner of a lumber mill and makes a place for himself in the mill by hard work, courage and fair play. Older boys and young men will enjoy this book.

—M. W.

NUTCRACKER AND THE MOUSE-KING. Translated by Louis F. Encking and illustrated by Emma L. Brock. *Albert Whitman*. \$1.50.

A translation from the German of the fairy tale which inspired Tchaikovsky to write the music of the famous Nutcracker Suite. It is a Christmas story filled with the gayest, most colorful imagining in a child's world. It tells how Marie helped the Nutcracker in his long fight with the many-headed Mouse King, and how she was taken by him to the beautiful land of Dolls. Very inexpensive considering the colorful illustrations. Good to buy

for its own sake, but will be doubly valuable in connection with the Tchaikovsky music at Christmas.—H. N.

THE BLACKSMITH OF VILNO. By Eric P. Kelly. *Macmillan*. \$2.50.

Mr. Kelly, author of *The Trumpeter of Krakow* (Newbery Medal book of 1929), has again written a story with a Polish background. The scene this time is laid in the ancient city of Vilno, in the year 1832, just after the Polish revolutions against Russia. The boy hero of the story is fifteen-year-old Stefan, an orphan, sentenced to Siberia but making his escape from prison beneath the folds of the cloak of Stanislaus, the poet. There is the Old Man of the Woods, a mysterious elf-like creature, dressed in skins and bark, who appears from time to time and as suddenly disappears. The story hinges upon the secret passing of the Polish crown from one hiding place to another to keep the Russians from taking it. There exists a belief that as long as the crown remains in Poland that country shall not perish, and it is the strength of this belief that has led the countrymen to form a secret brotherhood in which members pledge their lives for the safety of the royal crown. Older boys will find this a book to their taste, filled to the brim as it is with thrilling adventure, excitement and mystery. In construction this story is similar to *The Trumpeter of Krakow*, but we do not feel that this lessens the value of the book. Mr. Kelly's attention to historic detail and his careful character delineation are particularly noteworthy.—E. P. A. S.

One of the Pictures Made in Vilno by Angela Pruszyńska for "The Blacksmith of Vilno"

PETER MAKES GOOD. By Gertrude Thomas. *Beckley-Cardy*. \$2.

A very ordinary, rather tiresome collection of anecdotes about dogs of every kind, size, color and pedigree. The first story, which is the longest and from which the book takes its name, relates the principal incidents in the life of a little mongrel pup. The others are supposed to be told by the dogs themselves as they gather in the park each day under the leadership of Judge Airedale. They are all told in

the third person, however, and not as if the dogs were doing their own talking. The language used is stilted and pedantic, which makes the book extremely dull. With the wealth of material at her disposal, it is unfortunate that the author was not able to produce a more readable and interesting book. As it is, she seems merely to have collected a vast number of incidents without paying a great deal of attention to their presentation. The physical make-up of the book is also not in its favor. From its appearance one would judge it was intended for very little

children, but the language is much too difficult for them. Older children would shun it because of its "easy book" look. The stories are also too slight to interest an older child. Illustrations are cheap and poor. The book is well bound and type and paper are very good.—C. N.

FRAWG. By Annie Vaughan Weaver. *Stokes*. \$1.50.

Frawg is a little colored boy and the story of his carefree life is told most entertainingly. It is very real and the simple, yet characteristic illustrations greatly enhance its charm. Children from 7-10 years are certain to enjoy this book either when reading it themselves or when it is read aloud to them.—M. P.

MYSTERY OF WORLD'S END. By Helen Berger. *Longmans, Green*. \$2.

An isolated home, World's End, on one of the Hawaiian islands, is the scene of this story. The mystery is a bit too obvious and the incidents which go to build it up are somewhat artificial. Both boys and girls will enjoy reading the book, but there is little of lasting value about it.—L. H.

RAMA, THE HERO OF INDIA. By Dhan Gopal Mukerji. *Dutton*. \$2.50.

In this story of the *Ramayana*, the great epic poem of India has been vividly and connectedly retold for young people. It will make its greatest appeal to the exceptional boy and girl and also to those adults who delight in Mr. Mukerji's poetic prose, for he has done a fine piece of work in retelling "these doings of Rama." The interesting illustrations are by the French artist, Edgar Parin D'Aulaire.—T. C. B.

In The Library World

A Survey by the Office of Education

FROM A RECENT SURVEY conducted by the Office of Education, it was found that with fifty per cent of the population scattered about in approximately 3,000 counties only 262 counties have established county libraries and of these forty-six are in the State of California. Approximately sixty-one per cent of the total number of county library branches and stations are located in public school buildings and about thirty-seven per cent of these so housed furnish books for the general public, as well as for the schools. The number of books circulated by county libraries among rural schools is increasing. In the school year 1923-24 the median circulation was 10,681 volumes; in the school year 1927-28 it was 16,944. Miss Edith A. Lathrop, assistant specialist in rural libraries, states that the lack of county libraries hampers the educational progress of rural America.

The Bank Library

AT THE BANKERS' CONVENTION recently held in Cleveland, Ohio, the Special Libraries Association presented the members with a catalog called "The Bank Library, Why? When? Where? How?" compiled by a committee headed by Emma M. Boyer of the Union Trust Company, Cleveland. The booklet, which gives a strong argument for a bank library and points out its importance, runs to over sixty pages and includes a check-list of about 350 of the best books on banking classified by subject. The classification includes such subjects as Advertising and New Business, Banking Theory and Practice, Banking History, Biography, Branch Banking, etc.

Two Years' Study of A.L.A. Activities

THE COMMITTEE ON A. L. A. ACTIVITIES met at the Knickerbocker Hotel in Chicago on October 20-21. At that time the committee put into final form its report which will be presented formally to the Council at the mid-year meeting. It will appear in full in the December *A. L. A. Bulletin*. The report is the result of two years' study of the activities of the Association, based upon an examination of minutes

and reports of various boards and committees and other material sent out by headquarters; a survey of headquarters; letters from a cross-section of the membership, past and present officers and members of the Council, and other representative groups, in answer to a letter sent to them by the committee; and attendance of members of the committee at meetings of the

Executive Board and the more important boards and committees. The report will cover in some detail the activities of the Association, quoting freely from the letters received and coming to certain definite conclusions which it is the hope of the committee may be not without value to the Association. The members of the committee are Gratia A. Countryman, H. H. B. Meyer, and Charles H. Compton, chairman.

One Way of Loaning Books

IN PINCHFORD, Blackhawk County, Iowa, the village telephone girl acts as librarian. When she receives a supply of new books she gives the general ring on all party lines and, when everyone is listening in, tells them about the books she has to lend. This is the county where the Iowa Commission is carrying on a demonstration library for a year.

In February, 1929*

Bird Library Goes to Rollins College

THROUGH EFFORTS of the Florida Audubon Society, the ornithological library of the late Henry Nehrling, internationally famous horticulturist and ornithologist, has been acquired by Rollins College, Winter Park, Florida. The Nehrling library provides Rollins with the finest collection on ornithology of any educational institution in the State for the collection contains rare and valuable publications, including an eight-volume set of Audubon's works and an almost complete set of *The Auk*.

County Libraries in France

AT THE beginning of the year the French Ministry of Education named an extra parliamentary Committee to consider the best ways of organizing county libraries in France. The French Library Association has decided to hold a Congress of "Lecture publique" in April, 1931, in Algeria. The members of the Congress will visit the following cities in Algeria: Bona, Constantine, Setif, Oran, Miliana, Orleansville, and Tlemcen.

For full particulars apply to M. le Secrétaire de l'Association des Bibliothécaires français, 11, Rue Guénégaud, Paris-6e arr.

Send Us Your Questions

LEONILDA S. SANSONE, librarian in charge of Italian work in the New York Public Library branches, has been granted a Carnegie Corporation Fellowship for a year's special study in Italy. She sailed the last of October and will study Italian libraries, book publishing, and distribution. From time to time during this period she will have a column in THE LIBRARY JOURNAL devoted to her findings and she has stated her willingness to answer any questions that librarians may have about Italian literature. Send any requests for information to Miss Sansone, in care of THE LIBRARY JOURNAL, 62 W. 45th Street, New York City, where they will be forwarded.

N.Y.U. Starts Belgian Library

BIBLIOTHECA BELGICA, a Belgian library, was started officially on October 16 at the New York University, where the library is to be housed, when a collection of 400 volumes was presented by the Commission for Relief in Belgium, Educational Foundation, of which George Barr Baker is president and Perrin C. Galpin secretary. Dr. Henry G. Bayer, founder of the Bibliotheca Belgica, and Associate Professor of French at New York University, gave a brief account of the library and a statement of its aims.

TENTATIVE SCHEDULE OF MID-WINTER MEETINGS

	MORNING—10:00-12:30	AFTERNOON—2:30-5:00	EVENING—8:00

Books on Unemployment

THE PRESIDENT'S EMERGENCY COMMITTEE on Employment, headed by Col. Arthur Woods, is relying for local work largely on existing organizations, believing that for most cities and towns this is a better plan than to set up a new organization. It is hoped that these groups Chambers of Commerce, women's clubs, welfare organizations, etc.—as they come together to face the practical problems of their local communities will take opportunity to study the basic facts of unemployment as they have been found by experience and research, and that local libraries and bookstores will aid in supplying the best available material on the subject. Because of the importance of having such information available, the President's Committee has asked the offices of *THE LIBRARY JOURNAL* and *Publishers' Weekly* to use their pages to distribute as promptly as possible a brief list of the more important material. The editors have turned to the Economics Division of the New York Public Library and the library of the Russell Sage Foundation for suggestions for such a list, and from their suggestions are printing the following list of twelve books that might be considered a first selection for such a reference collection. It should be pointed out that besides the studies in book form a great deal of the important data is in pamphlet form covering research under various auspices, and in magazine form, as, for example, in the *Survey* of November 15 of this year. Librarians can give from their collections the key to this current material. It is hoped by the President's Committee that libraries will take the initiative in seeking out the local leaders to offer assistance.

\$150,000 for Oberlin

THE CARNEGIE CORPORATION of New York has recently given Oberlin College a gift of \$150,000 for the endowment of the librarianship of the Oberlin College Library. This gift came unsolicited, a tribute to the past and present excellence of Oberlin's library.

Oberlin College Library, now the largest college (not university) library in the United States, dates from the beginning of the college, when Rev. John L. Shipherd, one of the founders, collected books as well as money from his clergymen friends. By 1874 the library numbered 10,000 volumes, and college authorities for the first time considered a full-time librarian necessary. In 1885 it was moved into Spear Library, a building that housed the zoology department and a museum as well, and every one congratulated himself that the library was commodiously lodged for fifty years at least. But in 1887 Azariah S. Root was appointed librarian, and from that time on it grew rapidly. By 1892 there were 25,000 volumes; that number was doubled in 1900 and tripled by 1906. In 1908 the library was moved into the present Carnegie Library building. The number of volumes today is approximately 325,000. Azariah Root, who was the head of the Oberlin library for forty years and one of the foremost librarians in America for almost as long, died in 1927. A year later, his work was taken over by Julian S. Fowler, of the University of Cincinnati Library, who is the present librarian and will be the first beneficiary of the present endowment.

Union List Announcement of Publication

THE UNION LIST OF PERIODICALS in special libraries of the Metropolitan district is now assured publication not later than March 1, 1931, through the grant of the Carnegie Corporation, made to cover the cost of completing the compilation and of printing. In most cases the special library is necessarily confined to material bearing directly on its own field, but often is called upon for material in other fields. Lack of space and lack of funds forbids keeping material to fill this occasional need. Consequently, the special library is more dependent on the cooperation of other libraries than is the public library. The "Union List" aims to help the librarian in locating particular titles and volumes in other libraries. It will record the holdings of about seventy-five of our principal special libraries, covering practically all fields. The cooperating libraries fall into the following classifications:

Arts and Science	5
Civic	3
Commercial and Industrial	5
Engineering and Technical	17
Education	3
Financial	11
Insurance	5
Legal	4
Medical	8
Religious	7
Sociological	6

The list, which will include approximately ten thousand entries, will be printed by H. W. Wilson Co. in a style uniform with its other publications. It will form a book of about five hundred pages bound in library buckram and will sell at \$4 per copy.

In order to have some basis for estimating the number of copies to be printed, it is urgently requested that advance orders be placed now. These should be sent to Miss Ruth Savord, 45 East 65th Street, New York City.

Attention Given to State Extension

THE TWENTIETH annual meeting of the Montana Library Association, with thirty-five delegates attending, was held in Billings, Mont., October 20-21. Informal round tables discussing problems confronting librarians were found to be more beneficial than the usual scheduled talks and papers. Much attention was given to the library extension work in the State and particular emphasis laid on the travelling libraries. One evening the program was made

public and county libraries were discussed extensively. An interesting demonstration was made of the new Detroit charging system, a self-charging system used by patrons in many city libraries. An exhibit of Will James' writings and pictures was held in the Parmly Billings Memorial Library. Librarians of the State are extremely interested in Northwest history and particularly Montana history, and in this connection works of Montana authors and artists were discussed. Visits were made to the Eastern Montana Normal School library and the Polytechnic School, where one afternoon meeting was held. Miss Fernald, librarian of the Great Falls Public Library, gave an enthusiastic and entertaining talk on her travels in Europe this summer. She told a great deal of the Passion Play. Great Falls was chosen for the next meeting, which will be held the third week in May, 1932.

The newly elected officers are: President, Mrs. Mary Homan, Phillips County Library, Malta, Mont.; Secretary, Mrs. Leon Coombs, City Library, Glendive, Mont.; Treasurer, Miss Geneva Cook, City Library, Bozeman, Mont.

Librarians Meet with Teachers

LIBRARIANS from every section of Maryland attended the joint meeting of the Maryland Library Association and the Maryland Public Library Advisory Commission, held Friday, Oct. 24, at Baltimore. Members partook of a box luncheon, after which Frederic G. Melcher, editor of *Publishers' Weekly*, addressed the assembly on "Book News and How to Judge It." There was also an address by Dr. Joseph H. Apple, president of Hood College and president of the Maryland Public Library Advisory Commission. Delegates then joined with the State Teachers' Association, which was also in session, in hearing an address by Dr. Everett Dean Martin, noted author and educator, who talked on "What Is an Educated Person?"

New officers of the Maryland Library Association are: President, Miss Adelene Jessup Pratt, director of the Maryland Public Library Advisory Commission; Vice-Presidents, Louis H. Dielman, librarian, Peabody Institute Library, and Miss Mary S. Wilkinson, director of work with children, Enoch Pratt Free Library; Treasurer, Mrs. Thomas A. Van Sant, Jr., librarian of Gwynns Falls Junior High School; Secretary, Miss Louise M. Reese, branch librarian, Enoch Pratt Free Library. Dr. Apple, as mentioned, is President of the Maryland Public Library Advisory Commission, and Mrs. M. A. Newell is Secretary and Treasurer.

Library Organizations

North Central Library Conference

ATTENDANCE at the North Central Library Conference, which met in St. Paul, October 14 to 17, exceeded all expectations. At most, 500 were expected. The registration was 750. The State library associations participating in the conference were those of Wisconsin, Nebraska, Iowa, North Dakota, South Dakota and Minnesota. Although other regional conferences had been held in this section, this was the first to include all these six States. So successful was the meeting that, before it ended, the presidents of the six associations had agreed to form a permanent organization to cooperate in various ways and to plan other such conferences.

The program, which was in charge of Miss Clara F. Baldwin, chief of the Minnesota State Library Division, was studded with notables. Among others from outside the conference territory were Dr. Everett Dean Martin of Cooper Union Forum, New York City, who delivered the principal address of the general sessions; J. C. M. Hanson of the University of Chicago Library School, Miss Anne Carroll Moore of the New York Public Library, and Miss Amy Heminway Jones of the Carnegie Endowment for International Peace. Mrs. Margaret Culkin Banning of Duluth and Prof. J. H. Kolb of the University of Wisconsin were other attractions. Among publishers' representatives were Miss Louise Seaman of the Macmillan Company, who appeared on the program of the Children's Librarians Section, and Mr. Thomas J. McLaughlin of the H. W. Wilson Company, who brought the Bookmobile from the West Coast to be present at the conference.

The exhibit space at the Hotel Lowry, headquarters of the conference, was completely filled with exhibits from publishers, library supply houses and local bookstores, with publicity exhibits from the American Library Association and a large exhibit from Iowa. These exhibits, with the large registration, assured the conference at the outset of being a financial as well as a professional success, and a substantial sum which remained after expenses were paid was voted as a donation to the A. L. A. Endowment Fund.

Social affairs generally centered about the Hotel Lowry, although on the opening night of the conference the librarians were guests at a reception given by the St. Paul Public Library staff. In compliment to the conference,

the library opened its annual children's book exhibit earlier than usual, and the reception was held in the exhibit room. Simultaneously, the J. J. Hill Reference Library, which occupies a wing of the St. Paul Library, held open house for the visitors. The only social meetings on Wednesday were the Teachers' College Librarians luncheon, the International Mind Alcove Librarians luncheon arranged in honor of Miss Amy Heminway Jones, and the dinner for school librarians. Thursday, however, abounded in luncheons, which included the catalogers, the hospital librarians, the children's librarians, the county librarians, and the trustees. In the evening came the banquet in the Grand Ball Room of the Hotel Lowry. Tables were arranged for alumni of the various library schools, with a hostess at each table.

Friday, the final day, opened with the State association breakfasts. Following that, the county librarians were entertained with a ride to visit the county library stations of Ramsey and Hennepin Counties. Despite a blustery day of bitter wind and snow, about thirty-five made the all-day trip, stopping for lunch at the University of Minnesota. Sight-seeing trips through the Twin Cities for the other members of the conference were arranged by the Twin City Library Club for Friday afternoon. In the evening a number of the visitors finished the social activities of the week by attending the Minneapolis Symphony concert at the university.

ROUND-TABLES

The small colonial room of the Hotel Lowry was assigned as the meeting place of the Reference Round-Table on Thursday, October 16, but the size of the audience and the difficulty of hearing the speakers necessitated a swarming of the entire group to the ballroom. Mr. S. J. Carter, reference librarian of the Milwaukee Public Library, presided. Miss Katherine Dame, reference librarian of the St. Paul Public Library, opened the discussion with an excellent paper covering the following points: What is reference work? Upon what sort of question should the librarian spend his time? Where, if at all, should he draw the line? Although she admitted that the initials A. L. A. had been interpreted to mean "Ask Librarians Anything," Miss Dame suggested certain limitations to this service, both ethical and practical. Should the librarian, for example, spend hours of research in law books and medical books, since this free service deprives the doctor or the lawyer of legitimate fees? Crossword puzzles and contests, information on the

making of wine, telephone service to school children trying to shirk labor on their assignments, and whether or not librarians should give their time free to type long articles for patrons were other questions which Miss Dame suggested. As possibilities for the enlargement of service, on the other hand, Miss Dame mentioned the use of special personal talents of members of the library staff, such as the translation of letters or the criticism of manuscripts, if too much time were not involved. Mrs. Winifred Davis of the Wisconsin Free Library Commission gave a very practical talk on "New and Significant Reference Books." Her point of view was, frankly, that of the small or medium-sized library. The list of books which she had prepared contained the important reference tools which should be in such libraries. The relative merits of the *A. L. A. Catalog*, the *U. S. Catalog*, the *Standard Catalog*, the *Subscription Books Bulletin*, the various encyclopedias, including the new edition of the *Encyclopaedia Britannica*, came in for much lively discussion. Miss Adra Fay, reference librarian of the Minneapolis Public Library, spoke on "Our Service to Schools. Problems in Cooperation and Coordination." She gave many valuable suggestions as to the means of establishing such cooperation on the part of both the teachers and librarians. Teachers might cooperate by familiarizing themselves with the library collection, by teaching respect for books and appreciation of literature, by training students in the use of indexes, by defining their requests clearly, and by notifying the library in advance of important assignments to classes. Librarians could establish friendly relations with teachers by visiting them, by calling their attention to new books and helping them to spend wisely, and by satisfying their personal requests. Miss Fay also touched upon the problems of instruction in the use of reference books, which she thought in most cases might be left to the schools; the necessity for getting the student to help himself as much as possible; the question whether translations or synopses should be given or withheld; the distressing mutilation of books, especially since the introduction of the project method, which requires the student to furnish pictures for his notebook.

The attendance at the Library Commissions Round-Table was about thirty-five, including the secretaries of commissions of all the six States. Miss Leora J. Lewis, director of the South Dakota Library Commission and president of the League of Library Commissions, presided. Mr. C. B. Lester of Wisconsin suggested that part of the process of making rural people library conscious was to stress the value

of books and reading. He suggested that in library publicity we build too much on the foundation of our own viewpoint and assume an attitude toward reading that is not general. The first task is to show what books can mean, and then develop means of supplying books through libraries. The individual as well as the group must be considered in this educational process. In the discussion which followed Mr. Lester's talk, several methods of interesting farm people in books were discussed. The consensus of opinion seemed to be that among publicity agencies the radio and the farm journal were perhaps the most important. Miss Nellie Williams of the Nebraska Commission led the discussion as to the need of more printed helps for the very small library. In Miss Williams' opinion, the two helps most needed were an organization manual arranged for the use of the librarians without training, and a short list of books which should be timely, and which should avoid the books too expensive for the small library and also books intended only for the sophisticated reader and, consequently, too extreme for purchase by the library with limited funds. The question of whether such a list could be a union commission activity was discussed, and a suggestion was made that the *Booklist* be asked to consider this phase of book selection. Miss Lillian Cook of North Dakota, building on the discussions developed at the Rural Library Institute at Madison last summer, presented the question as to whether certain commission activities should be discontinued, which continued and stressed, and which initiated. It was decided that a survey should be taken in which commission secretaries should be asked to suggest policies or objectives which they considered important, these suggestions to be tabulated and presented at the mid-winter meeting for further consideration. A report on the county library experiment in Black Hawk County, Iowa, was given by Miss Julia Robinson of the Iowa Commission. Miss Robinson explained that the experiment was being jointly financed for one year by the Iowa Library Association, the Iowa Commission, and Black Hawk County, and that books had been donated by the Iowa Federation of Women's Clubs. Headquarters are in the Waterloo Public Library. Miss Robinson told of the interest in the experiment and suggested the possibility of continuing it through a second year if it was felt that it was desirable to give a longer period of service before asking the county commissioners to take over its financial support.

The Catalogers' Round-Table held its session Thursday afternoon in the auditorium of Wilder Building, St. Paul, Minn. The chair-

man, Miss Eliza Lamb, head cataloger of the library of the University of Wisconsin, Madison, Wis., opened the meeting by calling on Miss Amy Moon, chief of the Catalog Division of the St. Paul Public Library, who spoke briefly, urging establishment of groups of catalogers for discussion on methods of cataloging, classification, etc. Mr. Ralph M. Dunbar, assistant librarian, State College Library, Ames, Iowa, was the second speaker and gave a very enlightening talk on the "Cataloger—Mechanistic or Intellectual." Mr. Dunbar used as the text of his paper a quotation from Miss Harriet Howe's article of 1924, "Traits of a Cataloger": "The cataloger should possess the best traits of a scholar, an administrator and a good clerical worker, and must have such a clear conception of his work that nothing can interfere with the proper balance of these traits." Mr. J. C. M. Hanson of Chicago gave an interesting talk on "Tendencies in Catalogs and Classifications" and dwelt on four points: selective cataloging, arrangement in a dictionary catalog, classification and training. Miss Dorothea Heins, librarian of the Alexander Mitchell Library, Aberdeen, S. D., presented next "Cataloging in the Small Library." Miss Harriet A. Pearson, assistant librarian, State Agricultural College, Fargo, N. D., presented next "Cataloging Problems in the College Library." Miss Pearson spoke enthusiastically in favor of the information file. Before closing the round-table discussion, Miss Lamb called upon Miss Helen K. Starr, librarian of the James Jerome Hill Reference Library, to speak on the "Treatment of Maps in the St. Paul Public and Hill Reference Libraries." Miss Starr said that in remodeling the Hill Map Room they used the Newark map platform plan. Miss Starr brought with her copies of her "Map Routine," which she very generously gave to anyone interested.

County Libraries Voted Major Activity

THE FORTIETH ANNIVERSARY conference of the New York Library Association was held in Albany, October 14 to 17, in connection with the sixty-sixth convocation of the University of the State of New York, the theme of which was adult education. The registration was 330. The convocation for the first time recognized libraries on its program by devoting an afternoon to "The Library and Adult Education," with George Herbert Locke, Alice S. Tyler and Arthur E. Bostwick as speakers. This subject was also presented on the conference program by a discussion led by Edouard C. Lindeman on "The Public Library in Relation to Other Adult Education Agencies." Among

adult education agencies represented were the American Library Association (represented by Mr. Drury), the American Association for Adult Education, the Affiliated Summer Schools for Women Workers, the Extension Department of New York State College of Agriculture and Home Economics, the National University Extension Association, the Department of Adult Education of the National Education Association, the Committee on Adult Education of Western New York, the National Home Study Council, the Adult Education Bureau of the State Department of Education, and several local school systems. The meeting closed with reports of experiments in adult education of which libraries are a part, including a detailed report by Mrs. Helen W. Granniss of the Muhlenberg Branch experiment in New York City. Later in the week, as an outcome of the meeting, resolutions were passed recommending that the Council set up a committee "which shall endeavor to secure for the library in any community which has adult education movements in progress its rightful connection with these activities from their inception."

The promotion of the county library system throughout the State was voted again in 1930, as in 1929, to be one of the major activities of the Association. Resolutions were passed favoring active support of an amendment to the State's county library law which will provide State aid to county libraries and a more equitable distribution of the tax burden in the county. It was voted to organize locally the movement for county library development by appointing in each county committees representing the granges, parent-teacher associations, libraries and other interested groups. The book busses of the Queensborough and the Yonkers Public Libraries were present during the week to show what county-wide book service from a truck might be. At the meeting on the "County Library Campaign in New York State" the principal address was made by John D. Willard, Research Associate in Rural Education of the American Association for Adult Education, who summarized the obstacles to county library development as wrong attitudes, economic conditions and insufficient or embarrassing legislation, the last named of which it is the special responsibility of the State to overcome. Others who spoke in behalf of the county library idea and the proposed legislation were Elizabeth L. Arthur, State Grange lecturer, who spoke for the State and local granges; Prof. C. E. Ladd, who appeared for the extension interests of the New York State College of Agriculture and Home Economics at Cornell, and Mrs. Guerdon B. Miller, representing the State Congress of Parents and Teachers.

Prof. Robert E. Rogers, director of reading at Massachusetts Institute of Technology, made good his reputation for stirring up discussion by his talk to trustees and librarians on their duties to those born since 1900, for whom English literature of the eighteenth and nineteenth centuries has less and less to say, and to readers in general who should be brought by the public library into contact with the nineteenth century Europeans and more significant English writers who have had a dominating influence on the American literature of today.

The joint responsibility of public and school libraries for the reading of the young person midway between childhood and adulthood was emphasized by the meeting presided over by Anna Clark Kennedy, supervisor of school libraries in the State Education Department. Mabel Williams, supervisor of work with schools in the New York Public Library; W. H. Pillsbury, superintendent of schools, Schenectady, and Irene Smith, of the Intermediate Department, Brownsville Children's Branch, Brooklyn, dealt with the subject from their various points of view.

The address of the president, Elizabeth M. Smith, was a survey of the professional responsibilities of the New York Library Association, considered as a typical State library organization, related on the one hand to the national body, the A. L. A., and on the other to the State supervisory body, the Library Extension Division.

An anniversary meeting was held on the opening night, addressed by Dr. Frank P. Graves, Commissioner of Education, who extended a welcome in behalf of the Department of Education; by President Strohm, who brought greetings from the A. L. A., and by Capt. E. Cockburn Kyte, who gave a history of the English public libraries and the L. A. U. K. during the past forty years.

There were several round-table discussions—"Child-Study Problems of the Children's Librarian," led by Dr. Ruth Andrus, director in child development and parental education of the State Education Department; "Reference Books and Service," led by James I. Wyer; "Publicity for Public Libraries," led by Leon R. Whipple of the School of Journalism of New York University; "Mutual Aid Among Scientific Libraries," led by Muriel Almon, librarian of the Division of Laboratories and Research of the New York State Department of Health, and one on new charging systems and machines.

Social events included a tea given to the members by Mrs. Franklin D. Roosevelt in the Executive Mansion, a reception by the

Board of Regents, which opened the convocation, and the scholarship luncheon given by scholarship winners of previous years to the winners of 1930 and guests of the conference.

Officers and Council members elected were: President, Wharton Miller, chief librarian and director, School of Library Science, Syracuse University; Vice-President, Mrs. Mabel L. Loomis, librarian, Smithside High School Library, Elmira, N. Y.; Members of Council to serve until 1933: Ada J. White and Charles E. Rush.

Separate Library Tax Proposed

THE THIRTIETH annual meeting of the Missouri Library Association was held in the Sedalia Public Library, Sedalia, Mo., October 7-9, 1930. It was considered by all who were present one of the best meetings ever held by the Association. Great interest was shown in the proposed Constitutional Amendment, which is being sponsored by the Association. This amendment provides that the library tax in this State will be a separate tax, as is the school tax. Mr. Charles H. Compton, assistant librarian of the St. Louis Public Library, is chairman of this committee, and he was assured the hearty co-operation of every member present. Among the many interesting events on the program were talks by Dr. Walter Williams, president of Missouri University, and Mrs. Luella St. Clair Moss, president of the Missouri Federation of Women's Clubs. Miss Vera Prout of the Kansas City Public Library Children's Department gave a paper on children's books. This was followed by ways of teaching the use of the library to children by Miss Norma Weis, children's librarian of Crunden Branch, St. Louis, Mrs. Grace M. Young, librarian of the Sedalia Public Library, and Mr. C. E. Wells, librarian of the State Teachers College Library, Maryville, Mo.

The following officers were elected for the year 1930-1931: President, Dr. A. E. Bostwick, St. Louis; Vice-President, Miss Frances Swanwick, Joplin; Treasurer, Miss Lucille Brumbaugh, Maryville; Secretary, Miss Margaret McDonald, Jefferson City.

Manual of Library Economy

THE FOURTH EDITION of James Duff Brown's *Manual of Library Economy* will be published shortly by Grafton & Company, London. The work has been revised by W. C. B. Sayers and is illustrated with plans and elevations of the most modern English and American libraries.

Session Devoted to Emily Dickinson

THE FALL MEETING of the New Jersey Library Association was held at Passaic, Friday, October 10, 1930, with an attendance of over 250. The morning session was held at the Reid Memorial Library and was presided over by the President, Miss Maud I. Stull. Mr. Henry C. Whitehead, Trustee of the Passaic Public Library, welcomed the members of the association to Passaic. Miss Amelia H. Munson, in charge of work with Continuation Schools, the New York Public Library, was the first speaker. Her topic was "Introducing Books to Working Boys and Girls." She stressed the great problem of introducing books to the boys and girls of the continuation school whose ages range between fourteen and seventeen and many of whom have left school not because of economic pressure but simply because they hated school and books. The second address of the morning was on the subject of "A List of Books for Young People" and was delivered by Miss Mabel Williams, Supervisor of Work with Schools, the New York Public Library. She introduced for the consideration of the association a list of books for young people (1930 edition) published by the New York Public Library. The address was concluded with a general discussion on the subject of books for young people.

Following the address a brief business meeting was held at which time the following resolution concerning the death of Mr. Henry C. Buchanan was passed:

In the death of Henry C. Buchanan on Sunday September 28, 1930, the libraries of the State of New Jersey have lost a wise leader.

Mr. Buchanan was for thirty-one of his eighty years a member of the New Jersey Library Association. He aided in the passage of the traveling library bill and until an appropriation could be made he took charge of the traveling libraries and did the work for love. He was State Librarian from 1899 to 1914. In this capacity he aided in the passage of the law creating the Public Library Commission in 1900. For thirty years he served as secretary of that Commission.

Mr. Buchanan was on the editorial staff of the *Trenton Times* and special writer for the *New York Sun* and other newspapers for many years and in that capacity greatly served the library cause, not only through his own editorials and contributions, but through his influence throughout the State as dean of editors of New Jersey, and through the personal friendships of the reporters of the State. He was utterly fearless in any cause he championed, and keen of judgment, far-sighted and untiring in effort. To him is largely due the progress made by the Public Library Commission.

BEATRICE WINSER
SARAH R. BUDD
JOHN P. DULLARD

Mr. Howard L. Hughes, Treasurer of the

Scholarship Fund, reported that a total of \$3,210 has been collected for the George M. La Monte Scholarship Fund. Of this, \$3,000 has been invested in a first mortgage at 6 per cent interest, netting \$180 annually. This concluded the morning session.

The afternoon session was opened at Westminster Hall at 2:15 o'clock. Miss Maud I. Stull, President of the Association, presided and announced that the afternoon would be given over to a discussion of the life and poems of Emily Dickinson. Madam Martha Dickinson Bianchi, niece and biographer of Emily Dickinson, gave a most informal but wholly delightful talk on "The Real Emily Dickinson." She described Emily Dickinson to her listeners, giving them her background so that they might form for themselves a mental picture of this well-loved poetess and her surroundings. The next speaker, Dr. Carrie Weaver Smith of the Montrose School, Reisterstown, Maryland, read several of Emily Dickinson's poems, interspersing them with remarks about the author and the beautifully individual manner she had of bringing truths out in poetry. A cordial invitation was extended to the delegates to inspect any or all of the various branches of the Passaic Public Library.

The officers of the association elected for the coming year are: President, Miss Maud I. Stull; Vice-President, Katherine B. Rogers, of the State Library; Secretary, John B. Fogg, New Brunswick; Treasurer, Edith L. Smith, Morris County.

Michigan Emphasizes County Work

PERFECT WEATHER, brilliant autumn coloring, Lake Superior blue and shining stretching boundlessly to the north, hospitable homes in a lovely old town formed an unrivaled setting for the meeting of the Michigan Library Association in Marquette, on October 8, 9 and 10. It had been some time since a meeting had been held in this section. All but four of the libraries in the Upper Peninsula were represented at this meeting.

The program was not crowded and left ample time for the exchange of ideas and the making and renewing of professional friendships. Some of the historical backgrounds of the region were given by three prominent men of the locality: Prof. Lew Chase, Mr. J. E. Jopling of Marquette, and Prof. James Fisher of Houghton.

The central theme of the program was the County Library. The outstanding features were a talk on "County Libraries," by Miss

Charlotte Templeton, librarian of Greenville, S. C.; a talk by Ernest Cockburn Kyte of Queen's University, Kingston, Ontario, on "English Country House Libraries," and one on "Labor Saving Devices," by Mr. Ralph Ulveling of Detroit.

The various section programs were given prominent places on the program, and so arranged that there was no conflict in time. Everyone could, therefore, go to all but one of the meetings. The trustees' dinner has become one of the important functions in the Michigan meetings. This year school children who had won prizes for essays on the County Library were guests. The tables were decorated to represent farm and county library service. The result was a vivid and potent appeal for a much needed service. There were drives about the towns near by, a visit to the library in Ishpeming, and a picnic on lovely Presque Isle, where "pasties" were introduced to those who were new to their excellence. The College and Reference Section program was in charge of Miss Eunice Wead of the University of Michigan, the Catalog Section under Miss Maud Grill of Jackson, the Lending of Books—a round-table discussion under Miss Marie Brookes of Detroit. The School and Children's Section set a good example in combining their efforts. Miss Julia Garst of Hamtramck and Miss Frances Dunn of Saginaw were in charge of this meeting.

The officers for the coming year are: President, Prof. C. B. Joeckel, University of Michigan; Vice-President, Mrs. Mary Frankhauser, State Librarian, Lansing; Second Vice-President, Mrs. Marie Manderfield, Houghton Public Library; Secretary, Miss Elizabeth Skinner, Detroit Public Library; Treasurer, Mrs. Nancy B. Thomas, Birmingham Public Library.

Rosenwald Program Discussed

THE TWENTY-FIRST annual meeting of the Kentucky Library Association was held at Paducah, October 9-10. Mrs. May McClure Currey, Librarian of the Shawnee Branch of the Louisville Free Public Library, presided. The first session was devoted to business meetings and reports of standing committees, together with a review of the A. L. A. meeting at Los Angeles, by Mrs. H. G. Henderson, of the Georgetown Public Library. In the afternoon, after the address of welcome and the response, Miss Tommie Dora Barker, Regional Field Agent for the South, gave an interesting and enlightening discussion of the Rosenwald Program of Library Aid. There was a general discussion and questioning following the address showing the interest in the

movement among the members present. A delightful social function was given in the evening, in the form of a Book Dinner, in which the librarians were aided by some residents of Paducah.

The Friday morning session was devoted to section meetings. The whole body met for a short session with the school sections, where they heard a talk on school libraries, by Miss Lucile F. Fargo, Assistant Director of the Library School of George Peabody College for Teachers. Following this the Public, College and School Round Table meetings were held. The children's section meeting, led by Miss Bernice W. Bell, head Children's Department, Louisville Free Public Library, was held in the afternoon. It consisted of an address by Miss Fargo and discussions of several topics of interest to the children's librarian. One delightful feature was a puppet show, given by Miss Bell and a member of her staff. After the meeting the librarians were guests of the city for a drive over Paducah and its environs, followed by a tea given by the Women's Clubs.

In the evening, an address was made by Dr. A. L. Crabb, of George Peabody College for Teachers, Nashville, Tennessee. The theme was the place of books in the lives of the American people and the part the librarian plays in presenting these books to the public.

New officers elected are: First Vice-President, Miss Alma J. L'Hommedieu, Covington Public Library; Secretary-Treasurer, Miss Dorothy Goodwin, Louisville Free Public Library; Directors, Miss Margaret Bailey, Murray State Teachers' College, and Miss Isobel Bennett, Eastern Kentucky State Teachers' College, Richmond.

Two Memorial Volumes

TO HONOR John Cotton Dana, a tribute volume, consisting of letters received after his death, newspaper and magazine editorials, and nation-wide comments, has been compiled by Beatrice Winsor, librarian of the Newark Public Library. This memorial volume is printed by the Newark, N. J., Public Library.

A memorial volume in recognition of the centenary of the birth of Charles Pratt has just been issued by Pratt Institute, Brooklyn, N. Y. Mr. Pratt's own lack of a systematic education suggested the wide possibilities of self-education through the public library, not then universally prevalent, and his conception took the form of a "free library for the citizens of Brooklyn" which became an integral part of the great purpose of Pratt Institute in its initial year, 1887.

Among Librarians

Public Libraries

FRANCES BLACKMER ANGELILLO, Albany '26, is reference librarian at the Oklahoma Library Commission, Oklahoma City, Okla.

SARAH B. ASKEW, librarian and organizer of the New Jersey Public Library Commission, was appointed secretary of the Commission at a meeting of the New Jersey Public Library Commission on October 7, the position formerly filled by the late Henry C. Buchanan.

ELIZABETH BEAL, Pittsburgh '27, is now first assistant in the Boys and Girls Department, Carnegie Library, of Pittsburgh, Pa.

DOROTHY BECK, St. Louis '27, has accepted a position as assistant children's librarian in the Carnegie Library, Oklahoma City, Okla.

CLARA BEETLE, Simmons '14, has been appointed on the cataloging staff of the Library of Congress, Washington. Miss Beetle spent last year in advanced study at the School of Library Service, Columbia University.

WILMA BOISSELIER, Columbia '29, has been appointed first assistant in the Englewood, N. J., Public Library.

MARIA C. BRACE, recently reference librarian at Reading Public Library, is acting head of the Industrial Department at the Enoch Pratt Free Library, Baltimore.

PRISCILLA CHIPMAN, Simmons '26, has been appointed a cataloger at the Queens Borough Public Library, Jamaica, N. Y.

BERNICE E. DORAN, Wisconsin '25, librarian, East Side Branch, Evansville, Ind., Public Library, was promoted in the summer to serve as county librarian of Vanderburgh County, in the Evansville system.

ALICE J. DORMAN, Columbia '29, is now children's librarian of the Greenwood-Phinney Branch, Seattle, Wash., Public Library.

IDA JOSEPHINE DUFF, Pittsburgh '05, has been appointed supervisor of children's work in the Englewood, N. J., Public Library.

MABEL R. GILLIS has been appointed California State librarian to succeed Milton J. Ferguson, recently appointed head of the Brooklyn Public Library, N. Y.

LILLIAN GINSBURG, Simmons '28, has become an assistant on the staff of the Kirstein Library, Boston.

AGNES O. HANSON, Wisconsin '28, reviser and assistant in the Wisconsin Library School for a year, has resigned to accept the position of cataloger in the Peter White Public Library, Marquette, Mich.

CATHERINE MANLEY HICKER, Washington '29, has been appointed first assistant in Ballard Branch, Seattle, Wash., Public Library.

ANNASUE HUGHES, Wisconsin '28, has accepted the position as librarian of the Delano Branch, Kern County Free Library, Bakersfield, Cal.

PHYLLIS L. JANSEN, Washington '28, is working as a half-time assistant in the Central and Branch children's rooms of the Seattle Public Library, while taking the advanced course in children's work at the University of Washington Library School.

EMILY H. KEITH, Washington '21, formerly first assistant in the Yesler Branch of the Seattle, Wash., Public Library, is now librarian of the Georgetown Branch.

LUCY M. KINLOCH, Pratt '26, recently first assistant in the central children's room of the Utica Public Library, is taking the course in children's work in the Western Reserve Library School and is working part time in the Cleveland Public Library.

ELEANORE KISSANE, Pittsburgh '27, is now children's librarian, Mount Washington Branch of the Carnegie Library of Pittsburgh, Pa.

MADGE McLAUGHLIN, Wisconsin '24, has joined the staff of the Queens Borough Public Library, Jamaica, N. Y., as assistant in the Reference Department.

ELIZABETH MADDEN, Simmons '29, has accepted a position as an assistant in circulation at the American Library in Paris, and expects to remain in France for another year at least.

MYRA POLAND, librarian of the Osterhout Free Library, Wilkes-Barre, Pa., died Oct. 28.

AGATHA WADE, Simmons '26, formerly children's librarian at the Memorial Hall Library, Andover, Mass., is now children's librarian of the Dearborn, Mich., Public Library.

Colleges and Universities

JEANNETTE BOWEN, Simmons '27, has accepted a cataloging position at the Connecticut Agricultural College Library, Storrs, Conn.

MARGARET BRICKETT, Simmons '26, has joined the staff of the New Jersey College for Women Library, New Brunswick, as an assistant in circulation and reference.

ALBERTA L. BROWN, Wisconsin '25, has accepted the position as head cataloger in the University of North Dakota Library, Grand Forks.

ELSIE J. DUNCAN, Pittsburgh '24, is librarian of the Iowa State Teachers College Library, Cedar Falls, Iowa.

CECILE EVANS, Pratt '23, is now in charge of the children's library at the State Teachers College at Macomb, Ill.

KENNETH GODSCHALK, of the Library Extension Department, University of Michigan, has recently resigned and is succeeded by Mr. Francis Kamman.

ETHEL L. GOFF, Wisconsin '27, resigned as cataloger, Carnegie Free Library, Alliance, Ohio, in the summer to accept appointment as cataloger of Elmira College Library, Elmira, N. Y.

HELEN HANCOCK, Columbia '27, cataloger for the Oklahoma Library Commission, leaves New York City Nov. 29 with the Floating University.

MRS. TENNIE M. THATCHER has been appointed assistant in the Periodical Room of the University of Michigan Library, to succeed Mrs. Olive T. Bender.

KATHERINE WARREN, Simmons '14, has returned to the Yale University Library, at New Haven, Conn.

MARY EVELYN P. WHITE, Simmons '29, has been appointed cataloger at the University of Cincinnati, Ohio.

Special Libraries

MARGARET WOOD EMERSON, Simmons '17, has accepted the position of cataloger at the General Theological Library, Boston.

ROBERT GOODRICH, formerly on the staff of the University of Michigan Library, has accepted a position in the United Engineering Societies Library in New York City.

INA RANKIN, Pratt '09, formerly secretary of the Bureau of Government, has been temporarily placed in charge of the Forestry Library of the University of Michigan.

GRACE THORNTON, Pratt '25, is on the staff of the Russell Sage Foundation Library.

Marriages

GRACE C. BLEICHNER, Pittsburgh '29, was married on August 6 to Mr. James H. Grady at Pittsburgh, Pa. Mr. and Mrs. Grady will live in Buffalo, N. Y.

ETHEL A. CHILDS, Simmons '28, was married on Sept. 15 to Mr. Perley N. Storer.

BEATRICE CLUGSTON, Simmons '25, was married to Mr. John Hartwell Moore on June 21 at Waynesboro, Pa. Mrs. Moore was formerly on the staff of the Cuyahoga County Library Department at Cleveland.

ESTHER COLAHAN, Simmons '26, was married on May 29 to Mr. James Hutson Hopkins, and is living at 108 South Park Avenue, Alliance, Ohio.

GERTRUDE LOUISE HARRINGTON, Simmons '23, was married on March 29 to Mr. Leon Vermont Thompson in Brooklyn, N. Y. Mrs. Thompson is continuing her work at the library of the Insurance Society of New York.

PHYLLIS RICHARDSON KANE, Simmons '28, formerly on the staff of the Brooklyn Public Library, was married this summer to Mr. William Hobson Carroll.

ELEANOR MIDWOOD, Simmons '27, formerly with the Hispanic Society of America Library, New York City, was married recently to Captain Frank Trenholm Coffyn.

ANTOINETTE QUINN, Pratt '21, of the Racine, Wis., Library staff, was married to Mr. James B. Rohan on Aug. 16.

MILDRED SHAND, Simmons '22, formerly a cataloger at the Lincoln Memorial Library, Springfield, Ill., was married on July 2 to Mr. Leigh M. Kagy.

AGNES B. SPENCER, Simmons '25, was married June 30 to Rev. Corwin Carlyle Roach of Hartford, Conn. Mrs. Roach was for some years on the staff of the Yale Law Library.

MILDRED STARRETT, Simmons '13, formerly with the Avery Architectural Library, Columbia University, was married in 1928 to Mr. Alexander Garrett, and can now be reached at 7 King's Bench Walk, Inner Temple, E. C. 4, London, England.

BONNIE STRONG has left the library of the Standard Oil Company of California. She was married on Oct. 4 to Mr. George Henderson. Miss Mary Taylor, assistant librarian, has succeeded Miss Strong.

CORDELIA TITCOMB, Western Reserve '29, was married on May 24 to Mr. James Ambler Smith at Cleveland, Ohio, where Mrs. Smith had been connected with the Cuyahoga County Library.

Opportunities

(This column is open to librarians.)

Wanted—Assistant law librarian for large law library. Immediate salary, \$2,400. Age limits, 21 to 50 years. Applicants must be college or university graduates and must have had either not less than one year of training in a recognized law school or one year of training in a recognized library school, and in addition not less than two years' experience in a law library open to the public. L15.

Young woman, college and library school graduate with little experience, would like position as assistant in a public or college library. East preferred. L10.

Young woman, with college and library school training, desires responsible position. Experience includes reference, order, circulation and administrative work in college and public library. Prefers reference or reader's aid, but would consider any good opportunity. L11.

College graduate, with one year library school, would like temporary position in middle or south Atlantic States. Twelve years' general experience. College library preferred. L12.

College graduate, with additional degree in library science from Univ. Ill., desires position in college library. Would consider work in public, special or school library. L13.

Library school and teachers' college graduate desires position as general assistant. Four years' teaching and some library experience. L14.

Children's librarian, experienced, with highest references, desires position. K-15.

College graduate, with certificates from Riverside and Columbia and three years' experience in public library, desires position in public or high school library. Reference work preferred. K-16.

College and library school graduate with teaching experience and some public, college, and university library experience, desires position in library at once. South preferred, but will consider other localities. K-18.

Free

ANY LIBRARY wishing to complete their sets of the *Civil Report* of Brig. Gen. Leonard Wood as Military Governor of Cuba for the years 1900, 1901 and 1902 might write to the Roosevelt Memorial Association Library, 28 E. 20th St., New York City, who have a supply of odd volumes for free distribution. A list of available volumes will be sent on request.

Wanted

THE PUBLIC LIBRARY of Duluth, Minn., desires copies of *Libraries* for June, 1929, and March and December, 1926. Also the *Nation* for May 8, 1929, and *Popular Astronomy* for April, 1929.

WANTED by the University of Southern California Library, University Park, Los Angeles, Cal., *Library of Congress Classification D*.

WANTED—Complete file and long runs of *Leslie's Weekly*. Will pay a good price. X20.

The Calendar

Nov. 20-23—Negro Library Conference, Fisk University, Nashville, Tenn.

Nov. 21—Illinois High School Library Association meets as Section of High School conference at Urbana, Ill.

Nov. 27-29—Southeastern Library Association, annual meeting at Tampa, Fla.

Dec. 29-31—Midwinter meeting of the American Library Association will be held at the Drake Hotel, Chicago, Ill.

Free

THE MAYFAIR AGENCY announce the publication on November 1 of the "Periodical Handbook" for 1931, the first edition since 1929. The Handbook contains answers to almost all questions commonly asked about the leading library publications and will be sent free of charge to readers of THE LIBRARY JOURNAL who mention this periodical in making request. Apply direct to The Mayfair Agency, 51 E. 33rd St., New York City.

American Foundations

"AMERICAN FOUNDATIONS FOR SOCIAL WELFARE," compiled by Bertha F. Hulseman of the Russell Sage Foundation Library, supplants a previous publication under the same title issued in August, 1926, and for a year entirely out of print. Since 1926 many new foundations have come into existence, necessitating the inclusion of new data. A list of community trusts which report holding funds and a classified list of foundations is given. Foundations whose titles include proper names are placed alphabetically according to surnames.

New Offices

OWING to the rebuilding of the present premises of B. F. Stevens and Brown, American Library and Literary Agents in London, the new offices of this company will in the future be in New Ruskin House, 28/30 Little Russell Street, London, W. C. 1, within a few yards of the British Museum.

Story Hours for Children

THE QUEENS BOROUGH PUBLIC LIBRARY is planning to give the children of Queens Borough entertainment by-way-of-the-air at intervals during the winter. Through the courtesy of the Municipal Broadcasting Station WNYC, arrangements are being made to have Story Hours once a week.

It is felt that by using the modern magic of broadcasting that a multitude of children in Queens Borough will be able to enjoy these charming tales and that grown people also, who still like to hear the entrancing words "Once upon a time," will be able to listen in.

HACKH'S CHEMICAL DICTIONARY
232 illus. Over 100 tables. Fabrikoid, \$10.00

American Journal of Science (New Haven): "It is an excellent book for its purpose and should be extremely useful."

Journal of the American Chemical Society (Cambridge): "It is vastly superior to any other chemical dictionary in English."

Nature (England): "Hackh has rendered an important service to chemists and chemistry."

Journal of Chemical Education (Baltimore): "It is surprisingly complete, and the workmanship is excellent."

Chimie et Industrie (France): "The book is of great reference value; we only wish there was something like it in French."

Science (New York City): "A book which is sure to prove very useful to chemists and to physicists, biologists, physicians and many others who make use of the facts of chemistry."

Science ~ ~

Outruns the Bookmaker

The advance of science is incessant . . . hour by hour. Today in one great university alone there are more than 800 separate research projects under way.

Books—frequently out-dated before publication—cannot keep pace with this relentless, world-wide progress, for such publication is a slow and rigid process, measured in terms of months—sometimes even of years. Yet to the scholar the need for current research data is imperative.

The scholarly journal alone meets this self-imposed demand of science, providing the interested layman, the student, and the research worker with exact and complete reports of the latest investigations.

For more than forty years journals of the University of Chicago Press have kept pace with the restless growth of knowledge. As new and specialized fields have been opened for scientific inquiry new media of periodic publication have been established. The University of Chicago Press now publishes fifteen scholarly journals in fifteen specific fields of learning:

ASTROPHYSICAL JOURNAL
BOTANICAL GAZETTE
JOURNAL OF BUSINESS
CLASSICAL PHILOLOGY
INTERNATIONAL JOURNAL OF
ETHICS
JOURNAL OF GEOLOGY
LIBRARY QUARTERLY

JOURNAL OF MODERN HISTORY
MODERN PHILOLOGY
PHYSIOLOGICAL ZOOLOGY
JOURNAL OF POLITICAL ECONOMY
JOURNAL OF RELIGION
AMERICAN JOURNAL OF SEMITIC
LANGUAGES AND LITERATURES
SOCIAL SERVICE REVIEW
AMERICAN JOURNAL OF SOCIOLOGY

Is your library equipped to match the progress of learning in these fields? Can you supply your patrons with up-to-date reports of scientific investigations? If you need any of these journals, we shall be glad to receive your subscription orders or to furnish sample copies for your examination.

Checklist A. L. A. Publications 1930

Is your file complete?

Book selection. Drury. 369 p. Cloth, \$2.75.

Bringing up nine. Reely. 16 p. 10 copies, 50c; 100, \$2.50.

Bruce Barton broadside. 5 copies, 40c; 10, 70c.; 50, \$2.50.

Children's books from twelve countries. 42 p. 50c; 10 or more, 40c each.

Children's library yearbook, no. 2. 88 p. \$1.35.

College and reference library yearbook, no. 2. 146 p. \$2.

500 books for the senior high school library. Schmidt. 64 p. 75c; 10 or more, 60c each.

Graded list of books for children. Beust. 149 p. Cloth, \$2.

Helps for club program makers. Henry. 68 p. 65c; 10 or more, 55c each.

Illustrated editions of high school classics. Fitzroy. 72 p. 75c.

Introduction to cataloging and classification . . . Mann. 424 p. Cloth, \$3.

Librarianship as a profession . . . 8 p. 10 copies, 50c; 100, \$2.75.

Library in the school. Fargo. 453 p. Cloth, \$3.

Library service for children. Power. 325 p. Cloth, \$2.75.

Manuals of library economy. 35c.
10. Elements of the library plan.
16. Book selection. 20. Shelf department. 30. Library work with the blind.

Modern high school and its library. Hill. 12 p. 15c; 10, \$1.25; 50, \$5.50; 100, \$10.

Newspaper publicity for county library campaign. 37 p. Mimeo. 10 copies, \$3; 100, \$27.

One thousand useful books. 96 p. 75c; 10, \$7; 25, \$16; 50, \$30.

Order work for libraries. Drury. 260 p. Cloth, \$2.25.

Program for elementary school library service. Fargo. 220 p. Cloth, \$2.25.

Reader and the library. 100 copies, \$1.50; 500, \$6; 1000, \$11.

Reading, for instance. 100 copies, \$2.25; 500, \$9.50.

Reading with a purpose. Cloth, 50c. Paper, 35c; 4 copies, \$1; 100, \$11.
45. English history. 54. Scandinavian literature. 56. Invention and society. 59. Shakespeare. 64. Short story writing.

Reading with a purpose poster, no. 3. Single copy, 35c; 5, \$1.50; 10, \$2.50; 25, \$5; 100, \$15.

Recent children's books. Van Cleve. 100 copies, 90c; 500, \$2.75; 1000, \$4.50; 5000, \$17.

Reference books of 1929. Mudge. 47 p. 60c.

Reference work. Wyer. 315p. Cloth, \$2.50.

Sixty educational books of 1929. 15c.

Spend your spare time in profitable reading. 100 copies, 75c; 500, \$3; 1000, \$5.40.

Suggested code of ethics for librarians. 10 copies, 75c; 25, \$1.50; 50, \$2.50; 100, \$4.

Thirty books for young people. Roos. 10 copies, 35c; 50, 75c; 100, \$1.25; 500, \$5.

Will Durant's one hundred best books. 100 copies, \$1.25; 500, \$4.25; 1000, \$7.50.

Worker and the library. Dudgeon. 100 copies, \$1.50; 500, \$6; 1000, \$11.

THE LIBRARIAN . . .

Will agree that Peterson Library Furniture is scientifically designed. Inspection will prove the careful assembly and fine quality of materials. It pays to furnish with Peterson equipment.

L-5140

Write for the complete Library
Catalog No. 15-L

Representative of the complete Peterson Line is this Charging Desk efficiently arranged. It will fill the most exacting needs of the small or medium sized Library.

LEONARD PETERSON & CO., Inc.

1222-34 Fullerton Avenue

Office and Factory

Chicago, Illinois

Distributors conveniently located to serve you.

Colson Book Trucks

Colson Book Trucks are ideal equipment for library service. They are quiet, easily handled and attractively finished to harmonize well with any surroundings. All-steel construction assures a rugged truck that will last for years.

Model 6113, illustrated, has two shelves of surprisingly large carrying capacity. It is finished in sage green. The ball bearing, rubber-tired casters roll easily—swivel freely. This handy truck is a labor and time saver of wonderful convenience. It is just the right height for checking and delivery desks, as well as for quick loading and unloading at shelves.

Forthcoming Issues of THE LIBRARY JOURNAL

✿ The one special library that we believe has never before been written about will be covered in the December 15th (Christmas) Number, of THE LIBRARY JOURNAL. We feel sure that librarians have wondered a great deal about Santa Claus' Library and at last we have found someone who will not only tell us about this library but also give us an "authentic" photograph of it. We will not announce the author of this article for we believe you may be able to guess who in the profession is giving us this account. There will be other Christmas articles to supplement this unusual one.

✿ The article on "Reference Work in Branch Libraries," by Vera Morgan of the Indianapolis Public Library, scheduled for this number, has been held over for a special number devoted to branch library activities in a forthcoming issue.

✿ Doctor Bradford's article on the "Universal Decimal Classification," scheduled for the December 15th issue, will be held over for the January 1, 1931, number, if it is too long to print it along with the Christmas articles. B. E. W.

SNEAD

Standard Steel Stacks

Essex County
Law Library,
Newark, N. J.
Librarian,
Chas. H.
Conaway

As is the case with all Sneed products, you will find that the economy of Sneed Standard Steel Stacks in no way lowers our usual standard of efficiency. Our 50 years' experience in the installation of bookstacks is at your disposal. Let us aid you in your equipment problems—no library is too large or too small.

Departmentalized Reference Service

By Katharine D. Kendig

*Principal, Literature and Philology Department
Los Angeles Public Library, California*

ONCE UPON A TIME, in an enviable time, a scholar and a gentleman exclaimed regally, "I take all knowledge to be my province." A magnificent ambition worthy of his energetic age, when good Queen Bess watched the boundaries of her world stretch into the unknown, and her wise men measured with breath-taking enthusiasm the equally expanding frontiers of human knowledge. And men did take all knowledge for their province and began so to enrich their world that never since their time has anyone dared make a similar claim. For, with the boundaries widened to the bewildering complications of our own day, the best that a wise man can do is to concentrate on one subject—the mechanism of an aeroplane, the newly discovered letters of Shelley, or the possibilities of humanism. During his youth he may glance at the limitless boundaries of his world—earning thereby his A. B., but once he grows up he of necessity must, after a regretful sigh over those more fortunate Elizabethans, settle down to his own private field and till it to the best of his ability. In other words, the age of specialization is so a part of us all that to say so is to be guilty of a bromide. If you are a teacher in a large school, you teach mathematics or literature, or music, and you leave to the little country school the problem of all knowledge. If you are a doctor, you concentrate on one portion of the human anatomy. If patients have the flu or the measles, they turn to their good old family physician. For more mysterious complications they turn to a specialist in their own

particular problem. And most certainly should the library fall into line, since it is so integral a part of the life around it, that it cannot afford to attempt "all knowledge" without subdividing its provinces under the care of specialists. Branch libraries and smaller city libraries may take care of general problems, just as the family physician does. Certainly both have their very valued place. But a big city library must subdivide until it resembles an office made up of skilled doctors each of whom is prepared to cope with one specialized phase. The larger the library system, the more complicated must be its divisions. As Carl Vitz, Librarian at Toledo, said in his excellent paper on Administrative Problems and Costs of Subject Departments in Large City Buildings: "Such growth parallels the division of cells and is natural and progressive."

I wish to limit my talk to the study of one departmentalized library—the Los Angeles Public Library; and I am limiting the talk, not because that library is alone in the field. It is following the shining example of the Cleveland Library. And there are many others departmentalized to a large extent. But because it is the only one I know personally, which has so solved its arrangement, I have been in a position to watch the cells divide into more and more specialized functions. And in discussing one such library, the whole problem of departmentalization can be touched, because, though the geography and minor details have been worked out differently in different libraries, the principle is the same.

When I was first transferred, about six years ago, to take charge of what was then the General Literature Department, the library was in a rented building; it had already seemed wise

Paper presented before College and Reference Section, A. L. A. Conference, Los Angeles, Cal.
Miss Kendig has been married since presenting this paper and is now Mrs. Garbutt.

to establish certain departments to meet group needs. The Science Department was already organized, as it is in most libraries; the lovers of music and art had their division; Sociology Department was in full swing; Fiction had been separated from non-fiction; Foreign books were together; and it had just been decided to meet the problems of the teachers with a room of their own. All this subdivision, with, in each case, the reference and circulating books together, left two huge illogical cumbersome departments, the General Reference and the General Literature, the first made up of reference books on all the subjects left over after the creation of special departments; the other made up of circulating books on the same varied subjects. I, for instance, since I was buying the books, should have been equally well informed on the subjects of history, biography, travel, philosophy, religion, literature, and philology, while my neighbor, the Principal of the Reference Department, had to meet as varied needs in the reference books, and both of us had to keep a friendly eye on the other to be sure that we did not duplicate unnecessarily, nor leave too wide a gap between us. Meanwhile the special departments were growing rapidly, meeting so adequately the needs of their clientèle, and so obviously well received, that it became a matter of course when the library was moved to its own building, to complete the plan, and reorganize the two sprawling, overlapping remainders. After all, the growth was as natural as Mr. Vitz prophesied. If every existing department "worked," why differentiate among interested groups in the city? If the scientist and business man had their special room, why not the historical research worker? If the musician had his section, why not the dramatist, especially in a city where the motion picture industry creates an intensive demand for plays, new and old? If the teacher was pleased, why not try the same method with the minister?

And so the final subdivision took place and the library emerged as it is today. A little explanation of the arrangement may be necessary, though in each city it must necessarily differ to meet different needs. The hub of the whole wheel is, where a hub should be, in the geographic center. This is the Information Desk and Adult Education Department in the large Rotunda. Since the union catalog is located there, the Information Desk serves as a starting point in directing traffic among the public. Since it serves too as Readers' Adviser, it becomes the starting point also for a newcomer into the library. And from that central desk, patrons are sent to the room where their own needs may best be met. The History Department is the nearest room to the Information

Desk. It contains history, travel, biography, the encyclopedias, and general bound magazine collection (which may be reached as well by other departments). Next to the History Room is the Sociology Department, since it is so closely allied, and next to Sociology is the Science Room, equally closely allied to it. On the other side of the History Department is Literature and Philology, next door to Music and Art, its nearest kin in subject matter, and across the aisle from Fiction. On the floor below are the Teachers' Department, the Children's Room, Philosophy and Religion, Foreign, and the Periodical and Newspaper rooms. The Municipal Reference Library is outside the building altogether, located where it belongs in the City Hall.

In all this geographic maze, there is one special point I should like to make. In each room the circulating and reference books on a subject are together. Since a question is answered as readily from one as another, and since the purchase of both reference and circulating books is thereby concentrated in the hands of one person, the system is admirable. Well do I remember the days when one of us bought reference and one circulating books on the same subjects, and when to answer a question, the reference assistants had necessarily to wander in the circulating room in quest of books they could not know intimately, since they neither bought them nor were in close contact with them every day. To me, the combination of the books by subject only, rather than by the purely arbitrary distinction of reference or circulation, is one of the most logical and economical results of a highly specialized library.

So much for the explanation of the arrangement of one particular building. What then have been found the advantages and disadvantages of the system? I shall take the disadvantages first, since they are outweighed by the assets; the best proof being the very fact that the Los Angeles system grew slowly enough to test each difficulty, and yet its evolution continued steadily in the face of them. It must in fairness be stated, however, that the disadvantages loomed greater in the case of the Newberry Library, the librarian of which, Mr. Utley, wrote me that the departmentalization had to be abandoned there since it was found "too expensive in service," and that it required too much "duplication of material." The system was given up more than twenty-five years ago, and since then first the Cleveland Library, and then the Los Angeles Library found a different answer.

The disadvantages: The first does not affect this paper at all, since it is concerned with the general reader who wants "a good book." His

needs are really met more simply by the Branch Library, which is planned to take care of him. The Main Building is designed first and foremost for the specialist, and for reference work, though it naturally caters to Everyman as well as its function will permit; witness the busy Fiction Department. We have grown wiser in meeting this problem since the first days, when an exhausted man finally reached the Information Desk after apparently an endless search for a certain book down long corridors. He remarked, mopping his brow, but still willing to try once more, "They say Abraham Lincoln walked sixteen miles for a book. But I'll say he has nothing on me!" Now both library attendants and the public are better trained, and the man would be sent immediately to the correct point of departure, if he didn't go of his own accord. The other disadvantages are more pertinent. It is necessary to concede at once that the system is more expensive. More attendants are needed. There must be a small amount of book duplication as in the case of large dictionaries, or an encyclopedia. A duplicate section catalog must be supplied for each department. The question is not so much one of expense—which is greater, but whether the money is being spent to the best advantage. Mr. Vits, to quote him again, says, "Added cost of library service is not a real objection, provided real service is given." In other words, only the success of the system can meet the objection that it is more costly. Do more assistants, and those in turn, more specialized, spell better service? Is the duplication of certain general reference sets an advantage over the possession of just one to meet the needs of as many patrons, even if they are not scattered in different rooms? Again, only the use of the sets simultaneously in the various rooms (and that goes on every day) can answer the question. Possibly the expense is really an economy if the service becomes more efficient. A third objection, which can be met only through wisdom on the part of the staff, is the danger of a department growing provincial and forgetting it is one of many, and the question may find its answer from a different angle. When a man asked an attendant for books on "new writers" and she brought him an armful of material, her mind had to somersault out of a departmental attitude into a general library one when he exclaimed in horror, "No, no! I didn't say 'new writers'—I said 'neuritis'!" A provincial attitude can be prevented by the intensive use of the Information Desk with its finger on all the pulses; by the use of the inter-departmental telephones; by a friendly spirit of cooperation. Attendants are trained never to give up certain types of questions without first referring to the main catalog. Anyone in

the library can testify to the constant use of the house telephones, which are so continually ringing that sometimes we forget they are really a blessing. And the friendly spirit throughout the whole library is so pronounced and genuine, that there is no danger at present of a lack of cooperation.

And now for the advantages: Is the reference work bettered by departmentalization? Why not let a specialist answer. It is he who should be helped or hindered in his research work. In the first place, his books are arranged as nearly together as any classification will allow. In the second place, because more attendants are needed with so many rooms to cover, he gets more help. And in the third and most important place, he finds attendants who definitely are interested and are specializing in his own field. This is of vital importance to him. When I asked Doctor Blanchard's (Head of the English Department of the University of California at Los Angeles), opinion he gave it readily and said I could quote him as enthusiastically applauding departmentalization. This means an unqualified approval from a scholar and author who has used many libraries, and who is himself a specialist in one field. We have often heard of the value to the business man of a technical department. This is simply a variation of the theme from the standpoint of the college professor who is writing his books in the department which features his interests. A second tremendous advantage is the contact with special groups outside the library walls. Every department, of course, is better equipped to so cooperate with special groups. Take the example of the Music and Art Department: its Principal is so much a part of the life of her community, that she is on both the Board of Directors and the Technical Board of the local chapter of Pro Musica, the important international music association; she is a member of the Artists' Council, newly formed to stimulate art in the city, and especially to work on the Olympiad, coming here in 1932; she is on the Executive Board of the Woman's Committee of the Philharmonic Orchestra; on the Advisory Board of the Hollywood Bowl Association; and was recently one of three judges in the contest of the International Book Plate Association. In other words, the music and art groups in the city value her knowledge and appreciate her services. How could she possibly be in as close touch with these important organizations if she were in a less specialized department? But a final and supremely important advantage that springs from the very system itself is the specialization of library assistants with their consequent acquaintance with one subject, or allied subjects. This with its

attendant blessings means almost as much as the book collection, since it makes the book collection useful. It is always wise to choose a new assistant fitted by education and background for her position. But even if the worst should happen and she should have merely a smattering of the subject, her later concentration on it makes her at least know the vocabulary. And at the best, she becomes a real specialist herself, capable of giving advice, studying her subject in extension classes, and becoming increasingly valuable. Nothing takes the place of book knowledge. If nobody can match the book to the questioner, he goes away unanswered. Intelligent use of books in reference work is almost as important as having the books at all.

Then with increasing book knowledge from daily contact with the subject, and with everyone in the department definitely interested in certain fields, special reference tools can be created in addition to printed ones. I shall have to speak of my own department and again not at all because it is an example, but because I have watched it evolve from an ungainly mass lacking coordinating muscles, like some low form of sea life, to a logical unit, compact and workmanlike, and capable of real usefulness. When the Literature and Philology Department was created, the circulation leapt up more than 23 per cent the first year, over the same classes in the former arrangement, and the reference work naturally kept pace, but with figures impossible to obtain. Special indexes became possible. Los Angeles is a dramatic center because of the motion picture industries. We found a subject index to plays indispensable, and the printed ones, like the excellent

Firkins' *Index to Plays* or Drury's *Viewpoints in Modern Drama*, too limited for our use, or growing out of date, like any printed bibliography, as compared with a card catalog. We began making a subject card for almost every play added and now when a studio, realizing for instance that war pictures are popular, asks, like *Oliver Twist*, for "more, please," the plays are already listed. Types of pictures are produced in cycles, as we all know who have watched the fads come and go, and there is no telling what will be the next one. We now have approximately 3,400 such subject cards used of course, by the amateur as well as the professional; and about 6,000 more cards analyzing essays, especially of material about authors, a sort of miniature of the coming Wilson Index. We have made many special lists. We have indexed popular poetry not indexed elsewhere (even in the new supplement to *Granger*); and we keep special files to previous snags in reference work. This is not at all a complete enumeration, nor is there anything new of course in any of this, but it is all developed much more intensively than any program we could carry out with too many subjects in the department to cover any one of them thoroughly.

After all, there is virtue in thoroughness, and special information. Even Bacon would find it difficult today to make his splendid conquest of all knowledge. And we more common mortals are forced to choose whether we shall be a little Edison, or a minute Edna St. Vincent Millay, or a potential President of the United States, and with our choice comes specialization, and with specialization comes the necessity for the subdivided library to meet our more concentrated needs.

The Facsimile Text Society

By Frank A. Patterson

THE ORGANIZATION of the Facsimile Text Society on Dec. 30, 1929, was an event of unusual and unique importance to libraries, especially to those in America. For the object of the Society is to publish at a low price rare and inaccessible texts necessary not only for the research worker but useful to the general reader. It thus offers to libraries the opportunity hitherto entirely lacking to assemble books of great importance which have up to now foiled the efforts of their buyers and have been obtained only by great centers after long hunting and at exorbitant prices.

The list of eight books, the publications of the first year, is given later in this article. These books, too, have a real up-to-date im-

portance, for after all knowledge is not detached, but unified. For instance, only this autumn Dean Inge of St. Paul's in a book of essays wondered if under some circumstances suicide is not justifiable. The idea was immediately hit upon by editorial writers throughout the country who imagined that perhaps in this sentiment we were about to enter a new phase of modern thought. But verily there is nothing new here. Back in the seventeenth century Burton wrote his *Anatomy* in which he considers in typical fashion this puzzling question. He had been preceded, however, in his thought by many writers, notably Timothy Bright, who in 1586 had published *A Treatise of Melancholy*. A score of

years later Shakespeare had discussed the question in *Hamlet* and finally John Donne wrote a special treatise, *Biathanatos*, in which he enlarges upon this thought. Donne's book is among the publications issued already by the Society, while Bright's treatise is listed for publication next year. It is obvious that these books not only bear directly upon the whole question of melancholy in the seventeenth century, but they also throw interesting and valuable light upon a subject that is very much up to date this year. We thus see that Dean Inge's suggestion is not entirely original and that it must not be given undue significance. His ideas assume importance only when we know more of the thought of the earlier period.

The publications of the Society are selected by a committee of scholars who are specialists in the subjects. Professor James H. Hanford heads the committee on seventeenth-century literature, Professor Jay B. Hubbell that on American literature, and Professor Jacob H. Hollander that on economics. At present the publications and those contemplated include books in five series: (1) Literature and Language, (2) History, (3) Philosophy, (4) History of Science, (5) Economics and Allied Subjects.

The method of printing is unique in that it is based on a photographic process known as "offset" printing. This method has certain distinct advantages. It gives the reader an exact text with no attempts by a well-intentioned editor at conjecturing what the true reading should be. The text is there exactly as it appears in the original, where each reader is free to draw his own deductions. Furthermore, the books, from the original title page to the end, are accurate duplicates of the copies. Even the notes made in the margins, perhaps by a former owner, are present as in the original.

Since the books selected are important, the Society has decided that the paper used must be of a high grade. They are accordingly printed on a rag paper of good quality, a paper which experts believe will be almost as clear one hundred years from now as it is today. It is as nearly permanent as any paper available for such printing. Another thing is apparent when you open the books. In their reproduced form the page is much more easily legible than in the original, for the letters stand out firmly on the white paper, not indistinctly on a faded and fragile page.

The offset process has another advantage and a very practical one. It is much cheaper than the slow method of setting type and proof reading. This is why the Society is able

to offer its books at such a nominal price.

The publications of the first year are as follows:

	List	
	Price	Net
John Donne: <i>Biathanatos</i> (1644).....	\$2.50	\$1.50
Thomas Warton the Elder: <i>Poems on Several Occasions</i> (1748).....	2.50	1.50
<i>Poems on Several Occasions by a Gentleman of Virginia</i> (1736).....	1.25	.75
Clara Reeve: <i>The Progress of Romance Through Times, Countries, Manners</i> (1785)	3.00	2.00
Benjamin Franklin: <i>A Dissertation on Liberty and Necessity, Pleasure and Pain</i> (1725)	1.50	1.00
Henry More: <i>Enchiridion Ethicum</i> [English translation, 1690].....	2.50	1.50
Ralph Cudworth: <i>Sermon Preached before the House of Commons</i> (March 31, 1647)	1.50	1.00
T. M.: <i>A Discourse of Trade from England unto the East Indies</i> (1621)...	1.50	1.00

Among the publications listed for next year are:

Timothy Bright: <i>A Treatise of Melancholy</i> (1586)
John Wheeler: <i>Treatise of Commerce</i> (1601)
Joseph Glanvill: <i>The Vanity of Dogmatizing</i> (1661)
William Beckford: <i>Modern Novel Writing; or the Elegant Enthusiast</i> (1796)
William Wood: <i>New England's Prospect</i> (1634)
<i>Cooper's Letter to Lafayette</i> (1831)
<i>Good News from New-England</i> (1648)

The Society at the close of its first ten months has as members over one hundred libraries and 525 individuals. It welcomes libraries, especially, for it feels that its greatest usefulness lies in placing these volumes where they may be readiest available to general readers. The annual membership dues are \$5, for which the library receives books of its own choosing at the list price to that amount and all other publications at a discount of one-third or more. Most libraries have given the Society standing orders for all publications. This saves the annoyance of ordering each book as it appears and further assures the library of securing all books in the various series. This is important, too, for doubtless in a short time these books in turn will be out of print, for practical requirements limit each issue to the probable sale. Librarians often inquire how much such a standing or continuous order will involve. Of course this will vary each year. The cost of the eight books published this first year is \$12.25. About that sum should be set aside in the budget for the books of the Society for next year.

There are no formalities in securing membership. A prospectus outlining the work and the plans of the Society will be mailed on request. The Society is located in Philosophy Hall, Columbia University, New York City.

Adult Education

By Lily Milholland Dodgen

Librarian, State Normal School Library, Trenton, N. J.

AS WE WELL KNOW, librarians were working for the intellectual improvement and the welfare of grown-up people many years before the term Adult Education came into use. Let us take a look at this "Adult" child of ours, now that everyone seemingly is interested in it. Many different conceptions exist concerning the meaning of Adult Education, so many different phases of the work there are. To define Adult Education is almost as difficult as to answer the question "What is life?" Of the many definitions given, I like this characterization best: "Adult education is concerned with the universe of human interests and the application of intelligence to the whole range of adult living." We may think of Adult Education as the voluntary learning which one carries on after the formal education of school or college. The field is world wide. The work is going on in Europe, Asia and America. The type of work is determined by the particular need of each place. England is concerned primarily with the education of the laboring man; in Sweden we find well-organized study circles; Denmark has developed the Folk High School; in Germany the work of Adult Education is concerned largely with industrial centers. And so do we find Holland, Switzerland, Czechoslovakia, Japan, New Zealand and Australia working in some way to meet the need of the adult person for skill, knowledge and understanding.

The particular phase of Adult Education in America is an extension of the general conception of the work to suit our super-industrial civilization. The varieties and forms of the work are innumerable. In grade the work varies from that of teaching the illiterate man to write his name, to the extension courses given by the universities, and the work of such institutions as the New School of Social Research and the People's Institute of New York. The curriculum includes any subject of information which is beneficial in the affairs of human life. Among the various types of Adult Education we have training in industrial work, immigrant education, commercial education, home economics, night schools of all kinds, schools for the illiterate, university extension courses and correspondence study. The need for this world movement is expressed in the words of Morse A. Cartwright, director of the American Association for Adult Education: "Mind expansion is a part of the necessary condition of life."

The old idea that education is a preparation for life has been replaced by the conception of life as a process of growth from beginning to end, and education a plan for providing ways and means to give this growth its best development, and to add to the richness and enjoyment of life at all stages. Every day of life is life itself. The old idea of cramming into the early years of life enough knowledge for the entire span has been called the "camel's hump" plan. Dorothy Canfield, in her book *Why Stop Learning* compares the process to that of packing a valise for a journey. It was never possible at any time to fill the mind of youth with enough information to carry him through the journey of life, not even with the cramming process carried to its maximum. At present the breakdown of the plan is more keenly felt for conditions of life are changing so rapidly that only new knowledge can meet new situations. Moreover, the store of accumulated knowledge has increased so much it cannot be crowded into the years of formal school. The subjects of radio, for example, and the World War have added considerable work to the school curriculum. Doctor Thorndike, of Columbia University, said in conversation one day, that if he could by chance foresee that a boy, now fourteen years of age, would be able to step into a fine position at forty on condition of his knowing German, he would advise him to begin the study of German at thirty-nine. If the journey of life cannot be clearly foreseen by man, much more uncertain is it for woman. The girl walks out of school into a greater Unknown than does her brother. The status of woman is changing very rapidly. New occupations are opening and old securities are going. Marriage is not so safe an anchorage as it once was. The life of woman is subject to vicissitude, and at any turn she may have to prepare for a new occupation. Adult Education is her solution.

Industrial work at the present time is highly organized and highly specialized. In former years the craftsman did the whole of a piece of work, using perhaps all his faculties in the process. The same type of workman now probably turns an iron lever back and forth for a certain number of hours per day in a large factory. The work does not satisfy him. Education for the leisure time of the workman might accomplish two things: he might gain an understanding of the work in which he is engaged and its relation to life, an appreciation

of cooperation on a large scale, and he might then find a monotonous job less objectionable; or, he might find a way for individual expression during his free hours. The improvement of machinery is likely to continue, and leisure time is likely to increase. I believe we may well count on this leisure time as an opportunity for general education, enrichment of life, and individual creation. "One of the striking characteristics of modern life," says Dr. J. K. Hart in his book, *A Social Interpretation of Education*, "is the lack of integration; that is, the failure of the individual to be linked up with the many aspects of life. The home is tending to disintegrate. Divorce is increasing. The old sanctions are going, and the new sanctions are not yet established. We need a new kind of integration."

But there are more urgent reasons for Adult Education than those mentioned. The world, it seems, has taken to the idea of "testing" knowledge. We have grown into the scientific attitude. As a result, much traditional knowledge has been burnt up in the crucible. We have to be reeducated. We must reconstruct our thinking. The age of science has brought about inventions which have changed the ways of life. Our social and ethical creed has not kept pace with the change. We need a new code of ethics to meet new life conditions. Dr. W. H. Kilpatrick, in his book, *Education for a Changing Civilization*, calls attention to the fact that more changes in the ways of living have taken place in the last twenty-five years than in any other quarter of a century since the beginning of civilization and that the inventions which brought about these changes are likely to increase. The next twenty-five years will probably bring more changes than the last, and so the next, and the next. We can make our adjustment to this continuous change only by continuous education. H. G. Wells said a few years ago that the destiny of humanity is a race between education and catastrophe. The education must be that of adults. The world needs mature minds with knowledge and understanding of the needs of the present time.

We are creating problems faster than we are solving them. The world is in need of the maximum possibilities of Adult Education. We need the general status of intelligence lifted as much as it can be, and we need the best leadership that Adult Education can bring to the front. Dr. J. K. Hart says in his book, *Adult Education*: "The siege is on: The human race must educate itself or perish. . . . The adult must be released from his provincial mindedness, his animistic prejudices, his narrow customs, his obsolete habits; it is the adult who must be given the chance to become

free in the world of science, tolerance, human sympathy and intelligent organization . . . mind must take the place of false information and tradition . . . scientific temper take the place of dogmatic attitude."

Mr. Jennings, of the Seattle Public Library, called attention in an article in the *A. L. A. Bulletin of Adult Education* last April to the experiments of Doctor Thorndike in adult learning. We have long been accepting the belief that only children and young people have the capacity to learn. Doctor Thorndike has proved by experiments with many people that the learning capacity of the adult person is practically unimpaired up to the age of forty-five. The curve of learning capacity of the adult mind, beginning at sixteen years of age, rises to its maximum between twenty and twenty-five years of age, then declines very slightly, until, at the age of forty-five, it is on the same level as at sixteen. The normal person should not be afraid to undertake a task of learning at the age of forty-five which he would have attempted at sixteen. There are many instances of individual cases of unimpaired ability to learn in advanced years.

The library is a pioneer in the work of Adult Education. For many years it was the only agency for systematic learning for the adult person. The library has an honorable history in its cooperation with every other agency for Adult Education. We are all familiar with the many phases of educational work carried on by the library, from that of the small village library to the organized work of the American Library Association. The booklets, "Reading for a Purpose," are now in the hands of thousands of readers, and are helping them out of "the confusion of ideas" into systematic thinking. Let us now take a backward glance and a forward look and see if you can extend our service.

1. Let us keep in touch as far as possible with the entire field of Adult Education. Let us try to know just what China and Czechoslovakia and New York and New Zealand are doing. The office of the World Association for Adult Education is at 13 John Street, Adelphi, London. The office of the American Association for Adult Education is at 41 East 42nd Street, New York. These offices will furnish information concerning the world work in Adult Education.

2. Let us make the cause of Adult Education understood in the community in which the library serves. This is an opportunity for the librarian of the small place and of rural districts. The display table, the press, and all the clever ways which librarians know, may be called into use. Call the attention of the leaders of the community to the following books:

- Buffalo Educational Council. *Adult Education in a Community*. Amer. Assn. of Adult Education, 1926.
- Campbell, Olive. *The Danish Folk School*. Macmillan, 1928.
- Fisher, Dorothy Canfield. *Why Stop Learning?* Harcourt, 1927.
- Hall-Quest, A. L. *The University Afeld*. Macmillan, 1926.
- Hart, J. K. *Light from the North*. Holt, 1927.
- Hart, J. K. *Adult Education*. Crowell, 1927.
- Keppel, E. P. *Education for Adults*. Columbia Univ. pr., 1926.
- Keppel, E. P. *Libraries and Adult Education*. Amer. Libr. Assn., 1926.
- Kirkpatrick, W. H. *Education for a Changing Civilization*.
- Lindeman, E. C. *Meaning of Adult Education*. New Republic Press, 1926.
- Martin, E. D. *Meaning of a Liberal Education*. Norton, 1926.
- Noffsinger, J. S. *Correspondence Schools, Lyceums, Chautauquas*. Macmillan, 1926.
- Peffer, Nathaniel. *New Schools for Older Students*. Macmillan, 1926.
- Thorndike, E. L. *Adult Learning*. Macmillan, 1928.

3. I believe something might be accomplished by a special effort to give publicity to the findings of Dr. Thorndike on adult learning. Dr. Thorndike's book, with detailed explanation of his experiments, may not appeal to persons not interested in psychology, but a few charts and posters made from this book and exhibited in the library might get the main facts across. Old sayings get a tremendous hold upon people. "You cannot teach an old dog new tricks" has done a lot of damage. The nervous structure of man is very different from that of dogs. Educators have over-emphasized the idea of the plasticity of youth, and the "cement" qualities of mature life. We need to rise up and undo this. The neurones and synapses of the human adult are modifiable, and old people can learn new subjects. The correspondence department of Columbia University has on roll a woman of eighty-two studying the Greek language.

4. Let every library be a bureau of information concerning opportunities for Adult Education. List the opportunities offered by the surrounding community, and the opportunities in the field at large. Education by the correspondence method has grown to almost incredible proportions. Courses in nearly every kind of knowledge on earth are given by private correspondence schools, colleges, State universities and private, endowed universities. The papers are full of advertisements of private correspondence schools. Some of these give excellent work and some are worthless.

The library can function to great advantage in supplying information about these schools. A directory of approved private correspondence schools can be obtained from Dr. J. S. Hoffsinger, director of the National Home Study Council, Washington, D. C. The correspondence work of colleges and universities is not well known by the mass of population, because the universities do not advertise as do the private schools. One private correspondence school in the United States spends a million dollars a year in advertising. No State institution has money to do that. The courses offered by the universities cost the individual much less than those of private institutions. The library might well act as an advertising agent for university correspondence study; information in the library concerning the status of the correspondence work of various universities might be helpful. For example, the University of Chicago gives full residence credit for correspondence work, and will permit a student to do as much as half of the work for a bachelor's degree by correspondence. Columbia University conducts correspondence courses, but gives no credit. However, there is a balance of advantages; the University of Chicago requires fifteen points of high school work for admission, and Columbia has no other requirement for admission to the correspondence department than evidence that the applicant can do the work. The co-operation of the library in supplying reading matter for special study courses has long been established.

5. The librarian has an opportunity for leadership in the matter of organizing the agencies for Adult Education in her community. In many of the large cities this organization has been officially done. In smaller cities and villages these agencies are usually found working separately and sometimes overlapping. The librarian might begin by calling a conference of workers in Adult Education in the community. Full information as to procedure in organizing this work can be secured from C. S. Marsh, University of Buffalo, director of the Survey on Adult Education in Buffalo, N. Y., or Mr. H. F. Brigham, librarian of the Public Library of Nashville, Tenn., who has given a practical demonstration of the leadership of the librarian in this matter. For the organization of a rural center, the work of Chester County, Pennsylvania, may be taken as an inspiring example. In this community there are 125,000 people and 1000 organizations having some kind of educational program. These agencies are cooperating and accomplishing things that sound like fairy tales; full information about it can be obtained from Mr. John W. Herring, field organizer for the American

Association of Adult Education, 41 East Forty-second Street, New York.

6. Of all the subjects with which Adult Education is concerned, those which seem the most important are concerned with the social, philosophical and ethical problems of the present time. I know of no class of persons better suited for considering these problems than librarians. We hear much in scholarly circles about the "educational lag"; "things" have

multiplied around us, and we have not kept clear-minded about them. Our social creed has not kept up with the times. Dr. Kilpatrick says we are living in an automobile age with horse and buggy morals.

Since librarians have done so much to launch the work of Adult Education, and have carried a goodly load in the development, they may, I believe, face with confidence this big problem in the consummation of the work.

International Code of Abbreviations of Titles of Periodicals

By J. David Thompson

Executive Secretary, American National Committee on Intellectual Cooperation, Washington, D. C.

THE COMMITTEE ON INTELLECTUAL CO-OPERATION of the League of Nations, at its plenary session in July, approved a code of abbreviations of titles of periodicals, on the recommendation of its subcommittee on science and bibliography. This code was drafted by a committee of library experts convened by the International Institute of Intellectual Cooperation at Paris, submitted for comment and criticism to the various national organizations of librarians, and put into final form by the Scientific Relations Sections of the Institute. It is to be published in full by the Institute in English and French, but in the meantime the following text of the rules is made available for publication in the library journals of the principal countries of the world.

GENERAL RULES

I. As a general rule, titles of periodicals are not abbreviated beyond a point which allows of their easy identification. The order of the words is not varied.

Exception: Some of the most common generic names for periodicals (i. e., such words as *Journal*, *Zeitschrift*) are abbreviated to a greater degree than this principle permits. A list of these is appended.

II. Normally, the abridged form retains all words other than articles, conjunctions, prepositions and analogous locutions. These are generally omitted.

Exceptions: (a) When the title consists of only two nouns (neither of which is a generic name), separated by an article, preposition, conjunction or a combination of these parts of speech, the latter are retained.

E. g.: *Stimmen d. Zeit*, *Coal & Iron*, *Soeries de Lyon*, *Voz de la Verdad*, *Fanfulla della Domenica*, *Vita e pensiero*.

(b) The conjunction is retained between two compound nouns, the last part of which is common to both.

E. g.: *Land- und forstwirtschaftliche Blätter* = *Land- u. forstw. Bl.*

(c) In exceptionally long titles, in addition to articles, conjunctions and prepositions, some of the other less important words are omitted.

E. g.: *Arbeiten aus dem Elektrotechnischen Institut der Grossherzoglichen Technischen Hochschule Fridericiana zu Karlsruhe* = *Arb. elektrotechn. Inst. Karlsruhe*.

Arbeiten aus dem Institut zur Erforschung der Infektionskrankheiten in Bern und der wissenschaftlichen Laboratorien des Schweizer Serum- und Impf-Instituts = *Arb. Inst. Infekt.-Kr. Bern*.

Comptes rendus hebdomadaires des séances de l'Académie des Sciences = *C. R. Acad. Sci. Paris*.

(When the conjunction is preserved, "and" is abridged as "&," "und" as "u.," and "och" as "o." The German definite article is abridged as "d." in all its cases.)

III. The normal method of shortening is by abbreviation, the letters omitted being replaced by a full stop.

E. g.: *Médecine* = *Méd.*

But certain contracted forms are permitted. A list is appended.

IV. Nouns are spelt with a capital, adjectives with a small initial letter. For geographical adjectives, either a small or a capital may be used, as preferred:

E. g.: *Annales de la Société de médecine physique d'Anvers* = *Ann. Soc. Méd. phys. Anvers*.

Annales médico-chirurgicales du Centre.

Tours = Ann. méd.-chir. Cent.

Bulletin of the University of Arizona = Bull. Univ. Arizona.

Forschungen zur Brandenburgischen und Preussischen Geschichte = Forsch. brandenb. preuss. Gesch. or Forsch. Brandenb. Preuss. Gesch.

Arbeiten aus dem Gebiete der Experimentellen Biologie = Arb. exp. Biol.

Journal of the Scottish Chamber of Agriculture = J. Scot. Chamb. Agric.

V. No distinction is made between singular and plural.

Blatt, Blätter = Bl.

Bericht (e) = Ber.

VI. Cognate words in different languages are reduced to the same form when the orthography permits.

E. g.: Académie }
Academy } Acad.
Academia }
Accademia = Accad.
Akademie } Akad.
Akademi }
Science, Scienza, Scienza = Sci.
Società, Society, Société }
Sociedad, Societade } Soc.
Societas, Societate }

VII. Titles transcribed in Roman characters are also abbreviated in accordance with the foregoing rules, but more sparingly.

Titles of periodicals in Oriental languages are not abbreviated.

SPECIAL RULES

I. Only titles consisting of at least two words are abbreviated. When a title consists of only one non-compound word, it is given in full.

so: Recht = Recht.

Avenir = Avenir.

II. In compound words each part is abbreviated as when it stands alone, the different elements of the word being connected by hyphens.

E. g.: Sozialhygienische Abhandlungen = Soz.-hyg. Abh.

Braunkohlemarchiv = Braunk.-Arch.

Finska Läkaresällskapets Handlingar = Finska Läk.-Sällsk. Handl.

III. The place of publication is not given except in the following cases, when it is separated by a comma from the title itself.

(a) When the resultant abbreviation does not reveal the language which has been abbreviated.

E. g.: Revista agronomica = Rev. agron., Lisboa.

(b) When the title is in a language other than that of the country in which the periodical is published.

E. g.: Acta paediatrica = Acta paediatr., Stockholm.

Folia gynaecologica = Folia gynaec., Pavia.

Mitteilungen über allgemeine Pathologie und pathologische Anatomie = Mitt. allg. Path., Sendai.

(c) When two or more periodicals have the same abbreviated title.

E. g.: Journal d'urologie = J. Urol., Paris.

Journal of Urology = J. Urol., Baltimore.

IV. The first word of the title may be less abridged.

E. g.: Fundamenta mathematica = Fundam. math.

V. When the title of a review begins with the name of a person, the surname only is kept and the rest of the title is abridged according to the rules.

E. g.: Albrecht v. Gräfes Archiv für Ophthalmologie = Gräfes Arch. Ophthalm.

Niemeyers Zeitschrift für internationales Recht = Niemeyers Z. int. Recht.

Librarian Authors

DR. ARTHUR E. BOSTWICK, librarian of the St. Louis Public Library since 1909, was born in Litchfield, Connecticut, and educated at Yale. Before entering the library profession he was a high school teacher in Montclair, New Jersey; on the staff of the Appleton *Cyclopedia of American Biography*; assistant editor of *The Forum* and associate editor of the *Standard Dictionary* and office expert in physics. He became chief librarian of the New York Free Circulating Library in 1895 and remained here until he went to the Brooklyn Public Library as librarian in 1899. In 1901 he became chief of the Circulation Department of the New York Public Library, where he remained until he went to St. Louis in 1909 to take his present position. When he went to St. Louis the present library building was not yet complete. He supervised the occupation of the new building and has constantly furthered the extension of library facilities in St. Louis since then. The number of branch libraries has been virtually doubled during his administration. Although he has to spend much time on purely administrative work, he passes on all the recommendations for the purchase of new books before they go to the Book Committee of the Library Board, and manages to look over each new acquisition before it goes on the shelves. He has few taboos in choosing books, the principal test being whether a given volume will interest, instruct or offend a large number of those who use the library.

When he was fourteen he started composing but, though he enjoyed it, never considered the results meritorious enough for publication. He did, however, supply the words and music of some of the old songs collected and published by Sigmund Spaeth under the title *Weep Some More, My Lady*. Among his literary works are the *Young Folks' Cyclopedia of Games and Sports* (with J. D. Champlin) published in 1890; *The American Public Library* in 1910 (revised editions in 1917 and 1923); *The Different West* as seen by a transplanted easterner in 1913; *Earmarks of Literature* in 1914; *The Making of an American's Library* in 1915; *Library Essays* and *A Librarian's Open Shelf*, a collection of essays on various topics including the movies and enforcement of world peace, in 1920. He was editor of the *Classics of American Librarianship* (Vols. I-IV) from 1915-1927.

One of the most interesting experiences of Dr. Boswick's life was a tour of China in 1925 when he made a survey of Chinese libraries.

ARTHUR E. BOSTWICK

He spent seven weeks on this tour visiting thirteen provinces and fourteen or fifteen of the larger cities. Last year he went abroad again to attend the international conference at Rome. He is an enthusiast about travel in his native land and has been in every State in the Union.

Since his boyhood, walking has been the only exercise which Dr. Bostwick has followed systematically. He has walked because he liked it and knows the country immediately surrounding St. Louis thoroughly from tramping along its highways and byways. Keeping a scrapbook is one of his hobbies. He began it in 1875 and the record gives a chronological account of his personal activities since that time: programs of plays and concerts he has attended, banquet place cards, clippings, mentions of family events. Music has been more than a hobby with him; it has been one of the most important parts of his intellectual and emotional life. When a small lad he realized his love for it. His interest in music has been reflected in the attention paid by the St. Louis Public Library to this subject. It had virtually no music when he took charge; now its collection numbers 7,867 compositions of which 7,666 are in the open shelf department and can be borrowed freely.

THE LIBRARY JOURNAL

December 1, 1930

Editorial Forum

THE REPORT of the Committee on A. L. A. Activities, of which a lengthy but inadequate summary is given in this issue, is a most comprehensive and detailed review of these activities as seen not only by the three members of the committee who have given careful attention to their work but as expressed in many letters which they have obtained from individual members of the Association. On the whole, they give a most favorable picture of the complicated organization which is now the A. L. A. and which is creditable to its official representatives. Apparently more criticism of the adult education relations than of any other division is in the minds of members, for here there is another national association occupying the special field, besides work in numerous other relations, so that, as in the conclusions of the committee, this work should be regarded as in an experimental stage and possibly curtailed and specialized. The *Booklist* is criticized chiefly for the reason that its cumbersome system of obtaining the verdict of several librarians on books, which in some cases they may not have read, theoretically valuable if the books have been read but practically difficult to work out, results in such delay as to make the list less effective. It may be added also that private publications not requiring financial support from the Association are doing much of this work. The *Reading with a Purpose Series* has both approval and criticism, but here it may be added that the series lacks topics which are uppermost in the public mind and on which authorities on both sides should be fairly presented, while the many volumes already issued cover a number of minor subjects of less importance. The numerous committees, more now than Mr. Heinz's famous fifty-seven varieties, are found on the whole to be functioning well, though it may here be said that there is a quite general feeling that, on the Hibernian principle of hitting a head wherever you see one, no new topic comes up but a committee is at once thrown at it. A chief criticism of the committee seems to be that the several activities do not quite gear in with each other perfectly, and the re-

port may be especially helpful to the Headquarters authorities in making such contacts more practical. The members of the committee are certainly to be thanked for doing well a difficult and tedious job.

REFERENDUMS are the order of the day, and it is well that the long mooted question of annual vs. biennial conferences of the A. L. A. should be referred to the general body of the members. With the growth of the regional conference in several parts of the country, most of them only less large in numbers and equal in quality to the Association conference, there have been opportunities of getting together formerly to be had only through A. L. A. meetings. When the A. L. A. conference has been held on the national border line, as at Los Angeles the present year, the regional conference as at Swampscott has attracted especially large numbers, though without detracting otherwise from the importance of the larger conference. The number of meetings which call for the attendance of librarians has steadily increased from decade to decade, and thus the argument for less frequent national meetings has become strengthened. The scheme for alternate biennial and regional meetings will, we think, now command a majority vote of active members, and this change can doubtless be brought about without detriment to the progress of the profession.

THE COMMITTEE gave its sanction to three positive recommendations for new departments, one a statistical division following a previous recommendation by the Council, the other departments for school libraries and for children's work; these new departments to be associated continuously with headquarters as a permanent part of its organization. School libraries, as we have before indicated, are pretty sure to be the largest development in the library field in the new few decades and, although the field is partly covered by the N. E. A., the A. L. A. is better qualified to give technical oversight and stimulus to them. As to children's work, that grows indefinitely as population and children multiply, and its importance cannot be overestimated. Thus, despite the fact that these departments seem to add to the complexity of headquarters work, though they may to some extent absorb the work of lesser committees, the addition is not without justification, and possibly the children rather than adults should have the call in education through libraries.

AN IMPORTANT CONTRIBUTION to financial statistics in the library field is made in the report of the Citizens Committee in New York, headed by the well-known publicist, Henry Bruere, in respect to the salaries and pensions of branch librarians. The essential finding as to salaries is that they are too low in comparison with those paid in the directly educational field, as to high school librarians, and the general position that librarians should be as well paid as teachers has thus new confirmation. As to pensions, the committee meets the curious local difficulty that as the library systems, though for the most part financed by the city, are not a municipal department entirely under city control, as the political authorities naturally think desirable, the city feels that it has no legal power at present to provide a pension system for these employees. In Manhattan the New York Public Library as a reference library is supported entirely from the funds of the Astor, Lenox and Tilden Foundations and later endowments, while the circulation department is financed by the city. In Brooklyn the property and endowments of the old Brooklyn Library form a considerable part of library revenue, but the city covers the great body of expenses and the Mayor has now the entire appointment of trustees in his hands. In Queens the administration and financing are entirely under municipal control. Thus the three great library systems of Greater New York have their individual characters, and a good deal is to be said for the plan of keeping them separate from direct municipal control. The separation, however, gives reason to the municipal authorities to deny librarians place in the general municipal pension scheme, and in default of this the committee points out that action by the legislature would remedy the difficulty. The committee has made an important contribution to a difficult subject, which should be appreciated throughout the profession.

THE EXPERIMENT of field work in the South, in the regional development made possible by the Rosenwald grant and the appointment of Miss Tommie Dora Barker as regional field agent, is to be a special feature of A. L. A. enterprise in the coming year or two, and the first indication of its exploitation is the offer of a prize to junior and senior high school students for a poster to arouse popular interest in this regional library work. Posters, not least those of the A. L. A., were of great service during the war, and this application of the idea in peace time will be watched with interest. The awakened South is a good field for library as well as other development, and the very fact of the illiteracy of several classes

of the community there makes library work, while more difficult, even more promising of comparative resultfulness.

CHICAGO UNIVERSITY under its new president is trying interesting experiments, as that which proposes that in place of the four-year term for undergraduates there should be a free study or go-as-you-please system with degrees whenever a candidate presents himself for examination and passes it successfully. In this spirit the Library School of the university presents a new development in the establishment of three fellowships of \$1,500 per year each, open to competition by graduates of other library schools with college degrees, giving the successful competitors this financial backing while pursuing their studies in the graduate library school of Chicago University. If this experiment is successful, as may be hoped, it may do a further service in inducing endowments in other universities or for other library schools of candidates showing special aptitude for library service.

THE LATE CLEMENT WALKER ANDREWS, one of the several representatives whom Salem town in the old Bay State has sent to the library profession, was peculiarly the representative of science in the A. L. A. Like many eminent librarians, he won Harvard's A. B. and A. M. and, specializing in chemistry, became instructor in that subject in the Massachusetts Institute of Technology, where, from 1889-95, he served also as librarian. Thence he went to Chicago to develop the John Crerar Library, which under his active administration for more than thirty years became one of the foremost of scientific libraries, reaching a half million volumes, housed in the combination of office and library building which, as planned by him, became its permanent home and his monument. As an old bachelor, he lived with three others of that ilk a curious life of semi-retirement socially, but he was well known throughout the library profession and won the intimate friendship of many of his fellow workers. In addition to the presidency of the A. L. A. in 1906-07, he was the foremost member of the American Library Institute, to the effectiveness of which he contributed constantly. Some years ago, while in Springfield during the infantile paralysis epidemic, he became a sufferer from that disease, from the effects of which he was never afterward free. Of late years he has been, whether at Chicago or at Lake Placid South, almost a recluse, but he held the affection of his many friends, and his passing will have many mourners.

Report of Committee on A. L. A. Activities

THE COMMITTEE ON A. L. A. ACTIVITIES owes its existence to the trenchant pen of Mr. John Cotton Dana. In December, 1927, Mr. Dana addressed a communication to the A. L. A. Executive Board, asking that it be read to the Council. This communication criticized certain activities of the Association, in particular those relating to the Board of Education for librarianship, adult education, the survey, curriculum study, and the textbooks, all financed by the Carnegie Corporation.

The Council, acting upon this communication, voted that a special committee be appointed to study and report upon the matters brought up by Mr. Dana. The committee, consisting of Ernest J. Reece, chairman, Walter L. Brown, Theresa Hitchler, Franklin F. Hopper, and Mary U. Rothrock, reported to the Council at the West Baden Conference on May 29, 1928, in which it made the following recommendation:

"A periodic scrutiny of Association activities within three years and not less frequently than every third year thereafter, by a committee to be appointed by the President, such scrutiny to include as complete consideration of the effectiveness and results of the various activities as is warranted and practicable, with a view of suggesting to the Council possible changes of policy."

The present committee was appointed upon this recommendation.

The problem of how to go about making a study of the activities of the Association was a difficult one. The time for a thorough detailed examination or inspection was out of the question, taking into consideration the ramifying activities of the Association in manifold directions. Under these circumstances the following procedure was decided upon and has been followed:

1. An examination of minutes and reports of various boards and committees and other material sent out from Headquarters. All these have been most voluminous.
2. A survey of Headquarters, carried out on October 25-26, 1929, which consisted of conferences with the secretary and assistant secretary, and heads of departments.
3. Attendance by one or more members of the committee at meetings of the Executive Board and the more important boards and committees.
4. Letters inviting frank criticism sent to
 - (a) A cross-section of the membership, including 1016 names. The basis of selection was the first four names on each page of the A. L. A. *Handbook*, not including institutional members.

- (b) Present officers and members of the Executive Board and Council and members of the same for past three years.
- (c) Present chairmen of committees and past chairmen for previous three years.
- (d) Directors of library schools and those connected with library training agencies.
- (e) Secretaries of library commissions and heads of extension agencies.
- (f) Readers' advisers.

The members in general were also invited to write letters to the committee by notices in the *Bulletin* and the professional journals.

A characterization of the A. L. A. with its 13,000 membership, differing as only that many individuals can, may seem futile, but if we are going to understand what we are doing and where we are going, we at least should attempt to understand ourselves. How necessary it is for the Committee on A. L. A. Activities to understand certain group characteristics peculiar to the library profession is illustrated by the tone of the letters received. They are as a whole decidedly critical. Taken by themselves, these criticisms might to an outsider indicate a very serious condition, but knowing as the committee does the fine enthusiasm and loyalty to the profession of its most severe critics, the committee takes these two factors into consideration. In fact, the committee believes that this critical attitude is highly desirable, and on that account invited the frankest criticism. The committee must also keep in mind that the wide difference in the kinds of positions in the profession necessarily makes a wide difference in point of view. A children's librarian, a special librarian, and a cataloger hardly can look at professional problems in the same way. Even in similar positions the conservative librarian, imbued with a high sense of the dignity of the profession, cannot but look askance at the librarian filled with enthusiasm for publicity and go-getting methods.

The high grade of intelligence of the Headquarters staff is a clear indication of the care and judgment that has been exercised in their selection. It should be and is a professional distinction to belong to the Headquarters staff, and while a rapid turnover is most undesirable, the A. L. A. Headquarters cannot fail to be a school for the highest professional training.

The committee feels obliged to record, however, that the critical attitude toward Headquarters, as shown in letters received, is not entirely accounted for by the natural critical attitude of the profession. It is due in our

opinion in part to a lack at times of an understanding on the part of Headquarters of the problems of librarians. It verges at times upon intolerance and a self-sufficiency which would not seem warranted. A little more diplomacy and faith upon the part of both Headquarters and the profession in each other's ability would be conducive to better team work and greater accomplishment.

The committee early in this report wishes to express its own attitude toward A. L. A. activities or policies. Perhaps it should be pointed out that all members of the committee have within recent years served on the Executive Board, and from this and in other ways have had an intimate knowledge of the working of the business of the Association. The committee is not in sympathy with the desire as expressed by one member of the Association of curbing the ambitions of Headquarters. It is not afraid of centralization and expansion of A. L. A. activities. It believes that experience has shown that the natural conservatism of many of our members will guard against serious errors. It is in favor of an aggressive, active promotion of all legitimate professional movements. The committee believes strongly in experimentation. The fact that certain things done by the Association have in the eyes of some been unsuccessful does not worry the committee in the least. It is willing to subscribe to the dictum of Tom Johnson of Cleveland: "Be sure you are right half the time and then go ahead."

CONCLUSIONS AND RECOMMENDATIONS

HEADQUARTERS:

1. The personnel at A. L. A. Headquarters is of a very high order. The various secretaries and heads of departments, with their assistants, exhibit a fine enthusiasm, intelligent point of view, splendid vision of the future, and a thorough grasp of the present work in hand.
2. The organization at headquarters in all respects shows a high state of business efficiency.
3. The work being done, on the whole, is practical and is meeting definite needs of the profession.
4. There is need of centralization in some respects, in particular as follows:
 - (a) The library should be strengthened in its collection and its personnel. As far as possible all printed and typed material, useful to the various departments, should be centralized there rather than scattered in various departments as at present.

- (b) The Publicity Department should be responsible for all A. L. A. publicity and, although necessarily publicity at times will originate in other departments, it should have the closest scrutiny of the Publicity Department with revision when needed. The Publicity Department should be relieved of editorial work such as editing and indexing Proceedings.

SPECIAL ACTIVITIES

LIBRARY EXTENSION:

The Committee on Library Extension is doing admirable work in cooperating with other agencies, both outside and inside the profession, for the promotion of library extension.

It is recommended that this activity be continued along present lines of endeavor and that additional funds be provided when they are available.

ADULT EDUCATION:

The members of the Association apparently are pretty evenly divided as to the value of the adult education program of the A. L. A. Evidently it is of distinct aid to many libraries and not to others, perhaps because they fail to take advantage of it.

The Reading with a Purpose courses have had wide popularity and are now paying for themselves. They are as a whole a credit to the Association, both in their content and in the authors who have prepared them. Time only will tell whether they will continue in popularity and usefulness. It is recommended that the Board on the Library and Adult Education experiment with more inexpensive reading courses with simpler books, as there is an evident demand for these.

It is recommended that the Board on the Library and Adult Education continue its work for the present on substantially the same lines. The Activities Committee has pointed out in the body of its report the need for wise leadership due to the experimental nature of the whole adult education program. This leadership we believe the Board is giving.

BOARD OF EDUCATION FOR LIBRARIANSHIP:

The Board of Education for Librarianship has made a valuable contribution to the profession in aiding library schools to raise their standards, in assisting new schools in organization, in setting standards, and in encouraging scholarships for graduate study in library schools.

The Board has collected and made available much valuable data on library education in the United States and Canada.

To promote better understanding between the Board and training agencies, and in particular the Association of American Library Schools, the Activities Committee recommends that one member of the Board of Education for Librarianship be nominated by the Executive Committee of the Association of American Library Schools, and that another member of the Board be appointed by the President of the A. L. A. from members engaged in library training outside of accredited library schools.

The work of the Board which represents the least satisfactory results is the attempt to classify the library schools. The classification adopted was inadequate in that it failed to provide a place for all existing schools. Two courses seem to the committee to be open; either to revise the classification so as to provide a place for all schools or to discard the classification altogether. We would recommend that schools duly accredited by the Board be placed upon the approved list without being classified.

SCHOLARLY AND BIBLIOGRAPHICAL WORK OF THE A. L. A.:

In the opinion of many librarians of university and reference libraries, the A. L. A. has been guilty of neglect in attention to scholarly and bibliographical work. This feeling has gone so far as to threaten at times actual withdrawal of the College and Reference Section from the A. L. A. The Activities Committee believes that there has been reason for this feeling. It recommends that the College and Reference Section be asked by the Executive Board to draw up a definite plan for increasing the activities and publications of the A. L. A. in bibliographical, cataloguing and other scholarly fields.

PUBLICATIONS:

The Activities Committee is of the opinion that the publications are as a whole serving the needs of the profession. It presents its conclusions to definite publications as follows:

BOOKLIST:

The Committee believes that the policy of *The Booklist* has been too conservative. It is aware that at present proposals are being considered at Headquarters for overcoming the tardiness of publication which has for many years been the most general complaint against it. The Activities Committee is not convinced that the vote of librarians on books which in most cases they have not seen is especially significant. The Committee recommends that a different basis of selection be adopted as an experiment for one year.

BULLETIN:

The *Bulletin* neither in format or content is up to the standard which is desirable. It is the responsibility of Headquarters to make it more readable, more attractive and more a medium of exchange of ideas, criticisms and suggestions between the members and Headquarters. The Committee feels that much of the material presented to it during the preparation of this report would be of interest to the membership in general.

PROCEEDINGS:

The *Proceedings* as funds will warrant should be printed in much fuller form. Many valuable papers, given at section meetings, are being lost to the profession. It might be worth considering raising the \$4.00 membership in order to do this.

NEW ACTIVITIES:

1. A Department for School Libraries at Headquarters, according to a plan drawn up, is one of the most pressing needs, this being the consensus of opinion of Headquarters and of many members.

2. A Statistical Department, as recommended by the Council, is highly desirable.

3. A Department for Children's Work, as recommended by the Council, is highly desirable.

MEMBERS:

The leaders of the profession, as indicated by letters received, do not show much interest in the rank and file of the profession. Salaries, pensions and other allied subjects, with one exception, drew no comment from them. The rank and file as indicated by the letters received from the cross-section are vitally interested in these things and look to the Association to aid in higher salaries and pensions for librarians.

In addition to the establishment of a Statistical Department the Activities Committee recommends greater attention upon the part of the Association, in particular the Executive Board, to the betterment of the status of the members of the profession.

MEETINGS:

Based upon the apparent demand for this change, it is recommended that a referendum of the membership be carried out on the question of biennial meetings of the Association with regional meetings in alternate years. Such a referendum would be a valuable guide in determining the advisability of changing the by-laws to provide for biennial meetings. It is the opinion of the Committee that regional meetings should be left to the state or regional

organizations, thus relieving A. L. A. Headquarters of all responsibility. Probably brief statements for and against such a change should be sent with the ballot.

COMMITTEES:

The sixty or more committees of the A. L. A. are as a whole doing valuable work for the Association, involving in many cases an expenditure of much time upon the part of their members.

It is recommended that for the more important committees as funds permit provision be made to pay expenses of members to committee meetings held when there would be time to consider fully the work of the committee.

ENDOWMENT:

The endowment campaign for one million dollars, with an additional million practically assured on that condition, is worthy of the

support of every member of the Association. Its success will assure the continuance of present activities and the carrying out of some additional ones, such as have been recommended in this report.

In order that this report may reach the hands of every member of the Association, the Committee recommends that it be printed in one of the numbers of the *Bulletin*.

The Committee wishes to express its appreciation to all who supplied the information upon which this report is based. We are especially indebted to those from whom letters were received, to various Boards and Committees and to the Secretary and his staff.

The Committee on A. L. A. Activities, acting upon the instructions given to it, submits this report to the Council and respectfully asks that it be discharged.

(Signed) C. H. COMPTON, *Chairman*
GRATIA A. COUNTRYMAN
H. H. B. MEYER.

The Open Round Table

Information Wanted

To the Editor of THE LIBRARY JOURNAL:

I have been invited to prepare (for publication in a State library club bulletin) an article on sloping shelves in which it is desired to give a list of libraries using sloping shelves. Seattle Public, Toledo Public, Detroit Public, District of Columbia Public, University of Rochester, and New Haven Public are the only ones which I have heard of to date. I would also like to hear from any libraries which have experimented with sloping shelves. Many librarians are interested in this feature of shelving and it would be helpful to them to know what libraries in different parts of the country have tested this feature so that they might see such shelves in use for themselves. As this article will be printed in a few weeks, librarians are asked to send information as soon as possible, with as full details as they conveniently can.

WILLIS K. STETSON,
Free Public Library, New Haven, Conn.

Bulletin of the Association of University Professors

MOST REFERENCE LIBRARIES, and particularly college and university libraries, will probably find increasing need for a complete file of the *Monthly Bulletin of the American Association*

of University Professors, which serves as a medium for publication of reports of officers, committees, etc. It is in the *Bulletin*, for example, that are to be found the complete reports of committees appointed to investigate cases of alleged infringement of academic freedom. It is still possible for libraries to secure nearly all issues, from Volume I, 1915, to date, but, as the reserve is in several cases somewhat limited, early orders will be advisable. Orders should be addressed to the Secretary of the Association, 26 Jackson Place, Washington, D. C. The price is \$2.50 a volume (unbound), or 35 cents a copy, except for the January number containing the list of members, which is \$1 a copy.

C. C. WILLIAMSON,
Chairman, Committee on Library Service.

A Warning

To the Editor of THE LIBRARY JOURNAL:

Will you please place a notice in your periodical to the effect that a man by the name of Robert B. Yorston of the Desmond Publishing Company of 232 Summer Street, Boston, Massachusetts, is in no way connected with the Queens Borough Public Library as its agent or representative.

MARGARET S. GREEN
Reference Librarian,
Queens Borough Public Library, Jamaica,
N. Y. City

In The Library World

A.L.A. to Conduct Poster Contest

2.

THE JOY AND VALUE OF BOOKS to be found in libraries will be the subject of a poster contest to be conducted by the American Library Association in thirteen Southern States. The States are: Alabama, Arkansas, Florida, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, South Carolina, Tennessee, Texas, Virginia and West Virginia.

Junior and senior high school students only are invited to enter the poster contest. One hundred dollars for books will be given to the school library of a student winning first prize; the books to be marked with a bookplate bearing the student's name. Two \$50 prizes, four \$25 and five \$20 prizes, of the same character as the first, will also be awarded. Books will be selected by the school librarian from a new list of "Books for Recreational Reading" now being prepared by the School Libraries Section of the American Library Association. Prizes, which will be given by the National Association of Book Publishers in cooperation with the American Library Association, will be announced at the fifty-third annual conference of the latter association to be held in the summer of 1931.

The American Library Association hopes to obtain designs for three or four posters showing the educational, recreational or informational value of books, which can be reproduced for use by libraries, and will pay between \$25 and \$50 for any designs so used.

1.

Any high school student in the States named may enter the contest by submitting an original poster which can be used to promote interest in reading or the use of libraries, as indicated in the foregoing paragraph, on or before Feb. 14, 1931, to his high school librarian.

Each high school librarian is invited to send, before March 2, 1931, to the A. L. A. representative in her State one poster, chosen to represent her school by judges whom she shall select. The names of State representatives are given below.

The poster should be sent prepaid and securely wrapped in heavy, stiff cardboard. Corrugated cardboard makes an unsatisfactory wrapper.

A Window Display of Books and Lists for Junior and Senior High School Students Prepared by the Enoch Pratt Free Library, Baltimore. The Lists were Printed in Cooperation with Local School Authorities.

Alabama — Fanny T. Taber, Field Worker, Alabama Library Association, 601 Adams St., Montgomery.

Arkansas — Christine Sanders, Librarian, Free Library Service Bureau, Department of Education, Little Rock.

Florida — Helen V. Stelle, Librarian, Public Library, Tampa.

Georgia — Beverly Wheatcroft, Secretary, Georgia Library Commission, State Capitol, Atlanta.

Kentucky — Lena B. Nofcier,

Secretary, Kentucky Library Commission, Frankfort.

Louisiana — Lois F. Shortess, State Supervisor of School Libraries, State Department of Education, Baton Rouge.

Mississippi — Elizabeth Robinson, Secretary, Mississippi Library Commission, Jackson.

North Carolina — Mary Teresa Peacock, State Director of School Libraries, Raleigh.

South Carolina — Parmelee Cheves, State Library Field Agent, South Carolina Library Board, Columbia.

Tennessee — Nora Crimmins, Librarian, Public Library, Chattanooga.

Texas (northern section) — Violet Hayden, Assistant Librarian, Public Library, Dallas. (The northern section is the part of Texas north of a straight line extending east and west through Waco.)

Texas (southern section) — Frances R. Humphrey, Librarian, Public Library, San Antonio. (The southern section is the part of Texas south of a straight line extending east and west through Waco.)

Virginia — C. W. Dickinson, Jr., Supervisor of School Libraries and Textbooks, State Superintendent's Office, Richmond.

West Virginia — Etta M. Roberts, Librarian, Public Library, Wheeling.

3.

Each A. L. A. State representative will appoint a jury to select the best posters from those received. This selection will be sent to A. L. A. Headquarters

on or before March 16, 1931. Judges in the finals will be: Frederic Melcher, Editor, *Publishers' Weekly*; William A. Kittredge, member of the American Institute of Graphic Arts; Emily Ethell, member of the School Libraries Section of the American Library Association; Tommie Dora Barker, A. L. A. Regional Field Agent for the South, honorary judge.

4.

To be eligible for a prize, a poster must be designed by the student who enters it in the contest, the design being 21 in. x 13½ in., mounted or rendered on stiff board 27½ in., with top and side margins equal.

Nothing should appear in the margins. Each poster must be plainly marked on the back with the student's name, full address and school. The design must be in colors. The student, however, is limited to two flat colors, and the shades or tints that may be had by printing these colors one over the other. The caption on the poster should be limited to five words or less. If an additional slogan is used, it may be ten words or less.

5.

If the owner of a design wishes it returned, he should so state on the back of the poster, and either inclose postage in an envelope pasted on the back of the poster, or note that the design be returned express collect. A design returned by mail will be insured only if postage is sent to cover it; designs returned express collect are automatically insured for \$50.00. If no mention of the return of a design is made, it will be destroyed.

6.

All designs entered in the competition are submitted at the risk of the owner. The A. L. A. will not be responsible for the loss of, or damage to, designs through fire, theft or other cause while in transit or in their custody.

7.

Exhibits of the posters in the Lakeside Press Galleries, Chicago, and at the 1931 conference of the A. L. A. are contemplated, and later it is planned to arrange a traveling collection of the best posters which could be lent to schools, libraries or art directors. Unless a contestant states to the contrary on the back of his poster, it will be considered that his consent to these plans is given. In other contests it has proved of advantage to designers to have their work so displayed.

8.

Posters will be acknowledged by a State representative if a self-addressed postcard, inscribed with a statement of the receipt of the design, is inclosed with it.

9.

Any question about the contest should be addressed by the school librarian to the American Library Association's State representative.

Danish Libraries Pay Fee on Books

THE COPENHAGEN PUBLISHER, Steen Hasselbalch, is following up the judgment in his and the author, Peter Freuchen's, favor at the Supreme Court, according to which a publisher is entitled to put an embargo on libraries lending his publications to other people. Hasselbalch's slogan is that he who borrows a book shall pay a fee for the benefit of publisher and author. So far he is the only Danish publisher who has taken this step, and his

colleagues in Copenhagen hesitate to follow his example. On the other hand the Union of Provincial Booksellers is much interested in the new venture which has its full approval. The method is that if libraries, reading societies or similar institutions wish to include one of Hasselbalch's books in their lending department, they have to buy a coupon or voucher, which costs the same as the book itself, and which is to be attached to the volume, giving the library in question the right to lend the book from October 1, 1930, to April 1, 1932, at which date the embargo on the books Hasselbalch publishes this autumn ceases.

New York Branch Librarians Ask Consideration

THE CITIZENS' COMMITTEE on the Status of Librarians of the Public Libraries of Greater New York has issued a preliminary report concerning a more adequate salary schedule and a pension system. As compared with high-school librarians, for instance, the public librarian who has equal academic and special training works longer hours and receives \$780 less salary after sixteen years of service and has no pension. Two phases of the investigation are given, the first a detailed report prepared for the committee by Mr. Sampel Klaus on the law involved in the present status of these librarians. The second phase is a preliminary survey of the actual needs of the librarians for a pension system and more adequate salary schedules, prepared by Miss Marinoble Smith. Copies of both reports have been sent to the members of the several Boards of Trustees of the libraries of the city.

Corrections

KINDLY NOTE the following corrections in the November 15 issue of *THE LIBRARY JOURNAL*: In the fourth editorial on page 919, signed by J. L. W., the word "deprecate" was misspelled to read depreciate. The sentence should read as follows: "There is a certain school of librarians which immediately rises to deprecate anything in the way of 'efficiency.'" Two corrections are in the department of the Children's Librarians' Notebook. It is stated that Louis Encking translated *The Nutcracker and the Mouse King*. The translation was really made by Louise Encking. The price of *Peter Makes Good* is listed at \$2. The actual price is 75c. In the mention of the memorial volume to John Cotton Dana, p. 935, it is stated that the volume was printed by the Newark Public Library. The volume was printed by D. P. Updike of the Merrymount Press.

U. S. Library Is Sued

A SUIT to obtain from Herbert Putnam, Librarian of the Library of Congress, a collection of books he is alleged to be "unjustly detaining" has been filed in the Supreme Court of the District of Columbia. The suit is brought on behalf of George Curtis Treadwell and Hugh Reilly, executors under the will of Emma Treadwell Thacher. It states that a collection of books, pamphlets, autographs, autograph letters, manuscripts, and documents written or subscribed by kings and queens of England, Germany, Spain and Italy, the popes of Rome and including a Napoleonic collection, was given to the United States under the will of Emma Treadwell Thacher. According to the declaration the collection was to remain in the Library of Congress as the "Collection of John Boyd Thacher." Conditions of the gift were that the Librarian should prepare and publish a catalog of the collection and that all necessary precautions for the preservation and safety of the collection should be observed. The will is said to provide that the collection should revert at any time to the residue of the estate if the conditions set forth in the will are not fulfilled. The plaintiffs contend that these conditions have not been observed and that on September 7, 1929, the collection was demanded from the Librarian who "wrongfully failed and refused to deliver it to the plaintiff."

Tentative Program for Mid-Winter Meetings of the A. L. A.

A. L. A. COUNCIL

(Meetings open to all members of the A. L. A.)

First Session, Monday, December 29, 10:00 a.m.

Report of Committee on Affiliation of Chapters with the A. L. A.

A. L. A. Activities—Report of the Committee.

The recommendations will be considered in detail.

Second Session, Tuesday, December 30, 10:00 a.m.

Committee on A. L. A. Headquarters Building—H. H. B. Meyer, Library of Congress, Washington, D. C., chairman.

Committee on Libraries in National Parks—C. Edward Graves, Humboldt State Teachers College Library, Arcata, Calif., chairman.

Federal Aid for Libraries—Committee on Library Extension—Clarence B. Lester, Wisconsin Free Library Commission, Madison, chairman.

Recommendation from Committee on Library Extension—Clarence B. Lester, Wisconsin Free Library Commission, Madison, chairman.

AMERICAN LIBRARY INSTITUTE

President, Harry Lyman Koopman, Brown University Library, Providence, R. I.

Monday, December 29, 2:30 p.m.

President's address: Flexibility versus rigidity in library planning—Harry Lyman Koopman, Brown University Library, Providence, R. I.

Report on the proposed library colony at Lake Placid—Herbert O. Brigham, State Library, Providence, R. I.

Report on research in the library field—Henry O. Severance, University of Missouri Library, Columbia.

Brief business session.

ASSOCIATION OF AMERICAN LIBRARY SCHOOLS

President, C. C. Williamson, School of Library Service, Columbia University, New York City

Monday, December 29, 2:30 p.m.

BIBLIOGRAPHICAL SOCIETY OF AMERICA

President, H. M. Lydenberg, Public Library, New York City

Monday, December 29, 8:00 p.m.

Fifteenth Century Books as Books:

In the field of art—W. M. Ivins, Jr.

In the field of mathematics—Professor David Eugene Smith, Teachers College, Columbia University, New York City.

In the field of medicine—Dr. Arnold C. Klebs.

In the field of law—Professor Theodore F. T. Plucknett.

In the field of music—Dr. Otto Kinkeldey, Music Division, New York Public Library.

In the field of mineralogy—Dr. Thomas T. Read, American Institute of Mining and Metallurgical Engineers, New York City.

COLLEGE LIBRARIANS OF THE MIDDLE WEST

Chairman, Jessie J. Smith, Hiram College Library, Hiram, Ohio

Monday, December 29, 8:00 p.m.

Relation of the librarian to the alumni education movement—Charles H. Brown, Iowa State College Library, Ames, Iowa.

Recruiting for librarianship in the college library—Mary E. Downey, State Library Organizer, Columbus, Ohio.

Student centered college library—Hazel W. Byrnes, State Teachers College Library, Mayville, N. D.

EDUCATION COMMITTEE

No meeting.

LEAGUE OF LIBRARY COMMISSIONS

President, Leora J. Lewis, Free Library Commission, Pierre, S. D.

Monday, December 29, 2:30 p.m.

Developing a library consciousness among rural people—C. B. Lester, Wisconsin Free Library Commission, Madison.

A program for state wide library publicity—Joseph L. Wheeler, Public Library, Baltimore, Md.

Federal aid for county libraries—J. O. Modisette, Louisiana Library Commission, Shreveport; Glenn Holloway, Concordia Parish Library, La.

Tuesday, December 30, 2:30 p.m.

The part of the League of Library Commissions in the national library program—Essae M. Culver, Louisiana Library Commission, Baton Rouge.

Problems faced by a young library commission—Christine Sanders, Arkansas Free Library Service Bureau, Little Rock.

Has the traveling library been outgrown as a method for rural book distribution?—Louis J. Bailey, State Library and Historical Department, Indianapolis, Ind.

The need of a survey of library commission practices and policies—(speaker to be announced).

LIBRARIANS OF LARGE PUBLIC LIBRARIES

Chairman, Ralph Munn, Carnegie Library, Pittsburgh, Pa.

Tuesday, December 30, 2:30 p.m.

(Closed meeting. Attendance strictly limited to the chief librarians of public libraries in cities of over 100,000 inhabitants and to their personal representatives.)

NORMAL SCHOOL AND TEACHERS COLLEGE LIBRARIANS

Chairman, Emma Wiecking, State Teachers College Library, Mankato, Minn.

Monday, December 29, 2:30 p.m.

Recent books for children's recreational reading—Nora Beust, School of Education Library, University of North Carolina, Chapel Hill.

The use of leisure time through reading—Anna M. Tarr, Lawrence College Library, Appleton, Wis.

Some lines of interest for college students' reading—Mary K. Reely, Wisconsin Free Library Commission, Madison, Wis.

TRAINING CLASS SECTION

Chairman, Vera S. Cooper, Enoch Pratt Free Library, Baltimore, Md.

Tuesday, December 30, 8:00 p.m.

Business meeting, followed by informal discussion of plans for the year.

UNIVERSITY AND REFERENCE LIBRARIANS AND COLLEGE LIBRARIANS OF THE MIDDLE WEST,

JOINT SESSION

Chairman, University and Reference Librarians, George B. Utley, Newberry Library, Chicago

Chairman, College Librarians of the Middle West, Jessie J. Smith, Hiram College Library, Hiram, O.

Tuesday, December 30, 2:30 p.m.

The work of the advisory group on college libraries—William W. Bishop, University of Michigan Library, Ann Arbor; F. L. D. Goodrich, Library of the College of the City of New York.

The illustrated book: source material for research problems—John T. Windle, Newberry Library, Chicago.

Current studies pertaining to college and university libraries—Douglas Waples, Graduate Library School, University of Chicago.

UNIVERSITY AND REFERENCE LIBRARIANS

Chairman, George B. Utley, Newberry Library, Chicago.

Tuesday, December 30, 8:00 p.m.

The recording functions and the reference service: administrative reflections—J. Christian Bay, John Crerar Library, Chicago.

The university librarian: administrator or scholar?—Gilbert H. Doane, University of Nebraska Library, Lincoln.

Problems involved in the organization and administration of the Hoover War Library at Stanford University—Nathan van Patten, Stanford University Library, Calif.

Periodical Department routine—an informal discussion based on the paper presented a year ago by Gertrude Wulfekoetter, University of Cincinnati Library. Discussion to be opened by Miss Wulfekoetter.

Berlin's Library Is Reopened

THE BERLIN MUNICIPAL LIBRARY has been reopened after an interval of four months for rearrangement. This library, which was founded in 1906, has had its quarters since 1920 in the building of the former royal stables where now many offices and warehouses are located, and every Berlin inhabitant over sixteen years of age may enjoy its privileges. The new rooms are all on one floor, well lighted and ventilated. In addition to the large reading room with 260,000 books there is another for 250 German and foreign newspapers and 900 periodicals of most known countries, with a special room for circulating books. An extension of the library is planned which, when completed, will contain a Braille reading room, an exhibition room and a music library.

From The Library Schools

Library Fellowships Offered

THE UNIVERSITY OF CHICAGO will offer three fellowships of \$1,500 each for the academic year 1931-32 in its Graduate Library School. The fellowships are awarded by the President on the recommendation of the Committee on Fellowships and Scholarships. Applications must be in the hands of the Committee on or before March 1, 1931.

The following attainments are required:

a) The possession of a Bachelor's degree equivalent, or approximately equivalent, to that conferred by leading colleges and universities.

b) Completion of at least one year in an accredited library school, or the equivalent in experience.

c) At least one year of library experience under approved conditions.

In addition to the above requirements special consideration will be given to publications and manuscripts showing ability on the part of candidates to conduct original studies.

Before making application for a fellowship prospective candidates should determine whether or not they are eligible for admission to the Graduate Library School. Forms to be used in making application for admission, and for fellowships, may be obtained by writing the Graduate Library School, The University of Chicago.

New Jersey

COOPERATING with the New Brunswick Public Library the library school of the New Jersey College for Women has selected sophomores and juniors who are planning to take the library courses to serve as custodians of the Neighborhood House Library Station. This work done under the supervision of the New Brunswick Public Library will be accredited toward the two months of preliminary practice work required by the School. All full-time students attended the Fall meeting of the New Jersey Library Association at Passaic on October 10.

Pittsburgh

CARNEGIE LIBRARY SCHOOL of Carnegie Institute of Technology announces the following faculty ratings: Frances H. Kelly, Professor and Associate Director; Elva S. Smith, Elva L. Bascom, and Martha Conner, Associate Professors; and Elizabeth Nesbitt, Katherine E. Schultz, and Ann Macpherson, Assistant Professors.

St. Louis

ACCORDING to a recent ruling of the faculty, minimum requirements for entrance to the St. Louis Library School have been changed as follows: Beginning with the class entering the school in September, 1932, applicants for admission to the entrance examinations held in June each year, must have completed such work as would be accepted for admission to the junior class of an approved college or university. As formerly, candidates holding a bachelor's degree from an accredited college will be admitted without examination on the presentation of acceptable records. All candidates, including college graduates, must have satisfactorily completed at least two weeks of preliminary practical work in the St. Louis Public Library or in some other library acceptable to the school, before being formally admitted.

Wisconsin

AN ANALYSIS of the 1930 Wisconsin Library School class shows thirty-nine students representing fifteen States and the District of Columbia. Wisconsin leads with eleven, Illinois sends four, Iowa and Missouri three each, California, Indiana, Michigan, Ohio, Oklahoma, and South Dakota two each, Kansas, New York, Nebraska, Oregon, Pennsylvania, and the District of Columbia one each. They come from twenty universities and colleges including thirteen from the University of Wisconsin. The curriculum is following the general plan of other years, for covering only a single year it does not lend itself to drastic changes, though there will be various adjustments in keeping with the modern trends of library work.

Simmons

AFTER CHRISTMAS the program in library work for boys and girls at Simmons enters on its specialization with courses in Children's work and Story-telling. Not over twenty-five can be accommodated in this group and no "recruiting" is necessary to fill the quota, but some inevitably have to be disappointed when the limit is reached. A new feature this year is to be a talk by Henry R. Huntington on Binding and Mending with demonstration by one of his staff. In groups the students visited the Tercentenary exhibit of the treasures of the Boston Public Library under Dr. Haraszti's guidance.

School Library News

Library Psychology

SALESMEN and high-powered advertising experts no longer have a monopoly on the well-known truth, "It pays to advertise." The high school librarian, if she expects students and teachers to use the library, must be a master saleswoman and a student of psychology. A good salesman has numerous methods of making his product attractive to his customers. So does the good school librarian. The greatest and most effective selling devices used by the high school librarian are the bulletin boards, museum cases, and the special collections.

BULLETIN BOARDS

In the Senior High School Library, Greensboro, N. C., there are two big bulletin boards, which are arranged at least once a week and sometimes more often. The arrangement of pictures on the bulletin boards is important. When pictures, taken either from magazines or newspapers, are used, too much care cannot be taken to cut them out neatly; the effect is often ruined by careless cutting of pictures. The pictures should be uniform in color, and not too many should be used at once. Interest in the display on the bulletin boards may be stimulated by presenting information concerning them typed in capital letters on the back of old catalog cards. When placing pictures, care should be taken to leave enough space to arrange these captions to advantage. If posters are used, it is better to print them by hand, but since many librarians are not trained in printing, a rubber stamp printing outfit may be obtained at little cost. Due to the fact that the librarian has few opportunities to speak to the student body, printed information posters are very helpful. The card catalog, which is the correct height to place books relating to the pictures on display, is under one of the bulletin boards in the Greensboro Library. On this catalog display books are stood on end with most of the covers showing. If they are reference books, and too big to stand on end, a rubber band will hold the pages open at the description or illustration to which attention is being called. A few books make a more effective display than a larger number. Under the other bulletin board is a nest of three small tables, which can be placed in different parts of the library when needed for displays. One of them is used in connection with the bulletin boards, and the other two are very often placed at either end of the museum case with a few books on them that pertain to the exhibit in the case. The exhibit calls atten-

tion to books that would not be noticed otherwise.

It is interesting to note the different ways of attracting attention to little used books. Sometimes it is worth while to take a book from the shelf and open it and leave it on a table as if it had been used. This often attracts attention and the book goes out.

THE MUSEUM CASE

During the school year almost every department in school has something that can be exhibited in the library museum case. Individual students have contributed most interesting collections of birds' eggs, stamps, rocks, autographed letters and books, old documents and newspapers published at the time of important events in our history. Once there was on exhibit some of Procter & Gamble's prize-winning figures carved from cakes of Ivory soap. Some of these figures are very beautiful, and give the effect of white marble. The high school's art department frequently contributes to the museum and bulletin board projects. The head of this department, as a result of a course at Columbia University, has made some clay models of "Pan and His Choir," which attracted much attention in the library. In connection with these, several books were placed on display. A class in clay modeling has been started as a direct result of this exhibit.

SPECIAL COLLECTIONS

Special collections are a little difficult because they are not arranged according to their classification numbers, and it is hard for student assistants to know where they belong. It has been found very satisfactory to write the name of the collection on the date slip in the books, as it is eventually removed, anyway. At the top of these slips such titles as "Historic Novels—French Revolution," "Teacher's Collection," "Second Year English," "North Carolina Collection" may be written.

The teacher's collection, in addition to professional books, consists of approximately twenty books dealing with subjects of interest to them. It is well to place these books on end with the front of the book partly showing. This collection is changed frequently, and a mimeographed sheet is placed in each teacher's box with the new titles on it, and a short annotation of each book.

"Simplicity is the keynote of attentive understanding."

REBECCA B. WALL,

Librarian, Senior High School, Greensboro, North Carolina.

The November Forecast

A check list of books of general interest whose publication dates fall during the coming month

(Exact date of issue, when known, is given directly after publisher's name)

Fiction

Beaumont, William L. *Ben Ezra or The Midnight City*. Stratford. \$2.50.

The Needle in the Haystack (Primary Group), by John Matheson. Morrow.

Tales of a Basque Grandmother (Intermediate Group), by Frances Carpenter. Doubleday, Doran.

Tales from the Crescent Moon (Older Girls), by May McNeer and Charlotte Lederer. Farrar & Rinehart.

The Omnibus of Adventure (Older Boys), by John Grove. Dodd Mead.

Literary Guild

N by E, by Rockwell Kent. Putnam.

The author's own glamorous experiences in Greenland.

Religious Book Club

Pathways to Certainty, by William Adams Brown. Scribner.

For those who, confused by the perplexities of modern life, seek some sort of certainty upon which to build a faith in themselves, in their world, and in their God.

Scientific Book Club

Mysterious Universe, by J. Jeans. Macmillan.

Library Organizations

Pennsylvania Awards Book Review Prizes

THE PENNSYLVANIA STATE LIBRARY ASSOCIATION met at Wernersville, Pa., October 21-24, with President, Mr. A. Coleman Sheetz, Library Executive of the State Library, in the chair. The lecturers presented on the program were Mr. Stuart Chase of New York City, Miss Rose Fyleman of London, Dr. W. M. Lewis, President of Lafayette College, and Dr. Donald Cadzow of the State Historical Commission. Mr. Chase in his talk on "Men and Machines" brought the challenge "to master the machines we have invented or be mastered by them." A slightly different turn to the same emphasis was presented by Dr. Lewis in his address on Education as it has to do with the place of the library in the college picture. Developing leadership in the use of leisure time was the theme he pictured to a most interested audience. The more immature child's mind was revealed by Miss Rose Fyleman in her delightful talk on "Poetry for Children." In stressing sincerity she said: "I do not have a child audience in mind. I do not write things that I think children think but what I myself think, and it must be right, the exact word chosen, the perfect rhythm maintained." At the request of the audience she read a number of her own charming poems. From chasing fairies to "Chasing Dead Indians," the subject of Dr. Cadzow's lecture, was a long leap, but not too much for the practiced imagination of librarians. Moving pictures showed the processes of excavating, making casts, preserv-

ing pottery found by the archeological expedition at Safe Harbor on the Susquehanna River.

A report of the A. L. A. conference in Los Angeles was given by Dr. Fred Godcharles, State Librarian. The program on children's libraries was developed by Mr. Ralph Munn, Carnegie Library of Pittsburgh, assisted by two of his librarians. Miss Eugenia Brunot gave a very interesting demonstration of teaching children how to use the card catalog. Miss Elizabeth Nesbitt told most delightfully a story from *Seven Peas in a Pod*. A discussion of the "Relation of School Libraries to Public Libraries," was led by Mr. H. F. Marx of Easton. Mr. Marx introduced Miss Pauline Schmid of Hillside School, Montclair, N. J., and Miss Mildred Pope of Girard College. With such able leadership a very lively and profitable discussion arose. Miss Anna MacDonald of the State Extension Division presented the vital matter of county library service for Pennsylvania.

A new feature on the program was the awarding of a prize to that junior assistant who should write and read the best criticism of a recent book of fiction. The contest had been narrowed down to six by the judges and these contestants read their book reviews before the association; the award was then made.

The officers elected for the ensuing year are as follows: President, Mr. Ralph Munn, Carnegie Library, Pittsburgh; Vice-President, Miss Charlotte Evans, Erie Public Library; Treasurer, Miss Harriet Root, Bethlehem Free Library; Secretary, Miss Eliza J. Martin, Bucknell University, Lewisburg, Pa.

Among Librarians

Deaths

DR. CLEMENT WALKER ANDREWS, Librarian Emeritus of the John Crerar Library, died November 21 in the Grant Hospital, Chicago, after an illness of three years as a result of a paralytic stroke.

JAMES N. MOORE, 71 years old, chief of the Legislative Reference Bureau since its organization in 1909, died Oct. 17 at his home in Harrisburg, Pa. Mr. Moore was a member of the American Library Association, Pennsylvania Library Association, National Association of State Libraries, American Association of Law Libraries and the Pennsylvania Society of Washington, D. C.

GEORGE FRANKLIN SOUTHARD, president of the Carnegie Library Board, Enid, Okla., died at his home Oct. 2. He had been in failing health for the past year.

WINIFRED L. WALKER, reference assistant in the Business Branch of the Newark Public Library, died Oct. 9 after a short illness, aged 27. She had been a member of the Newark Library apprentice class of 1922 and had spent her eight years of library service in that institution.

Public Libraries

ISABELLA COOPER has received appointment as Chief of the Book Order Department of the Queens Borough Public Library, becoming effective on November 1. She will be responsible for the selection of books and building up the collections in the Central Building and the branch libraries, in addition to supervision of the book purchasing.

MARY A. MCCARTHY, Simmons '14, has been the assistant librarian of the Kirstein Library, Boston, since April.

MIRIAM I. OATEY, Washington '29, has resigned from the Children's Department of the Seattle Public Library to accept a position as children's librarian in the Wenatchee, Wash., Public Library.

ELIZABETH M. PATERSON, Columbia '29, has been appointed children's librarian in the Englewood, N. J., Public Library.

ELIZABETH SHEACH, Pratt '24, returned from England in June and is working for the New Jersey Public Library Commission.

MARY SILVERTHORN, Illinois '28, has been appointed librarian in charge of the Butman-Fish Library, Saginaw, Mich.

HARRIET P. TURNER, Western Reserve '16, recently reference librarian at Des Moines Public Library, is now reference assistant at the Enoch Pratt Free Library, Baltimore.

MRS. EVANGELINE WHITMORE THURBER, Columbia '28, recently director of Library Training School in the University of Oregon, is now assistant at the Information Desk at the Enoch Pratt Free Library, Baltimore.

MABEL E. ZEARLEY is now assistant in the Boys and Girls Department of the Carnegie Library of Pittsburgh, Pa.

Library Schools

MRS. EMILY KLUETER BROWN, Wisconsin '25, joined the staff of the Wisconsin Library School on Sept. 15 as reviser and assistant. Mrs. Brown had been the cataloger at the Municipal Reference Branch of the Milwaukee Public Library for two years.

CORINNE BACON, editor with the H. W. Wilson Company, has been appointed to the faculty of the Syracuse School of Library Science as lecturer in Book Selection in the spring semester.

LOIS E. DAVIS, Washington '27, is working as a half-time assistant in the Central and Branch children's rooms of the Seattle Public Library, while taking the advanced course in children's work at the University of Washington Library School.

School Libraries

DAISY ANDERSON, formerly librarian of Judson College, Marion, Ala., is high school librarian in Knoxville, Tenn.

HELEN M. LUTTON, Pittsburgh '23, is assistant teacher librarian at Fifth Avenue and Perry High Schools, Pittsburgh, Pa.

GEORGE P. MOORE, Pratt '25, formerly assistant librarian in the Boys' High School Library in Brooklyn, is now assistant in the De Witt Clinton High School Library, New York City.

A. ELEANOR THOMPSON, Drexel '29, has been appointed librarian of the Upper Darby Junior High School, Upper Darby, Pa.

ALICE D. SARDESON, Pratt '30, who substituted on the staff of the Pratt Institute Free Library during the summer, has been made librarian of the Neptune High School Library in Ocean Grove, N. J.

RUTH LEAVITT, Pratt '29, formerly in one of the branches of the New York Public Library, has received the appointment of assistant in the Julia Richmond High School Library, New York City.

The Recommendations of the White House Conference

(From the Committee on Reading)

CHILDREN'S READING interest was a prominent part of the discussion at the White House Conference on Child Health and Protection which was held at Washington, November 19-22. Carl H. Milam had served as chairman of the Committee on Reading, and the reports he gathered from his subcommittees provided an interesting current survey of the status of children's reading in the United States at present. These reports included studies of the publishing and selling of children's books as well as the problems of the school and children's library. Helen Martin of the Western Reserve Library School is chairman of the Committee on Public Libraries; Lucile F. Fargo of the School of Library Science of Peabody College, of the Committee on School Libraries, and Frederic Melcher, editor of the *Publishers' Weekly*, of the Committee on the Publishing of Books for Children, Bookselling and Home Libraries. The following recommendations come from the Section:

1. Public library service should be made available to the 54,000,000 people, about 20,000,000 of whom are children, now in places without it, through the establishment of municipal and especially of county (or other large unit) libraries.

2. The establishment of such libraries and the improvement of libraries now in existence, and particularly the improvement of specialized service for children, should be made possible by generous local appropriations by State aid and by Federal aid, and should be encouraged by the strengthening of State library extension agencies.

3. Every school should have a library and every school library should be in charge of or under the supervision of a person professionally qualified to select books and to direct reading as an important part of the work of the school and of the life of the child.

4. The development in every child of a permanent and desirable habit of reading should be the prime objective of the teaching of reading and English literature in the schools.

5. Parents should be made aware that theirs is the chief responsibility for stimulating an interest in good reading and for making books available in the home. Associations of parents should place increased emphasis on that part of their program which affects children's read-

ing interests and should give their indorsement to all projects for the establishment and improvement of agencies which provide good reading matter for children.

6. Publishers should continue the splendid publishing programs of the past ten years which have brought to children some of the best work of the finest present-day writers and artists; they should be encouraged to extend their publishing programs to include suitable books of various sorts needed as indicated by scientific investigations and recommended by competent observers. It is also urged that further efforts be made to make available at low prices the best in children's literature.

7. A spirited, well-written, purposeful, illustrated magazine for young children should be provided.

8. Writers and artists should be encouraged to give their fullest creative ability to children's books and magazines.

9. Bookstores should be encouraged, and they should be urged to employ as salesmen people trained in the selection and use of children's books, and to promote purchases by mail from rural areas.

10. Institutions, organizations, churches and special-interest groups of all sorts are urged to develop a library service designed to meet the reading and study needs of their groups, especially in communities without public libraries.

11. All methods that stimulate children's reading and create appropriate habits of reading should be studied and used intelligently and persistently by librarians, teachers, parents, and all adults interested in child education and welfare.

12. Scientific studies should be made, by persons equipped by training and experience, of the reading preferences of children, of the influence of reading on character, of the place of books, reading, and libraries in the teaching process, and of the individual and social factors which affect the wise use of books by children.

CONCLUSION

In conclusion, the committee repeats that the problem of promoting good reading among American children is, above everything else, a problem of making good reading matter accessible.

Opportunities

(This column is open to librarians.)

Young man, age twenty-seven and college graduate, desires position. Library school courses and experience in all branches of library work. Three years' public library, four years university library experience. Highest references. M10.

Responsible young woman with library summer school training and three years' experience desires position in children's department. Previous occupation, teaching. M11.

College and library school graduate with five years' experience in college and public libraries desires position in college in East. Reference work preferred. M12.

Young woman, college and library school graduate with public and college library experience, desires position as general assistant, reference librarian, high school librarian, or in loan work. M13.

Young woman, college and library school graduate with little experience, would like position as assistant in a public or college library. East preferred. L10.

Young woman, with college and library school training, desires responsible position. Experience includes reference, order, circulation and administrative work in college and public library. Prefers reference or reader's aid, but would consider any good opportunity. L11.

College graduate, with one year library school, would like temporary position in middle or south Atlantic States. Twelve years' general experience. College library preferred. L12.

College graduate, with additional degree in library science from Univ. Ill., desires position in college library. Would consider work in public, special or school library. L13.

Library school and teachers' college graduate desires position as general assistant. Four years' teaching and some library experience. L14.

For Sale

NEW JERSEY College for Women, Library, New Brunswick, N. J., will be glad to send to library paying carrying charges the following: *American and English Encyclopedia of Law*. Northport, Long Island, New York. E. Thompson. 1887-96. Volumes 1-31. Binding in poor condition.

PRINCETON UNIVERSITY LIBRARY will send to any library, transportation collect, a set of Brockhaus, *Konversations-Lexikon*, 9th ed., 17 vols.

The Calendar

Dec. 15—British Columbia Library Association, annual conference at Chilliwack, B. C.

Dec. 29-31—Midwinter meeting of the American Library Association will be held at the Drake Hotel, Chicago, Ill.

Jan. 31, 1931—California Library Association, sixth district, will meet at Pomona College.

Feb. 5, 1931—California Library Association, fifth district, will meet at Sacramento.

Feb. 14, 1931—California Library Association, ninth district, will meet at Colusa.

March 13-14, 1931—Pennsylvania Library Club and the New Jersey Library Association, joint annual meeting at Hotel Chelsea, Atlantic City, N. J.

June 22-27—American Library Association, annual meeting at Yale University, New Haven, Conn.

Wanted

WANTED: The following by The Lehigh University Library, Bethlehem, Pa.: *Federal Reserve Bulletin*, Vol. 1, No. 4, 7 and 8; Vol. 3, No. 2; Vol. 4, No. 4. Apply direct.

Nobel Prize for Literature

SINCLAIR LEWIS has been awarded the Nobel Prize for Literature for *Babbitt*. He is the first American to win this prize and the award has met with wide approval in Sweden for many of his novels have been translated into Swedish. The Swedish Academy made it clear that the award was based on *Babbitt* but it also expressed appreciation of *Elmer Gantry*, *Dodsworth*, and other of Mr. Lewis' novels. The Nobel prize is awarded on the basis of excellence of work and in the terms of the will of Mr. Nobel is awarded for "the most distinguished work of an idealistic tendency."

Please Report Promptly

COPIES of the preliminary list of minimum holdings for a well-stocked college library have been sent by the Carnegie Corporation to more than 250 institutions for checking. Charles B. Shaw, librarian of Swarthmore College, Swarthmore, Pa., is the compiler of the list, which is intended as a qualitative estimate of college library resources.

Misprints, old editions, inadvertent duplications, undeserving inclusions, unintentional omissions—most of the various sorts of inconsistencies, inaccuracies, questionable decisions and errors that have crept in—should be revealed in the process of checking. It is hoped that they will be reported promptly to the compiler. A corrected edition, incorporating the appropriate information received from such reports, and including an author index, will be issued later and made available probably through the agency of the American Library Association.

LIBRARY PURCHASING GUIDE

A Classified Directory of Supplies for Libraries and Schools

ATLASES, GLOBES AND MAPS

THE GEORGE F. CRAM COMPANY, 32 East Georgia Street, Indianapolis, Indiana

Cram's New Modern Reference World Atlas. Especially bound in durable attractive loose-leaf binding for library use.

Price \$30.00 with one year's free map correction service.

Write for descriptive circular or an Atlas for examination.

J. L. HAMMETT COMPANY
Cambridge—Boston—Newark

Maps and Globes; Blackboards; Paste; Pads and Pencils.

BINDERS BOARDS

DAVEY COMPANY, 164 Laidlaw Avenue, Jersey City, N. J.

DAVEY binders board is the standard for library bindings. It is made in three grades—GREEN LABEL (*tar binders*), BLUE LABEL (*special binders*), RED LABEL (*natural binders*), and stocked in all standard sizes by leading board distributors. The DAVEY COMPANY has manufactured binders board for more than three-quarters of a century and DAVEY board will meet every binding requirement.

C. B. HEWITT & BROS., INC., 23 Greene Street, New York City

Boards of all kinds for high grade library binding. Red Rope and Flexible Papers. We shall be glad to have your inquiries for any kind of Board or Paper.

BINDERS FOR MAGAZINES

THE H. R. HUNTING CO., 29 Worthington St., Springfield, Mass.

The most efficient low-priced locking Binder obtainable. Fitted with steel retainer rods and a patented hidden locking device that effectively prevents the magazine being extracted by unauthorized persons. The UNIVERSAL MAGAZINE BINDER is made in five different attractive styles and only from the best materials. Write us for price list.

BINDERS FOR PAMPHLETS

GAYLORD BROS., INC., Syracuse, N. Y., and Stockton, Calif.

Originators of pamphlet binders with gummed binding strips. All styles including magazine binders, multi-binders, duplex pamphlet binders and music binders in a choice of colors of pressboard, lithomount, photomount or red rope. Samples free. Address nearest office.

LIBRARY PURCHASING GUIDE

BOOK MENDING MATERIALS (Continued)

**THE H. R. HUNTTING CO., 29 Worthington St.,
Springfield, Mass.**

Supply **BOOKMENDING MATERIALS** and **TOOLS** of all kinds for Library use. Binders' Cloths, Papers, etc., put up in convenient sizes; Mounting Boards, Presses, Brushes, Paste, Glue, Book Lacquer, etc. Ask for particulars of our complete **BOOK-MENDING KIT**.

**ALBERT E. OBERFELDER, 307 5th Ave.,
New York City**

A Library Requisite—"Silk Chiffon." It's transparent. It's durable. Used extensively by principal Colleges and Universities and by Government, State and City departments for preserving manuscripts and records, also for Bookbinding. The material is 40 inches wide, and economically priced, 50c. per yard.

BOOK POCKETS

**GAYLORD BROS., INC., Syracuse, N. Y.
and Stockton, Calif.**

All standard styles of book pockets either printed with library rules or plain. New "Reinforced" pockets will wear twice as long as any other style. Samples free. Address nearest office.

BOOK STACKS

**SNEAD & COMPANY, Foot of Pine St.,
Jersey City, N. J.**

**Branch: 58 Wellington St., East,
Toronto, Canada**

Manufacturers of Library Book Stacks; Newspaper Stacks; Steel and Glass Partitions; Book Distributors and Light Reflectors. Write us about your problems and we will send you specific information covering any of the equipment referred to above.

BOOK TRUCKS

**THE COLSON COMPANY
Elyria, Ohio**

The Colson book truck is strong and quiet running. Made exactly the right height for checking and delivery desks, for the quick loading and unloading of shelves. Built of steel with ball bearing, rubber tired casters, this truck pushes easily and affords a surprising amount of storage space.

**DEMCO LIBRARY SUPPLIES, 114 So. Carroll St.,
Madison, Wis.**

A light weight, all steel book truck without bolts or screws, spot-welded, with 4 swivel 2-inch casters, rubber tired. Suited to the needs of small public and high school libraries. Smallest and lightest weight book truck in United States. 70 lb., crated, and 25 lb. on floor ready for use. Picture on request.

**GAYLORD BROS., INC., Syracuse, N. Y., and
Stockton, Calif.**

Our Book Truck is strong enough for heavy loads, light enough for convenience and improved with Colson Casters. The Truck can be moved easily and quietly. Shelves are let into uprights and bolted securely. Casters are 4 inches in diameter, rubber tired, ball bearing both in rotation and swivel. Address nearest office.

BOOK TRUCKS (Continued)

**THE H. R. HUNTTING CO., 29 Worthington St.,
Springfield, Mass.**

The best bargain in Library Trucks is The H R H **BOOK BUS**. All-steel, olive green finish: exceptionally sturdy yet light and easy to handle; the Truck for narrow aisles. You will be surprised at its low cost. A descriptive folder on request.

BOOKS

Wholesale

**THE BAKER & TAYLOR CO., 55 Fifth Ave.,
New York City**

Established in 1830. Comprehensive stock of books of all publishers and location here enable us to render prompt, complete book service not possible elsewhere. Ninety per cent of important books published in New York, Boston and Philadelphia, within five-hour radius of our stock.

**THE H. R. HUNTTING CO., 29 Worthington St.
Springfield, Mass.**

INK

CHAS. M. HIGGINS & CO., INC.
271 Ninth St., Brooklyn, N. Y.

Higgins' White Waterproof Ink is unexcelled for marking on dark colored papers or bookbindings. Higgins' Eternal Black Writing Ink, permanent as the pyramids, and Higgins' Red Writing Ink, brilliant and free flowing, are excellent for index cards and general library work.

J. W. JOHNSTON, Manufacturer, JOHNSTON'S SNOW WHITE PRODUCTS, 244 East Ave., Rochester, N. Y.

Johnston's Snow White Ink is the Standard Product of its kind. It has been on the market continuously for over fifteen years, being particularly well known to Librarians for the purpose of marking the back bindings of dark colored books to be placed on Library Shelves, Notices, Files, etc. Also for Bulletin Board Announcements, and for making white notices on Shelf Edges, Boxes, Drawers, etc. It is easily waterproofed with varnish supplied by Mr. Johnston, as required. Adheres firmly. Dries quickly.

LACQUER (Book)

THE HOLLISTON MILLS, INC., Norwood, Mass.
Branch Offices and Warehouses at Boston, New York, Chicago and St. Louis

Barco Book Lacquer forms a washable, waterproof, protective surface on your book covers which resists

dirt, water, scratches, stains and insects. Barco is easily applied and dries almost immediately. It will not turn white, crack or become sticky.

LEATHER

STEINHARDT LEATHER CO., Leather, Manufacturers, 201 McWhorter Street, Newark, N. J.

Substantial bookbinding leathers consist of cow hides and buffings in various weights. Since 1891 we have specialized in these types. Binders of library books will find Steinhardt Leather economical, reliable and exceptionally durable. Sample books and quotations will be cheerfully supplied.

LETTERS

DAVENPORT-TAYLOR MFG. CO., 412 Orleans St., Chicago, Ill.

D. & T. Quality cut to shape gummed paper letters and figures are used by Libraries everywhere for lettering and numbering books, shelves, files, cabinets, etc. They are as easy to apply as postage stamps. A catalogue showing twenty-three styles and sizes will be sent free on request.

LIBRARIANS' AGENCY

THE AMERICAN LIBRARIANS' AGENCY,

TO ANSWER INQUIRIES ON THE WORLD COURT ISSUE

EVERY LIBRARY NEEDS THESE AUTHORITATIVE BOOKS

THE UNITED STATES AND THE WORLD COURT

By Philip C. Jessup

Assistant Professor of International Law at Columbia University.

"This book states intelligently and accurately the international proceedings following the resolution of January 27, 1926, by which the Senate consented upon certain conditions in the form of reservations, that the United States should adhere to the protocol or treaty, creating the Permanent Court of International Justice."

Hon. Elihu Root, in the Foreword.

165 pages, fully indexed, cloth, **\$2.00**

THE WORLD COURT 1922-1929

By Manley O. Hudson

Bemis Professor of International Law at Harvard Law School.

A summary of the judgments, orders and advisory opinions of the Court, together with a brief statement of its origin, accompanied by the text of essential documents concerning the Court and American adhesion thereto. The most economical and compact detailed analysis of the actual work of the Permanent Court of International Justice in action.

211 pages, fully indexed, cloth, **\$1.75**

Forthcoming Issues of THE LIBRARY JOURNAL

✿ The author of the promised article on "Santa Claus' Library" reports the impossibility of obtaining the description and "authentic" photograph of it for this year, but we hope it will be available next Christmas. With this cancellation we are able to present Doctor Bradford's rather long article on the Universal Decimal Classification for which we were afraid there would not be space enough in this issue.

✿ The forthcoming numbers of 1931 promise several special numbers and a new series of articles. Among the subjects for the special numbers will be Branch Libraries, Small Libraries, Prison Libraries, Special Libraries, a number devoted to the various charging systems and a defense of the old method, several articles on budget making, and the usual Equipment Number of March 1. A series of articles on libraries in foreign countries, to begin with an article on "Three Great Spanish Libraries," by Mary Louise Foster of Smith College in the next number, will include articles from Wales, Scotland, England, Ireland, Germany, Holland, Sweden and Palestine. These articles are either definitely promised or on file in this office waiting their turn and we are trying to obtain many others. A column devoted to Special Library News will begin in January and will continue, we hope, at least once a month.

✿ To readers of THE LIBRARY JOURNAL we send a Merry Christmas greeting!
B. E. W.

KNOW COMPTON'S . . . The men who *knew* the facts worked with the men who *knew how to tell* the facts

Samuel Bannister Harding,
Managing Editor

▼

The actual preparation and editing of Compton's Pictured Encyclopedia covered a four year period of intensive application beginning in 1919 and ending late in 1922, when the first edition appeared

Guy Stanton Ford,
Editor-in-Chief

THE preparation of text was under the direct supervision of authorities in their respective fields—with Dean Guy Stanton Ford as Editor-in-Chief, Samuel Bannister Harding and Athol Ewart Rollins as Managing Editors . . . twenty departmental editors . . . and more than sixty-five contributing editors, staff editors and special writers—comprising the most outstanding group of educators and experts ever gathered together on a work of this kind.

As fast as the experts and specialists sent in their articles, the staff writers went to work on them. Technical language was simplified; involved explanations were translated into clear and simple terms; and the articles were then resubmitted to the authors.

In the end, each article bore two stamps of approval—the stamp of authority for accuracy, scholarship and completeness, and the stamp of the skillful writer for clearness and interest. Pictures came pouring in from all over the world—from picture agencies, from museums, art galleries and government bureaus. A half million selected pictures were studied and the best of them chosen for Compton's.

If Compton's Pictured Encyclopedia isn't in your junior reading room, you should see that a set is placed there . . . invaluable too, in the adult room where simply written and well illustrated information is desired. Bound by the famous Dura-Bound Process. Buckram binding, \$55.00 delivered. Fabrikoid slightly higher. Write for free sample pages.

An Old English Christmas Staff Breakfast

By Faith Holmes Hyers

Library Publicist, Los Angeles Public Library, California

THE MORNING before Christmas, some of us were up before daylight, and approaching town through the ruddy dawning, to be in good time for the Christmas Breakfast. We heard it was to be held in the basement of the Central Library, but when we arrived, we found the high ceilinged, austere room had been transformed into a Yuletide Baronial Hall. Great pillars were twined with ivy. A fire flamed ruddily in a great fireplace, with tall candelabra gleaming on either side. Tapestries hung on the walls, and long tables, likewise candlelit, were spread forth temptingly with meat pasties and Eccles cakes, and decked with ivy; while pages flitting to and fro, replenished the steaming cups of some 450 happy guests.

Suddenly heralds announced the entry of the lord and lady of the castle, with their train. Down the hall advanced a lordly Saxon baron resplendent in red velvet, his beautiful lady richly bedecked in a trailing green gown, her blond hair confined in braids to frame her face beneath a jeweled cap. Came next their little daughter, all in white, under the watchful eye

of the stately governess. Followed other ladies and gentlemen, the jester in motley and full of pranks, the monk pacing with downcast eyes, his acolyte beside him in a red gown with lace surplice. While sweet music was dispensed, this rich company moved through the hall and was seated at its own raised tables, against a

*Los Angeles Public Library Staff in Christmas Costume
for Annual Staff Breakfast and Fête*

tapestried wall. Then was the Yule Log welcomed with an ancient Welsh song, as it was pulled into the hall by two sturdy woodsmen, the son of the castle gaily astride it. Next did the castle cook proudly usher in his goodliest feast. Song greeted the boar's head borne by a retainer, the peacock pie raised

aloft by one of the fair ladies of the company, the plumb pudding flaming, surmounted by holly, and the wassail bowl wreathed with ivy. Father Christmas entered and was made welcome. His silvery hair and beard emerged from a green velvet hood, above a flowing red robe. Village children trooped in, singing ancient songs, and were given food and drink while all wassailed each his neighbor. And at last, slowly, one by one, moved down through

the hall a group of ladies-in-waiting, their faces radiant above lighted candles borne in their hands, graceful robes trailing, as they provided for us a picture not soon to be forgotten, while

all voices mingled in the old beloved Christmas hymns. So once more, and beautifully, Christmas swept into our hearts as we made happy festival together.

Suggesting Books for Gifts to Children

By Merrill Bishop

Assistant Director of Junior Schools, San Antonio, Texas

TO EVERY LIBRARIAN around Christmas comes the problem of suggesting books for gifts. The most difficult part is to get over to the parent the idea of presenting books and also the right books to present. The average mother is so busy that she does not care to take time to seriously go into the question.

We, in San Antonio, who have in charge the Junior School Libraries, have tried each year to get into the hands of the parent suitable lists of reading, which might suggest a reading gift. We realized that the majority of parents take the list as sent out, close their eyes, point at any title, then buy. Perhaps the child does not like that type of book, perhaps he has no genuine inclination to the subject-matter, perhaps he has read other books by the author and has failed to find him entertaining. These and many other inhibitions may exist.

With these experiences back of us we approached the problem last year. We went to the city library and consulted with the head of the juvenile department and asked her to aid us in the preparation of a list. Our idea was to suggest titles on a basic plan and we decided to take certain types of titles and make up lists from the types, giving the name of the publisher and list price. When the basic lists had been prepared, the librarian of the junior school added titles which she thought would be helpful to the pupils of her special locality; there are eight such schools in San Antonio. Thus the individuality of her school was maintained and at the same time the lists conformed to a certain uniformity. These lists were then sent to the book stores of the city, so that they might prepare to have on hand any or all of the titles.

Two weeks before the schools were dismissed for the Christmas holidays 5665 lists were distributed throughout the schools, the total number of pupils housed in the junior schools. Each pupil was asked to take the list home and give it to his parent, marking, if he wanted to, the titles which especially appealed to him. The parent could then take the list to the book store, knowing the price, author and publisher, and select. The lists could also be kept for further reference during the year. We felt that this assured the child of some book that he would like.

These lists did away with the age question. Many times parents buy books by giving the chronological age of the child. Chronological age is not the only criterion; many times a child likes books far beyond his age or far beneath his age. These lists were prepared on interest basis and not on age basis. The lists were prepared on highly colored paper and the Christmas theme was followed out because of the time of distribution.

They were attractive so the child was glad to take them home and show his parents. The covers were made by the Library Club in most of the schools, the art work by a pupil, and the whole work was a school project. A sample of the lists, as they were given out in one of these schools, follows:

SUGGESTED CHRISTMAS BOOKS

If you like

Little Women,

you should like

Rebecca of Sunnybrook Farm, by Kate Douglas Wiggin (Houghton, \$2, or Grosset, 75c.)

Nelly's Silver Mine, by H. H. Jackson (Little, Brown, \$2)

Prince and the Pauper, by S. L. Clemens (Harper, \$2.50)

Captains Courageous, by Rudyard Kipling (Doubleday, Page, \$1.90)

Christmas

Book

Gifts

Selected by The Staff

Syracuse Public Library, New York

The Age of Marbles and Paper Dolls

Auslander, Joseph. *DWARF'S RAILWAY*, illustrated by Ernst Kutzer. Longmans. \$1.50.

Picture book from the German. Text in verse and delightfully illustrated.

Berry, Eric. *PENNY WHISTLE*. Macmillan. \$1.

The jungle birds help a little black boy to learn new tunes for his whistle.

Bruere, Martha B. *SPARKY FOR SHORT*. Coward. \$2.

Fairy story of an electric spark which is really a radio photograph of a lost boy.

Charles, Robert. *ROUND ABOUT TURN*, illustrated by L. Leslie Brooks. Warne. \$1.50.

A few lines of text to a page and Leslie Brooks' inimitable drawings tell how Toad decides to see whether the world really is round.

Crawford, Phyllis. *BLOT: LITTLE CITY CAT*, illustrated by Holling C. Holling. Cape and Smith. \$2.

Both author and illustrator understand child and cat psychology.

Dalgliesh, Alice. *THE LITTLE WOODEN FARMER AND THE STORY OF THE JUNGLE POOL*. Macmillan. \$1.

For those just learning to read. Pictures in bright colors.

DeHuff, Elizabeth Willis. *FIVE LITTLE KATCHINAS*. Houghton. \$1.75.

Story of little gods, bringing in customs of the Hopi Indians.

Fyleman, Rose. *TEA TIME TALES*. Doubleday. \$2.

Fairy tales with humor running through them all. One, the "North Wind," is a Christmas story.

International Kindergarten Union. Literature Committee. *TOLD UNDER THE GREEN UMBRELLA*. Macmillan. \$3.

The old fairy tales.

MacDonald, Zillah. *MIC MAC ON THE TRACK*. Appleton. \$1.50.

Reform among locomotives with Mic Mac as the hero.

Morrow, Elizabeth. *PAINTED FIG*. Knopf. \$2.

Mexico is the scene of the story and pictures.

Petersham, Maud and Miska. *ARK OF FATHER NOAH AND MOTHER NOAH*. Doubleday. \$2.

In gay and humorous pictures and text the story of the ark unfolds.

Phillips, Ethel Calvert. *LITTLE RAG DOLL*. Houghton. \$2.

This doll names herself Dilly and goes house-keeping with Mrs. Thimbletop, the fairy.

Stoddard, Anne. *GOOD LITTLE DOG*. Century. \$1.

How Bingo becomes a hero.

White, Eliza Orne. *GREEN DOOR*. Houghton. \$2.

The heroine of this story has imagination and vim.

Up To High School Age

Ashmun, Margaret. *SUSIE SUGARBEET*. Houghton. \$2.

How a little girl got a better chance.

Brann, Esther. *LUPE GOES TO SCHOOL*. Macmillan. \$2.

The school is in southern Spain and in the very room where Cortes lived.

Caswell, Annie Gray. *SUSANN OF SANDY POINT*. Longmans. \$2.

Turning her hand to many things to make money to go to college, Susann earns the name of "Odd Jobs."

Chapin, Henry. *JOHNNY APPLESEED*. Coward. \$2.50.

New story of Frontiersman Jonathan Chapman, the founder of orchards.

Claudy, Carl H. **BEGINNER'S BOOK OF MODEL AIRPLANES.** Bobbs. \$1.75.

They fly.

Cruse, Amy. **BOYS AND GIRLS WHO BECAME FAMOUS.** Harcourt. \$2.50.

Darby, Ada Claire. **HICKORY-GOODY.** Stokes. \$2.

The early 1800's in Missouri.

Everson, Florence M. and Howard. **SECRET CAVE.** Dutton. \$1.75.

Two nine-year-old boys explore a secret cave on Hallowe'en.

Field, Rachel. **HITTY**, illustrated by Dorothy Lathrop. Macmillan. \$2.50.

At 100 years of age Hitty, with enthusiasm undimmed, pens her memoirs. She is a doll of mountain ash. Newbery Medal book of 1930.

Hagedorn, Hermann. **BOOK OF COURAGE.** Winston. \$2.50.

Inspirational biographies from Socrates to Lindbergh. Famous women are included.

Harrington, Isis. **EAGLE'S NEST.** Macmillan. \$1.

Story of two Navajo boys.

Hinkle, Thomas C. **TORNADO BOY.** Morrow. \$2.

A horse of rare intelligence, stolen by rustlers, escapes.

Jackson, G. Gibbard. **BOOK OF THE SHIP.** McBride. \$3.

History of ships and a description of boat-building.

Koenig-Warthaussen, Baron F. K. von. **WINGS AROUND THE WORLD.** Putnam. \$1.75.

A young German aviator's experiences.

McNamara, John F. **PLAYING AIRPLANE.** Macmillan. \$2.50.

Written by an ex-aviator in answer to questions of his own sons.

Morse, Elizabeth. **CHANG OF THE SIAMESE JUNGLE.** Dutton. \$2.50.

Including a good deal about Bo, the white elephant.

North, Mary Remsen. **DOWN THE COLORADO.** Putnam. \$1.75.

A Girl Scout engages in boating adventures.

Robinson, Mabel L. **ROBIN AND TITO.** Macmillan. \$2.

Adventures of a small Scotch-American girl in Sicily.

Sherwood, Merriam, tr. **TALE OF THE WARRIOR LORD.** Longmans. \$2.50.

Exploits of the Cid.

For Grown-Up Boys and Girls

Allee, Marjorie Hill. **JUDITH LANKESTER.** Houghton. \$2.

Judith learns to lead a useful life in a Quaker Indiana home of the 1840's. Excellent characterization.

Berger, Helen. **MYSTERY OF WORLD'S END.** Longmans. \$2.

Peter is sent to Hawaii to lose an obsession that he cannot walk.

Carroll, Gladys Hasty. **LAND SPELL.** Macmillan. \$2.

A city girl seeks shelter in a New England farmhouse.

Darling, Esther Birdsall. **NAVARRÉ OF THE NORTH.** Doubleday. \$2.

This dog has a part in the World War.

Irving, Washington. **BOLD DRAGOON.** Ed. by Anne Carroll Moore. Illustrated by James Daugherty.

Weird tales.

James, Will. **LONE COWBOY.** Scribner. \$2.75.

Romantic autobiography of the most famous of cowboy artists and authors.

Kelly, Eric P. **BLACKSMITH OF VILNO.** Macmillan. \$2.50.

Mystery and adventure abound in this story of Poland of 1832.

Knapp, George L. **YOUNG VOLUNTEER WITH OLD HICKORY.** Dodd. \$2.

John Preston, seventeen, joins the forces of General Jackson in the campaign against the Creek Indians.

Lide, Alice Alison and Johansen, Margaret Alison. **OOD-LE-UK, THE WANDERER.** Little. \$2.

Driven out to Sea from Alaska on an ice floe, Ood-Le-Uk after a perilous existence arrives on the coast of Siberia.

MacMillan, Donald B. **KAH-DA.** Doubleday. \$2.

Life of a North Greenland Eskimo boy.

Rohan, Jack. **RAGS.** Harper. \$2.

Story of a dog who went to war.

Schultz, James Willard. **WHITE BEAVER.** Houghton. \$1.75.

An Indian story that involves the pursuit of the "medicine animal," the white beaver.

Tyrell, Mabel L. **WITCH'S MAIDEN.** Harper. \$2.

Adventure story of the time of Charles II.

Verrill, A. Hyatt. **LOST TREASURE.** Appleton. \$3.

Stories of many kinds of lost treasure, some of which are true.

Wade, Mary Hazeltine. **BOY WHO DARED.** Appleton. \$1.75.

William Penn was the boy.

Williamson, Thames. **OPENING DAVY JONES'S LOCKER.** Houghton. \$2.

Deep sea observation is the theme of this story.

For Those of Voting Age

Barnes, M. A. **YEARS OF GRACE.** Houghton. \$2.50.

American family life, the newer generation vs. the older.

Bowles, Ella S. **ABOUT ANTIQUES.** Lippincott. \$3.50.

Well illustrated and generally valuable.

Briggs, Clare A. **HOW TO DRAW CARTOONS.** Harper. \$3.15.

Good suggestions and assistance. Profusely illustrated with Briggs' own cartoons.

Buck, Frank. **BRING 'EM BACK ALIVE.** Simon and Schuster. \$3.50.

By an American who goes to the jungle and brings back his trophies.

Byrd, Richard E. **LITTLE AMERICA.** Putnam. \$5.

Commander Byrd's trip to the South Pole.

Canfield, D. F. **DEEPENING STREAM.** Harcourt. \$2.

Story of the growth and evolution of a woman's soul.

Cave, Edna S. **CRAFT WORK.** Century. \$3.

Lessons in making lamp shades, batik, toy construction, reed basketry, suggestions for gift shops, a practical book of handcraft.

Chase, Joseph C. **THE ROMANCE OF AN ART CAREER.** Sears. \$3.50.

Experiences of an illustrator during the World War behind the firing line.

Cobharn, Sir Alan John. **TWENTY THOUSAND MILES IN A FLYING BOAT.** McKay. \$2.50.

The author's flight around Africa. Well illustrated.

Crane, Stephen. **COLLECTED POEMS.** Knopf. \$2.50.

Davis, M. L. **UNCLE SAM'S ATTIC.** Wilde. \$3.50.

Alaska today. A travel book that has the charm of fiction along with the accuracy of true description.

Dimnet, Ernest. **ART OF THINKING.** Simon & Schuster. \$1.

Brief, concise, stimulating pointers on that greatest of arts.

Edmonds, W. D. **THE BIG BARN.** Little. \$2.

Dramatic tale of farm life in New York in Civil War time.

Faris, J. T. **ROAMIN' THE ROCKIES.** Farrar. \$3.

A delightful trip through our western parks and forests.

Finley, Ruth E. **OLD PATCHWORK QUILTS AND THE WOMEN WHO MADE THEM.** Lippincott. \$5.

Two and a half centuries in the life of American womanhood, ending with the year 1880, cover the period of patchwork, and the contents of this fascinating work.

Frost, Robert. **COLLECTED POEMS.** Holt. \$5.

Vivid, colorful blank verse.

Galsworthy, John. **ON FORSYTE 'CHANGE.** Scribner. \$2.50.

Twenty-nine new short stories of the famous Forsyte clan.

Gardner, Helen. **ART THROUGH THE AGES.** Harcourt, Brace & Co. \$4.

Surprisingly concise for such a stupendous field.

Garland, Hamlin. **ROADSIDE MEETINGS.** Macmillan. \$3.50.

Talks with Walt Whitman, Kipling, Riley, Stephen Crane and other highlights provide material for these roadside meetings. A family album of the last thirty years of the nineteenth century.

Halliburton, Richard. **NEW WORLDS TO CONQUER.** Bobbs. \$5.

Central and South America described in narrative. Halliburton has a charm all his own and a clientele who are enthusiastically constant.

Jackman, Evelyn R. **AMERICAN ART.** Rand. \$3.60.

A splendid text by a university professor of fine art.

Jeans, Sir James. *THE MYSTERIOUS UNIVERSE*. Macmillan. \$2.25.

Modern science in its relation to life. A readable book of science.

Jones, R. T. *DOWN THE FAIRWAY*. Minton. \$3.50.

The life and technique of the famous Bobby.

Kipling, Rudyard. *COLLECTED POEMS*, inclusive edition. Doubleday. \$4.

New Kipling anthology, sure to interest lovers of dramatic poetry.

Lawton, Mary. *SCHUMANN-HEINK*. Macmillan. \$2.50.

A sympathetic, human biography showing the great singer as she appeared to her own family.

Locke, W. J. *SHORN LAMB*. Dodd. \$2.50.

Here is a new *Beloved Vagabond*, with all the charm of the old.

Loring, Emilie. *LIGHTED WINDOWS*. Penn. \$2.50.

A light, old-fashioned love story.

Ludwig, Emil. *THREE TITANS*. Putnam. \$3.50.

Michael Angelo, Rembrandt and Beethoven, a brilliant study of all three.

Mackay, H. F. B. *THE MESSAGE OF FRANCIS OF ASSISI*. Morehouse. \$1.75.

New version of the life and work of this beloved saint.

Mansfield, Katherine. *SELECTED STORIES*. New ed. Knopf. \$5.

Poignant, living short stories by a master.

Munro, H. H. *SHORT STORIES OF SAKI*. Viking Press. \$3.

With a preface by Christopher Morley.

Munthe, Axel. *STORY OF SAN MICHELE*. Dutton. \$3.75.

One of the outstanding autobiographies of recent years.

O'Brien, Edward Joseph. *BEST SHORT STORIES OF 1930*. Dodd. \$2.50.

The reader of short stories will like this new O'Brien collection.

Oliver, John R. *FOURSQUARE*. Macmillan. \$2.50.

Autobiography of one of our leading American psychiatrists who is also an Anglican priest.

Post, Emily. *PERSONALITY OF THE HOUSE*. Funk. \$4.

Practical work on interior home decoration by a woman of proverbial good taste.

Priestley, J. B. *ANGEL PAVEMENT*. Harper. \$3.

Story of the ruin of a little business, told by a close, appreciative observer of English life. Humorous, pathetic, understanding.

Repplier, Agnes. *PERE MARQUETTE*. Doubleday, Doran & Co. \$3.

Thrilling experiences of pioneers and Indians at the time of the exploration of the Mississippi.

Rines, F. M. *DRAWING IN LEAD PENCIL*. Bridgman. \$2.50.

Written primarily for the beginner. Useful, simple.

Rosman, Alice. *THE YOUNG AND SECRET*. Minton. \$2.

An original plot, enacted by delightful characters, done with a charming gayety of style.

Sayers, D. L. *OMNIBUS OF CRIME*. Payson & Clarke. \$3.

Best crime stories of outstanding authors.

Sedgwick, A. D. *PHILIPPA*. Houghton. \$2.50.

A child of divorce with a striking personality.

Sprague, Curtiss. *HOW TO DRAW SILHOUETTES*. Bridgman. \$2.50.

A bright, attractively bound volume on a fascinating subject.

Thomas, Lowell. *INDIA: LAND OF THE BLACK PAGODAS*. Century. \$4.

New light on a puzzling country.

Undset, Sigrid. *KRISTIN LAVRANSDATTER*. Knopf. \$3.50.

Splendid medieval romance of Norwegian life.

Upton, G. P. *STANDARD OPERAS*. McClurg. \$2.75.

An enlarged, revised edition that includes descriptions of the plots and music of all the recognized operas.

Whiffin, Mrs. Blanche. *KEEPING OFF THE SHELF*. Dutton. \$3.75.

Correspondence and reminiscences of an American dramatic actress who refused to retire. Simply, charmingly done.

Wilder, Thornton. *WOMAN OF ANDROS*. Boni. \$2.50.

A perfect little poem in prose by the author of *The Bridge of San Luis Rey*.

Wister, Owen. *ROOSEVELT*. Macmillan. \$4.

Personal rather than political record of Roosevelt, told by an intimate friend.

Yeats-Brown, Francis. *LIVES OF A BENGAL LANCER*. Viking. \$2.75.

The contrast between the Orient and the Occident in the conception of the purpose of life.

Zweig, Stefan. *JOSEPH FOUCHE*. Viking Press. \$3.50.

The prize traitor of the French Revolution.

A Christmas Greeting To Librarians

*Rabindranath Tagore, Now
Visiting in This Country*

The opening of the Suez Canal has laid the path of commerce between the two great geographical divisions of the world. My object is to find the channel for the commerce of culture between the Western Continent and my own country, India which represents the east, for through such a bridge of communication will be fulfilled a most important mission of education. Mountains and seas cannot obstruct the fact that deep in our beings we need you and you need us, for we are *Kia*.

Rabindranath Tagore

Why the Science Library Adopted the Universal Decimal Classification

By Dr. S. C. Bradford

Science Library, South Kensington, London, S. W.

A SUBJECT-MATTER INDEX to periodical literature has been organized in the Science Library as a means of supplying the information to research workers, the lack of which in the past has been an ever-present and increasing hindrance to progress. Although the importance of ascertaining what previous work has been done on a given subject of investigation is recognized generally, the immensity of the store of recorded information, at present buried out of reach in the printed volumes on the library shelves, is realized by few. Nor do most of those who labor patiently and laboriously to extend the boundaries of human knowledge, or to provide better tools, or new sources of power, for the use of mankind, foresee more than dimly that in many cases the hard-won results of their work are likely to do more than add to the musty archives of forgotten achievements.

It is this appalling waste of the fruits of the highest kind of human activity that the Science Library is endeavoring to remedy. The task might well seem impossible to accomplish, for the printed record of scientific and technical information is growing at the rate of perhaps about thirteen thousand separate books and half a million articles published in twelve to fifteen thousand periodicals each year. Certainly it would be hopeless, were the magnitude of the undertaking not fully understood. I think that one of the chief reasons for the lack of a comprehensive index to recorded information in the past has been that the quantity of material to be indexed has been altogether underestimated, so that the scale on which most of the existing indexes have been conceived has been inadequate. But when the extent of the enterprise is visualized, another difficulty arises, i. e., that the work is vastly greater than can be undertaken by a single institution with the resources at present available.

The Science Library is attempting to overcome both these difficulties by adopting a classification that is sufficiently flexible and extensive to comprehend all knowledge, and by recommending that all bibliographical undertakings should adopt the same classification, so that by the standardization of classification the present chaos of divided effort may be reduced to order, and all may work together for the common good.

Standardization seems to provide the solution to the problem. For by the coordination of bibliographical agencies using the same system the desired index can be provided. Since the need for indexing information began to be felt, multifarious individuals and institutions have applied themselves to the task, each one by the method that seemed to himself the best. That the result of so much uncoordinated individual effort should be confusion is an economic necessity. Thousands of bibliographies have been compiled and many bibliographical periodicals issued, but nearly all of them are on different systems; the same articles have been classified over and over again, and only a small portion of the total literature has been indexed. Consequently, to find what papers have been cataloged as dealing with a given subject, it is necessary to ascertain what bibliographies have been issued on that subject, where they are, gain access to them, master the system on which each one is compiled, and then study each of the parts of which each volume may consist. Such a research may take several weeks or months, and in the end only a portion of the literature on the subject will have been found. In the Science Library a point has been made of collecting as many scientific and technological bibliographies as possible, and, with a view to making these more accessible, all those issued separately from other matter have been classified and gathered together into one place in the Reading Room for open access. This has made it possible to prepare a careful estimate of the total number of separate bibliographical entries in the library, excluding those published in, or in connection with, separate articles. The number works out at the enormous figure of forty million. This calculation is particularly interesting, because it shows that, in the past, the total number of bibliographical entries made has been of the same order as the total number of scientific and technical articles written. So that, if bibliographical work had been coordinated, the same expenditure of energy would have sufficed to index nearly every scientific and technical paper published. The estimate shows also that to index the total output of scientific and technical literature is not an impossible undertaking.

Nevertheless, at the present moment we have to deplore the fact that, in spite of this

colossal expenditure of energy, we have nothing approaching a comprehensive index to knowledge. However, the science of economics shows how to bring order out of this confusion. It suggests that those, who are now working independently in making separate indexes to published information, should agree to work together by standard methods. It is necessary to impose a minimum of control, which, though interfering slightly with individual liberty, yet allows of the attainment of the end that is desired by all. It is an economic law that the individual must be willing to undergo the slight inconvenience of submitting to a minimum of regulation in order to obtain the maximum benefit from the labor of the many. It is the principle which has come down to us through the ages in the familiar words "Union is strength."

The application of this law to the art of bibliography is very simple. The necessary regulation required is the adoption of a standard classification. A classification is like a language; in order to understand each other, bibliographers must use the same nomenclature. However, in the case of bibliography, the inconvenience of submitting to rule is very slight, while the advantages are very great. As Professor Pollard said in his paper read at the Seventh International Congress of Photography last year:

"Individual attempts to devise schemes whereby such material may be classified by subject must necessarily be attended sooner or later with failure. The ramifications and inter-relations of matters, which can form the subject of an intellectual work, are so vast that no single mind can hope to deal with the problem of universal bibliographical classification. Even when such a classification has been attempted, by the concerted action of numbers of persons with specialized knowledge, imperfections become apparent in the scheme, which can only be minimized by constant and critical application."

But by adopting a standard classification, the individual gets a scheme that embodies the accumulated experience of his co-workers. At the same time his work is made available for use by them and theirs by him. The application of the principle of coordination appears so obvious that it hardly seems necessary to emphasize it. A very extensive bibliography can be produced only by a number of workers using a common classification, and, if a large number of bibliographical undertakings should agree to use the same classification, their total bibliographical output would be unified immediately. It would be then possible for individual workers and associations to collect information on a given subject, from all sources using the standard system, and intercalate it in one series in a single special bibliography of that subject for their own use, while, in very large libraries, all such pub-

lished bibliographies could be collected, and formed into one great repertory, in which all the references on a given subject would fall together automatically into one place, so that they could be found in a moment, with the saving of weeks or months of work at each consultation. From what has been said above, it follows that such a great repertory would cover a considerable proportion of the total output of scientific and technical literature. At the same time the enormous waste of energy, in the overlapping of bibliographical publications, would become so apparent that institutions would wish to take steps to obviate it. Thus, by adopting a standard classification, the bibliographical work of each individual would fit into one whole like the standardized parts of a machine, and the desired master-key would be attained.

The question will now be asked: "Why has the Universal Decimal Classification been adopted? This classification may be very good for most subjects," but, the inquirer may say, "for the one in which I am most interested it is inadequate." As members of the Association of Special Libraries will realize, a complete reply to this question would need a course of lectures and practical instruction, for there is a technique of classification, and it is impossible for anyone to select or prepare a satisfactory scheme for any science without an expert theoretical and practical knowledge of both the subject of classification and the subject to be classified. As this combined knowledge is rare, the number of faulty classifications is multifarious. Fortunately, however, the general principles of classification are simple, and a short outline of the subject can be given. The answer to the second part of the question asked may first be stated, and is that in all probability the inquirer does not understand the Universal Decimal Classification, and that, in any case, the logical order and completeness of a section of a classification is a mere detail as compared with the principles on which the classification is based. The classification is intended as a means of filing references by subjects so that they may be found as readily as possible, not as an exposition of the best philosophical order of the departments of knowledge. When a scheme has been chosen as a standard it may be easy to add to, or rearrange, the subject divisions of a classification, if these are really insufficient, or inconveniently placed, but, unless the whole is drawn up on sound principles, the classification must be unsatisfactory.

In considering the principles on which such a classification should be based, we must recognize that what we classify are Things, and that Things have Attributes. The act of

Classification is a mental process, in which we imagine that we have picked out all things that possess a certain Attribute, or set of Attributes, and put them together in a group by themselves. Such a group is called a class. But there are very many attributes that are common to a variety of things, and if we attempt to make a Classification by allotting a separate class to every possible attribute of every kind of thing, the size of the Classification would become enormous. It would indeed contain the extent of knowledge and include, besides, classes that are now imaginary but that may become real in future.

When the novice in the art of classification attempts to tabulate all the classes of a given subject, he sets himself a task of such an order of magnitude. And realizing, subconsciously or otherwise, the impossibility of making the scheme complete, he is obliged to be content with a selection of what he considers to be the most necessary headings. Naturally almost every selection is different, and confusion inevitably results.

Much has been written on the application of logic to the arrangement of the classes in such a single series. We are told that the form of a classification should follow that of the order of ideas, history or evolution. Its function is to place a topic in its sequence in the "order of knowledge" in such a manner that books leading up to the topic are on the left of those dealing with it, and books leading away from the topic are on the right of them. Such an arrangement might be demanded in a land "Through the looking glass" where readers might be expected to require books on any subject other than that under discussion, but in practice, what is demanded of a classification is that it should enable the searcher to find the books on a given subject. Ignoring this practical test, the pundits have criticized every published scheme in regard to the logical arrangement of its main classes, and finding each one defective, they have come to the rather ridiculous conclusion that the individual librarian may choose any classification he prefers. The necessary result of such logic is the present confusion of bibliographical procedure. Actually it is no matter to a student whether the books in Chemistry are arranged before or after those in Geology, or if books on Ethics are placed for convenience between books on Logic and Systems of Philosophy, because the subjects are essentially different. The same remark applies even to the major subdivisions of a classification. It is only in the minor subdivisions that it is useful to have closely related subjects brought together. In short it is wholly impracticable to have a bibliographical classification which will repre-

sent the best philosophical statement of the interrelations of knowledge; no two thinkers would ever agree on the exact order of things and, having made the best compromise, every year would require modifications and changes involving confusion and expense. The one permissible test of a classification is its utility.

Now, although many writers have discussed the application of logic to the arrangement of the classes in what might be called a linear classification, MM. Otlet and La Fontaine are the only thinkers who have attempted to apply the laws of logic to the art of classification itself, and the result was the International Decimal Classification, which is therefore unlike any other scheme, being at the same time simple and almost infinitely comprehensive.

Let us suppose that we represent by X_1 a thing defined by a single attribute, or by a restricted set of attributes, let us say the substance sulphuric acid. Now, if we are classifying literature on sulphuric acid, we shall have to deal with many forms of books and papers in which this substance is treated from many different points of view. The literature of sulphuric acid is in fact a collection of things, any one of which may be represented by $x_1 m_1 n_1 p_1 \dots$, where $m_1 n_1 p_1$, etc., indicate various attributes of the literature or of the substance sulphuric acid. For instance, there will be papers on theoretical or experimental studies relating to the manufacturing process at the start, while in use, or after modifications; papers from the point of view of realization of the manufacture, such as gathering materials, special operations, raw materials, accessory products, machines employed, fixed machinery, engines, machine tools, implements, results obtained, by-products, fittings and apparatus; papers from the economic point of view, such as cost of materials, labor, selling price; from the point of view of premises, sites and personnel of various kinds. These and other general points of view are common to the various branches of the sulphuric acid industry, as well as to a vast number of specific subject divisions. Again it will be necessary, in any case, to classify bibliographical material according to place, time, or language, or, it may be, according to the form of the work. Thus sulphuric acid manufacture may need to be treated from the point of view of country or period, or it may be desired to distinguish between large treatises, manuals, books of tables, popular descriptions, collected papers or historical studies.

It is obvious, therefore, that a classification, in which a separate class is allotted to each aspect of every conceivable subject divisions would occupy many hundreds of volumes. On the other hand, by classifying separately, in a

number of auxiliary tables, as many of the attributes, *m*, *n*, *p*, as possible, that are common to a number of things, the size of the main classification of things represented by *x* is reduced to its smallest limit, and each class of the main classification can be subdivided as required by the use of the auxiliary tables. This is the principle of the Universal Decimal Classification, which is thus able to represent, in a single volume, almost every conceivable set of attributes in the universe.

It is unnecessary to describe Melvil Dewey's classification to American readers. It contains the germ of an idea which, developed afterward by the Brussels Institute, converted his classification into a powerful instrument of bibliography. There are certain general groups into which bibliographical material may be divided that are independent of subject, or common to a large number of conceptions. Thus at the head of each of the main subdivisions (e. g. of 5, Pure Science), there is a section

01 Philosophy, Theories	05 Periodicals
02 Compends, Textbooks	06 Societies, Transactions
03 Dictionaries, Encyclo- pædias	07 Education, Methods of Teaching
04 Essays, Lectures, Ad- dresses	08 Collected Works
	09 History.

Such subdivisions relate to the form or purpose of the work. For example, the Proceedings of the Physical Society would be numbered 53.06. Again under geology, 55, there is a section, 554 to 559, to be subdivided by countries like geography, 94 to 99. Altogether, a good many examples occur of the application of such an idea, but the classification as published was suitable for the purpose of arranging the books in a large library, and the principle of common subdivisions was not developed in detail. By its publication Dewey conferred a lasting benefit on bibliographers, and it is not to be expected that the original scheme should prove to be perfectly adapted to the indexing of scientific papers as a whole. The classification of separate articles requires much more subdivision than the grouping of books even on the largest scale. The main subject-classification itself requires to be more detailed, and when this has been developed as much as possible, there remain the various common aspects of a given subject to be dealt with.

Now, although, as it has been stated, Dewey's classification contains the germ of an extension by common subdivisions, this was not developed, and his tables have no places for grouping materials by common headings such as have been mentioned. Indeed, to provide for such subdivision as necessary in each case, without perfecting a system of general classes,

would have increased the size of the classification to several hundred volumes. For this reason his scheme in its original form is hopelessly unsuitable for the preparation of a comprehensive index to knowledge, and appears never to have been used for bibliographical work on a large scale.

This was the state of affairs when, in 1895, the first International Conference on Bibliography was held in Brussels. The Conference had to search in a spirit of impartiality for the principles on which could be established a universal bibliographical classification. It decided that the Dewey system was based on such principles and was capable of being transformed into a highly satisfactory classification. As a result of the Conference, the Institut International de Bibliographie was founded, which undertook the work of perfecting the Dewey code.

Under the direction of MM. Otlet and La Fontaine and with the aid of their expert advisers, the classification itself was considerably extended and, in addition, the conception of auxiliary tables for common subdivisions was developed. These are two kinds: Analytical subdivisions that relate to special subjects only and Common subdivisions that may be added to any item of the classification. For example, general operations in photography are made into a group of special analytical subdivisions that are available for arranging matter relating to any of the various photographic processes. The numbers representing such subdivisions are preceded by a zero. For example, toning is one such division, represented by 0235, and this number can be added to any of the numbers representing a photographic process. Thus 77.21 denotes silver processes in general, and 77.21.0235 means toning in relation to processes based on the use of silver salts.

Besides these special subdivisions that relate to particular parts of the classification, there are five tables of common subdivisions that may be used in any connection. The first relates to the form of the publication, and is developed from the general subdivisions of the Dewey scheme described above, the numbers being enclosed in parentheses. Thus (05) represents a periodical, so that a magazine restricted to acetylene welding, for example, can be indicated by adding (05) to the number for that process as 665.882(05). Table II comprises the geographical subdivisions. These are enclosed in parentheses. Thus (493) denotes Belgium. Consequently sulphuric acid manufacture in Belgium would be 661.25(493). Table III has subdivisions by language and Table IV by time. The fifth of these common groups includes all subdivisions corre-

sponding to general points of view. These are indicated by numbers commencing with a double zero; e. g., 00311 represents net cost of the raw materials. If it is desired to classify a paper on that aspect of the sulphuric acid industry, it would be numbered 661.25.00311; and these ten figures represent an idea requiring eleven words to express in English.

By such a logical extension of Melvil Dewey's scheme it was converted into a beautiful bibliographical tool of the greatest power that is suitable for work of the finest detail; and in order that the classification may be kept up to date, a Commission was established to issue additions as needed. From time to time, with the progress of science and invention, new divisions become necessary and are published by the Commission. Or, an expert who discovers the need may suggest a considered extension of the scheme, and if this is drawn up in accordance with the principles of the classification, it will be incorporated.

The principles of the Universal Decimal Classification may thus be summarized. The Classification aims at covering the whole field of knowledge, and is far more extensively developed than any other known system covering the same general field. Generally speaking, the classification is capable of dealing with the widest range of literature in any desired detail. The system has been used extensively for twenty-five years or more and many of the defects inherent in the original Code have been removed. But it is recognized that some specialists might still criticize its extent in certain particular fields for which the classification has not been used to a great extent hitherto. As such defects are pointed out they can be remedied so that the more general the application of the system the more perfect it will become.

A classification intended for international use must be provided with a notation. The system of decimal numbers has been accepted as the most suitable for such a symbolic notation, because it is at the same time ordered in an easily comprehended manner, it is independent of language, so that the order of the classes is the same in all countries, classified cards can be rapidly arranged in correct sequence by unskilled labor, and new classes can be intercalated without disturbing the order of the rest of the classification. The signs of association used in conjunction with the decimal numbers are also given an easily comprehended order of succession. They very greatly increase the scope of the classification and simplify the classification of the compound ideas, which are characteristic of modern research. As references classified by means of numbers linked by signs of association are filed under

all the numbers specified; these signs insure that information indexed from one point of view shall be available to those who may need it from any other point of view from which it may be of interest. Moreover, the compound symbols, consisting of two or more groups of numbers connected by signs of association, are eminently suited to the needs of specialists who require to stress any one aspect of the concept at the expense of the other. In a general bibliographical repertory, arranged by this system, every aspect will be represented in its proper sequence, references bearing compound numbers, appearing under both headings, but the specialist may content himself with filing on the basis of his own requirements, using only those numbers in which his subject is given priority in the symbolic sequence.

The basis of subdivision follows the natural and accepted principle of from groups of wide extent to groups of great intent, but undue stress is not laid on any theory of natural succession. It is recognized that such theories vary with passage of time and that interdependence is as much a characteristic of modern knowledge as dependence. Practical utility is the sole criterion of development recognized.

Due allowance being made for the fact that the point of view regarding a subject is a necessary factor in defining a concept, the rule adopted is one concept, one class. Any apparent duplication of classes will almost always be found on examination to be imaginary. This quality of uniqueness of representation is regarded as of primary importance, and may involve some sacrifices on the part of the specialist, every one of whom is inclined to regard his own subject as a focus around which others revolve, and to attribute a more extensive range to his subject than other specialists would recognize. The solution adopted is to allocate one primary class number to the group in question and to indicate, if desired, its liaison with other groups by means of signs of association.

The extensive employment of analytical subdivisions representing attributes common to a whole group or sub-group of classes is an exceptional feature of the system which distinguishes the classification from all others. These analytical subdivisions enormously amplify the scope of the system, as they can be applied to whole groups of classes, and they simplify the main tables, from which common subdivisions can be deleted.

Owing to the adoption of a decimal notation, the scheme is indefinitely extensible, and the Commission de la Classification Decimale at The Hague is prepared to approve and adopt

necessary extensions of the classes of any division, provided that such extensions conform to the basic principles of the system. A further opportunity for extension is generally afforded by the practice of reserving a portion of the available numbers in any group for future allocation. The length of the numbers is the one disadvantage that must be admitted. It is necessitated by the extent and complexity of human knowledge. It is the price that must be paid for the advantages of rationalization. Actually the symbols needed to express a compound idea are usually far fewer than the letters of the words required, while those having to index a great many entries in a single section may employ cards or slips on which the first common part of the decimal number is printed, or they may use a rubber stamp to stamp the first part of the number on each entry.

The advantages of the Classification are:

1. Its principles are such as have by past experience been found to be absolutely necessary and have the approval of all experts on classification.
2. Its flexibility and applicability are greater than that of any other system.
3. Its apparent complexities vanish on close examination, and an investigation will demonstrate that it has the characteristics of a practical machine, i. e., its accessory apparatus, designed to increase its efficiency, conceals the essential simplicity of its fundamental principles.
4. Its notation is pure, consisting of a single set of symbols only, the additional signs being restricted to their proper function of association with the pure symbols.
5. Its use reduces the labor and cost of bibliographical work to a minimum.

6. During its use for more than twenty-five years for the classifying of literature on many branches of science, some millions of bibliographical entries have been published on this system. Its use is now rapidly extending. Many biographies are issued that are classified by the Universal Decimal Classification. Those who employ it are enabled thereby to incorporate any desired portions of these bibliographies in their own work. At the same time any bibliographical work they may publish becomes available for incorporation in all bibliographies classified on the same system. So far as is known there is no other system that has been used on a large scale for the indexing of bibliographical material by more than a single institution.

There are still those who criticize the scheme, and even offer to prepare a better classification of their own subject. It will be obvious from what has been indicated above that no better classification than the Universal Decimal Classification could at present be prepared, except by accepting the principles which it embodies, and then only by a committee of experts having great bibliographical experience. There are indeed defects still existing in the Decimal Classification, but it is possible to remove them one by one as they become evident. To make a better scheme without further discoveries in the art of classification is practically impossible.

By adopting this system in the Science Library it has been possible to collect in a few years a Subject-Matter Index to periodical literature comprising more than a million and a quarter cards, which will increase in size and scope more and more rapidly as the use of the standard classification spreads.

The Dalton Plan and the High School Library

By Jane F. Hindman

Librarian, South Philadelphia High School for Girls

"**L**IBRARY ATMOSPHERE" is a phrase that I have heard on the lips of all librarians since the day I entered Library School. Of course, the first question raised in my mind was "What is this Library atmosphere?" My present definition of this elusive thing is a feeling that is generated in a library, large or small, when the patrons assume an attitude of intelligent interest in the information they are seeking, and the librarian is friendly and sympathetic; the two forming a pleasing atmosphere entirely free from restraint.

I would like to tell you how the Dalton Laboratory Plan almost miraculously put us in sight, at least, of that goal of all librarians, library atmosphere.

Before we began this plan our library was similar to many other school libraries throughout the country. It was used as an overflow from Study Hall with the librarian devoting much of her time to keeping order and checking up in attendance. The number of pupils who used the library during the day was small, but the before-school and after-school rushes

were appalling. With the inception of the Dalton Plan this adjusted itself naturally and easily. The discipline problems have been solved, for since the pupils have time freedom, no one comes to the library except to study from the books in the library or to read. Text-book study, such as stenography, is banned. For this work the pupil must go to Study Hall. A busy girl is not one who needs to be disciplined. This changing of ideals of the library did not hurt its patronage. On the contrary the number of readers immediately tripled, and the number of books circulated doubled. The number of readers has kept at the new level for the last six years. This undoubtedly is caused by the new method of teaching which has brought the library into importance and made it the pivotal point of the school. It is the central laboratory for all classes. There are so many more books used in class work than formerly. Not only the pupils come to do their individual problems, but also any class may come at any period to do a part of its laboratory work. The library is open to the pupils during the entire school day. Even when there is a library lesson in progress in one end of the room, the other pupils are given free access to the books, and are permitted to work in the room.

Our activities are not restricted to the library room alone. We circulate books among the classrooms. A teacher, for instance, may wish to have a laboratory period in her room, so she sends to us for a copy of the different books she needs. She may keep them for a period, a day, a week, or in some rare cases a month. This all depends on the nature of the work and the size of the group working on the problem. If there is one small class who are the only ones in the school at that particular time working on a problem who need the advice of a teacher, it is better to have the books temporarily housed in the classroom. If there are several groups working on the same problems, it is much better for the books to be in the library that they may be available to all. In order that we may have the books accessible during the day for the use of those who have time freedom we allow the class books to circulate only overnight. Since we have only one or two copies of each of the books in demand this rule is necessary to insure the best use being made of them. We encourage the use of the books in school, for it is a recognized fact that it is better for the pupil to get started on her work in school where she has the proper equipment and sufficient time in which to do it. Of course, what has been started in school must often be finished at home, but a good beginning means that the battle is half won. Since so many

pupils have an opportunity to do their problems in school there is not the terrible rush at the end of the day that there used to be when a topic was assigned and no time given in which to do it.

Possibly it would be well to tell you briefly the principles of the plan which has brought about such a happy change. Its first principle is individualized instruction. This is made possible by the abandoning of the old system of recitation five times a week. The teacher now holds a conference of the whole class at least once a week. The other four days she arranges as she sees fit. She might hold a meeting of an advanced group on one day, and one of a retarded group on another; she might hold the time free to discuss with an individual her particular problem. By this, the shy and backward child has as much of a chance as the one who is always anxious to be heard.

The second principle is a socialized environment. It is valueless to create a consciousness of individuality if at the same time the individual does not have developed in her a sense of responsibility to her neighbor. To insure this necessary consciousness the pupils are brought together in Home Rooms, and in their different classes they are divided into groups and committees which work together. They have their chairman and make their reports. Through the discussion of their problems among themselves they develop a respect for the opinions of others and a realization of their neighbor's rights.

The third principle is freedom with responsibility. I have seen people throw up their hands in horror at the mention of the word "Freedom" for high school pupils. They forget the two succeeding words "with responsibility." Even at that they are aghast. But why should they be? On the day a pupil graduates she is expected to handle her freedom with good judgment, yet she has been given no training in so doing. In many cases she graduates with the feeling that at last she has escaped from a prison where she was restrained every moment. What will she do with her freedom? Is it not better to treat her as a responsible person and train her to make worthy use of her time? This is a vital point in the training for life.

These three principles affect the library in a very definite way. The individualized instruction results in diversified assignments. Thus there is individual research going on all the time rather than the doing of a mass problem that is solved in the beginning by the librarian and handed on to each pupil who comes asking for it. The committees formed through the principle of socialized environment follow a subject farther, and go into more phases of

it than the individual pupil ever would. Here, also, the library plays a part. The freedom allowed the pupils enables them to come to the library at all hours of the day to pursue the subject they have selected.

The pupils are divided into different groups according to abilities, and these groups use the library in various ways. The largest of these groups is the average. The slow average do only that which is required of them to pass. All their time is taken in doing the minimum work. They come to the library only to get those books which are definitely assigned to them. The advanced group do more than the minimum. After they complete the work required they are permitted to work on little problems. For many of these they find the material themselves. For others, they come to us for suggestions and help. The retarded or extension group are below average mentally and will never be able to complete the prescribed high school course. They are segregated for three reasons: that they might not hold back those who are better equipped; that they be not too much discouraged by a sense of failure; and that they get as much out of school as they possibly can. These girls do most of their work in the classroom. Our duty to them is to see that in their free time they are supplied with such simple books as will create an enjoyment of reading, and help them form a reading habit. At the other end of the scale we have the highly selected honor group. These girls have more freedom than the others, and each one of this group works on a project through an entire term, taking it from every point of view, and is able to go about her work intelligently without much more help from the librarian than the gathering of available material.

So that we may help the pupils to gain skill in the use of their tools we teach library lessons. There is no place provided for them on the roster. Formerly no teacher was willing to sacrifice any of her classes so that the lessons might be taught. Since the Dalton Plan has started to function, different teachers have come and asked us to teach their pupils the use of books and libraries, until now we have built up a definite course of library instruction.

Two lessons which serve as an introduction to the library are given to each freshman. The time for these lessons is taken from the English classes. The first lesson is a lecture on the care of books and arrangement of the library. The card catalog and main headings of the Dewey Decimal classification are also taught. The second lesson is a practice lesson on the card catalog and decimal classification. Each girl has a different group of questions for which she finds the answer

during the class period held in the library.

To the Juniors who are to write an original essay in English, a group of five lessons is taught. Each girl makes a simple bibliography during these lessons, on the topic which she has selected for her essay. These bibliographies are made a step at a time. The first lesson is devoted to the explanation of the card catalog and the arrangement of books. The girls are told to look in the card catalog and among the books that come in the classification in which their subject falls, so that they might gather material for their essays. At the second lesson the relative merits of the encyclopedias are discussed and any useful information found in them is included in the bibliography. This lesson is followed by a period of browsing among the books. There is a lesson devoted to the teaching of the *Readers' Guide*, and one of discussion of the different types of magazines. To her bibliography each pupil then adds all the magazine references that she can find on her subject. All that remains now is that the bibliography be put in its proper form and handed in to be passed on both by the librarian and her teacher.

To the Academic seniors who are taking a course in Human Geography we give several lessons on the use of atlases, guide books and other useful reference books. Since this is an advanced group it has been found advisable to have them discuss the relative merits of each group of books in committee. The librarians go from one committee to another offering bits of advice.

We give a course of five lessons in the use of the business reference book to the seniors in the Office Practice Group. These lessons are considered a unit of their Office Practice work. Since the idea of this Office Practice course is to train the pupils to do the work they actually would do in a business office we try to carry out the same idea in our instruction. At the beginning of these lessons each girl is assigned a definite position. One may be a secretary to a mining engineer, another to a bank president. We explain the main features of the business books that are in our library and require each girl to look at these books and make a list of those helpful in her own position and to be prepared to defend her selection. At the next meeting these lists are discussed and each girl is given a set of three questions pertaining to her own position. The answers are found for these during the two laboratory periods allowed for this work. At the last meeting the difficulties encountered are discussed. The girls finish this course with the feeling that they will be able to handle the books that will be available in the offices into which they are going.

For each of these groups of lessons we have a guide sheet; that is, an outline of the work which each girl has in her own hands and which she follows. Some of the periods are used for lectures, others are laboratory periods with each girl doing her own problem. There is follow up work done in the classroom, and in the case of the junior English classes, a test is given. Any girl who fails in her library

work, fails her month's work in English or Office Practice, as the case may be. With the freedom from constant discipline; the interest created through the pursuing of individual topics, and the opportunity for the development of a habit of intelligent use of books, we have promising material for making real library users. It remains only for us to do our part in creating the ideal library atmosphere.

Tools for the Readers' Adviser

By Alice M. Farquhar

Readers' Adviser, Public Library, Chicago, Ill.

TO PUT IT CONCISELY, the necessary tools for a Readers' Adviser are brains and bibliographies, and the less she has of one the more she will need of the other. However, when I say that the Adviser should be constantly building up her file of bibliographic books, pamphlets and cards, I am not intimating that there is less gray matter at work in the Readers' Bureau than in other departments of the library, but stating that it is impossible to have too much help in the task the Readers' Adviser has set herself.

The best tool of the Adviser is a large file of reading courses, capable of adaptation. This, however, can only come with a period of years, and the question this article is attempting to answer is one constantly asked by new Advisers, "What books and pamphlets shall we buy to help us prepare study courses?" The book bibliographies are of four different kinds: books with which the Adviser may orientate herself in the subject, general bibliographies, bibliographies of special subjects, and books giving reviews. The first books the Adviser thinks of in the process of compiling a study course are those which give her a clear idea of the subject as a whole, its relation to other subjects the reader may have been following, its natural subdivisions, and the ones important enough to call for a special book if there is one. The most helpful, all-inclusive tool of this kind is the *New International Encyclopedia*, with its clear explanations and its bibliography of important books; *The Lincoln Library* is also helpful for its concise summaries of subjects, its bibliography and review questions. Columbia University's *Course in Literature*, the Alexander Hamilton set of *Modern Business*, and Crawford's *What to Read in English Literature* are also useful. The first and third show what scholars feel to be the

most important literature of the various nations and periods, and the second offers a clear outline and explanation of business subjects. Such titles as Clay's *Economics for the General Reader*, Cunliffe's *English Literature During the Last Half Century*, Richardson's *Literature of the World*, Cross's *Development of the English Novel*, Elson's *History of the United States*, Hassall's *European History Chronologically Arranged, 475-1920*, and Gardner's *Art Through the Ages* refresh the memory on names of movements, periods, and personalities, and make for two of the characteristics of a good reading course, a well-defined subject, and logical arrangement of the reading.

The second group of books, the general bibliographies, divide themselves into those which simply make a selection of titles, those which select and annotate, and those which weave particular titles into running comment. Of the first type, Max Herzberg's *World of Books* is a good example. It is compiled by the head of the English department of a Newark high school, who had as his objective a list of books high school people would find interesting. It is arranged by subdivided subject under each of the four years of high school. Of the second type, those with annotations, one thinks immediately of the *A. L. A. Catalog and Booklist*, and at the same instant of Wilson Company's *Standard Catalog*—the high school, social science, fine arts, fiction and biography sections. Because so much of the Adviser's output is of the high school level of intelligence, the splendid new high school section is particularly helpful; a book like Stevens' *Home Guide to Good Reading* fills a need. There is also room on the shelf for a book like Gray's *Books That Count*, or Dickinson's *One Thousand Best Books* to satisfy the person who is always wanting to

read somebody's five or ten foot bookshelf. The former is an English publication and not new, but has been found useful for annotations of old standard books, for which notes are not easily found elsewhere. The pleasantest book of this type so far is J. L. Bennett's *Much Loved Books*.

Then, in this group of general bibliographies, comes that type written by May Lamberton Becker, J. L. Bennett, Bessie Graham, Temple Scott and others, in which the annotation is in the form of running comment; sugar-coated reading courses, designed for the ultimate consumer, but more helpful to the Readers' Adviser. Mr. Bennett's *On Culture and a Liberal Education* and *What Books Can Do for You* are pioneers in this field, and particularly good because of Mr. Bennett's broad outlook and happy style. F. L. Mott's *Rewards of Reading* is one of the best of these. Taking fifteen broad subjects, like history, painting, biography, etc., he explains what to look for in books about them, and appends a selected list of titles. Mrs. Becker's *Reader's Guide Book* and her *Adventures in Reading* cover just the type of subjects asked for in the library, and are examples of one good type of presentation in reading courses. Graham's *Bookman's Manual* is a help in selecting editions and for its brief characterizations of the authors and their outstanding works. *Counsel Upon the Reading of Books* is a compilation of reading courses by experts in each field. Smith's *What Can Literature Do for Me*, and Temple Scott's *Pleasures of Reading*, open the eyes of the Readers' Adviser to new possibilities of pleasure and profit from reading. These last two titles lead to a type of book which is not a bibliography, but nevertheless a very helpful tool for the self-education process. I refer to books like Kornhauser's *How to Study* and Kerfoot's *How to Read*. The Adviser should be thoroughly familiar with them and should often recommend them to new readers.

In a good reading course the titles are limited to the essential ones only, and each makes a very definite contribution to the development of the subject. If a particular subject has been analyzed, and the particular books on each aspect of it chosen and described, that material should certainly be at the elbow of the Readers' Adviser. For instance, for help on history courses, she should have Andrews' *Bibliography of History for Schools and Libraries*; Channing, Hart & Turner's *Guide to the Study and Reading of American History*, and W. W. Davies' *How to Read History*; for fiction, Baker's *Guide to Best Fiction* and *Guide to Historical Fiction*, Kaye's *Historical Fiction*, and Speare's *Political Novel*; for general literature, Manly & Rickert's *Contemporary*

American Literature and *Contemporary British Literature*, Schwartz's *Outline Study of French Literature*, and Green's *Negro in Contemporary American Literature*; for child study, Gruenberg's *Outline of Child Study*; for sociology, Zimand's *Modern Social Movements*. Veal's *Classified Bibliography of Boy Life* will help prepare a course for leaders of boys' clubs. Lovi's *Best Books on Spirit Phenomena* is on a subject becoming of more and more interest. Although advisory service at the present time is usually limited to help in the cultural subject only, an exception is generally made in the case of business subjects, and the Adviser needs Newark's *Twenty-four Hundred Business Books* and its continuation, *Business Books, 1920-26*, Berg's *Bibliography of Management Literature* and *A List of Practical Business Books*, compiled by Frances M. Cowan of the Dartnell Corporation.

In the preliminary selection of titles for a course, there are always some which the author or imprint seems to recommend and which on scant perusal pass muster, but the Adviser wishes more authority and goes to reviews for it. For the newer books she will have on file one or two of the newspaper literary supplements; for the others, Keller's *Reader's Digest* and certainly a complete file of *The Book Review Digest*. Even more valuable than these is the slip file of staff reviews, if the library has one over a period of years, for these will usually give a comparison between the title in question and others on the same subject in the library. Before going on to speak of pamphlets and card files, a word might be said for two continuations: *The Publishers' Weekly* should be on file for notice of new books and for clipping purposes, and *The Public Affairs Information Service* will also be found useful in its subject suggestions, for one branch of the work, help in compiling programs for women's clubs.

While the request from a new Readers' Adviser has always been for a list of books for the department, the hardest worked tools of the Readers' Bureau are not the books but the pamphlets and card files. The pamphlet files contain courses prepared in the department, and reading and study courses made by individuals and by organization headquarters. Some of these found useful are—those prepared by the A. L. A., Southern Bell Telephone & Telegraph Co., General Federation of Women's Clubs, American Institute of Sacred Literature, National Congress of Parents and Teachers' Bureau of Education, Workers' Education Bureau of America, and the National Adult School Union. They contain also reading courses of the various universities, as Wellesley, Amherst, Oxford, Smith, University of

North Carolina, University of Missouri, and Columbia; college lists of pre-college and college reading, like that of Trinity; the radio talks of the University of Pittsburgh; and syllabi of the courses in nearby colleges and universities. Likewise here, there are helps for high school reading, such as the Board of Education *Outline of Courses of Study* and Keyes' *Recommended English Readings for High Schools*; publications of the city, State and national government; publications of the various libraries, like Newark's *Aid to International Understanding*, Pratt's *Technical Books of the Year*, and Syracuse's *Gold Star List*; A. L. A. lists, H. W. Wilson Co.'s *Study Outlines*, those issued by nine or ten library commissions, and the annotated monthly bulletin of the library. Here there are lists published by the various foundations, like the American Scandinavian Foundation and the Foundation for Child Study. They yield up, on demand, publications which help in the compilation of reading lists for the weekly Forum, like those of the National Council for the Prevention of War. They yield up the View-point series, and scores of other printed helps too numerous to mention.

The card file is a thing of slow growth and the result of loving attention. It differs radically in different libraries, because it reflects so much the personality of the attendants. In Chicago there are two: the subject bibliography file for use in evaluating a particular title or help in outlining a subject, and the subject fiction file. The former has five distinct kinds of information. It is, first, a bibliographic reference file, referring to bibliographies in books, magazines, *The Bulletin of Bibliography*, portions of a large list, such as the section on advertising in the A. L. A. *One Thousand Business Books*, to bibliographies in other parts of the library. It contains clippings from Mrs. Becker's column, typed lists of best books, and suggestions for club programs. Secondly, it is an authority file. It contains the verdict of experts on particular titles. If Horace Bridges says in a Sunday sermon that Machen's *Christianity and Liber-*

alism is the best statement of fundamentalism, in it goes. If Pauline Palmer puts in a good word for Henri's *Art*, that is also jotted down. If a certain title is used on a Columbia University home study course, a card says so. It contains Annunzio's list on modern dramatists. It lists individuals and societies which are willing to help on particular subjects or are experts on them. Thirdly, it refers to reviews in out-of-the-way places. Last of all, it includes material which might some day make some course more interesting or attractive, as a particular quotation, a beautiful description of a country, or interesting biographical bits about authors.

The fiction subject file was started at a time when we had an unusual amount of social case work. A young woman about to become a stepmother to a rebellious fifteen-year-old girl wanted stories showing a happy relationship between stepmother and stepdaughter, and the subject, Step-Children, was put in the file. A man trying to dissuade his brother from getting a divorce, wanted books showing the effect of two households on a child's character. A mother, afraid to have her son take a position in the tropics, was responsible for the heading, The Tropics and Degeneration, with books like Isa Glenn's *Heat* under it. Other typical subjects are handicaps, middle age, mother complex, marriage, religious perplexities, renunciation, etc. The staff, in reading old books, and in glancing over reviews of the new, is constantly on the alert for possible new headings and titles.

One could go on indefinitely listing particular printed bits which might be called Readers' Adviser's tools, but this would be a waste of time, for they are not standardized. They will differ according to the nature and location of the library. Neither are they as stable as the tools of the reference librarian, but must be constantly discarded and replaced. On the other hand, they are not expensive, and making them gives the Adviser the same sort of pleasure experienced by the antique hunter, or the thrifty housewife who succeeds in making something out of nothing.

Genealogy in a Tax-Supported Library

By Mildred A. Kenney

Head of Genealogical Collection, Denver Public Library, Colorado

"**D**RY BONES OF HISTORY" someone has called genealogy. Sometimes we do feel that way about other people's hobbies. The place of genealogy in a tax-supported library is a disputed one, but wrongly so. In *THE LIBRARY JOURNAL* of June 1, 1929, Mr. Harry Miller Lydenberg discussed the justification, function, divergence and problems of the special library in the Public Library. For the genealogical library as for other special libraries of this type, there are three essentials: It must reflect a community need, be the source of reliable information in its field, and justify itself in the service it renders.

Many supporters of our libraries are cynical about genealogy, consider it snobbish, undemocratic, un-American and far too specialized to justify such expenditure of the people's money. Not every community does need a genealogical department, but where there is the need for it why should it not be as well supported as art or music or science or literature? The demand will depend upon the size and location of the city, the character of the population, existence and activity of hereditary patriotic societies, availability of genealogical literature, financial resources of the library, and such minor considerations as any board will be ready to suggest. In 1925 Seattle sent out a questionnaire which, when returned, showed that out of twenty-five libraries in this country which specialized in genealogy five were public libraries. The survey did not show what circumstances led to the specialization on the part of these five but one can be certain that the movement found hearty response in the human nature of the patrons of any of these libraries.

Robert Lynd in an article in *Living Age*¹ says, "It is one of the minor tragedies of life that there are not enough ancestors to go around." He discredits the self-made man who pretends that he is indifferent to this sort of thing, and that he would rather be an ancestor than have one. He contends that every man is happier if even the heel taps of Norman blood are mingled with his own; and if he can trace his line back to some gentleman who led his tenants to the wars five hundred years ago, be sure he will let his friends know about it. Mr. Lynd himself does not pose as one "who possesses a genealogical tree from which golden fruits may be plucked." He represents

"that very large class who, belonging to old but decayed families, have few ancestors." Granting the need manifest, and a growing usable collection of standard works extant; what service, then, can a genealogical department perform to justify its place in a tax-supported library?

There must be organization to care for the routine of the department and a library assistant who knows the collection—that goes without saying. Also need I say that to know the collection thoroughly she will not despise the crumbs of fact proffered, not with malice, but tentatively or even unintentionally by the well-informed among her patrons. Many of them will be professionals and are bound to know from experience much that a librarian can at best know only in theory or after a lifetime spent in the work. Even the amateurs are capable of astoundingly practical suggestions if one can but be open minded. Without the sympathetic interest of one who knows the intricacies of library method and is willing to be helpful, the richest collection is only an aggravation to the worker in genealogy. Patrons will come largely from the class which Mr. Lynd describes as having few ancestors. The librarian is the medium through which each one is enabled to do patriotic justice to all of them. To this majority of patrons genealogy is a treasure hunt, willingly, tirelessly conducted in and out of the library. However, there are those to whom ancestor hunting is a duty—a duty which, it is true, rests upon a very few as lightly as it did upon that character in *The Biglow Papers* whom Lowell makes to say,

"Sence I've been here, I've hired a chap
To look about for me,
To get me a transplantable an' thrifty fem'ly tree."

The other extreme of seriousness is found in those who believe as one of the vital principles of religion that "God commanded men beginning with Adam to preserve these 'Records of the dead'" and that upon doing so depends the soul's salvation. Also, there is the high school youth who has caught the gleam from a social science teacher and with reverent, eager unbelief, comes to prove the miracle that history may have remembered the name or deeds of his ancestors.

It is important that the librarian understand a patron's motives in coming; is he inspired to undertake research for social ambition or as a patriotic duty, a pleasant diversion or as a

¹*Living Age*, CCXX, 518.

sacred obligation, for personal aggrandizement or as a contribution to knowledge? Is he riding a hobby or consecrating a memorial? If he belongs to that body of men and women whose religious faith makes genealogy a God-imposed duty, his attitude of mind will be largely determined for him. If not, he may need to be led to consider what is his own object in research. Perhaps he is proving eligibility to membership in a hereditary, patriotic society. He will appear to be half ashamed of that, but he need not be and, though it is a worthy aim, he must not lose sight of the real importance attaching thereto. If he is of the superficial type, a faint glimpse of a Revolutionary ancestor or other illustrious American will satisfy him. He may fall by the wayside before the fascination of research has laid claim to him and forget that he walked for even a day in the ranks of the genealogist. Even when the course promises to be brief an enthusiastic librarian can lead him to make allowance for the fact that interest may broaden, family pride be stirred, curiosity awakened. Having placed himself in the way of its spell for ever so brief a moment he may catch that broader vision and be led to follow an insatiable desire for more of the data genealogy in all of its ramifications yields to the scientific worker. No matter how superficial the present aim may be, he can be helped to lay the foundation for lifelong study in which to receive all the benefits of his effort.

But a patron may not be particularly interested in joining anything; he may only have a natural, perhaps secret, curiosity about his ancestors. Heirlooms and tradition hint at an ancestry of which anyone could be proud. Nobility veiled in uncertainty or obscured by remoteness is an irresistible lure. Every clue to its probability spurs him on to tireless effort which can only be satisfied when the dragon of incomplete records is overcome and every Jason has his coveted fleece in the form of an unbroken line of descent from royalty or a positive claim to an illustrious company of noble men—preferably warriors. He represents the other extreme of interest. The librarian need only make accessible the library's resources and rejoice with this man in each new victory.

Perhaps for another individual, family pride is justified by a long line of descent fully established. This patron may come bewailing his fate that such is the case. A patriotic librarian sees in that situation her great opportunity. It is true he will miss much of the thrill that comes with discovering an ancestor, but there is work for him to do. Tell him how valuable records wait to be pub-

lished; how many need to be sought out in obscure places and to be preserved. One patron I know makes a practice of visiting book stores for the purpose of copying inscriptions from the fly leaves of books and the records in old Bibles. They mean nothing to her. Her family dates are established. She does this in the hope that sometime that information will be needed by some other enthusiast. Inspire to service the patron who regrets his genealogical task is finished. To a few enthusiastic genealogists research has appealed, not as an exercise in ancestor worship, nor as a rung on the social ladder, but as a scientific study to be correlated with history and eugenics. To these scholars the world owes much for salvaged records, clear vision, and conscientious research. No encouragement or assistance is too great to give them.

To another great class of genealogists who have loved genealogy for its own sake belong numbers of both men and women who have been denied that immortalizer—descendants of their own. Yet they long to be remembered. They brave the taunting fling of those who think they perceive irony in the enthusiasm of such for genealogy and spend their lives collecting records, hoping against hope that a future generation may appreciate the labor and call its donor blessed. Many a family history has been preserved for all time because a devoted aunt or uncle cast far-seeing eyes along the future and worked out in the time that was theirs such a contribution to the race.

Whatever the incentive to genealogical research there invariably arises the problem of where and how one shall begin. The public library should be as able to supply that information as any specialist in the field. Experience has shown that in genealogical research one cannot begin too near home. Encourage patrons to gather what information is available from the immediate family; older relatives and their intimate acquaintances and from family possession such as *Bibles*, letters and documents. A most readable and entertaining essay on how to hunt an ancestor is Frank Allaben's *Concerning Genealogy*. Two good articles on source material are: Joel N. Eno, "American Genealogical Sources and Genealogical Limitations,"² and E. J. Sellers, "Genealogical Investigation."

There are some questions a public library genealogical department cannot answer. With the many demands upon the time and energy of assistants lengthy and involved research cannot always be undertaken, but with a knowledge of the working tools of a genealogical department and the rudiments of that science

²*Americana*, XXII, 421.

³*Gen. Soc. of Pa. Pub.*, IX, 120.

even a staff which is shared with other departments in the library should be able to keep the collection always available to patrons. Yet the most helpfully inclined may sometimes meet defeat. I recall one incident in my own experience. Mrs. Blank slipped cautiously into the department—spied the latest *Who's Who in New York* back of the reference desk and clung to it because her ancestors "came from New York—queer they weren't in it, they must be!" She looked accusingly at me. No amount of explanation would do. When almost forced to look at a volume which might contain the name of an ancestor she still clung to the book until she actually saw the name she was looking for. It was all off, however, when she read, "Samuel Livingston—five slaves." She threw up her hands in horror! "Land sakes, no!" she declared. "Them ain't my Livingstons. I know they couldn't had nary slave." And in spite of all I could do she turned to *Who's Who in New York*.

The genealogical librarian cannot afford to seem too busy. Patrons of the genealogical library are sometimes a timid folk and reticent about what they hope to find there. No more in the matter of genealogy than in any other interest can we afford to be Nehemiahs proclaiming loudly to the genealogically-inclined Sanballats, "I am doing a great work, so that I cannot come down." The public's work is the librarian's work. If a patron is interested in genealogy, that is reason sufficient for him to approach the assistant in charge for such help as he may find necessary to a clear understanding of use and location of indexes, arrangement of books, methods of research, and a knowledge of the resources of his own and other libraries.

The Denver Public Library does not make research for individuals, but does give the following service:

1. Explain the location and use of catalog and index.
2. Locate books.
3. Provide information on methods of research and the making of family trees.
4. Try to secure inter-library loan of genealogies from other libraries if the patron pays postage both ways.
5. Answer correspondence.
6. Serve as a clearing house for queries.
7. Accept and consider requests for new books.
8. Keep a register of addresses and the specific interests of patrons.
9. Supply new book lists each quarter.
10. Compile reading lists for individual or group study as the need arises.

If the patron is entering upon genealogical research for the first time the librarian may be able to direct him more quickly to the source he needs if he can supply some or all of the following information:

1. Reason for desiring information.
(This may seem impertinent, but if prefaced by "You are interested in filling out your [D. A. R., S. R. or whatever society seems likely] papers?" they will usually admit it if true, and if not eagerly tell you all about why they have come.)
2. The name of the ancestor about whom information is wanted.
3. The approximate locality.
4. Such dates as are known.
5. Pertinent traditions.
6. Related names.

Much of this can be set down on a simple "family tree" which some libraries have found it worth while to supply free in multigraphed form. It is a good basis for explaining methods. It also gives confidence to the patron. He will be surprised to see how much information he has at hand when he gets it down systematically on paper.

In a public library there are, roughly speaking, ten classes of genealogical material, namely:

1. Compiled family histories.
2. Local histories.
3. Vital records.
4. Government documents.
5. State archives.
6. Compendiums, peerages, etc.
7. Genealogical magazines.
8. Nomenclature.
9. Heraldry.
10. Miscellaneous and clippings.

These should be indexed or analyzed, if no printed index has been published.

One strong point in favor of genealogical departments in our public libraries is the co-operation which is possible with other departments—history, general reference, government documents, biological sciences and even fiction. Many patrons will be interested in the pre-American history of their American ancestors and want to study the ideals of their fathers back where those ideals began in Fifteenth Century France or England or Ireland, or they will be interested in eugenics and the genealogy of human traits. The circulation department is able to contribute to that broader side of genealogical research. If research is to be really fruitful the librarian must encourage the genealogy habit in the recreational reading of her patrons also. She must encourage them to preserve their records, the fruit of their research. Few perhaps have written books. Assure them that they are not the only amateurs with such an ambition.

Genealogical research can be accomplished nowhere more successfully or satisfactorily than in the well-organized genealogical department of a public library. Encourage your patrons to seek their "Pirate ancestors." Make genealogy cease to be "Dry bones of history."

THE LIBRARY JOURNAL

December 15, 1930

Editorial Forum

AN INTERESTING controversy has raged within academic circles on the tendency of universities and colleges to include in their curriculum courses on all sorts of subjects so that, under domestic science, even cookery becomes a branch of college education. Universities with their tens of thousands of students and innumerable summer courses have developed a range of studies beyond the wildest imagination of a generation ago, and perhaps it is time to call a halt on this too great diffusion of knowledge! Incidentally, there is a specific danger that in the growth of demand for librarians there may be included courses in library science which are entirely inadequate for the special needs of professional education, and therefore delusive and harmful in their results. This danger has wisely been taken up by the committee of two on the survey of southern library schools; a committee consisting of Miss Sarah Bogle, with widest library experience, and Miss Tommie Dora Barker, whose special knowledge of the South has caused her appointment as Regional Director therein. What they have to say in this special field is applicable North as well as South, and may well be considered by librarians and educators. Proper equipment should be a first requirement in all education, especially professional education, and inadequacy of equipment of teaching staff or of opportunities for practice, may turn out half-baked librarians who are simply doing more harm than good, if they are received as thoroughly trained members of a professional class more and more required. Therefore, the word to the wise put forth by this committee is well worth consideration throughout the field.

IN THIS REPORT attention is wisely directed to the question of salaries in southern libraries which are even less adequate than those in the North, where they are as yet none too liberal and often much below those of

teachers. The South needs to hold, first of all, the graduates of its own library schools to serve among the people they know best. This would scarcely be an adequate supply for the demand of the southern library field as it needs to be developed and the missionary spirit among librarians should bring many graduates of northern schools to seek employment in the South where, especially under Miss Barker's guidance, they can be of the greater service in making the profession truly national and thoroughly effective in the states whose needs are greatest. School libraries are to show the great progress of the next decade in the library field and nowhere should this development be more marked and more effective than throughout the new South, which needs libraries to keep up with its industrial and other developments so remarkable within this generation.

CIVIL SERVICE reform has spread to good effect throughout most of our states, but the District of Columbia has for years lacked the advantage of the merit system in its local service. President Hoover has now taken the wise course of permitting the District Commissioners to confine appointments to the Civil Service Commissioners' eligible lists. Incidentally, this has brought up the question of whether libraries should or should not be restricted to those who have been accepted for eligible lists whether in the District of Columbia or in our municipal libraries. In many cases a library has a merit system thoroughly worked out which is, on the whole, superior to the less specific method of test of the Commissions. This has been recognized in the District of Columbia by permitting the library to make its own training and examination the sufficient test. This question comes to the front also in Greater New York where, for instance, the Brooklyn Public Library has a most thorough method of test, both for entrance into and promotion within the service. Such a library system is a thorough safeguard against political influence, preferable to the local civil service commission. On the other hand, where libraries do not have such a system, and are subject to political influence, it is far better that they should be under the civil service system than left open to the influence which, a generation or so ago, was the determining factor in political appointments throughout the country.

A MISOGYNIST of extraordinary character has just been disclosed in a bequest to the town of LeMars, Iowa, by Townsend M. Zink, who

is reported to have left six million dollars for the establishing of a library in which no women should have any part whatever whether as library worker, as trustee or as author. This is going a good ways in the other direction from the pronounced femininity of the profession and doubtless his request will be considered impracticable, unless the town decides to make itself notorious by such a unique mono-sexual institution. In contrast, should be mentioned the modest bequest of Miss Myra Poland, who, after her long service in the Wilkes-Barre Public Library, in succession to Hannah B. James, has left her entire life savings to the institution which has had her life's devotion. There is here something of a parallel between the Dives of Scripture and the widow's mite!

A VAST AMOUNT of brain work and enthusiasm go into the bibliographies and reading lists prepared each year by library school students. Nothing should interfere with the preparations of these lists, so badly needed. Yet they generally remain buried in the school files, or, as suggested in Miss Kirsch's article on bibliographies in a recent issue of *THE LIBRARY JOURNAL*, are used only in the one or two libraries which initiate or discover them. Some means ought to be found by which all these good lists may be duplicated, at least in mimeograph form. The cost of such duplication is very small. It has again been suggested that some clearing house be created so that the entire profession may know about lists being completed or under way, both in the schools and in various large libraries. Someone who can spare the time ought to volunteer to gather this information, as *THE LIBRARY JOURNAL* has already offered to devote reasonable space to it, and even this would enable each library to know what valuable lists are available for its own reference workers. J. L. W.

CORRECTION should be made of an editorial statement regarding the California State Library and its recent and present heads. The appointment is "at the pleasure of the Governor"—a term even more unsatisfactory than a yearly appointment. On Mr. Ferguson's departure for his South African mission, since there was no legal provision for the assistant-librarian acting during his absence, the Governor appointed Miss Gillis as state librarian, with Mr. Ferguson's approval, and on Mr. Ferguson's return Miss Gillis resigned from the office and Mr. Ferguson was reappointed. It is only right that the record of this be made correct.

"A Book! A Book! My Life for a Book!"¹

Thus wrote Coluccio Salutati, the great Chancellor of Florence, Aug. 31, 1392 ? to Ser Giovanni Lippi, worthy citizen of Arezzo, Italy, in a Latin Epistle, which is now Englished by Thomas G. Schwartz, College of the City of New York Library.

"Dearest Brother,

"I hear that you have a very large stock of books: a source of much happiness, indeed, to a scholar. I rejoice at this news. Verily, when one book may unlock another, what greater good fortune can come to a man eager to gain new knowledge than to have a plentiful supply of books and to be able to satisfy a desire so laudable with facts right up to date? I do not know how others feel about it, but, as for me, I want all to know that, although by God's most benign indulgence, I am happy—as is apparent to you—with a famous office, many children, a strong and healthy body, and with more money than the needs of my family and of myself require, yet nothing is more precious and more dear to me than that sufficient supply of books which has been accorded me as a gift of the same God.

"For, while I delight in, and am happy with, my other possessions, books I not only enjoy and exult over, but what is more, by means of them I perfect myself, and from them I acquire food for thought.

"However, if there are any among my books that you would like, please feel free to write for them. I shall certainly regard it as a pressing duty to further your studies with my darling books. Moreover, I would ask you, for your part, not to withhold from me any uncommon and rare book that may, perchance, have come into your possession.

"And, because I have learned from information supplied by various persons that you possess many of Cicero's works in large script, and because you have been able to acquire them every day, as they are plentiful enough, I beseech you on the score of our common interest in the same studies and on the strength of our real delight in them, yea, in any other way that I can more effectively and as vigorously as my old age will permit—an old age that is now afflicted with failing eyesight—I do implore and beg of you to sell me a copy in that script at a fair price. In this transaction, please deal with my dearest brother, ser Guccio di Francesco, as you would with me.

"Fare thee well, O fortunate One, and remember me."

¹The translation is based on the Latin text of Francesco Novati's, *Epistolario di Coluccio Salutati*, vol. 2, p. 385, ll. 4-19 incl., and p. 386, ll. 1-12 incl., Rome, Forzani E.C., 1893.

Librarian Authors

NELLIE M. ROWE, librarian of the Greensboro Public Library, North Carolina, is author of a book of children's stories entitled *My Magic Storyland*. In her work with children she found a great demand for stories of other countries and this was one of the incentives that decided her to write a few stories to satisfy this need. The stories were told at the story hour in her own library and became so popular that they were requested by some of the city schools and other schools throughout the county and state. This popularity induced her to collect the stories as a whole and *My Magic Storyland*, a book of fairy and animal stories of other lands, was published by Albert Whiteman in November, 1929.

After completing her education, Miss Rowe entered the Carnegie Library at Greensboro as an assistant where she remained until 1914 when she went to the Atlanta Library School, Georgia, for her library training. Upon completing the course she returned to the Greensboro Public Library and in 1920 she was appointed librarian. Realizing the great need of the rural population for good books Miss Rowe, after innumerable difficulties, at last succeeded in getting sufficient funds to purchase a county book truck. The work has been a marked success from the first and her own pleasure is shown in the following statement, "It was one of the happiest days of my life when I saw my hopes realized and the county book truck start out on its first visit to the people of my county."

How Santa Claus Lost His Whiskers. Taken from "My Magic Storyland"

In 1926-27 Miss Rowe served as president of the North Carolina Library Association. During her term of office she made a number

NELLIE M. ROWE

of visits to different parts of the state stressing the great need of better library facilities. She has also taken a great interest in the Citizen's Library Movement of North Carolina. In addition to her interest in the spread of library work in the State and at large, she states that her real interest lies in child development through wholesome early training in good literature. The observance of Children's Book Week has for some time been an outstanding event in the Greensboro Public Library and in 1928, during a visit from Anne Carroll Moore, the library staged a pet parade in which some fifty books were represented by the children and their pets, ranging from the *Three Boy Scouts in Africa* to *The Little Red Hen*. In her spare time from her administrative duties she is often to be found among the children in the Boys and Girls Department of her library.

While *My Magic Storyland* is Miss Rowe's first book, she has written a number of articles on library subjects. She is a member of the A. L. A., a member of the Committee in Charge of the National Student Forum on the Paris Pact, and the North Carolina Council of Administrative Women in Education.

Southern Library Schools Survey

FINDINGS AS TO EXISTING CONDITIONS

IT IS LOGICAL to expect the State supported institutions of higher learning to feel an obligation to offer training for all types of service required in those agencies toward which the institutions have a responsibility. If this expectation is accepted as reasonable, it might seem that the problem of education for librarianship for the South is solved, and it only remains for the several State institutions to fulfill their recognized obligations. This statement may be accepted in principle but must vary in fact and application according to conditions. For example, in one State without an articulated system of education, a privately endowed institution seems the place to develop a complete program of library training rather than the State university, because the former is located in an environment where varied and well-developed types of libraries are available for observation and practice; in another State, library development does not seem to be far enough advanced to make it desirable for the State university or any other institution, State or private, to offer as yet a full year's curriculum in education for librarianship. For the time being it would seem wise for this State to depend upon library schools outside its boundaries for training on the higher levels, and to limit its functions to training for the lower levels of school librarianship only.

Because of the aroused interest and the unregulated growth of courses in library science, certain evils result. The following points are forced to attention.

1. *Too many institutions are trying to give courses in library science.*

In their commendable zeal to meet an urgent need, many institutions are introducing courses in library science into their curricula without adequate knowledge of the requisites or even clearly defined objectives.

2. *Lack of defined library organization, trained staff, and adequate book collections, equipment and budget.*

Instruction in library science is being attempted in some institutions where the library has not a professionally trained person on the staff, where the library is unorganized, where the books are either worn out completely or badly in need of repair, and where there is not a piece of standard library equipment. Obviously, training in such an environment will not further the cause in the name of which the training is given.

3. *Lack of suitable equipment for offering courses, such as practice collections of books, professional libraries, study rooms, etc.*

4. *Lack of adequate financial support.*

Courses are frequently being introduced into the curriculum without any provision in the budget for their expense.

5. *Tendency to require members of the staff of the library to add teaching duties to their already heavy schedules.*

In one institution with an enrollment of about 500 students, where the staff consists of two trained librarians and part-time student assistants, a curriculum of thirty semester hours in school library work is being offered, the two members of the staff being also the teachers of the courses in library science.

6. *Teaching frequently is being done by those whose training and experience do not fit them for the work.*

The question of teachers in library science is a serious one. The demand is so great at the present moment that institutions are having to accept as teachers those who qualify only technically, without taking into consideration aptitudes and experience.

7. *Tendency to offer separate or unrelated courses that do not combine into a satisfactory curriculum.*

This again is a serious problem. Too frequently those planning the courses have no special knowledge of curriculum-building and evidently consider that the difference between a six, twelve, twenty-four, and thirty semester hour curriculum is one of hours only, and that the successive levels of training can be offered simply by adding more courses until the required number of hours is reached without regard to the content of the courses and consideration of the correlation of the whole.

8. *Interest in courses given in summer that cumulate into a full year's work.*

There evidently will be a great demand for this type of curriculum especially from teachers who wish to prepare for library work, but who cannot give a consecutive year to study. In developing such courses, however, care should be taken that the conditions, environment, financial support, faculty, equipment, practice field, etc., equal in every way those that would be suitable for a regular library school conducted during the academic year.

9. *General variation in the academic recognition for the courses.*

The results of a library school survey in Southern states, undertaken early in 1930, by Sarah C. N. Bogle and Tommie Dora Barker.

Questions that arise out of this that need consideration are those concerned with the transfer of credit, adoption of unit courses, etc.

RECOMMENDATIONS

From the study of data, from interviews with leaders, both librarians and educators, and from first-hand impressions, certain trends seem definitely to mark the types of training needed and the locations for training centers. It is evident that the region must be considered as a whole, because individual States are not ready for financial reasons to assume the whole burden of training, and because in some States certain types of library service are not yet sufficiently developed to furnish suitable environments for rounded training. It is desirable that effort should be concentrated upon the development of strong training centers; too many gestures are now being made, and some pressure resistance needs to be developed.

Certain places stand out as good locations for certain types of development. Atlanta, Birmingham, Knoxville, Greensboro, Baton Rouge and Baltimore recommend themselves as strategic points for the development of strong centers of training for several types of library work.

Atlanta, of course, is already an established center, and with the reorganization of the library school of the Carnegie Library of Atlanta as an integral part of Emory University, its immediate expansion is assured. This school should begin to plan immediately for advanced graduate work in the field of education for librarianship.

With the combination at Birmingham of a well-developed library environment in the Birmingham Public Library, with its county work, the growing school libraries under the Board of Education, and a library-minded institution such as Birmingham-Southern College, there would seem to be no question but that a library school offering a high grade of work should be developed when sufficient demand for trained librarians is proved.

The University of Tennessee, Knoxville, already has the foundation for satisfactory training for the lower levels of school librarianship. It should develop a full year's curriculum in school library work and go on to the field of general library training in view of its advantages in location.

North Carolina College for Women, Greensboro, has well-established courses for school librarians which have been provisionally accredited by the Board of Education for Librarianship. The work now offered should be developed further on the basis of a senior undergraduate library school.

The University of Louisiana is now offer-

ing summer courses that cumulate in successive summers into a full year's curriculum. Because of the increase in parish libraries in Louisiana, there is apparently need here for a library school of graduate grade offering courses in the academic year as well as in summer quarters. As the situation develops in the lower South, Tulane University will probably establish a library school. Recent developments in the plans for exchange of students with our neighbors to the south, Mexico and South America, suggest where the emphasis may be placed at Tulane.

At Baltimore, as before stated, Johns Hopkins University, through its College of Education, will probably come into the Southern plan through the establishment of a library school.

Other strategic points in the region at present are being taken care of through recent grants; i. e., the University of North Carolina and the George Peabody College for Teachers. The University of North Carolina, with its new library school, which will open in 1931, will undoubtedly develop all types of training, but emphasis may be placed on the preparation of librarianship for universities and colleges. With research and bibliography well in the foreground, graduate work will be developed.

Because of its position in education in the South, Peabody will have an unusual opportunity to contribute to school libraries. It should organize its present courses in library science into a strong curriculum in school library work and develop a training center which should go beyond the mere training of school librarians into the field of research.

Virginia, Florida, and Kentucky should each develop one center offering a full year's curriculum for school librarians. Until the public library field is further developed, it is probable these States should not yet attempt to train for general library work, but should look to their neighboring States for such training.

Because of the excellent beginning already made, and because of the quality of its leadership, Alabama College, Montevallo, Ala., seems a point for developing a full year's curriculum in school library work.

It is recommended that until their library service is further developed, Mississippi, South Carolina, West Virginia and Arkansas limit their activities to developing training for teacher-librarians only up to the sixteen semester hour level. The State university in each State would seem the logical place for this instruction. The libraries in institutions where courses are to be offered should be expanded.

The training of teacher-librarians and school librarians, particularly the question whether they can be prepared in teacher-training institutions, should be given further study. Here

is where much experimentation may be expected.

If the weak points rather than the strong seem to have been emphasized in this report, it is because the purpose of the survey is to be helpful, and the builder always wants tests of the strength of his material before he begins to build.

Record should be made, however, of the generally prevailing desire on the part of administrators to do honest, sincere work of a grade that will advance the profession of librarianship and the cause of libraries.

It is recommended:

1. That quality must not be sacrificed to quantity in training librarians under the pressure of a time limit. This recommendation cannot be made too strongly.
2. That first attention be given to the strengthening of the library schools already established or provided for before starting entirely new schools.
3. That new schools be undertaken only when the need is clearly proved, and after geographical relation to existing schools has been considered.
4. That Dr. Bachman's report on school libraries, due in October, be awaited before many new courses in school library work are undertaken.
5. That numerous weak courses in school library work be discouraged.
6. That the Association of Colleges and Secondary Schools of the Southern States adopt standards for institutions proposing to train school librarians for high schools accredited by the Association, which will insure proper auspices and environment for such training.
7. That orientation courses be given for school superintendents and principals on the place of the library in the school program. These courses should be given by librarians whose vision and background of experience are broad enough to enable them to tie up the subject of school library development with the whole program of library service, public, county, etc.
8. That open fellowships and that scholarships for the South be sought not only for advanced study but also for first year professional work. Some of the former should be limited for the present to those preparing to teach library science in the South.
9. That an institute for teachers of library science in the South be planned similar to the one conducted at the University of Chicago several years ago.
10. That foundations be encouraged to aid in

the improvement of libraries in institutions offering courses in library science.

11. That attention of library boards and administrators be drawn to salaries that they may be sufficient to bring back to the South those librarians who are taking training elsewhere, and to keep in the South many of the best graduates of its own schools.
12. That when the next library school for negroes is started, it may be at Atlanta University as an institution well adapted to its satisfactory conduct.¹

This report would fail to express true findings if it omitted an expression of admiration for what is being done in the thirteen States considered and if it made no record of the belief that a library future of world importance is evident. It has been a privilege and a source of new strength to participate in the deliberations of those in whose power rests that future.

¹It is suggested, however, that representatives of institutions and agencies interested may find it desirable to hold a conference for the discussion of future developments in education for librarianship for Negroes.

In reading the following report it is suggested that two major recommendations be kept in mind.

1. That, other things being equal, the State University is the logical place for the establishment of the first library school in a state. The recommendations which are made in this report under the individual states are based largely on present conditions and on probable improvements in the immediate future. It is possible that in some instances a longer look will suggest the selection of the State University as the place for library school training in spite of present handicaps.

2. That the summer courses and other short courses for school librarians or teacher librarians, established to fill the immediate demand for librarians in high schools which must meet the standards of the Southern Association, should not be allowed to grow into permanent library schools if the result is to be an unnecessary duplication of training within the state. It is entirely possible that after the present demands are met one or at most two training agencies in each state will be more economical and more efficient than a large number.

Magazine Guide Free

"THE Librarians' Subscription Catalog and Guide to American Periodicals" has just been published by the F. W. Faxon Company, 83 Francis Street, Back Bay, Boston, Mass. It includes four thousand periodicals, giving price and how often issued, but there are other useful features which all librarians will appreciate. There is, at the end, an alphabetical list of six hundred fifty-nine American periodicals, covering all that are included in eight of the general periodical indexes, showing in which index each magazine may be found, and telling what and how many volumes these magazines published in 1930, how many numbers make up a volume, and just how the title page and index is issued—whether as part of some issue, or supplied only on request. If no index is published, that is indicated. Sent free on application.

For Sale

PRINCETON UNIVERSITY Library offers for sale *Railway Age Gazette*, volumes 30-49, 51-58; and *Supplement, Daily Edition*, volumes 39, 45, 46, 50 and 52; all bound but some broken in hinges; the lot for \$75. If not sold as a set, separate volumes will be supplied at \$2.50 each.

BIOGRAPHY

Who's Who in America. A. N. Marquis Co., Chicago, \$8.75. For contemporary biography.

General encyclopedias, especially the *New International* and *Americana*.

Collective biographies; of these there are numerous recent books.

Dictionary of American Biography. 5 v. out; to be complete in 20 v., \$12.50 per volume. Scribner.

Expensive, but larger school libraries are buying it. Can only be bought over a stretch of years.

Pamphlets, free or at small cost, are often sent out by an author's publishers. Biographies of authors may be obtained in this way and kept in the pamphlet file.

Biographical manual of contemporary writers. H. W. Wilson Co. About 400 biographical sketches, most of them about a page in length. Publication may be expected by late fall.

Another Solicits Funds

To the Editor of THE LIBRARY JOURNAL:

A young woman giving the name of Miss Esther E. Reardon of Haverhill, Mass., has recently secured funds from professional people in several towns and cities for the publication of a Library Bulletin which is non-existent.

She claims to have produced Bulletins for more than forty libraries, but investigation has brought to light no issue of any Bulletin. She solicits almost entirely from dentists and doctors, and gives them to understand that the proceeds are to go to the library named. This claim is unfounded.

DOROTHY ANNABLE.

Secretary, New Hampshire
Public Library Commission.

A Correction

IN THE issue of Dec. 1 of THE LIBRARY JOURNAL an editorial statement was made that Henry Bruere, publicist, headed the Committee on the Status of Librarians of the Public Libraries of the City of New York. Dr. Howard Lee McBain is chairman of the committee, Henry Bruere is treasurer, and Spencer Miller, Jr., is secretary.

GRACE A. CONWAY.

The Children's Librarians' Notebook

TIMOTHY CRUNCHIT THE CALICO BUNNY.
By Martha Jane Ball. *Laidlaw*. \$1.50.

"I'm a Calico Bunny Brown,
I dress in Calico,
An ear perks up—and one flops down,
I hope you like it so."

After such an introduction what child can resist Timothy Crunchit and all the rest of the Calico Bunnies who live in the Calico Village? The children from the Little Brown School were first surprised, then interested, and soon staunch friends of these little people. They were delighted with the surprise lunch of vegetables and fruit, and afterward pleased with the

new menus furnished their mothers by Grandmother Grumbly. After reading this story no mother should need to coax her child to eat vegetables instead of pie and cake. Such a book can be used to advantage in the primary grades in connection with the health project work. The illustrations by Gaye Woodring will catch the child's interest at once.—M. W.

TOM AND MOTT. By Max Trell (Illus. by Jo McMahon). *Cosmopolitan Book Company*. \$1.50.

A story telling the adventures of Tommy Lynn, the naughty boy from the Nursery Rhyme, who threw Poor Pussy in the well. The book is supposed to be humorous, being full of puns and smart phrases, but the humor seems forced and is over the head of a child. We already know this Tom to be a proverbial bad boy and the author goes out of his way to glorify his misdeeds without introducing any leavening quality. It is too bad the author did not choose a different subject, because the bare adventures related in the story are entertaining to children from six to ten years old. Would not buy.—H. N.

These books are actually reviewed by different children's librarians in the field. If you do not agree with the review of a book, send in your own review and we will print it. See also p. 1031, column two. The name of the reviewer of any book will be given upon request.

THE SINGING SWORD. By Mark Powell Hyde. *Little, Brown*. \$2.50.

Ogier the Dane, one of Charlemagne's famous paladins, who is also the national hero of Denmark, is the hero of these tales and we are glad to have him take his place with Roland and Siegfried in the galaxy of boys' heroes. Some children's librarians may be critical of the scene in the haunted castle, but *The Singing Sword* really gives a vigorous picture of the Middle Ages and retains the Spirit of the Chansons de Geste. Recommend to older boys and girls who have read the stories of King Arthur, Siegfried, and the other heroes.

—T. C. B.

OPENING DAVY JONES'S LOCKER. By Thames Williamson. *Houghton Mifflin*. \$2.

Children's librarians, who usually frown upon the question and answer method of imparting information in books, will find a delightful surprise in this story of a young boy scout who is chosen to go with a scientific expedition which is to explore the depths of the Caribbean Sea. With Ted Farnum the reader lives through each day's experience—thrills with him when he dons a diver's helmet for the first time; exclaims with him at the things Davy Jones's locker reveals; sympathizes with him when he displays his ignorance and asks foolish questions. There is a wealth of information packed between the pages of the book, and yet the story never drags and is never dull. By including the ordinary events of each day, as well as the unusual things that happen, and by making the characters very real instead of automata who merely ask and answer questions, the author has succeeded in producing that rare thing—a good story filled with real facts. Almost any boy or girl above the sixth grade should find the book extremely fascinating, while adults to whom the subject is not already well known will be equally interested.—C. N.

THIRTY FATHOMS DEEP. By Edward Ellsberg.
Dodd, Mead. \$2.

A thrilling tale of the finding of an old Spanish treasure ship off the coast of Peru, with just a dash of Twentieth Century piracy thrown in. The author, who is well known as commander in charge of raising the submarines S-4 and S-51, has carefully built his story around scientifically accurate technical details in the business of salvaging. The plot is not fast moving, but it gives a fascinating picture of the dangers, the hard work, and the romance of a deep-sea diver's life. For older boys, especially those with an engineering turn of mind.—H. N.

BOY WITH THE PARROT. By Elizabeth Coatsworth. *Macmillan.* \$1.75.

The story of the adventures of an Indian boy of Guatemala as he travels through the country to make his fortune. The children will enjoy traveling with him and Guatemala will be more than a colored spot on the map. Can use in branches, deposits, and schools.—M. W.

GOLDEN-FEATHER. By Luigi Capuana (trans. by Dorothy Emmrich). *Dutton.* \$2.50.

These tales have native flavor and a fairy element which children love. But in several instances there is a coarseness too offensive to American taste to pass unnoticed. For this reason I would not recommend this book for children.—E. P. A. S.

LINNET ON THE THRESHOLD. By Margaret Thomsen Raymond. *Longmans, Green.* \$2.

The story of a girl who, at fifteen years of age, is forced to leave school and go to work. Linnet is a very natural, human heroine, the type that girl readers will understand and feel a kinship with. The difficulties are not minimized at all, but Linnet meets them squarely until finally her problems are solved and she is able to go back to school. It is a sane, wholesome book which will be enjoyed by the adolescent girl. Should fill somewhat the same position among girls' books that *High Benton* does for boys.

—M. R.

THE ARK OF FATHER NOAH AND MOTHER NOAH. By Maud and Miska Petersham.
Doubleday, Doran. \$2.

A new version of the famous voyage full of fun and color. Noah makes a mistake in

the size of the door and the sons paint the ark modernistically, but all other runs true to form. There are all the animals you've ever heard of or seen, birds and insects, big and little. Done in the brightest colors for children from six to eight. Price is rather high.

—A. M. W.

NEW GERMAN FAIRY TALES. By Norbert Lebermann (translated by Frieda Bachmann). *Knopf.* \$2.

Fairy tales written for the author's children after they had absorbed Grimm and Andersen. The tales are modern as to subject—some could be told, notably "Secret of the Animals" and "Little Light Spirit." An unusual one is "The Wise Inventor" in which four evil hobgoblins are changed into steam engine, telephone, telegraph, and electric light. The illustrations by Margaret Freeman do not add to the book.

—A. W.

EARLY MOON. By Carl Sandburg. *Harcourt, Brace.* \$2.50.

Seventy poems selected for young people from the works of a poet whom the advertisements claim is very popular with the youth of today. There are poems included in the collection which are briefly outlined pictures of rare beauty and depth of understanding. The line drawings and decorations by James Daugherty are different from the illustrations by this artist with which we have become so familiar and add a definite spirit and grace to the sometimes monotonous lines. The "Short Talk on Poetry" which the author gives at the first of the book might also be called a simple and comprehensive discussion of aesthetic values.—L. H.

Current Library Literature

ABBREVIATIONS

Thompson, J. D. International code of abbreviations of titles of periodicals. *LIB. JOUR.* 55:957-958. 1930.

Code approved by the Committee on Intellectual Cooperation of the League of Nations.

BIBLIOGRAPHY

A. L. A. Committee on Bibliography. *A Restatement of the A. L. A. Plan for the Promotion of Research Library Service by Cooperative Methods.* Washington, D. C., 1930. pap. 59p.

Made for the Executive Board of the A. L. A. at the request of the Secretary, by the Chairman, Ernest C. Richardson, Nov. 3, 1930. Reviews recent activities in assembling union card finding lists at the Library of Congress, and outlines plans for establishing an incorporated card printing, publishing, and selling company.

BOOK BUYING

Cannon, C. L. *Order and Accession Department.* A. L. A., 1930. pap. 55p. (Manual of Lib. Econ., XVII).

Based on earlier editions by F. F. Hopper. Discusses organization, prices and discounts, second-hand buying, serials, importations, accessioning, exchanges, order records, etc.

BOOKS AND READING

Weston, Stella. Professing books: a new vocation. *Natl. Education Assn. Journal.* 19:277-278. 1930.

By a student in the reading course offered at Rollins College, Winter Park, Florida, by Edwin Osgood Grover. Courses include Reading, the History of the Book, and Literary Personalities, and are conducted informally. Mr. Grover also directs the college library.

BUILDINGS, LIBRARY. *See* LIBRARY ARCHITECTURE.

CATALOGING

Wallace, Ruth. Cost of cataloging and recataloging and how it may be reduced. *LIB. JOUR.* 55:899-902. 1930.

Care in the choice of catalogers, the employment of as many typists and pages as possible, special typewriter equipment, electric erasers, and handling of government documents, periodicals, and pamphlets outside the catalog department are some possible ways of cutting costs.

See also COUNTY LIBRARIES.

CHARGING SYSTEMS. *See* DETROIT CHARGING SYSTEM; DICKMAN BOOKCHARGING SYSTEM.

CHILDREN'S LITERATURE

A child's library. Cleveland Public Library. *The Open Shelf.* No. 11. Nov., 1930.

The child in question is the late Caroline Hewins, librarian of the Hartford (Conn.) Public Library. The article is derived from Miss Hewins' book, *A Mid-Century Child and Her Books.*

CLEMENTS LIBRARY. *See* MICHIGAN, UNIVERSITY OF, LIBRARY. WILLIAM L. CLEMENTS LIBRARY.

COUNTY LIBRARIES

Henderson, Mrs. Alexander. County library cataloging. *Lib. World.* 33:117-118; 120; 122. 1930.

The writer, a former county librarian at Fife, Scotland, argues in favor of the provision of printed catalogs

for county libraries. In her own county such a catalog advanced the service greatly.

McIlwaine, H. R. The county free public library. *Virginia Libs.* 3:37-43. 1930.

By the State Librarian of Virginia, The Charles H. Taylor Memorial Library, situated in Hampton, and serving both that city and the county of Elizabeth City, is a good object lesson as to the wisdom of establishing more county libraries in the State.

DEPARTMENTALIZATION. *See* REFERENCE DEPARTMENT.

DETROIT CHARGING SYSTEM

Ulveling, R. A. Detroit charging system. *Libraries.* 35:393-396. 1930.

Under this system borrowers do most of their own charging of books. The result has been the elimination of long waiting lines at the charge desk, and less fatigue and nerve strain for the staff.

DICKMAN BOOKCHARGING SYSTEM

Trudeau, E. C. The Dickman Bookcharging System in use. *Mass. Lib. Club Bull.* 20:86-87. 1930.

The machine after two years' trial has proved most satisfactory to the East Orange (N. J.) Free Public Library. After the initial supplies have been bought the additional annual expense is slightly greater than that of the old system.

EDUCATION, ADULT

Bostwick, A. E. The library and scholarship. *Libraries.* 35:389-393. 1930.

Address given at the Convocation of the University of the State of New York, Oct. 17, 1930. "If the library is to go heavily into the business of systematized adult education—and we seem to have decided that it shall—it should have at its disposal elementary texts, clearly written, and they should be, so far as possible, self-contained. It will not do to assume in presenting subject B that the reader is already familiar with subject A. A may always be taken up before B in college, but readers in a library are bound down to no curriculum."

Dodgen, L. M. Adult education. *LIB. JOUR.* 55:954-957. 1930.

The library, a pioneer in the work of adult education, must continue to keep in touch with and further the work of other organizations which have taken up the work.

Drury, F. K. W. Some opportunities for library service in adult education. *LIB. JOUR.* 55:867-868. 1930.

Opportunity for cooperation is offered by parent-teacher associations, radio talks, motion pictures, alumni education, religious organizations, etc.

FINANCIAL LIBRARIES. *See* PRINCETON UNIVERSITY LIBRARY. BENJAMIN STRONG COLLECTION.

HEWINS, CAROLINE M. *See* CHILDREN'S LITERATURE.

INSTITUTIONAL LIBRARIES

The A. L. A. Institution Libraries Committee issues three brief pamphlets for the use of institution librarians: *Aids in Book Buying*, *Hints on Library Technique*, and *The Prison Library*.

Frankhouser, M. E. Our obligation to libraries in State institutions. *LIB. JOUR.* 55:863-867. 1930.

Also in *Mich. Lib. Bull.* 21:237-240. 1930. By the Michigan State Librarian. "Perhaps I have dwelt overlong on the prison phase of institutional library expansion, but the replies to the questionnaire disclosed that this feature was the one receiving more thought and interest on the part of library workers, due in part to the impetus furnished by the Massachusetts demonstration, and by the action of the Federal Prison Board. . . . But in all institutions, whether a hospital for the insane, a prison, a school for the feeble-minded, a tuberculosis sanatorium, or a hospital for crippled children, the reading of books is looked upon as a very necessary part of the institutional activities."

Intended to index with brief annotation, or excerpts when desirable, articles in library periodicals, books on libraries and library economy and other material of interest to the profession. The subject headings follow those in Cannons' *Bibliography of Library Economy*, to which this department makes a continuing supplement. Readers are requested to note and supply omissions and make suggestions as to the development of this department.

INSTRUCTION IN USE OF LIBRARIES

Ingles, May, and Anna McCague. *Teaching the Use of Books and Libraries; a Manual for School Librarians and Classroom Teachers, to Accompany The Library Key*. Wilson, 1930. cl. 198p. \$1.80.

Intended for librarians and teachers giving library instruction to high school and normal school teachers. Some portions of it can be used by those giving instruction to college freshmen. Although designed especially for use with the student's textbook, *The Library Key*, by Zaidee Brown, it is also adapted to use in schools in which no textbook is provided for library instruction. Appendixes of teaching outlines, and 6p. bibl.

LIBRARIANS

McMillen, J. A. Requisite qualifications for assistant librarians. *Libraries*. 35:396-398. 1930.

"Some qualities that an assistant librarian should possess are: Knowledge, special or technical training, tact, resourcefulness, the ability to work with others, and imagination. Promotion, while dependent to a certain extent upon vacancies or expansion, should go to those who show increased ability in their individual work and especially to those who have the knack of directing the work of others effectively."

LIBRARIANSHIP

Brown, C. H. "Bridging deep rivers." *Wis. Lib. Bull.* 26:234-239. 1930.

Commencement address at University of Wisconsin Library School, June 19, 1930, by the Librarian of Iowa State College. "Many seem to retire for an eternal rest after they cross the river of graduation. . . . Continue your education and continue your studies, don't stop; second, make your profession, which is a profession of service, your chief concern."

LIBRARY ARCHITECTURE

Yust, W. F. Recent tendencies in the planning and architecture of central library buildings. *LIB. JOUR.* 55:903-907. 1930.

Factors affecting library architecture in recent years, largely for the better, include the high cost of sites, building, and labor; the demands of a mechanical age; the increasing popularity of libraries; lessons from office and other commercial buildings, and from branch libraries; and the change of policy by the Carnegie Corporation in regard to gifts. Bibliography.

LIBRARY ECONOMY

Brown, J. D. *Manual of Library Economy*. 4th ed., edited and newly revised by W. C. Berwick Sayers. London: Grafton, 1931. cl. 533p. illus. plans. facsimis. 30s.

The first edition by James Duff Brown (1862-1914) was published in 1903, the second in 1907, and the third in 1919. "The biographical introduction and the chapter, now supererogatory in such a manual, on Museums and Art Galleries have been omitted from this edition, and many illustrations which time has made effete have been dropped. The *Manual* is now a volume of 533 pages and 628 sections, with 197 illustrations, as compared with 519 pages, 587 sections and 183 illustrations, the omissions noted above bringing the number of extra pages to thirty-three. This new material has been spread over the work in general . . . ; but the principal emendations occur in the chapters on Children's and County libraries. —*Lib. World*, 33:132-133. 1930.

LIBRARY ORGANIZATION

Burgess, H. E. *The Organization of a Small Library; a Manual for Use in the Small Public and High School Libraries of South Dakota*. Pierre, S. D.: Free Library Commission, 1930. 22 mim. p.

For use in the organization of a small library which cannot employ a trained librarian.

LIBRARY PUBLICATIONS. See LIBRARY TRUSTEES.

LIBRARY PUBLICITY

Compton, C. H. How to advertise library service to the business man. *LIB. JOUR.* 55:908-911. 1930.

Mr. Compton, assistant librarian of the St. Louis (Mo.) Public Library, has found that newspapers love statistics, and "has been feeding them stories from our monthly statistics for six years and there has never been a time when at least one of the papers has not printed a

story on them." A class at the St. Louis Library School offered suggestions for library publicity which are enumerated here.

LIBRARY RECORDS

Woods, C. F. A classification of library records and correspondence. *LIB. JOUR.* 55:859-861. 1930.

A decimal classification for records and correspondence on reports and finance, personnel, departments, branches, libraries and library associations, official matters, etc., with special divisions for the library and library school of which the author is librarian and director (Riverside, Cal.).

LIBRARY SERVICE TO CHILDREN

Beard, S. A. The adolescent challenge. *LIB. JOUR.* 55:911-914. 1930.

"What are the means of holding this quicksilver-like group? Whatever our understanding of the age in general, an understanding of the individual is necessary for the greatest success. Although it is a wise policy for all ages, we should treat particularly the adolescent borrower as an individual. . . . Antagonism, ridicule, or objection, which the adolescent meets with inevitably in his daily life, surely can be banished in the library whose wares represent the free play of ideas."

LIBRARY TRUSTEES

A Trustees' Organ. Published for the Trustees of Libraries in Essex County, (N. J. Montclair (N. J.) Free Public Library. v. 1, no. 1. Nov., 1930.

"The modern library is an intricate business and requires efficient trustees to act as its board of directors." This is the sole idea behind the issuing of this paper. Its editors believe that in the several libraries of the neighborhood progress in this business management is being made in such a degree as to constitute news; and that such news is worthy of being brought to the attention of other library trustees."

MICHIGAN, UNIVERSITY OF. WILLIAM L. CLEMENTS LIBRARY

Adams, R. G. A new library of American revolutionary records. *Current Hist.* 33:234-238. 1930.

An account of the Lansdowne, Clinton and Gage papers now in the great collection of Americana at the Clements Library.

University Librarianship

(Continued from page 1027)

library to another is unquestionably against the principles of good service." The book is, of course, primarily concerned with the problems of the smaller British university library, but the problems of all libraries which attempt to do serious work differ so little in essentials that practically every librarian will find in Mr. Bushnell's compact little book suggestions of value.

EDWIN E. WILLOUGHBY,

The Newberry Library, Chicago.

The Shelfless Library

WITH THE NOVEMBER issue of *The Friends of Reading*, by the Syracuse Public Library, a Shelfless Library label was inclosed. This type library was organized by Dr. Will Baker, who was editor of the *Syracuse Post-Standard* and regent of the University of the State of New York, and it has been adopted by The Friends of Reading of Syracuse and Onondaga County as an inheritance from a beloved friend. The rules of the library are these: The borrower agrees to put the book borrowed on his reading table, not his bookshelf, and to read it without delay. He also agrees when he has read it to pass it on to a friend who, he believes, will be interested. The names of those who have read the book are written on a label inserted in the book.

Book Reviews

American Library Directory, 1930

JUDICIOUS discrimination in standards of inclusion and in addition of new types of libraries makes the 1930 revision of the *American Library Directory* (Bowker, cl., 538p., \$12) by far the most useful of the series. The work of compilation was done by Karl Brown under the direction of R. R. Bowker. The writer of this note, who is in charge of a club library, has found in recent weeks a larger number of interesting catalogs in his daily mail. This he is inclined to attribute to the fact that his library is listed in the *Directory* and that dealers are exercising some judgment in sending lists of material which is likely to fall within the scope of such a library.

The libraries within the United States have been classified in the following categories: (1) Public libraries; (2) Federal libraries, State libraries, and Federal and State institution libraries; (3) Libraries of the United States Territories and Dependencies; (4) Educational and professional libraries; (5) High school libraries, and (6) Business and other special libraries. Canadian libraries and lists of library organizations and library schools form additional sections. Over twelve thousand libraries in all (12,480) are listed, with names of librarians and statistical data.

The arrangement, as in the 1927 *Directory*, is alphabetical, first by State and then by city and town. With an occasional exception for some exceptionally vigorous or promising small library, the general standard for inclusion of statistical information has been that the library has a librarian and an income of at least \$500, with a minimum book expenditure of \$100. A new small class added consists of outstanding branch libraries of county library systems. Public libraries naturally constitute the largest class listed in the *Directory*. The list extends to 229 pages, and 5,364 libraries are included. The statistical data include number of branches and stations, if any; number of volumes; latest circulation figures; income; expenditures for books and periodicals; heads of departments (in the case of large libraries); and subjects of special collections, besides those listed in the 1928 Supplement to the 1927 *Directory*.

The new list of Federal libraries includes the Library of Congress, State libraries, Federal and State departmental libraries, and libraries of Federal and State institutions—371 libraries in all. The roll of 2,890 high school libraries, covering over a hundred pages, offers a rather

amazing proof of the expansion of the school library field. It forms the largest class next to public libraries; next to it stand the 2,155 educational and professional libraries, including libraries of universities, colleges, normal schools and other professional schools; also professional societies, professional collections in hospitals, museums and cognate institutions; and scholarly collections available for restricted use. The list of 111 library organizations—national and regional, State and provincial library associations and local library clubs—does not include State and provincial library commissions, now put at the head of the appropriate State under the Public Libraries Section, and under Federal and State Libraries. The list of business and other special libraries, including libraries connected with firms and business organizations, commercial associations, and clubs and societies, is constituted of 1,219 libraries.

EARLE F. WALBRIDGE,

Librarian, Harvard Club of New York City.

UNIVERSITY LIBRARIANSHIP, by George Herbert Bushnell, University Librarian, St. Andrews, London. Grafton & Co., 1930, 214 pp. 7s. 6d.

THE BOOK before us is of interest both because of the subject and the point of view. Its scope is broad, a survey of all the problems, both administrative and technical, of "university librarianship as a branch of general librarianship" ranging from the organization of the faculty governing committee to the training of the students in the use of the library, from the planning of the library building to the selection of proper book supports. The pitfalls of Parliamentary papers, the methods of dealing with dissertations, the advantages of an electric stamping machine, a recipe for an asbestos paste which will remove book labels and suggestions for the use of end-papers with the book-plate of the library printed upon them are topics which to the reviewer seemed especially worthy of mention.

The viewpoint of the book is the frankly personal judgments of a British librarian. To Americans who take it for granted that no library today would adopt any catalog but a card index, Mr. Bushnell's discussion of that form of catalog as opposed to the bound book index and his decision in favor of the latter will no doubt be enlightening. They will also be interested in his inquiry into the value of inter-library loans and perhaps a little horrified at his conclusion, unorthodox in its conservatism, that "the loaning of any book from one
(Concluded on p. 1026, column two)

Library Organizations

A Prison Library Exhibit

LOUISVILLE, KENTUCKY, was the meeting place from October 10 to 16 of the Sixtieth Congress of the American Prison Association and the National Conference of Juvenile Agencies. The assembly was of special interest because recent prison riots have focused attention, formerly dormant, on prison inmates. It was timely that the A. L. A. Institution Libraries Committee should reemphasize the value of books in prisons and reformatories. Within the past year the Federal Government named a supervising librarian of the Department of Justice's Bureau of Prisons and two local prison librarians. Other appointments will follow until the ideal is reached of a librarian in every prison. Libraries form one part of the educational work in charge of an assistant director of the Bureau of Prisons.

Due to the influence of the Louisville member of the Institution Libraries Committee, the library booth was given the most conspicuous position in the hotel and drew general attention. The Committee assembled so large a collection of literature, lists, bibliographies, instructions, posters, etc., that frequent changes of exhibits could be made. The St. Louis Public Library furnished a well selected collection of the type of books needed in prisons, the A. L. A. and several publishers loaned groups to illustrate specific ideas. Gaylord Brothers conducted mending and rebinding demonstrations important both to the library and as a prison handicraft. Michigan and Wisconsin contributed exhibits of the working out of courses of study; the Federal Prison at Chillicothe, the New Hampshire State Prison and Connecticut State Reformatory sent material illustrating successful prison libraries. The work of Minnesota institutions, systematically developed by trained guidance

for many years, was well represented. Pennsylvania sent some attractive posters. Clippings of book reviews written by prisoners came from several places. The artistic printing and distinguished writing of *The Island Lantern* from the Federal Penitentiary at McNeil Island are well known and caused frequent comment. Three important pamphlets of the Committee were from *The Island Lantern* print shop.

Perhaps the most constructive criticism was

the frequent query from superintendents and social workers. "Why not have a similar exhibit for boys' and girls' industrial schools?" In conducting next year's booth the committee plans to undertake this highly important phase as well as to emphasize library service for women in penal institutions. Prison life intensifies the reasons for reading.

A Portion of the A. L. A. Institutions Committee Library Booth at Louisville in October

Illinois State and Extension Conference

THE THIRTY-FOURTH ANNUAL MEETING of the Illinois Library Association was held in the Le Claire Hotel in Moline, October 15-17. Two luncheons and round tables for the Trustees and the Children's Section were the first meetings scheduled on the opening day, and both were well attended. Mrs. Arne Oldberg, Evanston trustee and chairman of the Trustees Section, presided over the Trustees Section which followed the luncheon. Discussion in this section was grouped around the three papers presented: "The Contract System" (a report on the contract service Moline is giving Port Byron), by Mr. O. F. Anderson, Moline trustee; "Cooperation with Schools," by Mr. David E. Walker, Assistant Supt. of the Evanston schools; and "Proposed Revision of the Library Laws of Illinois," by Mr. Otto Barnett, Glencoe trustee and chair-

man of the Legislative Committee of the I. L. A. Following the discussion of Mr. Barnett's paper he was authorized to present a resolution to the I. L. A. asking the Association to approve his report and to authorize the Legislative Committee to present a bill to the next legislature incorporating the suggested changes, which have to do principally with defining the powers of library boards relating to acquiring and managing property, and to the creation of independent library districts. This resolution was presented and accepted at a later business session of the I. L. A. There was also some informal discussion of certification of librarians, resulting in a motion that the Trustees Section request the I. L. A. to appoint a committee to study the question of certification and report to the next meeting of the I. L. A. This motion was passed. It was subsequently accepted by the I. L. A. and referred to the incoming administration. The Children's Section, under the chairmanship of Miss Mary Armstrong Ayres, children's librarian in Oak Park, carried out a program of stories interspersed with the luncheon, "The Story Teller's Pack," and was continued in an informal luncheon the following day for the discussion of new juveniles.

The Reference and Advisory Service program was held on the first afternoon, under the chairmanship of Miss Jane Hubbell, librarian of the Rockford public library, in which the following papers were presented: "Adult Education and the Library" by Miss Ida F. Wright, librarian of the Evanston public library; "Advisory Service Without an Adviser" by Miss Anna F. Hoover, librarian of the Galesburg public library; "The High School Librarian as Adviser" by Miss Lucy P. Williams, high school librarian, Bloomington; "Reference Work Today" by Miss Ruth P. Hughes, librarian, Freeport public library; and "Recent Reference Books" by Miss Faith Armstrong, reference librarian of the Rockford public library.

Special interest in this year's meeting centered in the Illinois Library Extension Conference which was an all-day session and the only meeting scheduled for the second day. Mr. Roden presided over the meeting and announced at the opening that the morning session was to be devoted to "Conditions as they are"; the afternoon to "What to do about them." The opening address was given by Mr. M. F. Gallagher of Chicago, president of the I. L. A. Papers and addresses were given by Mr. Spencer Ewing, Bloomington trustee; Mrs. Paul G. Burt, Chairman of the Children's Reading Committee of the State Congress of Parents and Teachers; Mrs. Claire V. Golden, vice-president of the Illinois Home Bureau

Federation; Mr. J. C. Hanna, state high school supervisor; Miss Anna May Price, superintendent of the Illinois Library Extension Division; Mr. Homer Hall of the Northern Illinois State Teachers College; Mr. Carl Milam, secretary of the American Library Association; Miss Alice Williams, librarian of the Moline public library; Mr. Matthew S. Dudgeon, librarian of the Milwaukee public library. Miss Callie Wieder, librarian of the Waterloo public library, gave an account of the preliminary steps and plans for the Black Hawk County (Iowa) library demonstration. A motion was passed requesting the incoming executive board of the I. L. A. to appoint a committee on Library Extension to consist of members of the I. L. A. and of other cultural organizations, with power to add to its numbers, for the purpose of formulating and launching a program to promote the extension of library service in the state of Illinois and to perform all such functions as may be found germane to that general object.

The meeting of the Lending Section with Miss Nella Beeson, head of the loan department of the Peoria public library, presiding, was held on the morning of the third day. Miss Emily V. D. Miller, Editor of A. L. A. publications, gave a paper on "Public Libraries as Agents for World Peace," and Miss Edith Erskine, librarian of the Pullman branch of the Chicago public library, presented "Fall Styles in Books," which was followed by many brief book reviews and suggestions from other librarians. The experience of different sized libraries with the Detroit charging system was reported by Miss Pearl Field, librarian of the Legler branch of the Chicago public library; Miss Ida F. Wright, librarian of the Evanston public library; and Mrs. Amy Houghton, librarian of the Galva public library.

Officers for next year are: President, Miss Alice Williams, librarian of the public library in Moline; First Vice-President, Mr. Nathan R. Levin, assistant librarian, Chicago public library; Second Vice-president, Miss Winifred Ver Nooy, head of reference department, University of Chicago libraries; Secretary, Miss Gladys Allison, librarian of the River Forest public library; Treasurer, Miss Blanche Gray, librarian of the Mattoon public library.

Virginia Holds Annual Meeting

THE ANNUAL MEETING of the Virginia Library Association which was held in Petersburg, Virginia, October 24 and 25, was one of unusual interest. The St. Paul's Parish House Auditorium, which was courteously extended to the Association, provided attractive and comfortable rooms for all of the meetings.

A cordial welcome was extended to the Association by Mayor I. Val Parham. Following this the President, Mr. Thomas P. Ayer, Librarian of the Richmond Public Library, Richmond, Virginia, conducted a short business session and then introduced the principal speaker of the morning, Mr. Henry M. Brimm, Librarian of the Union Theological Seminary, Richmond, Virginia, who spoke informally on "The Proper Type of Formal Instruction of Novice Assistants."

Immediately after lunch five Round Table Groups were formed as follows: College and Reference, Leader—Miss Martha Bell, Randolph-Macon Woman's College; Children's Work, Leader—Miss Florence Reinhart, Norfolk Public Library; Circulation, Leader—Miss J. Maud Campbell, Lynchburg Public Library; County and Rural Libraries, Leader—Miss Leslie Stevens, Virginia State Library; School Libraries, Leader—Miss Annie Ruth Cole, Junior High School, Petersburg.

At the evening session Dr. George F. Bowerman, Librarian of the Washington Public Library, Washington, D. C., entertained the Association, as well as many Petersburg visitors, with an address entitled "The New Biography."

Beginning the Saturday morning session Miss Florence R. Curtiss, head of the Training School for Librarians at Hampton Institute, gave an interesting and instructive address on "The Rosenwald Aid to Educational Institutions." The final business session began with the reports of the Secretary-Treasurer and the various committees. Following a motion of Mr. Harry Clemons, Librarian of the University of Virginia Library, the Association voted to apply to the American Library Association for chapter membership. In response to an urgent invitation brought by a committee of ladies from Newport News the Association voted to hold its annual meeting in that city next year.

Officers elected for the ensuing year are: President, Miss Theresa D. Hodges, Librarian of the Wm. R. McKenney Free Library, Petersburg, Virginia; Vice-President, Mr. Harry Clemons, Librarian of the University of Virginia Library, University, Virginia; Secretary-Treasurer, Miss Mary Louise Dinwiddie, Assistant Librarian of the University of Virginia Library, University, Virginia.

Kansas Library Association

THE TWENTY-NINTH Annual Meeting of the Kansas Library Association was held in Salina, Kansas, October 22, 23, and 24. The program included features representative of the somewhat varying interests of those present from

the public library, the school library, the children's library, the college library and the extension library field. Looking toward a program of library extension for Kansas several reports on rural library matters were presented, including a discussion of the Rural Library Institute held during the summer at Madison, Wisconsin, as told by Miss Ida Day of the Traveling Libraries Commission, and a report of the Books and Reading Classes conducted at the 4-H Club Round-up by Mrs. Elsie H. Pine of the Kansas State Teachers College, Emporia. Discussions were held concerning the need in Kansas of a library survey—proposed to disclose definite information as to the exact status of the libraries in the State. Such a survey was felt necessary before any steps could be taken toward standardization or certification. A committee brought before the group a consideration of the low allowance made by the state law for book purchases within the school districts. The Committee was instructed to do all in its power to influence the School Code Committee to raise the minimum allowance and to secure its acceptance by the legislature. The most outstanding feature of the conference was contributed by Miss Jessie Gay Van Cleve, specialist in Children's Literature in the American Library Association.

The afternoon of the second day was given over to Round Tables for the College and University Librarians, Library Extension Service workers, and Children's Librarians. The College and University Librarians considered such questions as care and handling of pamphlet material, book selection, student assistants, and the reserve book problem. The Library Extension group, made up almost entirely of representatives from the state educational institutions and libraries, discussed informally mutual problems, welcoming the opportunity to exchange ideas and ask questions. The Round Table on Children's Work, led by Miss Van Cleve, considered informally many questions of common interest to those present, such as the use of stories based on foreign countries and customs, methods of observing Book Week, Vacation Reading, and methods for interesting children in worthwhile books. Many interesting and enjoyable features of entertainment were provided for the conference in the way of Greetings from Salina, a delightful reception, visits to the colleges in a tour of the city and a banquet at which the guest speaker was Mr. R. F. Bailey, a Salina journalist.

The following officers were elected for the year 1930-31: President, Miss Ruth E. Hammond, Wichita; Vice-president, Miss Ida M. Day, State Library; Treasurer, Mrs. Charles C. Craig, Winfield; Secretary, Miss Helen E. Wagstaff, University Extension Library.

In The Library World

A New Science Library for Antioch

THE ANTIOCH PROGRAM, which aims to encourage symmetry of personal development, requires its students to spend a large part of their time in reading and individual study. While the autonomous plan of study brings the student directly to the library for suggested reading in greater numbers than is common in most college libraries, several new research projects call for library facilities in graduate work and research. Demands are now made upon the library which were not thought possible in the early years of the Antioch program. It was to meet this rapidly growing need that the science department libraries, formerly scattered in the Administration Building, were centralized in one wing of the new Science Building.

The first thought in planning the arrangement and furnishing of the Science Library was to provide for physical comfort away from the humdrum of class rooms and laboratories, and at the same time to make the Library readily accessible to the departments of instruction in the sciences. No expense was spared to provide a quiet and comfortable place for students to study. Special periodical unit cases engage the attention of the students, reference and reading facilities are separate from book stacks, and provision has been made for individual studies adjacent to the book stacks. The furniture and flooring are finished in monochromatic shades of green. Plenty of natural light from large windows, indirect artificial light and a good ventilation system provide healthful conditions for study.

Centralizing six seminar collections in one science library, under the supervision of trained library assistants, has done away with a troublesome administrative problem and permits a higher quality of reference service to the users.

A Quiet Place for Study and Research—Antioch's New Science Library

Juvenile Book Discussed

To the Editor of THE LIBRARY JOURNAL:

It seems to me, and to several other people working with girls, that *A Barrel of Clams*¹ is a striking example of a style and content which we think lowers the standard for girls' books. The idea is an interesting one, and, differently developed, might have proved a valuable influence in showing courage and resourcefulness. But, as told, it merely presents some very improbable incidents, strung together with the effect of haste.

The criticism of the imaginary (?) editor, that the story in its first form needed a plot, applies very well to it as it is now.

As to its improbability, in spite of the statements of publishers that it did happen, it is the fault of the author's style, undoubtedly, that she has not been able to present her material

with any air of verisimilitude. Allie Manes, for instance, and the amorous Captain Blake, seem to have no reason for being. The light way in which the episode featuring the former is passed over, once the horrors are all described, is like the popular detective-story manner, where the reader expects to have his hero two-thirds killed in one chapter, and rescuing the heroine in the next, half an hour later. Other strange things are the financial arrangements mentioned by your reviewer, and—very annoying to me—the casual attitude of Judy's family to the whole affair. Does it seem a true one?

I am also going to be brave, and object to swearing in a girl's book—by the man with whom she falls in love, by her father, and by the girl herself. All three cases seem to me wholly unjustified. It would have been quite in character with the rough men of the place. But unless we thoroughly approve swearing by girls, and supposedly well-spoken American

¹"A Barrel of Clams," by S. B. Leshner. Harcourt, Brace, \$2. Reviewed, p. 827, October 15 LIBRARY JOURNAL.

men, and enjoy hearing it from them, I submit it does not belong in the pages of a girl's book, where it acquires a sort of halo of attractiveness.

Just one more word. Will someone tell me how old this girl was? She speaks and acts like a girl of fifteen, and nothing is said about school or college days. But she writes a successful story, and is engaged when we leave her. That is the most improbable improbability of the whole story!

ELEANOR M. BARKER,
Librarian, Norman Library, Rogers High School, Newport, R. I.

Public Library Exempt from Civil Service

EMPLOYEES of the Washington, D. C., Public Library are not included under the Board of Welfare in the list of appointees to be selected from the civil service eligible lists, according to letters addressed by Dr. Luther Reichelderfer, president of the Board of Commissioners, to Dr. George Bowerman, librarian of the Public Library.

The commissioners' decision is founded on the fact that the employees are already selected by a merit system that has been found to function adequately.

The appointments in the District of Columbia Government Service are not by law under the regulations of the Civil Service Commission, but recently the President issued an order permitting the District Commissioners to require that appointments in the District of Columbia Municipal Service should be made from the Civil Service Commission's eligible lists. Under the President's order, the District Commissioners issued an order requiring heads of departments to make appointments from civil service eligible lists, but from the above statement it will be noted that the Public Library is exempt from such ruling.

New Buildings

THE DAYTON VIEW Branch of the Dayton, Ohio, Public Library was dedicated September 30 at 8 p. m.

CREATION of a reference library in Milwaukee, Wis., to aid research into natural and applied sciences, was urged November 12 at a session of the mayor's advisory council. To house the library, Mr. Simon, representative of the Milwaukee Engineering Society, estimated a building costing approximately \$1,000,000 would be necessary. Books to make a fair start on a good reference library would cost \$250,000, and the maintenance and operation about \$100,000 annually. The matter was referred to the executive board.

MEMORIAL LIBRARY - NORTHWESTERN UNIVERSITY - EVANSTON
Northwestern University's New Library to Be Started in the Spring

THE NEW Fisk University Library at Nashville, Tenn., was dedicated November 20 at 2 p. m.

TRUSTEES of Northwestern University have approved the plans for the million dollar Charles Deering Memorial Library to be the first unit in the recently com-

pleted plans for the expansion of the Evanston campus. Funds for the new library were donated by the late Charles Deering, who was deeply interested in Northwestern University. Although ground was broken last June, actual work may not start until next spring. The plans call for a simplified Gothic structure of field stone, with Bedford stone trim. The front will consist of a two-story building approximately 200 feet long and forty feet deep, with a basement which will be lighted from a wide sloping area running around the structure. The architectural motif goes back to that group of English academic buildings of which King's College Chapel, Cambridge, is perhaps the best known and which has furnished the inspiration for buildings at both Yale and Harvard.

Tentative Library Colony Agreements

1. A Library Colony of Lake Placid Club is desirable and it should be organized by librarians eligible to guest privileges of L. P. C., with its own officers, as in case of six other intra-club agencies, and with by-laws mutually agreed upon. Incorporation is not necessary, but can be undertaken later if and when there is advantage to be gained.
2. The aims and methods of the Library Colony should be in harmony with aims and standards of Lake Placid Club, Lake Placid Co. (in operation) and Lake Placid Club Education Foundation, as commonly understood and described in Club and Foundation circulars.
3. The Library Colony will be chiefly useful in promotional matters for the present.
4. Lake Placid Club Education Foundation Restorations plans as at present administered are caring for many who would naturally become members of the Library Colony, except for the busy summer and winter seasons, together amounting to about nine or ten weeks out of the fifty-two of the year. Until other provision is made to cover Restorations privileges for these busy periods when all accommodation as a rule is required for regular Club members, the privileges hitherto granted librarians will be continued and extended as there is demand and space available.
5. The Foundation policy of exempting librarians from the 20 per cent extra non-members' charge, and also from dues, will be continued, as librarians individually apply for those privileges in the usual way. Each member of the library colony will fill out and file as heretofore the usual application blank which will be passed upon by the special Foundation committee. In case of doubt about any candidate officers of the Library Colony will be consulted in advance of action. The usual procedure, however, will be acceptable from the viewpoint of both Club and Foundation. Recommendations of officers and members of the Library Colony will of course be always acceptable.
6. For the present existing housing facilities generally available at Lake Placid Club will care for the needs of the Library Colony. L. P. C. will as heretofore assign those coming under Foundation privileges to whatever space is best suited in light of season, houses open with space, etc., with

understanding that when the number here simultaneously requires and expressed wishes of members of Library Colony make desirable L. P. C. will do whatever it can, with due regard to cost of service, to assemble those desiring it in one or more buildings for rooms, as, for instance, in either Cobble or Cascade clubhouse.

7. L. P. C. will cooperate as fully as possible with officers and members of Library Colony in developing their organization and program, and will in this connection assume the same relationship as to Golf Association, Camp and Trail Club, Snow Birds, Placid Club Players, Tennis Association and Saddle Club, considering the Library Colony as an intra-Club organization which is an integral part of Club and Foundation life.

APPROVED BY:

Messrs Brigham, Hill, Rush, representing Library Colony.

Also Messrs. Hicks, Holt, representing Lake Placid Club, Lake Placid Co. and Lake Placid Club Education Foundation.

Oberly Memorial Prize

BIBLIOGRAPHIES in competition for the fourth award of the Oberly Memorial Prize should be submitted to the Chairman of the Committee in charge (Claribel R. Barnett, Librarian, U. S. Department of Agriculture) before January, 1931. The prize is awarded once in two years to the compiler submitting the best bibliography (either in printed or typewritten form) in the field of agriculture or the related sciences. The amount of the prize is the interest at four and one-half per cent on the Eunice Rockwood Oberly Memorial Fund of \$1,050, which is administered by the American Library Association. Further details in regard to the prize are available in printed form and may be obtained from the Chairman of the Committee.

Please, Report Promptly

SECTION FIVE of the preliminary edition of the *List of Serial Publications of Foreign Governments* has just been sent to the libraries that are checking. The last sections will be issued early in the coming year. Work on the final edition, which will incorporate a record of holdings and the new titles reported, will begin in January. Libraries which have not received copies of the preliminary edition, and which wish to have their holdings recorded in the final edition, are urged to communicate at once with the editor, Miss Winifred Gregory, at the New York Public Library.

Opportunities

(This column is open to librarians.)

Wanted—assistant for college position in the Southwest, duties to be half administration, half reference. Applicants must have a college degree and some experience; Library School training desirable, good health important. Salary at start, \$2,000. M16.

Young man, age twenty-seven and college graduate, desires position. Library school courses and experience in all branches of library work. Three years' public library, four years university library experience. Highest references. M10.

Responsible young woman with library summer school training and three years' experience desires position in children's department. Previous occupation, teaching. M11.

College and library school graduate with five years' experience in college and public libraries desires position in college in East. Reference work preferred. M12.

Young woman, college and library school graduate with public and college library experience, desires position as general assistant, reference librarian, high school librarian, or in loan work. M13.

College graduate with two summer sessions in library science desires change of position. Experience includes four years as part-time assistant in college library, one year in large public library, and three years as college librarian. M15.

Young woman with college degree, library training, five years' experience as librarian, and high school English teacher would like position in public or school library. No objection to part time teaching. M14.

Wanted

ANY LIBRARY having odd numbers of the *American Dyestuff Reporter*, volumes 1-9, for disposal please notify Clemson College Library, Clemson College, South Carolina. Marguerite V. Doggett, librarian.

Historical Fiction

A PAMPHLET, "Historical Fiction Suitable for Junior and Senior High Schools," issued by the National Council for the Social Studies as Publication Number One, was so well received by librarians and teachers and seemed to fill so real a need that it was considered wise to enlarge the scope of the material to include interesting non-fiction as well as fiction in the new compilation of "Historical Fiction and Other References for History Classes in Junior and Senior High Schools," compiled by Hannah Logasa of the University of Chicago High School. The non-fiction titles of the new pamphlet are an entirely new feature and approximately four hundred fiction titles have been added, although the present compilation is based on the same educational principles and follows the same general organization as the first pamphlet. Published by the McKinley Publishing Co., Philadelphia. \$1 per copy.

The Calendar

Dec. 29-31—Midwinter meeting of the American Library Association will be held at the Drake Hotel, Chicago, Ill.

Jan. 31, 1931—California Library Association, sixth district, will meet at Pomona College.

Feb. 5, 1931—California Library Association, fifth district, will meet at Sacramento.

Feb. 14, 1931—California Library Association, ninth district, will meet at Colusa.

March 13-14, 1931—Pennsylvania Library Club and the New Jersey Library Association, joint annual meeting at Hotel Chelsea, Atlantic City, N. J.

June 22-27—American Library Association, annual meeting at Yale University, New Haven, Conn.

Colorado Library Association

THE FORTIETH annual meeting of the Colorado Library Association was held in Denver from October 2 to 4. The opening session took up the subject of the County Library. Mr. Frank A. Ogle, superintendent of the schools of Weld County, read a paper on "Relation of the Public Schools to a County Library." Miss Eleanor Davis of the Natrona County Library, Casper, Wyo., led the discussion, which was very helpful, since both States have much the same problems. In the evening a largely attended banquet was held at the Brown Palace Hotel, celebrating the fortieth anniversary of the Colorado Library Association. A large birthday cake was presented to Miss Julia Douglas, librarian at Evergreen, Colo., in honor of her seventy-second birthday. Miss Douglas is the oldest member of the C. L. A. Mr. Hile gave extracts from Shakespeare and Mr. Herbert Richie, formerly with the Denver Public Library, gave a résumé of library work in Denver forty years ago. Friday's program consisted of A. L. A. reports and a paper by Mrs. Katherine Watson, children's librarian of the Denver Public Library, on "Problems of Children Book Selection in Places Remote from Publishing Centers." Miss May Wood Wigginton spoke on "Subscription Books," and the Detroit charging system was demonstrated. Open house was held at the Denver Public Library in the evening. Saturday morning the association met with the school librarians at East Denver High School.

Newly elected officers for the coming year are: President, Miss Linda Clatworthy, Denver University, Denver; Regional Vice-Presidents, Miss Elizabeth Welch, Fort Morgan, Colo., Mrs. Mary Townsend, Montrose, Colo., Miss Mary Barclay, Las Animas, Colo.; Council Members, Miss Mary Hoyt, librarian, State School of Mines, Golden, Colo.; Miss Louise Kampf, librarian, Colorado College, Colorado Springs, Colo.; Secretary-Treasurer, Miss Laura M. Ritter, Denver Public Library.

A True Story of "Raggedy Ann"

An Italian girl returned a "Raggedy Ann" book to the library a week overdue and in a terribly dilapidated condition. A little questioning by the librarian brought out the fact that the girl's younger sister had been very ill for over two weeks. Many times the parents and doctor had given up all hope of saving the little one—but through some miracle she was now on the way to recovery. During the entire time, whether she was conscious or unconscious, "Raggedy Ann" was under her pillow or in her weak little hands. We need more books for our foreign and home children which have the same heart appeal. —Polly Ann Scott in "The Publisher's Weekly."
